H.R. 1601. A bill to amend title 38 of the United States Code in order to provide service pension to certain veterans of World War I and pension to the widows of such veterans; to the Committee on Veterans' Affairs.

By Mr. MURPHY of New York (for himself, and Mr. SOLARZ):

H.R. 1602. A bill to amend the Securities Exchange Act of 1934 to require issuers of

securities registered pursuant to section 12 of such act to maintain accurate records, to prohibit certain bribes, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ROGERS:

H.R. 1603. A bill to amend the Federal Food, Drug, and Cosmetic Act and related provisions of law to improve the protection of the public health and safety with respect to drugs; to the Committee on Interstate and Foreign Commerce.

By Mr. RONCALIO (for himself, Mr. BAUCUS, Mr. JOHNSON of California, Mr. HANSEN, Mr. ABDNOR, Mr. JOHNSON of Colorado, Mr. SYMMS, Mr. EVANS of Colorado, and Mr. SEBELIUS):

H.R. 1604. A bill to provide for consideration of the comparative productive potential of irrigable lands in determining nonexcess acreage under Federal reclamation laws; to the Committee on Interior and Insular Affairs.

By Mr. STEED (by request):

H.R. 1605. A bill to amend the Indian Claims Commission Act of August 13, 1946, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. VENTO:

H.R. 1606. A bill to terminate the Airlines Mutual Aid Agreement; to the Committee on Public Works and Transportation.

By Mr. WON PAT:

H.R. 1607. A bill to amend the Consolidated Farm and Rural Development Act for the purpose of making Guam eligible for assistance under the act; to the Committee on Agriculture.

H.R. 1608. A bill to provide for the establishment of a national historic park on the island of Guam, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ECKHARDT (for himself, Mr. WRIGHT, Mr. WON PAT, Mr. SEBELIUS, Mr. YOUNG of Alaska, Mr. LAGOMARSINO, Mr. FOUNTAIN, Mr. SCHEUER, Mr. ROUSSELOT, Mr. FISH, Mr. CHARLES WILSON of Texas, Mr. JONES of Oklahoma, Mr. BOWEN, Mr. KETCHUM, Mr. MARTIN, Mr. MOORHEAD of California, Mr. MOORE, Mr. SCHULZE, Mr. MURPHY of Pennsylvania, and Mr. HUCKABY):

H.R. 1609. A bill to amend the Mineral Leasing Act of 1920, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, and Public Works and Transportation.

[*Introduced Jan. 6, 1977*]

By Mr. BLANCHARD:

H.J. Res. 111. Joint resolution proposing an amendment to the Constitution of the United States relative to the maintenance of neighborhood public schools; to the Committee on the Judiciary.

By Mr. GINN:

H.J. Res. 112. Joint resolution proposing an amendment to the Constitution relating to school busing; to the Committee on the Judiciary.

H.J. Res. 113. Joint resolution proposing an amendment to the Constitution to provide that, except in time of war or economic emergency declared by the Congress, expenditures of the Government may not exceed the revenues of the Government during any fiscal year; to the Committee on the Judiciary.

By Mr. HUGHES:

H.J. Res. 114. Joint resolution proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States; to the Committee on the Judiciary.

By Mr. HYDE:

H.J. Res. 115. Joint resolution proposing an amendment to the Constitution of the United States guaranteeing the right of life to the unborn; to the Committee on the Judiciary.

By Mr. LATTA:

H.J. Res. 116. Joint resolution designating the composition known as The Stars and Stripes Forever as the national march of the United States; to the Committee on Post Office and Civil Service.

By Mr. LOTT:

H.J. Res. 117. Joint resolution proposing an amendment to the Constitution of the United States with respect to the offering of prayer in public buildings; to the Committee on the Judiciary.

By Mr. McCLORY:

H.J. Res. 118. Joint resolution proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States; to the Committee on the Judiciary.

Mr. RHODES:

H.J. Res. 119. Joint resolution to designate the week commencing with the third Monday in February of each year as National Patriotism Week; to the Committee on Post Office and Civil Service.

[*Introduced Jan. 10, 1977*]

By Mr. ANDERSON of California:

H.J. Res. 120. Joint resolution to amend the Constitution of the United States to provide for balanced budgets and elimination of the Federal indebtedness; to the Committee on the Judiciary.

By Mr. EDWARDS of Alabama (for himself and Mr. ROBINSON):

H.J. Res. 121. Joint resolution proposing an amendment to the Constitution of the United States with respect to the offering of prayer in public buildings; to the Committee on the Judiciary.

By Mr. EILBERG:

H.J. Res. 122. Joint resolution to designate January 4, 1978, as Haym Salomon Day; to the Committee on Post Office and Civil Service.

[*Introduced Jan. 6, 1977*]

By Mr. HANSEN:

H. Con. Res. 48. Concurrent resolution expressing the sense of the Congress that inspections pursuant to section 8(a) of the Occupational Safety and Health Act of 1970 shall cease pending a determination by the Supreme Court of the United States of the constitutionality of such inspections; to the Committee on Education and Labor.

By Mr. LOTT:

H. Con. Res. 49. Concurrent resolution providing for continued close relations with the Republic of China; to the Committee on International Relations.

By Mr. MITCHELL of New York:

H. Con. Res. 50. Concurrent resolution to provide for the procurement and display in the Capitol of a facsimile of the Constitution of the United States; to the Committee on House Administration.

[*Introduced Jan. 10, 1977*]

By Mr. EILBERG:

H. Con. Res. 51. Concurrent resolution urging the President to take certain measures against countries supporting international terrorism and persons engaging in international terrorism and to seek stronger international sanctions against such countries and persons; jointly, to the Committees on International Relations, and Public Works and Transportation.

By Mr. MURPHY of New York:

H. Con. Res. 52. Concurrent resolution expressing the sense of Congress with respect to a bill of rights for Vietnam veterans; to the Committee on Veterans' Affairs.

By Mr. WINN:

H. Con. Res. 53. Concurrent resolution relative to establishing a Presidential Task Force on Prisoners of War and Missing in Action; to the Committee on Armed Services.

[*Introduced Jan. 6, 1977*]

By Mr. ALEXANDER:

H. Res. 85. Resolution to recommend that the Board on Geographic Names approve a proposal to name two mountains in Alaska after the late Congressmen Hale Boggs and Nick Begich; to the Committee on Interior and Insular Affairs.

By Mr. JOHN L. BURTON (for himself, Mr. ZEFERETTI, Mr. DRINAN, Mr. RAHALL, Mr. HANNAFORD, Mr. BRODHEAD, Mr. BLOUIN, Mr. OBERSTAR, Mr. WHITLEY, Mr. MOSS, Mr. MOAKLEY, Mr. SANTINI, Mr. DAN DANIEL, Mr. KINDNESS, Mr. PEPPER, Mr. RISENHOOVER, Mr. CONYERS, Mr. RUSSO, Mr. MEEDS, Mr. BUTLER, Mr. MCFALL, Mr. HUGHES, Mr. NOWAK, Mr. PATTEN, and Mr. DUNCAN of Oregon):

H. Res. 86. Resolution amending rule XXII of the Rules of the House of Representatives to remove the limitation on the number of Members who may introduce jointly any bill, memorial, or resolution, and to provide for the addition and deletion of names of Members as sponsors after the introduction of a bill, memorial, or resolution; to the Committee on Rules.

By Mr. JOHN L. BURTON (for himself, Mrs. SPELLMAN, Mr. ROYBAL, Mr. LLOYD of California, and Mr. HARRIS):

H. Res. 87. Resolution amending rule XXII of the Rules of the House of Representatives to remove the limitation on the number of Members who may introduce jointly any bill, memorial, or resolution, and to provide for the addition and deletion of names of Members as sponsors after the introduction of a bill, memorial, or resolution; to the Committee on Rules.

By Mr. CONTE:

H. Res. 88. Resolution directing the Committee on International Relations to conduct hearings to determine the nature and extent of any U.S. involvement in the hostilities in Northern Ireland; to the Committee on Rules.

By Mr. RHODES (for himself, Mr. DEVINE, Mr. FRENZEL, Mr. CEDERBERG, Mr. HORTON, Mr. SKUBITZ, Mr. LATTA, Mr. JEFFORDS, Mr. HYDE, Mr. GRADISON, Mr. SCHULZE, Mr. MITCHELL of New York, Mr. THONE, Mr. MYERS of Indiana, Mrs. PETTIS, Mr. FORSYTHE, Mr. ANDREWS of North Dakota, Mr. CARTER, Mr. CLEVELAND, and Mr. MOORHEAD of California):

H. Res. 89. Resolution to create a Select Committee on Energy; to the Committee on Rules.

By Mr. RINALDO:

H. Res. 90. Resolution in support of continued undiluted U.S. sovereignty and jurisdiction over the U.S.-owned Canal Zone and the Isthmus of Panama; to the Committee on International Relations.

By Mr. SEBELIUS:

H. Res. 91. Resolution to express the sense of the House of Representatives that the President of the United States should direct the Secretary of the Interior to conserve the helium which is now being extracted from natural gas and then wasted into the atmosphere; to the Committee on Interior and Insular Affairs.

[*Introduced Jan. 10, 1977*]

By Mr. FLOOD:

H. Res. 92. Resolution insisting upon retention of undiluted U.S. sovereignty over the Canal Zone and the Panama Canal; to the Committee on International Relations.

By Mr. GRASSLEY:

H. Res. 93. Resolution to make certain records of the House Committee on Agricul-

ture available to the public; to the Committee on Rules.

By Mr. GUYER (for himself, Mr. MICHEL, Mr. MOORHEAD of California, Mr. HARSHA, Mrs. FENWICK, Mr. EDWARDS of Alabama, Mr. FISH, Mr. KAZEN, Mr. FINDLEY, Mr. HAMMERSCHMIDT, Mr. BURKE of Florida, Mr. SEBELIUS, Mr. MYERS of Indiana, Mr. O'BRIEN, Mr. DRINAN, Mr. GRASSLEY, Mr. POAGE, Mr. MILLER of Ohio, Mr. STRATTON, and Mr. HAMILTON):

H. Res. 94. Resolution providing for the establishment of a Select Committee on Narcotics Abuse and Control; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

[*Introduced January 6, 1977*]

By Mr. HARRINGTON:

H.R. 1552. A bill for the relief of Oh Soon Hee; to the Committee on the Judiciary.

By Mr. LOTT:

H.R. 1553. A bill for the relief of Maria Magdalena Pena Rich; to the Committee on the Judiciary.

By Mr. McFALL:

H.R. 1554. A bill for the relief of Clara Riccomini; to the Committee on the Judiciary.

By Mr. TRAXLER:

H.R. 1555. A bill for the relief of Jesus Aguilera-Enriquez; to the Committee on the Judiciary.

By Mr. CHARLES WILSON of Texas:

H.R. 1556. A bill for the relief of Ed J. Damuth; to the Committee on the Judiciary.

H.R. 1557. A bill for the relief of Franklin R. Helt; to the Committee on the Judiciary.

[*Introduced January 10, 1977*]

By Mr. CHAPPELL:

H.R. 1610. A bill to direct the Administrator of General Services to release a covenant contained in a deed conveying certain real property to Argyle Southern Co., a Delaware corporation; to the Committee on Government Operations.

H.R. 1611. A bill for the relief of Ramona Castro Flores Vda. de Guzman; to the Committee on the Judiciary.

By Mr. JOHN T. MYERS:

H.R. 1612. A bill for the relief of certain employees of the Naval Ordnance Systems Command; to the Committee on the Judiciary.

H.R. 1613. A bill for the relief of certain postmasters charged with postal deficiencies; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

28. The SPEAKER presented a petition of Mrs. Everett Arendts, Stanhope, Iowa, relative to disability insurance for the blind, which was referred to the Committee on Ways and Means.

SENATE—*Monday, January 10, 1977*

The Senate met at 12 o'clock meridian and was called to order by Hon. PATRICK J. LEAHY, a Senator from the State of Vermont.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Eternal and Ever-Living God, as we pause to pray at the beginning of another week, we thank Thee for the legislative adventure of a new Congress. While we settle into offices, may we settle a few things in our own lives. Draw us close to Thee, hold us in Thy love and guide us by Thy spirit. May we be kept humble by the awareness of working under Thy transcendent and eternal sovereignty, and by the knowledge that in the processes of history Thy judgment matters most.

Help us, O Lord, to live by our affirmations and not by our negations, by our faith and not by our doubts. Save us from losing our direction, from compromising our ideals or forsaking our standards. Spare us from squandering time on the wrong things, from saying things we later regret, and from putting our own welfare above that of the Nation.

Give us grace and wisdom so to consecrate our talents, our energies, and our time that our efforts may set forward Thy kingdom. May a radiant joy transfigure our relations with one another. And as the days pass wilt Thou endow us with something of the spirit of the Man of Nazareth who went about doing good.

In His name we pray. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., January 10, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. PATRICK J. LEAHY, a Senator from the State of Vermont, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. LEAHY thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Thursday, January 6, 1977, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, for the moment, I reserve the remainder of my time.

Mr. McCLELLAN addressed the Chair.

The ACTING PRESIDENT pro tempore. The distinguished minority leader (Mr. BAKER) is recognized.

Mr. BAKER. Mr. President, I intend to yield part of my time to the distinguished Senator from Virginia, Senator SCOTT, in a moment.

I wish to reserve the remainder of my time.

The ACTING PRESIDENT pro tempore. Under the previous order the Senator from Virginia is recognized for not to exceed 15 minutes.

The Senator from Arkansas has also asked the Chair for recognition for purposes of introducing a bill.

Mr. ROBERT C. BYRD. Mr. President, without objection, how much time does the Senator need?

Mr. McCLELLAN. Three or four minutes.

Mr. ROBERT C. BYRD. Mr. President, I yield to the distinguished Senator from Arkansas (Mr. McCLELLAN) 4 minutes or such time as he may desire out of the time allotted to the majority leader.

Mr. SCOTT. Mr. President, if the Senator will yield briefly, if there is any Senator who wishes to make a brief statement, without the time being charged against my time, as I am not in any hurry, I am glad to yield to him.

Mr. ROBERT C. BYRD. The Senator is very kind in making that suggestion.

The ACTING PRESIDENT pro tempore. The Chair appreciates the offer of the distinguished Senator from Virginia, and the Senator from Arkansas is recognized.

Mr. McCLELLAN. Mr. President, a parliamentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. McCLELLAN. Is the introduction of bills now in order?

The ACTING PRESIDENT pro tempore. It will be at the time of the period for transaction of routine morning business. It is not in order at this time.

Mr. McCLELLAN. Mr. President, I ask unanimous consent to have this time out of order to proceed to introduce a bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

[Mr. McCLELLAN's remarks made at this point in connection with the introduction of the bill relating to new district judgeships are printed in today's RECORD under Statements on Bills during routine morning business.]

Mr. McCLELLAN. I thank my distinguished leader for yielding.

Mr. ROBERT C. BYRD. The Senator is very welcome.

Mr. STENNIS addressed the Chair.

Mr. ROBERT C. BYRD. Mr. President, in accordance with the suggestion made by the distinguished Senator from Virginia (Mr. SCOTT), if it is still agreeable with him, Mr. STENNIS and other Senators may wish to obtain recognition under the time allotted earlier; they may do so without prejudice to the distinguished Senator from Virginia (Mr. SCOTT) and at any point, of course, he may ask to be recognized for the time allotted to him under the order.

Mr. SCOTT. Mr. President, I am ready to proceed, but certainly I yield to my chairman of the Committee on Armed Services and to other Senators but do not go to the end of the line.

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. Mr. President, will the Senator withhold just for a second?

Mr. STENNIS. Yes.

Mr. BAKER. Mr. President, I yield 5 minutes of the time allotted to the minority leader under the standing order to the distinguished Senator from Virginia in addition to the time allotted him under the previous order.

Mr. STENNIS. Mr. President, I especially appreciate the thoughtfulness and generosity of the Senator from Virginia, who is always observant, very generous and gentlemanly, also.

MILITARY UNIONS

Mr. STENNIS. Mr. President, I have brief remarks today on what I think is a very important subject.

Mr. President, I have given mature thought to the matter I shall briefly discuss today.

Labor unions of course have their place. In my opinion, there is no place in our military units, the Army, Navy, Air Force, and Marines, for labor unions or similar unions of any kind.

This is certainly not an antiunion position. This is no reflection on labor unions nor on military units. We can have labor unions and we can have military units, but we cannot have both in the same group of people at the same time. Military units and labor unions just do not mix.

The military man or woman owes absolute and total allegiance to his military obligation. He must be disciplined to obey, and he must obey military orders. The military man cannot be given a divided allegiance to the commands, rules or policies of some other organization, as, for instance, an order to strike or some similar action, or to withhold work or obedience. The military man cannot be allowed to threaten to do these things.

Under our present law, no person is required to join a military service. If he does join, he has voluntarily given up certain privileges he might otherwise enjoy as a citizen, and has made the choice to give undivided allegiance to his military organization, which is based on discipline, training, and loyalty.

Fundamentally, it is clear to all that we cannot have a group of men obeying two sources of authority, as, for instance, a military commander and a union leader. We cannot have a military unit with some members in a union and some not. A divided house cannot stand.

To have military security, we must have a military organization from top to bottom with men properly trained to the extent that we know they will fully respond to a duty and a command, both as individuals and as a unit.

It is clear that if there must be bargaining and choices as to military services, it must all be done before signing up as a member of a military organization. After signing up, total allegiance to the military command is the only course of action.

The members of the military services have, in fact, representation through the entire congressional membership, including, with emphasis, the members of the Armed Service Committees of both the House of Representatives and the Senate.

This problem has been gradually growing in the services for some time. I had hoped that a solution would come from the Department of Defense, or the military services, but they have been unable to bring forth a remedy. We must have legislation that will put a ban on these activities within the military services.

I am going to propose that our committee hold open hearings on this entire problem soon, and fully develop all the relevant facts. I believe that we can then write a meaningful bill that will fully cover this grave and growing problem, and do it with justice to all. I believe we can do this and thus relieve, to this extent, one of the many burdens now confronting the volunteer forces concept.

The Senator from South Carolina [Mr. THURMOND] has been interested in this subject and introduced a bill during the last session which I assume he will introduce at this session. I invite all who are interested to introduce a bill if they desire. I am not wedded to any particular bill but believe the committee, with the help of every member, can develop and write a firm bill that will meet the situation fully. Just as soon as is reasonably possible, our committee will get these hearings started.

I believe the Congress can and will readily pass such a bill, fair on its face and in fact, once the facts are developed.

At least one statement has been made by an outstanding union leader that he does not favor the attempt to in any way unionize the military services. This statement was quoted in the press. This shows a sentiment within the unions in opposition to efforts to have union operations within the military units. I firmly believe a bill of the type I mention will also serve the best interest of unions.

Mr. President, I again expressly thank the Senator from Virginia for yielding to me.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Virginia (Mr. SCOTT) is recognized for not to exceed 15 minutes.

Mr. BAKER. Plus 5.

The ACTING PRESIDENT pro tempore. Plus 5 minutes yielded by the minority leader.

Mr. SCOTT. I thank the Chair.

Mr. ROBERT C. BYRD. Mr. President, how much time do I have remaining under the order?

The ACTING PRESIDENT pro tempore. The Senator has 8 minutes.

Mr. ROBERT C. BYRD. I thank the Chair. I will yield 3 minutes of my time to the Senator from Virginia, if he will allow me at this time to use up some of my time.

Mr. SCOTT. Certainly. I appreciate the Senator's yielding his time.

Mr. ROBERT C. BYRD. I thank the Senator.

NONLEGISLATIVE PERIODS—CALENDAR YEAR 1977

Mr. ROBERT C. BYRD. Mr. President, there has been general agreement on the desirability of announcing, as early as possible in the session, a schedule of nonlegislative days during which Senators can visit their respective States and constituencies, conduct public hearings in and away from Washington, and fulfill speaking engagements for high school commencements, Fourth of July audiences, and so on. This practice has enabled Members to schedule a time when they can be assured of no Senate floor sessions, thus permitting the Members to be out of the city without concern for rollcall votes, and I believe this practice has enhanced the attendance of Senators during sessions.

I have discussed this matter with the distinguished Republican leader, and have taken it up during the caucus this morning, and it has been agreed to there. So I make the following statement of nonlegislative periods extending through August:

The Senate will not be in session on Monday, February 14, Tuesday, February 15, Wednesday, February 16, Thursday, February 17, and Friday, February 18.

In April, the Senate will not be in session on Friday, April 8, Monday, April 11, Tuesday, April 12, Wednesday, April 13, Thursday, April 14, and Friday, April 15.

The Senate will not be in session on Monday, May 30, Tuesday, May 31, Wednesday, June 1, Thursday, June 2, and Friday, June 3.

The Senate will not be in session on Monday, July 4, Tuesday, July 5, Wednesday, July 6, Thursday, July 7, and Friday, July 8.

The August "recess," which is set by law, will begin on Monday, August 8, with reconvening on Wednesday, September 7.

In July, in accordance with the agreement with the distinguished Republican leader and other Senators on both sides of the aisle, we will take another look at the situation and design appropriate periods for later in the year if that should become necessary.

I yield to the distinguished Republican leader.

Mr. BAKER. Mr. President, I am delighted with the schedule of nonlegislative days. I agree with the distinguished majority leader that knowing that these days will be nonlegislative days does have the effect of improving attendance in the Senate, and providing an opportunity for everyone to schedule matters with their constituencies. I thank the majority leader for consulting with and honoring certain requests by the minority in this respect. I think this is a good beginning for what I hope will continue to be harmonious cooperation to expedite the interests of the Senate.

I also agree with the majority leader that I hope we can do this without going too much beyond the August recess, and conclude the business of Congress as soon as possible.

Mr. ROBERT C. BYRD. I thank the distinguished minority leader.

Mr. President, whatever time I have not consumed I yield to the distinguished Senator from Virginia from my time, and I thank the distinguished Senator from Virginia for yielding.

HOW WOULD YOU VOTE?

Mr. SCOTT. Mr. President, the majority and minority leaders have been very generous, and I appreciate it.

Mr. President, last month our office included an opinion poll as part of a regular newsletter to constituents. The mailing list is a general one going throughout Virginia to members of both political parties and people of varying philosophies. Their views were solicited on measures that could be considered this year by the Congress.

We attempted to provide a short synopsis of major proposals and left room for such comment as they cared to make. More than 400,000 of these newsletters were distributed throughout Virginia's 10 Congressional Districts. The Library of Congress had advised me that a response of 5 to 7 percent would have been good, so we were pleased to obtain a 9- to 10-percent return.

The newsletter posed the question: How would you vote? and the percentage favoring and opposing the proposals has been inserted after each question. I ask unanimous consent that a copy of the newsletter, with the percentages dubbed in, be printed at this point in the RECORD for the information of my colleagues.

There being no objection, the newsletter was ordered to be printed in the RECORD, as follows:

[From: Your Senator BILL SCOTT Reports, December, 1976]

HOW WOULD YOU VOTE?

You probably know of my decision not to seek reelection when the present Senate term ends on January 3, 1979. During the more than two years remaining, however, I do want to represent Virginia in the best way possible and it would be helpful to know your views and those of other constituents on various proposals that may come before the Congress convening next month.

There will be differences regarding the part the private sector of the economy should play and the part to be played by the Federal government. There will probably also be differences between the portions of the tax dollar to be spent for social programs and for national defense, as well as whether a given service should be provided by the Federal, state or local government. I have attempted to prepare short factual statements regarding some of the measures likely to come before the Senate next year and hope you will indicate the position you would favor on each of them were you voting in the Senate. Of course many of the proposals are complex and the statements may well be oversimplifications, but the collective responses will help materially in knowing the general views of the people of Virginia.

HUMPHREY-HAWKINS BILL

Legislation which mandates a goal of full employment of most adult Americans within four years and makes the government the employer of last resort is expected to be considered next year by the Congress. It has been argued that large-scale economic planning by the Federal government is necessary to stimulate the economy and provide additional jobs to reduce unemployment. Some believe such an approach may tend to reduce opportunities for business expansion and creation of private sector employment. Opponents say it would interfere with business decisionmaking, siphon off skilled workers from the private sector if government-financed jobs were higher paying than those in industry, and significantly increase the Federal budget and overall consumer costs.

Question: Would you tend to support such a measure? Yes, 11 percent; No, 89 percent.

TAX CUT

We hear that there will be a proposal to further reduce taxes without any corresponding reduction in government spending. Proponents believe this would stimulate the economy by causing people who have less money withheld from their paychecks to immediately spend it and provide additional jobs. Others feel that reducing government income when expenditures will probably increase would add to inflationary pressures and be against the best interests of citizens generally.

Question: Would you favor a cut in taxes at this time without a reduction in government spending? Yes, 13 percent; No, 87 percent.

NATIONAL HEALTH INSURANCE

Everyone is interested in having adequate medical care. There is a difference of opinion, however, as to the proper role of the Federal government. Some feel that adequate protection can be obtained for those who can afford it by participating in private insurance plans with the government providing for those unable to pay. Others would have the Federal government provide for catastrophic or the most costly and lingering illnesses. Still others would have the Federal government provide funds to meet all hospital and medical expenses of all our citizens.

Question: Do you favor the Federal government: (a) staying out of the medical field entirely, (b) participating insofar as catastrophic illnesses only are concerned, or (c) providing for full national health insurance for all illness? Circle a, b, or c. A., 38 percent; b., 54 percent; c., 8 percent.

ENVIRONMENT VS. ENERGY

Everyone seems to want a clean wholesome environment, to have an adequate supply of energy, and to maintain the standard of living to which we have become accustomed. Yet, problems arise when we attempt to have a maximum of all three. Various individuals and environmental groups believe it is desirable to have stricter Government control of air and water pollution, Federal control of land use, and a general strengthening of environmental constraints. On the other hand, others see a need for national energy sufficiency with greater utilization of coal, our most abundant fossil fuel, elimination of restrictions on drilling and price control for oil and gas, further use of nuclear energy and more research into the possibilities of using exotic sources of energy such as the sun, the wind and the tides.

Question: Would you favor a reasonable compromise between the nation's need for an adequate supply of energy and environmental protection, so long as the air and water quality are high enough to maintain the health and welfare of citizens on a nationwide basis? Yes, 94 percent; No. 6 percent.

DEFENSE BUDGET

This year Congress provided for a defense force of two million military and one million civilians. Critics argue that such a large number of military personnel and expenditures involved are not needed and would like to see some of the defense funds spent on social programs. Advocates of increased military spending believe that growing Soviet military power justifies further increases in the defense budget and that national defense should be our first priority.

Question: Do you favor a reduction in defense spending? Yes, 20 percent; No, 80 percent.

PANAMA CANAL

In 1903, after becoming an independent nation, with American aid, the government of Panama signed a treaty which permitted the United States to build a canal between the Atlantic and Pacific Oceans. As consideration, Panama received an initial payment and still receives a yearly annuity. The United States was granted rights of sovereignty in perpetuity and was given responsibility for defending the Canal. However, later Panamanian governments have sought to renegotiate the treaty to obtain jurisdiction over the Canal and a greater share of the proceeds.

Question: Should the United States negotiate a new treaty with Panama which limits American rights? Yes, 12 percent; No, 88 percent.

RIGHT TO WORK

There may be an effort made in the new Congress to push legislation that would eliminate state right-to-work laws. At present, a number of states, including Virginia, have laws permitting individuals to work at their jobs without being forced to join or support a union. Right-to-work laws, proponents say, are designed to protect the worker from compulsory membership in unions as a condition of employment; but those advocating repeal of Section 14(b) of the Taft-Hartley Act, thereby invalidating state right-to-work laws, believe such laws frustrate and endanger collective bargaining and the rights of labor.

Question: Should the Congress pass Federal legislation to abolish state right-to-work laws? Yes, 5 percent; No, 95 percent.

OVERSEAS TROOPS

Since the end of World War II, the United States has maintained a large overseas military force to help protect the free world. There are more than 450,000 American troops stationed in foreign lands, primarily in West Germany. Such forces result in annual overseas defense expenditures of several billion dollars, adversely affecting our balance of payments, and opponents say increase the risks of our involvement in a foreign war.

Question: Should we reduce the number of U.S. troops overseas? Yes, 58 percent; No, 42 percent.

POSTCARD VOTER REGISTRATION

A bill to allow voters to register by mail may again be considered in the Senate next year. The bill would create a new bureau within the Federal Elections Commission. Traditionally, voter registration has been a responsibility of state and local governments. Proponents believe the measure would encourage more people to vote but opponents fear widespread fraud if the bill is passed.

Question: Is postcard voter registration a good idea? Yes, 7 percent; No, 93 percent.

CONSUMER ADVOCACY AGENCY

Efforts have been made over the past several years to establish an independent Consumer Protection Agency staffed with lawyers to represent the interests of consumers before existing Federal administrative agencies and courts. Proponents believe the new agency is necessary because of their opinions that existing ones are controlled by business interests and that the general public is not properly protected. Opponents state, however, that if officials of existing agencies are not properly performing their duties, they should be removed from office rather than to have another agency created which would stir up strife, impede the work of existing government offices and add to the cost of operation. They add that since every citizen is a consumer and we have differences of opinion, it would be impossible to find anyone who would know the views of the general public on every issue coming before every government regulatory agency and such a super agency could not function as effectively as existing administrative bodies with employees selected with expertise in their special field of operation.

Question: In your opinion, should a new Consumer Advocacy Agency be established? Yes, 15 percent; No, 85 percent.

SURFACE MINING

As you may know, coal is this country's most abundant energy resource; and more than half of the nation's overall coal production comes from surface mining. In the 94th Congress, unsuccessful efforts were made to enact additional Federal controls and standards in this field. Some believe surface mining in certain areas lacks adequate safeguards to protect the environment, and the Federal government should therefore regulate mining on both privately owned and Federal lands. Others oppose such legislation as a deterrent to expanded coal production. They believe there can be a surface mining of coal in a manner not detrimental to the environment and that the passage of the proposed legislation would materially add to the cost and tend to prevent the nation from obtaining a self-sufficient supply of energy.

Question: Do you believe stricter Federal legislation on this subject should be passed? Yes, 35 percent; No, 65 percent.

SOUTHERN AFRICA

Since the end of Portuguese rule in Angola and Mozambique, the governments of nearby Rhodesia and the Republic of South Africa have faced guerrilla warfare on their borders as well as economic and diplomatic sanctions imposed earlier by the United Nations. Recently, our government was instrumental in promoting negotiations designed to replace the present government of Rhodesia. Advocates of this policy believe that delay in making changes will only result in a war which would be won by radical governments. Opponents argue that the United States should not interfere in the domestic affairs of other nations and that present American policy encourages internal conflict.

Question: Do you favor American intervention in the affairs of the southern African nations? Yes, 19 percent; No, 81 percent.

OIL COMPANY BREAKUP

There are differences of opinion within the Congress on the size of oil companies. Some feel that the major companies which produce oil should be prevented from also refining, transporting or marketing it. Others consider that a more efficient operation exists and the public benefits by permitting even the largest companies to drill, transport, refine and market. Legislation to separate companies who produce oil from those that will refine, transport, or market it was considered this year and may be brought up again in the next Congress.

Question: Do you tend to favor legislation to break up the larger oil companies? Yes, 26 percent; No, 74 percent.

ILLEGAL ALIENS

An estimated 8 million illegal aliens live in the United States, and during 1976 about 3.5 million of them held jobs in this country, according to the Department of Justice. Legislation has been proposed that would subject employers who knowingly hire illegal aliens to fines and imprisonment.

Question: Do you favor such legislation? Yes, 88 percent; No, 12 percent.

"SUNSET" BILL

Legislation calling for the periodic review of government spending programs may gain increased attention in Congress next year. Referred to as "sunset" legislation, it would provide that all government programs, with few exceptions, would come before Congress for review every four or five years, when they would either be reauthorized or terminated. Proponents believe this would eliminate outmoded or unnecessary and costly programs.

Question: Would you tend to favor such a measure? Yes, 97 percent; No, 3 percent.

YOUR COMMENTS ON LEGISLATION

When completed, return your response to Senator William L. Scott, 3109 Dirksen Senate Office Building, Washington, D.C. 20510.

SENATE OFFICE ALLOWANCES

You may be interested in knowing that the Senate Disbursing Office has furnished a factual statement of the funds authorized to be expended by our office during the four years since my election to the Senate through October 31 of this year, together with the amounts actually spent and the unexpended balance. The funds cover the salaries of staff assistants, stationery, and other office supplies, local and long distance telephones, expenses of the Richmond office, as well as Washington, telegraph, transportation and miscellaneous expenditures.

For all purposes over the four-year period, our office was authorized to spend $1,933,-557.36. We actually spent $1,055,284.43, and returned $878,272.93, or 45.4 percent, to the Treasury. Of course, these expenditures were made in serving the approximately 5 million citizens of Virginia, but it is your money and I thought you ought to know.

MAILING LIST

In order to maintain as nearly a correct mailing list as possible, it will be appreciated if you will advise us of any errors in your name or address or duplication in newsletters received. Changes can be indicated on the mailing label of this 11th annual opinion poll.

SOMETHING TO PONDER

"Men are never so likely to settle a question rightly as when they discuss it freely."—Lord MacAulay.

WILLIAM L. SCOTT,
U.S.S.

Mr. SCOTT. The responses were tabulated by a fairly large group of volunteers from northern Virginia who came to the Hill and worked together for a period of somewhat more than 2 weeks to tabulate the results. This indicates one of the advantages of representing a State adjoining the seat of government, and I am most grateful to these fine people who worked in cooperation with one or more members of our staff in tabulating the results by congressional districts, as well as the responses of the State as a whole.

Mr. President, as Members of the Senate know, Virginia is a fairly conservative State, and, yet, some of our more urban areas are said to be liberal. Nevertheless, the percentages by which they showed their approval or disapproval of specific issues confronting the Nation will be of considerable value to me and hopefully to other Members of the Senate. Perhaps the results will be of sufficient interest to cause others, even those inclined to a different point of view, to talk with their own constituents to determine whether the people represented by individual Senators in fact support the measures that may be brought before this body for consideration.

Being the first Republican ever elected to the Senate from Virginia, I was surprised by a constituent from just across the river writing, "I can't stand you big spending Democrats." Now, of course, this also indicates a lack of knowledge of the philosophy of at least one of his Senators. But other responses were something like the one who wrote:

The fact that you are interested enough to poll your constituents is refreshing. Thank you for a chance to express my views.

I also appreciated the remarks of a gentleman who wrote:

I like your ideas. I am 94 years old, can hardly write at all, but like your ways of doing things.

Now, Mr. President, I believe that all of our constituents like to be consulted. They appreciate an opportunity to be heard on the issues and, in my opinion, the collective views of the people of the country should be reflected in the legislation we enact in the Congress. This has to be true if we believe with Hamilton, "In America the people govern"; that the ultimate will or sovereignty resides in the people collectively. Of course, we are elected to exercise our best judgment on the issues but as the people's representatives we should be interested in their opinions, that is why I take the time to share with you the views of the people of my State with the thought that citizens from other States may well have similar views.

Let me review the proposals in the order they are listed in the newsletter that has been made a part of the record. The first question relates to the Humphrey-Hawkins bill. I hope my summary of the proposal was a fair one, and realize, of course, that it was an oversimplification. But when the question was posed, "would you support such a measure," only 11 percent responded in the affirmative, while 89 percent were in the negative. Among the comments accompanying the responses was one from a gentleman in central Virginia stating,

Some very much needed public service projects might be undertaken. At least working for the government and doing useful work is better than getting paid by the government for doing nothing.

A Danville man, however, noted:

There are too many unnecessary programs that don't amount to a hoot. Thanks for keeping me up-to-date on the affairs of the country.

Regarding the concept of guaranteeing a job, an Orange, Va., woman said:

Our people keep their hands out because Congress keeps doling out the money—money that doesn't exist.

A Sumerduck constituent—and I might add parenthetically, Sumerduck is a small community in Fauquier County, Va., stated:

Any legislation that can help the taxpayer and reduce welfare rolls is a step in the right direction to retain our strength as a country.

Again, Mr. President, the tabulation showed that the people of Virginia rejected the Humphrey-Hawkins bill by a ratio of 89 to 11 percent.

The next question was, "Would you favor a cut in taxes at this time without a reduction in overall Government spending?" It was surprising to me that taxpayers were opposed to a cut in taxes without a corresponding reduction in

Federal spending by the lopsided majority of 87 to 13 percent. A couple from McDowell made this comment:

There is entirely too much Federal control of State and local government, as well as the lives of the citizens of this Nation. Our taxes are already unbearable.

A Purcellville constituent stated:

A tax cut is not what our economy needs. Instead we should balance our budget and take the money we would cut from taxes and apply it to debt reduction. If this were done you would see employment soar in our Nation. Inflation, fired by crushing debt, is what is stifling our economy, not taxes per se.

A gentleman from the Northern Neck states his views in this manner:

To cut income taxes without cutting spending would be the height of irresponsibility, and, in my opinion, is responsible for our present condition—bankrupt!

Now, Mr. President, I believe we sometimes underestimate the intelligence and the commonsense of the American people. If the views of the people of Virginia are any criteria for the views of the people of the Nation as a whole, they do not want a tax cut without a corresponding reduction in Government spending. This view being expressed by a ratio of 87 percent against, compared with 13 percent in favor, should give us pause before acting upon the reduction of taxes whether such action is recommended by a retiring Republican President or an incoming Democratic one. If, in fact, "in America the people rule," any reduction in taxes should be accompanied by a reduction in expenditures.

The next question related to national health insurance and you may want to refer back to what I hope was a fair, general statement of the various proposals that have been before us over the past several years in the field of Government-financed insurance. Thirty-eight percent indicated they would favor the Federal Government staying out of the medical field entirely. Fifty-four percent indicated they favored the Federal Government participating only insofar as it related to catastrophic illnesses, while only 8 percent expressed a desire for the Federal Government to provide full national health insurance for all illnesses. I am advised that total spending for health has increased by more than 300 percent since 1965 and we would generally agree that the cost of medical care is continuing to increase. Most Virginians, however, appear to favor retention of private health care unless it relates to a federally operated insurance program for catastrophic illnesses.

A southwest Virginian suggested:

If Government gets further into health insurance protection, I hope it at least does not do it as a full-blown program. History indicates that private enterprise invariably has done such things more efficiently and less expensively.

A constituent from Alexandria made this comment:

The cost of medical care reflects much mismanagement, waste and too many wealthy doctors.

We hear considerable criticism of the concept of socialized medicine adopted in England and, yet, people in this country are concerned about the cost of health care. I recall some years ago the House Committee on Post Office and Civil Service conducted hearings on the cost of Government-sponsored health care programs for Federal workers and it was brought out in testimony that the cost could be lowered by reducing the number of bed patients in hospitals and increasing the services provided in a physician's office, in a clinic, or even in the hospital to nonbed patients with the patient returning to his home after receiving the necessary attention. We all realize this is a field that requires considerable study before committing the Nation to a costly program that might not be easily eliminated. In any event, the results of the survey of the people of Virginia may be useful to you in determining your own point of view, bearing in mind that only 8 percent of the people desire full national health insurance to cover all illnesses.

Our next question, Mr. President, we entitled, "Environment vs. Energy" and I was somewhat surprised by the strong feeling of Virginians regarding an adequate supply of energy. While you may want to review the summary of the issue presented in the newsletter, the question asked was:

Would you favor a reasonable compromise between the Nation's need for an adequate supply of energy and environmental protection so long as the air and water quality are high enough to maintain the health and welfare of citizens on a nationwide basis?

Ninety-four percent of those responding answered in the affirmative, while only 6 percent were opposed. This response indicates strong support for the nondegradation amendments I have offered to clean air bills in the past and, again, I hope Senators will attempt to obtain the views of the people of their own States on this most important matter, especially those who represent States with large underdeveloped rural areas which may need additional industry to maintain a high standard of living for their people.

Some persons responding to our questionnaire suggested that there be economic impact statements on any future regulation of the environment. This, of course, adds a new twist to present requirements for environmental impact statements before construction on any major scale is permitted. In fact, the Army Corps of Engineers routinely supplies me with statements which include, among other things, proposed construction of bridges for roads over small streams and creeks and whether or not an environmental impact statement has been made or waived by the necessary governmental authorities. I sometimes recall the statement made by a retiring head of an agency within the Department of Transportation who said that present laws and regulations now make it impossible to construct Federal highways. He was speaking partly in jest but partly seriously, and this from a man who had spent more than 40 years as a Federal employee in charge of construction of highways throughout the country.

I believe we need to remember, Mr. President, that man does not live by clean air alone. He should have food, clothes, housing, and the other necessities and luxuries the American free enterprise system has enabled its citizens to have over the years. If we are to maintain our standard of living, we must not impose regulations which, for whatever purpose, are so severe that our economy cannot continue to grow. Stagnation could well result in a major depression.

Our next question relates to the defense budget and I feel sure that the vast majority of the people of Virginia do not want waste in any agency of the Government. Most Virginians are conservative of fiscal matters, yet only 20 percent favored a reduction of defense spending, with 80 percent voting against a reduction in the defense budget. They may have read, as I have, reports that the Soviet Union is now dedicated to military superiority over the United States rather than equality and this is a matter I believe should concern all of us. Many constituents voiced concerns over the Soviet arms buildup. They also referred to the expansion of the Russian navy. However, a number mentioned the high cost of military manpower. Some felt there needed to be a revision of the retirement system for the military and some complained of the large number of civilians employed by the Department of Defense.

A Virginia Beach man wrote:

We believe our misguided foreign policy has allowed our defenses to lag far behind Russia. However, there is much waste that should be eliminated. Too many generals and admirals.

A northern Virginia constituent said this:

We need to spend more on new weapons such as the B–1 bomber. National Defense should be the first priority of the Federal Government. Too much of our defense dollar goes to wages for an increasingly poor Army. We should consider returning to the draft.

Regardless of their reasons, however, there is no doubt that the people of Virginia want to maintain an adequate national defense.

On the Panama Canal question, 12 percent expressed the opinion that we should negotiate a new treaty with Panama which would limit American rights, while 88 percent were opposed to it. The future of the Panama Canal was kicked about a bit during the primaries of both of our political parties and to a lesser extent discussed during the general election campaign. I wonder, however, Mr. President, if all of the Members of the Senate have read the text of this 1903 treaty. It refers to American sovereignty in perpetuity at several places and I believe we should remember how the present country of Panama came into existence. Without the Panama Canal there probably would not have been a country called Panama but it would have remained as a part of Colombia.

During the last Congress, more than one-third of the Senators cosponsored a resolution urging retention of our sovereignty over the Canal Zone which indicates that a change in the present treaty restricting our sovereignty would not be ratified by the Senate. A Richmond man stated:

Panama should keep its agreement with the United States. It would be dangerous for us to lose control of the canal.

I believe this sums up the position of the people of Virginia.

When the question was asked, "Should the Congress pass Federal legislation to abolish State right-to-work laws?" only 5 percent of the respondents answered "yes" while 95 percent of the Virginians responding answered "no." I feel reasonably sure that if this matter was brought to the floor of the Senate, we would witness the greatest filibuster of the decade. Since 19 or 20 States have right-to-work laws, it is doubtful that cloture could be imposed on eliminating section 14B of the Taft-Hartley Act which permits States to enact such legislation. I know that organized labor carries considerable weight in both Houses of the Congress but we have so much important legislation that can be considered and acted upon by the Congress that it would seem foolhardy for the leadership to permit legislation to repeal 14B to be brought to the floor for consideration.

The response of a Waynesboro couple may be representative of the people of Virginia. They said:

We believe doing away with the right-to-work laws would give too much power to labor leaders and destroy competition in the labor sector.

In any event, 95 percent opposition from Virginia leaves no doubt where our State stands on this question.

The answers to the next question presented, however, resulted in a more evenly divided response when we asked, "Should we reduce the number of U.S. troops overseas?" 58 percent said "yes," and 42 percent said "no." Perhaps this mixed feeling is because many Virginians feel a closeness with the countries of Western Europe where most of our foreign based troops are located, or believe that our Nation needs to fulfill its global responsibilities. This is illustrated by a note from a sailor from Norfolk who responded:

I hate to spend so much time away from home, but I believe what I am doing is important.

An Arlington man, however, wrote:

We have got to learn to mind our own business; let's leave the rest of the world alone!

I personally believe, Mr. President, that we have to assume our fair share of the burden of protecting the free world and perhaps a little bit more than our fair share, but that we should give up the idea often expressed that our Nation alone can protect the free world. To continue to attempt to do so, in my opinion, is too much of a burden upon the American people and one they are not willing to assume. Therefore, I hope that in negotiations with other nations of the free world, the new administration will express a willingness to cooperate with other nations for mutual defense but consider joint commitments to be on a global rather than a regional basis.

There still remains a question in my mind as to whether the American presence is a deterrent to Soviet aggression as General Eisenhower is reported to have said or the number of American troops within a given country, whether it be West Germany, Korea, or somewhere else.

On the question relating to postcard voter registration, only 7 percent of the people of Virginia thought it was a good idea, while 93 percent voted against it. We even had some constituents, perhaps facetiously, suggest that the next step would be everyone voting by mail. If a measure such as the postcard registration bill was adopted. I believe the proposal is fraught with the potential for fraud and have no difficulty in agreeing with the views of constituents.

The question of a Consumer Protection Agency, or Consumer Advocacy Agency, has been before us on several occasions and I refer to it as the common law barratry bill, a measure that would stir up strife and litigation within the existing Government offices, add to the cost of operation and be of little, if any, benefit to the individual consumer. We asked the question: "In your opinion, should a new consumer advocacy agency be established?" and the response from Virginia was 15 percent "yes" and 85 percent "no." A Culpeper woman stated:

I am opposed to any new Federal agency except in dire necessity; and some other agency should be shut down to maintain a balance.

A Bristol resident added:

I am extremely opposed to any more tentacles from Washington creeping further and further into our lives.

Regardless of the views expressed by the people of Virginia, I am fearful that this matter will again be brought before the Senate but would only urge that the individual Senators check with their own constituents before they put their views in concrete on this very controversial proposal.

Strip mining brought a somewhat different response from the portion of Virginia in the metropolitan Washington area from that of the remainder of the State. Northern Virginians, by a slight majority, favored stricter Federal legislation on strip mining but it was overwhelmingly reversed by the votes of the people from the remainder of the State. The statewide results to the question: "Do you believe stricter Federal legislation on this subject should be passed?" was 35 percent "yes" and 65 percent "no."

I am glad to have read that President-elect Carter wants greater use to be made of coal, our most abundant fossil fuel, although I am aware that he wants most of this coal to come from deep mines rather than strip mining. Yet, I believe we should remember that more than 50 percent of the coal produced in this country is from strip mining. A lady from Ewing, Va., made this point:

The coal business is the main source of livelihood in this part of the country; and if more regulations are enacted, the cost of producing a ton of coal will be so high that many producers will have to close down and many of our neighbors will no longer be employed.

Certainly I am no expert on coal mining, but it would seem reasonable to assume that less people will contact blacklung disease or lose their lives in surface mining as from deep coal mining.

Southern Africa was very much in the news during the past year and we posed the question: "Do you favor American intervention in the affairs of the Southern African nations?", and received a 19-percent favorable and 81-percent unfavorable response.

Virginians apparently do not believe our country should intervene in Southern Africa either on behalf of governments now in power or in aid of those seeking control. A number of constituents expressed a fear that developments in Angola and Mozambique might ultimately lead to pro-Soviet governments controlling the strategic southern tip of Africa, and very few favored direct military or economic aid. A southside Virginian wrote:

Other countries should not be led to expect that the United States is the sole defender of peace and freedom in the world. Every nation should be encouraged to upgrade its own defenses. If the people of other nations are not willing to sacrifice to protect their freedom, I do not believe it is possible for the people of the United States to preserve their freedom for them.

Our Committee on the Judiciary considered a measure to prevent major oil companies from producing, refining, transporting, and marketing their product. They were urging a vertical breakup of the oil companies last year, but this proposal was not considered on the Senate floor and apparently is not favored by the people of my State. In response to the question: "Do you tend to favor legislation to break up the larger oil companies?", 26 percent said "yes" and 74 percent said "no." Of course, there is a wide difference of views when we get into the field of the proper use of our fossil fuel resources, but general agreement that the national interest demands energy development be made through the private enterprise system and that the breakup proposals would hamper efficient development and use of our oil resources.

Strong opposition was expressed to permitting 8 million illegal aliens to live in the United States with 3½ million of them holding jobs in the country. Eighty-eight percent of Virginians responding indicated their approval of legislation that would subject employers who knowingly hired illegal aliens to fines and imprisonments with only 12 percent opposing such legislation. Apparently the people of the country are concerned about our immigration laws and the estimate that only one-third of those who enter the country illegally are apprehended. I cosponsored Chairman EASTLAND's bill brought before the Judiciary Committee last year, but suggested that it limit the authority of the Attorney General to parole foreign nationalists into this country without limitation. The subcommittee included a provision in the clean bill providing that all aliens brought into the country under the Attorney General's parole authority be included in immigration quotas.

An Arlington woman made this emphatic statement:

Control of illegal aliens is a must. Please help!

A Danville man stated:

They add to the welfare rolls, underemployment rolls, crime and other problems. It seems to me one of the first and most

important things we need to do is to get these people out of the United States. There must be some way to do this.

In view of the 88 percent of the people of my State favoring such legislation, I hope that the Judiciary Committee will hold such additional hearings as may be necessary and report this bill early in the session.

The final question contained in our opinion poll related to so-called sunset legislation. That is, providing for the periodic review of Government programs with few exceptions every 4 or 5 years so that they would either be reauthorized or terminated. Virginians favored such a proposal by a 97- to 3-percent margin. In view of this overwhelming vote of those responding to the questionnaire, I, of course, intend to support such legislation. However, there may well be a danger of reshaping the laws of the country so that the people who serve in the Congress, over a short period of 4 or 5 years, may have more of an impact on legislation than that of the accumulated wisdom of a century or more. My only suggestion is that we exercise prudence and weigh very carefully the conclusions reached by those who preceded us in past Congresses before we discard the laws they adopted and substitute new ones in their stead. While we certainly want to eliminate obsolete or undesirable laws, we should exercise extreme care in this overall review of Federal programs so that our Government priorities or emphasis will not be changed without thorough consideration of the results of such changes.

Mr. President, in bringing the views of Virginians to the attention of the Senate, I certainly do not suggest that my State has any monopoly in the decision-making field. I merely wanted to share with the full Senate a comprehensive public opinion poll of more than 400,000 families throughout our State. The fact that in most instances their opinions, one way or the other, approach unanimity and often were different from the positions of the leadership of the outgoing Ford or the incoming Carter administration might cause us to reflect on the subject matters and hopefully to discuss these issues in the various communities throughout our Nation.

As stated by the English historian and statesman quoted at the end of our newsletter:

Men are never so likely to settle a question rightly as when they discuss it freely.

APPOINTMENT BY THE VICE PRESIDENT

The ACTING PRESIDENT pro tempore. The Chair, on behalf of the Vice President, pursuant to the provisions of title 20, United States Code, sections 42 and 43, appoints the Senator from Arizona (Mr. GOLDWATER) as a member of the Board of Regents of the Smithsonian Institution, in lieu of the Senator from Pennsylvania, Mr. Hugh Scott, resigned.

APPOINTMENT BY THE VICE PRESIDENT

The ACTING PRESIDENT pro tempore. The Chair, on behalf of the Vice President, pursuant to Public Law 94–304, appoints the Senator from Kansas (Mr. DOLE) to the Commission on Security and Cooperation in Europe, in lieu of the Senator from New York, Mr. Buckley, resigned.

QUORUM CALL

Mr. CRANSTON. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ALLEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business, for not to exceed 1 hour, with statements therein limited to 10 minutes each.

NO BLANKET PARDON FOR DRAFT EVADERS

Mr. ALLEN. Mr. President, on Tuesday, the Senator from Alabama delivered remarks with respect to the matter of a possible granting by the President-elect, when he becomes President, of a blanket pardon to Vietnam-era draft evaders and deserters from military service. At that time, the Senator from Alabama inserted in the RECORD a copy of the resolution which he proposed to introduce today.

President Ford has indicated that he has under study the matter of acting further in this area, in addition to the setting up of the clemency board which he set up sometime ago and under which some 15,500 individuals did obtain some form of clemency in return for a period of humanitarian service by such individual.

Mr. President, it is not my intention or my contention that the Senate is able to prevent the President, or any President, from taking this action if he so wishes, because he does have that power under the Constitution. However, I feel that it is incumbent upon the Senate not to allow this action to go unchallenged, because I believe it is the duty of the Senate to express its views on this subject.

I believe it is unwise and is against the national interests for the President to take this action. I believe it is an action that he will have cause to regret in time to come.

In the first place, Mr. President, it is an affront to the 3 million men and women who served honorably in the Vietnam war. It is an affront to the more than 300,000 men and women who were wounded in the Vietnam war. Certainly, it is an affront to the families of the more than 50,000 who were killed in that war.

Further, Mr. President, in the matter of discipline and future action in our Armed Forces, would it be wise to give a blanket pardon or amnesty to draft evaders and deserters when others have served bravely and honorably, some having been wounded and some having been killed? In the future, if a person feels that his violation of the law is going to be pardoned after the war, would it not encourage desertions and evasions of military service if they should realize and feel that in time they would be forgiven?

So it would encourage men and women not to serve their country, to violate the law, to evade the draft, to desert, if you please; and I believe that we cannot operate a military service if this idea goes abroad.

I believe we need to take action in the Senate to advise with the President. This resolution could be directed alike to President Ford, who says he has this matter under consideration. I do not believe he is going to take any action. But inasmuch as the Senate has, in general, the right to advise and consent in matters of appointment by the President, and since we are operating in a spirit of cooperation in Congress with the incoming President, it is only fair that we give him the benefit of the views of the Senate. Then, too, it would give each Senator the opportunity to say yea or nay as to the wisdom of this action on the part of the President.

Mr. President, I received a letter this morning from the national commander of the American Legion, William J. Rogers, in which he strongly supports this resolution. I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE AMERICAN LEGION,
Washington, D.C., January 10, 1977.

Hon. JAMES B. ALLEN,
U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR ALLEN: The American Legion strongly supports your sense of Senate resolution which urges that no general pardon or amnesty be granted to draft evaders, military deserters or those receiving less than honorable discharges during the Vietnam period. We continue to urge that each case be tried and/or reviewed on an individual basis by existing judicial and administrative authority.

Our views are firmly founded upon the demonstrated compassion and fairness of the American judicial system and the responsibilities of citizenship. Moreover, any unconditional amnesty or pardon may seriously impair our already lagging recruiting efforts and will bring into serious question our ability to require military service of our citizens in a future national emergency.

Again, The American Legion supports your prompt and responsible action on this issue.

Sincerely yours,

WILLIAM J. ROGERS,
National Commander.

Mr. ALLEN. Mr. President, I am offering today a sense of the Senate resolution which would express the disapproval of the Senate of the President-elect's proposal to proclaim an unconditional blanket pardon of all Vietnam era draft evaders and possibly of deserters and military law violators.

The Constitution, in article II, section 2, vests in the President "the power to grant reprieves and pardons of offenses against the United States." The power to grant pardons given to the Chief Executive is unlimited and unqualified, not subject to any action of either the Senate

or the House of Representatives. The authors of the Constitution after debate and deliberation placed no limits on the power of the President to grant pardons in order to allow him the fullest possible discretion and freedom of action in dealing with situations demanding immediate or plenary action.

The President's right to grant an unconditional pardon to Vietnam draft violators or even to military deserters is thus fundamental to our system of government, and in offering my resolution I do not wish in any way to imply a challenge to the President's authority to grant pardons as he sees fit wholly within his own discretion. However, Mr. President, an even more fundamental right—or, perhaps, duty—is ours as Representatives of the 50 States; that duty is to offer to the President in appropriate instances our considered judgment as to the effect of actions he contemplates.

Senators should, therefore, clearly understand that my resolution does not question the constitutional authority of a President to proclaim a general amnesty or blanket pardon; it merely expresses the considered judgment of the Senate that in these circumstances an unconditional blanket pardon would be a grave mistake.

This resolution affords each of us the opportunity to go on record against the contemplated action of the President-elect that we might thereby convince him that his proposal, if carried out, would be a grievous error without historical precedent and dangerous to the future security of the Nation. Conversely, if any Senator favors the contemplated pardon, his vote against the resolution will put his stand on record.

Mr. President, having just completed our Bicentennial Year, we are all even more mindful than in other times that American freedom and our constitutional system of law were purchased 200 years ago at very high cost in the War for Independence. Since that initial victory, Americans have been required to make periodic payments for the continuation of our freedom in numerous and bloody wars. But, Mr. President, unlike the laws of virtually any other nation in the world, in every conflict, our Constitution and laws have allowed for debate and lawful opposition and have even permitted lawful alternatives to combat for those deemed to be morally motivated in their opposition to it. Vietnam was no different. The men drafted into our Armed Forces and those who volunteered for service were no more willing or anxious to see and suffer the horrors of combat or to die than had been any of their predecessors in past conflicts—but they obeyed the law.

Three million young men served honorably in Vietnam; 300,000 were wounded in action; and more than 50,000 died there—the majority in each category having been drafted into service. Many hundreds, as prisoners of a criminal enemy, suffered because they, too, preserving their honor inviolate, obeyed the laws of the United States.

Who here can now say how many countless times the sickening fear of violent death was confronted and overcome by those steadfast Americans who did serve faithfully in this unpopular and cruel conflict? Mr. President, I do not think I am being too dramatic in reminding Senators that the hazards of war are faced best by those motivated in high patriotism, confident that their countrymen approve, support, and admire their conduct. Such was the case at Bunker Hill, such was certainly the case on the beaches of Salerno, such has been the case on countless fields of carnage over the long two centuries of our existence as a free people.

Mr. President, in past wars and during the Vietnam conflict there have also been those who have opposed combat and genuinely motivated by high moral purpose have refused to fight, but, Mr. President, they were willing to accept full responsibility for their actions within the framework of our laws and to perform alternate service or to accept punishment in accordance with their own conscience and as proof of their convictions. Thus, too, following almost every conflict, American Presidents, consistent with the generous spirit and popular will of the people of the United States, have when appropriate offered pardons to such individuals. The United States, at the insistence of her people, when at war pursues victory and when at peace plays fair with those who for reasons of conscience would not fight.

Our history proves us to be fundamentally a moral and forgiving nation. However, never once—let me repeat, never once—in our history has an unconditional pardon been given as is now proposed by the President-elect. In every case, American Presidents have required certain actions of those to whom pardons were granted and have also limited in some fashion every general amnesty extended to those who were thought to deserve it. Thus, President Washington demanded an oath of loyalty from the whisky rebels; President Lincoln sent Union deserters back to their units to serve out their time; and President Truman pardoned 1 in 10 draft violators after the Second World War only after they had served jail sentences. The Korean war is the only major conflict in our country's history after which no pardons were offered. But, Mr. President, the point is that all of the precedents taken alone or considered collectively, imply that a President in a postwar period ought to exercise the Nation's mercy and forgiveness within limits and with conditions placed upon those who receive it.

At the conclusion of the Vietnam conflict, President Ford apparently felt that there was, indeed, a need for just such a conditional grant of pardon. He did, therefore, on September 16, 1974, proclaim a limited amnesty program and signed Executive Orders 11803 and 11804 establishing the Clemency Review Board. Individual draft violators were required to apply for clemency, thereby displaying their intent and desire to become again citizens in good standing. Each case was reviewed on its merits, and 94 percent of the cases reviewed resulted in recommendations of leniency or full pardon.

Mr. President, many of the draft evaders, who had been convicted and who were at the time of the proclamation serving out their prison terms, were immediately set free. A good number were given the chance to serve their country in the areas of public health or the environment in order to, as the President put it, "earn their reentry" into American society; 15,000 draft evaders and deserters participated. When the program was about to lapse, it was extended twice—once on January 31, 1975, and again on February 28, 1975—so that more could apply and have the opportunity to right the wrong they had committed. The Clemency Board dispensed the Nation's forgiveness to those who sincerely desired it and who by their actions had manifested their wish to make good in a lawful way the wrong they had committed against their country.

Mr. President, by complying with the rules and determinations of the Clemency Review Board, the individuals who participated in its program will ironically also, in my judgment, along with the millions who served honorably, be aggrieved by a totally unconditional pardon extended now to those who not only disobeyed the law in the first place but who were unwilling later to take any action whatsoever to reclaim their citizenship and to assume its responsibilities. They deserted their country in a time of need; they refused her forgiveness; they deserve nothing more.

At present an all-volunteer military force defends our Nation. We are also, thankfully, at peace. However, the reality of the present world order should make evident to us all that the latter condition could change in an instant. A major national crisis could require the reinstitution of the draft. In that unhappy event, it might well prove impossible to implement an effective national mobilization if an unconditional blanket pardon is now granted to those who violated with apparent impunity the very same draft statutes, or who were drafted and subsequently deserted. And let us be frank about this matter, the draft has served to compel millions of Americans to do their duty in a prompt and efficient manner, and it has saved the democracies in this world twice in this century. Without the ability to reimplement it if needed, the peace and security of the world are in certain jeopardy.

When the Selective Service Act was written, it included penalties for its violation. The Uniform Code of Military Justice contains penalties for desertion. Our predecessors in this Chamber felt those penalties necessary, and if the draft were in a crisis to be reimplemented, those penalties would be necessary again today. Those penalties make effective our Selective Service System, which in itself even when lying dormant acts as a deterrence to potential enemies of the United States. But, Mr. President, if an unconditional blanket pardon is given to draft dodgers now, or to military deserters, that deterrent effect of a reimplemented draft will be undermined, and our enemies—present or future—ought to rejoice at the prospect.

Thomas Jefferson, in his first inaugural address, in which he set forth the standards by which government should be judged, stressed repeatedly the need for equal and exact justice under law. An unconditional pardon would mock that standard, would break the precedent of

two centuries of our history, and would aggrieve the millions who have served honorably in past wars, the tens of thousands who have died, and the thousands who still bear the scars of conflict as reward for obeying the laws of their Nation. Furthermore, it would undermine and possibly nullify the ability of the United States to take decisive military action, if necessary, on any scale and for whatever cause.

Mr. President, my resolution does not seek vengeance. To so judge it would require the conclusion that our entire history as a nation has been immoral and unforgiving. Senators who stand with this resolution will by their vote offer good advice to a new President and hopefully thereby prevent a serious initial error which might forever blemish his Presidency, even notwithstanding the many future great accomplishments he may achieve and which we all sincerely hope for him. The action I propose would not, therefore, be taken out of any wish for vengeance against lawbreakers or from any desire to embarrass a statesman for whom we all have the deepest respect but would be done rather to reaffirm our commitment to equal and exact justice under law, to insure our future security and peace within the framework of law, and to honor as is justly due those who served lawfully.

SENATE RESOLUTION 18—PARDON OF VIETNAM ERA DRAFT EVADERS

Mr. ALLEN. Mr. President, on behalf of myself, the distinguished Senator from North Carolina (Mr. HELMS), and the distinguished Senator from Virginia (Mr. HARRY F. BYRD, JR.), I send to the desk a sense of the Senate resolution and ask consent for its immediate consideration.

The PRESIDING OFFICER (Mr. GLENN). The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 18) to express the sense of the Senate in opposition to a general Presidential pardon by proclamation of Executive order of Vietnam era draft evaders, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

Mr. CRANSTON. Yes, there is.

The PRESIDING OFFICER. Objection is heard.

Mr. ALLEN. Would there be any objection to the resolution being read in full?

Mr. CRANSTON. No; of course not.

The assistant legislative clerk read as follows:

S. RES. 18

Whereas President-elect Jimmy Carter has indicated that he will, as one of his first official acts as President, issue some form of blanket Presidential pardon for all Vietnam era draft evaders and may extend such pardon to military deserters or violators of military law;

Whereas the grant of a blanket Presidental pardon for all Vietnam era draft evaders, deserters, or military law violators would be a disservice to the more than 3 million men and women who served honorably in the Armed Forces during the Vietnam era and to the families whose sons died in battle or captivity or remain missing in action;

Whereas the grant now of a blanket Presidential pardon for all Vietnam era draft evaders, deserters, or military law violators would ignore the purpose and work of the Presidential Clemency Board and make meaningless the alternate service performed by those who elected to apply for clemency;

Whereas a blanket Presidential pardon for Vietnam era draft evaders, deserters, or military law violators could have dire effect on military morale and discipline and might tend to hamper future defense efforts; and

Whereas the issue of blanket pardons for draft dodgers, deserters, or military law violators is of such importance to the United States and the people of the United States that the Senate feels that President-elect Carter and the people should be advised of the Sense of the Senate on this issue;

Now therefore, the Sense of the Senate is that the President of the United States would be ill-advised to pardon, and he is hereby urged not to pardon, by any general or blanket decree, proclamation, order, or amnesty draft evaders, deserters, or military law violators who chose to break the laws of the United States rather than to serve honorably in our Armed Forces during the period August 4, 1964, through March 28, 1973, and it is further the sense of the Senate that each application for pardon for draft evasion, desertion, or violation of military law should be handled compassionately but on the basis of its own merit or demerit.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

Mr. CRANSTON. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The resolution will go over under the rule.

Mr. CRANSTON. Mr. President, I wish simply to explain to the Senator from Alabama that my objection was procedural and not substantive. I was not aware of the nature of the resolution except I had heard what the Senator had stated, and I am not now fully cognizant of the contents because I did not hear the full reading, but most Senators have been under the impression that there would be no business in the Chamber at this particular time that would require their attention, and in fairness to them I felt it necessary to object to immediate consideration of the resolution.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. CRANSTON. I yield.

Mr. ALLEN. I do not take exception to the remarks of the distinguished Senator from California, but I did announce on Tuesday that this resolution would be introduced and I put in a copy of the resolution. It is in the RECORD. I assume Senators who are not present in the Chamber have occasion to read the RECORD, and I think it is well known that the Senator from Alabama was going to introduce this resolution. He so advised the distinguished majority leader who is usually in the Chamber.

I might state, further, that over in the House of Representatives tomorrow they have 3 hours set aside for the consideration of some subject such as this. I do not know whether it is a sense of the Congress resolution, but they are going to debate this subject.

I am sorry that the distinguished Senator has made this objection, and I am hopeful that he will use his good offices with the majority leader to see that we do adjourn at the close of business today rather than recess so that this matter will in fact come over under the rule so that we may have an opportunity to discuss it on the next legislative day.

Mr. STEVENS. Mr. President, will the Senator from California yield?

Mr. CRANSTON. I yield.

Mr. STEVENS. I join my Democratic counterpart in urging that the matter not be considered today because of the understanding that we had. But so far as I know on this side of the aisle we would be most willing to accommodate the Senator in order that the matter will come before the Senate an an early date

Mr. ALLEN. That is fine. As I say, I do hope we will adjourn today rather than recess because if we only recess it will not come upon the next legislative day.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The assistant majority leader has the floor.

Mr. CRANSTON. I yield the floor.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

SENATE CONCURRENT RESOLUTION 2—ACCOUNTING OF MIA'S

Mr. HELMS. Mr. President, I do wish that it were possible to have immediate consideration of this resolution, which I wholeheartedly endorse and which in fact I am cosponsoring with the able Senator from Alabama.

This question is very much on the minds of the American people and, as the Senator from Alabama has indicated, I feel that the Members of the Senate ought to take a position yea or nay on this question. One of our responsibilities, after all, is to advise and consent in matters of consequence to the American people.

Certainly the question of amnesty and pardon for those who cut and ran to avoid their country's call to duty is understandably on the minds of the American people.

I commend the Senator from Alabama on his resolution which as I have indicated I am honored to cosponsor.

Mr. President, in tandem with the resolution just submitted by the Senator from Alabama, I send to the desk a concurrent resolution for which I shall in a moment ask immediate consideration. I ask that it be stated.

The PRESIDING OFFICER. The concurrent resolution will be stated.

S. CON. RES. 2

Whereas, Article II, Section 2, of the Constitution of the United States designates the President of the United States Commander in Chief of the Army and Navy (Military Forces), and

Whereas, on August 10, 1964, the Senate and House of Representatives of the United States Congress passed Public Law 88-408 authorizing the deployment of the United States Armed Forces for the Maintenance of International Peace and Security in Southeast Asia, and

Whereas, over 800 members of the Armed Forces authorized by the Congress and dispatched by the President to Southeast Asia are still categorized as *Prisoner of War or*

Missing in Action and are still unaccounted for, and

Whereas, Article II, Section 2 of the Constitution of the United States grants to the President of the United States further power, by and with the Advice and Consent of the United States Senate to make treaties, and

Whereas, on January 27, 1973, the Paris Agreement on Ending the War and Restoring Peace in Vietnam (Designated the Paris Agreement), which, by its terms became effective on that date, was executed by duly authorized representatives of the United States, the Republic of Viet-Nam (South Viet-Nam), the Democratic Republic of Viet-Nam (North Viet-Nam) and the Provisional Revolutionary Government of the Republic of South Viet-Nam (the Vietcong), and

Whereas, Article 8(b) of the Paris Agreement provides:

"The parties shall help each other to get information about those military personnel and foreign civilians of the parties missing in action, to determine the location and take care of the graves of the dead so as to facilitate the exhumation and repatriation of the remains, and to take any such other measures as may be required to get information about *those still considered missing in action.*" (Emphasis supplied)

which Article establishes an obligation under International Law upon the parties to the Agreement in favor of members of the United States Armed Forces who are categorized as Missing in Action and a further obligation to, if possible, exhumate and repatriate the remains of those categorized as Killed In Action. This obligation runs to the United States as a party to the Agreement, and

Whereas, the State Department as the responsible agency of the Executive Branch of the United States Government has exhibited no positive direction or leadership in meeting its responsibility of enforcing Article 8(b) of the Paris Agreement or seeking alternatives that might otherwise resolve the Prisoner of War/Missing in Action problem, and

Whereas, on September 11, 1975, the U.S. House of Representatives formed the Select Committee on Missing Persons in Southeast Asia, to report within one year on the status of persons held as prisoners or missing in action and unaccounted for in North and South Viet-Nam, Laos and Cambodia, which committee has been responsible for identifying or accounting for *less than one-tenth of one percent* of Americans unaccounted for in those areas, and

Whereas, the Joint Casualty Resolution Center's recent withdrawal from Thailand leaves no United States Agency in Asia to locate Americans still prisoner or missing and unaccounted for in Indochina, and

Whereas, knowledge that some unaccounted for military and civilian personnel, fifty-seven of whom were known to be alive and who have not been returned, were at one time prisoners of war and alive was manifested through enemy propaganda broadcasts, foreign media reports, photographs and other sources, personnel who may be presumed to be living and retained for purposes of bargaining or blackmail by the Vietnamese, Cambodians or Laotians now in power. Now therefore be it

Resolved:

1. That the President of the United States recognize his duty and responsibility as Commander in Chief of the Armed Forces of the United States and require an accounting for the person or remains of all military personnel responding to the Orders of the Office of the President and who are presently categorized as Prisoner of War, Missing in Action or Killed in Action (body not recovered) in Southeast Asia on the personnel rosters of the United States Army, United States Navy, United States Marine Corps or United States Air Force.

2. That the President of the United States, by executive fiat, require the Secretary of State to pursue, with diligence and tenacity, enforcement of the Paris Agreement of January 27, 1973, with emphasis on enforcement of Article 8(b) of that Agreement.

3. That the Congress of the United States, having passed Public Law 88-408 authorizing the deployment of the United States Armed Forces for the maintenance of international peace and security in Southeast Asia, recognize a corresponding continuing duty and obligation to determine the fate of Americans missing or unaccounted for consequent from enforcement of that law.

4. That the President of the United States, through and by the Secretary of State, hold the Democratic Republic of Viet-Nam (North Viet-Nam) and the Provisional Revolutionary Government of the Republic of South Viet-Nam (the Vietcong) responsible to account for and provide essential information not otherwise available to satisfactorily dispose of the Prisoner of War/Missing in Action problem in accordance with the Paris Agreement or seek alternatives that might otherwise resolve the question of those Americans unaccounted for in Southeast Asia.

5. That responsible officeholders in the Executive and Legislative branches of the Government of the United States, both elected and appointed, should immediately address the authority of their office, individually and collectively, toward a satisfactory resolution of the Prisoner of War/Missing in Action problem, make a public accounting, and remove any question as to the integrity of their function.

Mr. HELMS. Mr. President, it is the duty of both the Congress and the President of the United States to secure an accounting of all prisoners of war and military men missing in action. There are some who seem to feel that it would tidy up our national affairs simply to declare that these men will never be seen again and need not be accounted for; that what is really needed is an official declaration of presumed death in action so that the books can be closed and we can get on with other things.

If all avenues had been exhausted, that certainly might be the case. But we, as a nation, have never exhausted even the steps provided for in the Paris agreement. North and South Vietnam and the Provisional Revolutionary Government—Vietcong—all were signatories to the Paris agreement. Article 8(b) provides that:

> The parties shall help each other to get information about those military personnel and foreign civilians of the parties missing in action, to determine the location and take care of the graves of the dead so as to facilitate the exhumation and repatriation of the remains, and to take any such other measures as may be required to get information about those still considered missing in action.

All the parties to the agreement are obliged under international law to help find, and, if possible, to exhumate and repatriate those categorized as missing in action. Needless to say, if the United States prematurely reclassifies those now in the status of MIA, all pressure will be off Communist Vietnam to fulfill its obligations.

Last December, the Select Committee on Missing Persons in Southeast Asia of the House of Representatives issued its final report. To say that the conclusions of the House select committee were controversial is to make an understatement. Indeed, four of the nine members of the select committee disagreed strongly with some of the key conclusions. The select committee is entitled to its own conclusions, but the Congress of the United States must now allow those conclusions to stand without debate.

Of course, it would be convenient for the Defense Department to close the books, and it would make it easier for the State Department to pursue new and different policy goals in Asia if the nagging problem of Southeast Asia were glossed over. But the fact is that the Nation owes an obligation to its citizens, and especially to those citizens who accepted the obligation of military service from the Nation. We must hold Vietnam to its obligations or we have failed our people. I have prepared a resolution for this purpose.

The President-elect in his public speeches has vigorously supported the need to receive an accounting from Vietnam of our MIA's, even to the point of withholding diplomatic recognition and membership in the United Nations until such an accounting has been given. He has also proposed that a Presidential commission be set up to go to Vietnam, to go to Laos, to go to Cambodia to seek information. Such a commission would be one way of accomplishing the purpose. Vietnam is seeking international respectability; all that we are seeking is an accounting of MIA's. The resolution does not specifically mention such a commission, so as to leave reasonable flexibility to the President depending upon forthcoming events. But certainly the commission could do good work if it were properly constituted and assigned a hardnosed mission.

Moreover, there are other steps that the President can take. For example, by executive order, he could stop the review of cases of MIA's until the commission has completed its work; for, logically, such a review could result in the rapid removal of most, if not all, cases from MIA status, thereby making the work of the commission moot, and relieving Vietnam of its international obligations.

Therefore, I am submitting a concurrent resolution reviewing these matters and urging that all responsible officeholders of the executive and legislative branches seek as satisfactory resolution of the MIA's situation.

Mr. President, I ask unanimous consent that the name of the junior Senator from Alabama (Mr. ALLEN) be added as a cosponsor of the resolution.

Mr. President, the bottom line of this resolution is that this Senate should take a stand, that Senators should vote, one way or another, on the proposition that our Government should do its duty on behalf of the families of American fighting men listed as missing in action. For too long this matter has been allowed to float in limbo, contributing to the increased agony of wives, mothers and fathers, and children of men whom we sent to the other side of the world to fight in what turned out to be a no-win war. The least that we can do now is to pursue, with every bit of effectiveness and dedication we can muster, a resolution of the MIA problem.

Mr. President, I ask for the immediate consideration of the resolution.

The PRESIDING OFFICER. Is there

objection to the immediate consideration of the resolution?

Mr. STEVENS. Mr. President, in keeping with the actions taken by the majority whip, I object at this time.

The PRESIDING OFFICER. Objection is heard. The resolution will go over under the rule.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. HELMS. Yes.

Mr. STEVENS. I want him to understand that I have objected in the same vein that the Senator from California objected to the other resolution. I certainly am very sympathetic with this issue, but I think we had an understanding that there would be no business of this type conducted today, and, therefore, it should go over under the rule.

Mr. HELMS. Mr. President, I do hope the leadership of the Senate on both sides of the aisle will agree to a date soon for consideration of the resolution by the able Senator from Alabama and the resolution of the Senator from North Carolina.

JACK SPAIN'S DEATH SADDENS HIS MANY FRIENDS IN THE SENATE

Mr. HELMS. Mr. President, it is with sadness that I report to the Senate the death of Jack Spain, who was without question one of the most capable and dedicated men ever to serve on Capitol Hill. Jack passed away over the weekend in his hometown of Greenville, N.C., which he served as mayor many years ago.

Jack retired a little over 4 years ago as administrative assistant to our distinguished former colleague, Sam J. Ervin, Jr. Senator Ervin spoke on this floor at that time about his personal relationship with Jack Spain.

When Senator Ervin's predecessor, Clyde R. Hoey, died in 1954, Jack was serving as administrative assistant to Senator Hoey. Gov. William B. Umstead, himself a former Member of the Senate, offered to Sam Ervin the appointment to the Senate to succeed Senator Hoey. Senator Ervin was then associate justice of North Carolina; and he had to make up his mind whether to leave our State's highest court. Before doing so, he called Jack Spain, and asked if he could count on Jack to help him.

Jack agreed without hesitation, and then began a relationship which was meaningful to both Jack Spain and Senator Ervin.

Jack had come to Washington many years earlier to serve as administrative assistant to Representative Herbert C. Bonner. When Senator Hoey was elected to this body, Jack came over from the House side to serve as Senator Hoey's right-hand man.

And how well he served. I came to Washington, Mr. President, in late 1951 as administrative assistant to North Carolina's junior U.S. Senator, Willis Smith. I was the greenest of the green. I knew scarcely anything about the Senate, let alone the sometimes complicated and always demanding duties of an administrative assistant. But Jack Spain took me by the hand. He taught me how to handle the affairs of a Senator's office. He was completely unselfish with his time, and I shall always remember his patience with me.

Jack Spain was one of the dearest friends I ever had, Mr. President. He was a man of great ability. He was dedicated. He was a completely honest, forthright man. But he had a lightheartedness about him that always managed to bring cheer to those around him.

To Jack's dear wife, Marie, and their children, Mrs. Helms and I extend our deepest sympathy. Their loss of a wonderful husband and father means that I have lost a splendid friend. Jack Spain was a remarkable human being, and I shall miss him.

(Remarks made at this point by Mr. HARRY F. BYRD, Jr., in connection with the introduction of a bill relating to tax funds to aid Vietnam, are printed in today's RECORD under Statements on Bills during routine morning business.)

QUORUM CALL

Mr. HARRY F. BYRD, JR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ESTABLISHMENT OF THE OFFICE OF DEPUTY PRESIDENT PRO TEMPORE OF THE SENATE, AND FOR OTHER PURPOSES

Mr. ROBERT C. BYRD. Mr. President, on behalf of Mr. Baker and myself, I send a resolution to the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 17) to establish an office of Deputy President Pro Tempore of the Senate, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 17) was agreed to, as follows:

S. RES. 17

Resolved, That, effective January 5 1977, there is hereby established in the United States Senate the Office of Deputy President Pro Tempore.

SEC. 2. Any Member of the Senate who has held the Office of President of the United States or Vice President of the United States shall be a Deputy President pro tempore.

SEC. 3. Each Deputy President pro tempore is authorized to appoint and fix the compensation of an Administrative Assistant at not to exceed $40,748 per annum; a Legislative Assistant at not to exceed $38,577 per annum, and an Executive Secretary at not to exceed $23,380 per annum.

SEC. 4. The Sergeant at Arms and Doorkeeper is authorized (a) to provide, by lease or purchase, and maintain an automobile for each Deputy President pro tempore, and (b) to employ and fix the compensation of a Driver-Messenger for each Deputy President pro tempore at not to exceed $15,364 per annum.

SEC. 5. The President pro tempore is authorized to appoint and fix the compensation of an Administrative Assistant at not to exceed $40,748 per annum; a Legislative Assistant at not to exceed $38,577 per annum, and an Executive Secretary at not to exceed $23,380 per annum.

SEC. 6. The Secretary of the Conference of the Majority and the Secretary of the Conference of the Minority may each appoint not to exceed two staff assistants in each office and fix the compensation at a total of not to exceed $32 732 per annum.

SEC. 7. Until otherwise provided by law, the Secretary of the Senate is authorized to pay from the Contingent Fund of the Senate such amounts as may be necessary, for salaries and expenses, to carry out the provisions of this resolution. Expenses incurred under section 4(a) of this resolution shall be paid upon vouchers approved by the Sergeant at Arms and Doorkeeper. Vouchers shall not be required for the disbursement of salaries of employees paid under authority of this resolution.

TEMPORARY COMMITTEE APPOINTMENTS

Mr. ROBERT C. BYRD. As will be remembered, last Thursday, the Steering Committee met and made recommendations to the caucus on the temporary assignments to committees for our new Members. During the discussions, it was apparent that committee chairmen should be designated for those committees whose chairmen have not returned to the Senate. This was necessary so that vouchers could be signed, committee business could be conducted, and necessary personnel actions could be effected.

The conference on Thursday evening ratified the Steering Committee actions. It was emphasized, however, that these assignments of new Members to committees and the designation of chairmen were temporary and, in fact, unalterably temporary, pending the Steering Committee meeting again following the resolution of Senate Resolution 4, which is under consideration in the Rules Committee. It was specifically stated that these assignments are in no way establishing a precedent, and nothing would be done to interfere with the process of selecting committee chairmen which was agreed to last year. Every member of the caucus will have an opportunity at the appropriate time to indicate whether he wishes a ballot on committee chairmen. However, this will occur when the final organization of the Senate takes place, hopefully by early February. As a result, all chairmen have been designated as temporary at this time.

AMENDING RULE XXV OF THE STANDING RULES OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a resolution making temporary—and I stress the words unalterably temporary—certain assignments of new Members on the Democratic side of the aisle to committees, and I ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 19) amending paragraph 2 of rule XXV of the Standing Rules of the Senate.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

Mr. ALLEN. Just a minute.

The PRESIDING OFFICER. Objection is heard.

Mr. ROBERT C. BYRD. Mr. President, the amendment to the rule merely allows the assigning of new Members on a temporary basis to the various committees.

Mr. ALLEN. That is what I understood. I lost track of it when it was at the desk. It is merely an assignment of the incoming Senators on a temporary basis to the committees as they presently exist.

Mr. ROBERT C. BYRD. Yes, and this resolution establishes the sizes of those committees to accommodate such temporary assignments.

Mr. ALLEN. I have no objection.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 19) was agreed to as follows:

S. RES. 19

Resolved, That paragraph 2 of Rule XXV of the Standing Rules of the Senate is modified to read as follows:

"2. Except as otherwise provided by paragraph 6 of this rule, each of the following standing committees shall consist of the number of Senators set forth in the following table on the line on which the name of that committee appears:

"Committee	*Members*
"Aeronautical and Space Sciences	8
"Agriculture and Forestry	16
"Appropriations	24
"Armed Services	16
"Banking, Housing and Urban Affairs	15
"Budget	14
"Commerce	17

Resolved, That paragraph 3 of Rule XXV of the Standing Rules of the Senate is modified to read as follows:

"3. Except as otherwise provided by paragraph 6 of this rule, each of the following standing committees shall consist of the number of Senators set forth in the following table on the line on which the name of that committee appears:

"Committee	*Members*
"District of Columbia	7
"Post Office and Civil Service	6
"Rules and Administration	9
"Veterans Affairs	8."

TEMPORARY MAJORITY APPOINTMENTS TO COMMITTEES

The PRESIDING OFFICER. The next resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 20) making temporary majority appointments to committees.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 20) was agreed to, as follows:

S. RES. 20

Resolved, That the following shall constitute the majority party's membership on the standing committees and the Select Committee on Small Business of the Senate for the Ninety-fifth Congress (Temporary):

Committee on Aeronautical and Space Sciences: Mr. Ford (Temporary Chairman), Mr. Stennis, Mr. Cannon, Mr. Bumpers.

Committee on Agriculture and Forestry: Mr. Talmadge (Temporary Chairman), Mr. Eastland, Mr. McGovern, Mr. Allen, Mr. Humphrey, Mr. Huddleston, Mr. Clark, Mr. Stone, Mr. Leahy, Mr. Anderson (Temporary).

Committee on Appropriations: Mr. McClellan (Temporary Chairman), Mr. Magnuson, Mr. Stennis, Mr. Byrd of West Virginia, Mr. Proxmire, Mr. Inouye, Mr. Hollings, Mr. Bayh, Mr. Eagleton, Mr. Chiles, Mr. Johnston, Mr. Huddleston, Mr. Riegle (Temporary), Mr. Melcher (Temporary), Mr. Sarbanes (Temporary), Mr. DeConcini (Temporary).

Committee on Armed Services: Mr. Stennis (Temporary Chairman), Mr. Jackson, Mr. Cannon, Mr. McIntyre, Mr. Byrd of Virginia, Mr. Nunn, Mr. Culver, Mr. Hart, Mr. Leahy, Mr. Metzenbaum (Temporary).

Committee on Banking, Housing, and Urban Affairs: Mr. Proxmire (Temporary Chairman), Mr. Sparkman, Mr. Williams, Mr. McIntyre, Mr. Cranston, Mr. Stevenson, Mr. Biden, Mr. Morgan, Mr. Metzenbaum (Temporary).

Committee on the Budget: Mr. Muskie (Temporary Chairman), Mr. Magnuson, Mr. Hollings, Mr. Cranston, Mr. Chiles, Mr. Abourezk, Mr. Biden, Mr. Nunn.

Committee on Commerce: Mr. Magnuson (Temporary Chairman), Mr. Cannon, Mr. Long, Mr. Hollings, Mr. Inouye, Mr. Stevenson, Mr. Ford, Mr. Durkin, Mr. Anderson (Temporary), Mr. Matsunaga (Temporary), Mr. Moynihan (Temporary).

Committee on Finance: Mr. Long (Temporary Chairman), Mr. Talmadge, Mr. Ribicoff, Mr. Byrd of Virginia, Mr. Nelson, Mr. Gravel, Mr. Bentsen, Mr. Hathaway, Mr. Haskell, Mr. Zorinsky (Temporary).

Committee on Foreign Relations: Mr. Sparkman (Temporary Chairman), Mr. Church, Mr. Pell, Mr. McGovern, Mr. Humphrey, Mr. Clark, Mr. Biden, Mr. Zorinsky (Temporary), Mr. Matsunaga (Temporary).

Committee on Government Operations: Mr. Ribicoff (Temporary Chairman), Mr. McClellan, Mr. Jackson, Mr. Muskie, Mr. Metcalf, Mr. Allen, Mr. Chiles, Mr. Nunn, Mr. Glenn, Mr. Sasser (Temporary).

Committee on Interior and Insular Affairs: Mr. Jackson (Temporary Chairman), Mr. Church, Mr. Metcalf, Mr. Johnston, Mr. Abourezk, Mr. Haskell, Mr. Glenn, Mr. Stone, Mr. Bumpers, Mr. Sarbanes (Temporary), Mr. Moynihan (Temporary).

Committee on the Judiciary: Mr. Eastland (Temporary Chairman), Mr. McClellan, Mr. Kennedy, Mr. Bayh, Mr. Burdick, Mr. Byrd of West Virginia, Mr. Abourezk, Mr. Riegle (Temporary), Mr. Sasser (Temporary).

Committee on Labor and Public Welfare: Mr. Williams (Temporary Chairman), Mr. Randolph, Mr. Pell, Mr. Kennedy, Mr. Nelson, Mr. Eagleton, Mr. Cranston, Mr. Hathaway, Mr. Durkin, Mr. Melcher (Temporary).

Committee on Public Works: Mr. Randolph (Temporary Chairman), Mr. Muskie, Mr. Gravel, Mr. Bentsen, Mr. Burdick, Mr. Culver, Mr. Morgan, Mr. Hart, Mr. DeConcini (Temporary).

Committee on Rules and Administration: Mr. Cannon (Temporary Chairman), Mr. Pell, Mr. Byrd of West Virginia, Mr. Allen, Mr. Williams, Mr. Clark.

Committee on Post Office and Civil Service: Mr. Burdick (Temporary Chairman), Mr. Randolph, Mr. Hollings, Mr. Leahy.

Committee on the District of Columbia: Mr. Eagleton (Temporary Chairman), Mr. Inouye, Mr. Stevenson, Mr. Glenn.

Committee on Veterans' Affairs: Mr. Cranston (Temporary Chairman), Mr. Talmadge, Mr. Randolph, Mr. Stone, Mr. Durkin.

Select Committee on Small Business: Mr. Nelson (Temporary Chairman), Mr. Sparkman, Mr. McIntyre, Mr. Nunn, Mr. Johnston, Mr. Hathaway, Mr. Abourezk, Mr. Haskell, Mr. Culver.

TEMPORARY MINORITY APPOINTMENTS TO COMMITTEES

Mr. BAKER. Mr. President, I send to the desk a resolution and ask for its immediate consideration. This is the resolution to make the temporary appointments of the minority Members to committees pursuant to the resolution allotting those seats previously adopted by the Senate.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 21) making temporary minority appointments to committees.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 21) was agreed to, as follows:

S. RES. 21

Resolved, That the following shall constitute the minority party's membership on the standing committees and the Select Committee on Small Business of the Senate for the Ninety-fifth Congress (Temporary):

Committee on Aeronautical and Space Sciences: Mr. Goldwater, Mr. Domenici, Mr. Laxalt, Mr. Garn.

Committee on Agriculture and Forestry: Mr. Dole, Mr. Young, Mr. Curtis, Mr. Bellmon, Mr. Helms, Mr. Hayakawa (Temporary).

Committee on Appropriations: Mr. Young, Mr. Case, Mr. Brooke, Mr. Hatfield, Mr. Stevens, Mr. Mathias, Mr. Schweiker, Mr. Bellmon.

Committee on Armed Services: Mr. Thurmond, Mr. Tower, Mr. Goldwater, Mr. Scott, Mr. Bartlett, Mr. Wallop (Temporary).

Committee on Banking, Housing, and Urban Affairs: Mr. Tower, Mr. Brooke, Mr. Packwood, Mr. Helms, Mr. Garn, Mr. Wallop (Temporary).

Committee on the Budget: Mr. Bellmon, Mr. Dole, Mr. McClure, Mr. Domenici, Mr. Chafee (Temporary), Mr. Lugar (Temporary).

Committee on Commerce: Mr. Pearson, Mr. Griffin, Mr. Baker, Mr. Stevens, Mr. Weicker, Mr. Schmitt (Temporary).

Committee on Finance: Mr. Curtis, Mr. Hansen, Mr. Dole, Mr. Packwood, Mr. Roth, Mr. Schmitt (Temporary).

Committee on Foreign Relations: Mr. Case, Mr. Javits, Mr. Pearson, Mr. Percy, Mr. Griffin, Mr. Danforth (Temporary).

Committee on Government Operations: Mr. Percy, Mr. Javits, Mr. Roth, Mr. Weicker, Mr. Lugar (Temporary), Mr. Hatch (Temporary).

Committee on Interior and Insular Affairs: Mr. Hansen, Mr. Hatfield, Mr. McClure, Mr. Bartlett, Mr. Hatch (Temporary), Mr. Hayakawa (Temporary).

Committee on the Judiciary: Mr. Thurmond, Mr. Mathias, Mr. Scott, Mr. Chafee (Temporary), Mr. Heinz (Temporary).

Committee on Labor and Public Welfare: Mr. Javits, Mr. Schweiker, Mr. Stafford, Mr. Laxalt, Mr. Danforth (Temporary).

Committee on Public Works: Mr. Stafford, Mr. Baker, Mr. McClure, Mr. Domenici, Mr. Heinz (Temporary).

Committee on Rules and Administration: Mr. Hatfield, Mr. Griffin, Mr. Tower (Temporary).

Committee on Post Office and Civil Service: Mr. Stevens, Mr. Bellmon.

Committee on the District of Columbia: Mr. Mathias, Mr. Bartlett, Mr. Garn.

Committee on Veterans' Affairs: Mr. Hansen, Mr. Thurmond, Mr. Stafford.

Select Committee on Small Business: Mr. Javits, Mr. Weicker, Mr. Bartlett, Mr. Laxalt, Mr. Packwood.

STATEMENT ON TEMPORARY COMMITTEE ASSIGNMENTS

Mr. ROBERT C. BYRD. For the record, Mr. President, I wish to state that those committees that are not mentioned in the various resolutions which have been submitted just now are continuing bodies under the precedents of the Senate and may continue to do business as such continuing bodies although not mentioned in the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. CRANSTON. Would it not be advisable also to state clearly for the record that this does not constitute formal organization of the committees and, therefore, grandfathering and all other precedents are not affected by this action.

Mr. ROBERT C. BYRD. Precisely. I am glad the Senator made that statement.

Mr. CRANSTON. I thank the Senator.

COMMENDING PRESIDENT AND MRS. FORD

Mr. ALLEN. Mr. President, I am offering today to the Senate an opportunity to acknowledge the exemplary conduct of Gerald R. Ford and Betty Ford during the time they have occupied the White House. Certainly President and Mrs. Ford merit that acknowledgment and deserve our commendation for their dedicated public service to the Nation. Certainly they have maintained the highest standards of honor and honesty throughout their entire career of public service and especially as President and First Lady.

The President came into office as the first President in our history who first became Vice President in accordance with the 25th amendment to the Constitution of the United States. He came into office under circumstances which demanded consistent good judgment, patience, and courage. He was not found wanting and carried out the duties of his new office in a manner which rapidly restored confidence in the executive branch of our Government and brought the country from crisis to stability.

President Ford was defeated in the general election, but none of us doubt that he and Mrs. Ford leave the White House with the sincere esteem of the American people and with tremendous popularity.

Gracious in defeat, President Ford has been extremely cooperative with representatives of the incoming administration in implementing an orderly transition. Mrs. Ford, too, has given good counsel and assistance during the transition and has consistently shown herself to be a lady inbred with the best qualities of compassion, understanding, and good humor.

Mr. President, I believe that President and Mrs. Ford have in all things served our country well and, therefore, that we ought now on behalf of the people of the United States to congratulate them and to thank them for a job well done.

Mr. President, on behalf of Mr. HELMS and myself, I send to the desk a Senate resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 22) commending the President and Mrs. Ford on their exemplary conduct and dedication to public service.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 22) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 22

Resolved, That, Whereas Gerald R. Ford President of the United States, is the first President in our history who first became Vice-President in accordance with the terms of the 25th Amendment to the Constitution of the United States;

Whereas President Ford assumed the duties of his office under difficult and trying conditions which demanded the exercise of good judgment, patience, and courage;

Whereas President Ford in the conduct of the Presidency has done much to restore confidence in government and has carried out the responsibilities of his office in a manner meriting the thanks and appreciation of the people of the United States and of their representatives in Congress;

Whereas President and Mrs. Ford leave the White House with the high regard of the American people and with tremendous popularity with them; and

Whereas President and Mrs. Ford were gracious in the President's defeat in the Presidential election and extremely cooperative with the incoming administration in the transition period;

Now therefore, the Senate of the United States congratulates and commends President and Mrs. Ford on their exemplary conduct as President and First Lady and for their dedicated public service to the Nation during their entire career of public service.

SEC. 2. The Secretary of the Senate is directed to transmit a copy of this resolution to President Ford.

WISHING THE NEW ADMINISTRATION WELL

Mr. ALLEN. Mr. President, we have just begun the third century of our country's existence and in a matter of a few days a new President will be inaugurated to assume the heavy responsibility of directing the executive branch of our Government. He will face abroad a troubled world racked by political uncertainty and periodic war. He will face at home significant economic and social dislocation, the prospect of continued unemployment and inflation, and a worsening shortage of energy resources. His tasks are unenviable and will demand great foresight, courage, and—to some extent—forbearance. His decisions, always difficult will in their outcome be critical in directing the affairs of the Nation and in guiding Americans toward desirable national goals.

Mr. President, I believe that we are all mindful of the ability and qualities of leadership of the President-elect of the United States, Gov. Jimmy Carter, and that we have faith that as President he will always seek to preserve the freedoms now enjoyed by Americans and consistently put foremost in his decisions the national interest.

Mr. President, at the beginning of our third century the time is certainly appropriate to express our confidence in the incoming President and to extend to him our sincere best wishes for his Presidency and our hope that his administration will set standards of good government by which in the next one hundred years future Chief Executives will be judged.

Mr. President, on behalf of Mr. HELMS and myself, I send another resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 23) to extend to the President-Elect of the United States, and to all who will serve in authority in his administration, the best wishes of the Senate, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of theresolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 23) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 23

Resolved, That whereas Governor Jimmy Carter will be inaugurated on January 20, 1977, as the first President of the United States inaugurated in the third century of our country's existence;

Whereas upon his inauguration the new President and his Administration will face difficult decisions of critical importance in directing the affairs of the Nation and in guiding our people toward desirable national goals; and

Whereas the Senate is mindful of the ability and qualities of leadership of the President-elect of the United States and has faith that as President he will seek to preserve to the people their freedoms in a

troubled world and will always put foremost the interest of our Republic;

Now therefore, the Senate hereby extends its sincerest best wishes to Governor Jimmy Carter, the incoming President of the United States, and to all those who will serve in his Administration.

SEC. 2. The Secretary of the Senate is directed to transmit a copy of this resolution to Governor Jimmy Carter.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER EXTENDING PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at 2 p.m. today there be an extension of the period for the transaction of routine morning business, with statements limited therein to 10 minutes, such period not to extend beyond 30 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECEIPT OF BILLS, RESOLUTIONS, AND STATEMENTS UNTIL 5 P.M. TODAY

Mr. CRANSTON. Mr. President, I ask unanimous consent that all Senators may have until 5 p.m. today to introduce bills, resolutions, and comments thereon, and any other statements they wish to put in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered. The time will be extended until 5 p.m.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Marks, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore (Mr. LEAHY) laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGE FROM THE PRESIDENT RECEIVED DURING ADJOURNMENT—PM 3

Under authority of the order of the Senate of October 1, 1976, the Secretary of the Senate, on November 5, 1976, received a message from the President of the United States, which was referred to the Committee on Public Works, the Committee on Armed Services, the Committee on Labor and Public Welfare, the Committee on Finance, and the Committee on the District of Columbia, jointly, pursuant to the order of January 30, 1975, as follows:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I am withdrawing one previously proposed rescission and reporting three new deferrals. In addition, I am reporting revisions to two deferrals previously transmitted.

The withdrawal is for the highway crossing federal projects program of the Federal Highway Administration. The three new deferrals, totaling $980.8 million affect programs of the Departments of Defense, Health, Education, and Welfare, and the Treasury. The revised deferrals are for programs in the Department of Health, Education, and Welfare and reflect routine increases in the amounts previously deferred.

The details of the rescission withdrawal and each deferral are contained in the attached reports.

GERALD R. FORD.

THE WHITE HOUSE, *November 5, 1976.*

MESSAGE FROM THE PRESIDENT RECEIVED DURING ADJOURNMENT—PM 4

Under authority of the order of the Senate of October 1, 1976, the Secretary of the Senate, on December 3, 1976, received a message from the President of the United States, which was referred to the Committee on Appropriations, the Committee on the Budget, the Committee on Armed Services, the Committee on Foreign Relations, the Committee on Finance, and the Committee on Labor and Public Welfare, jointly, pursuant to the order of January 30, 1976, as follows:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report four new deferrals of funds totalling $3.7 billion. Funds deferred were appropriated for the Department of Labor, two International Security Assistance programs, and ACTION.

In addition, I am reporting revisions to two deferrals previously transmitted. The Department of Defense military construction deferral is increased by $259.4 million and a General Revenue Sharing deferral in the Department of the Treasury is increased by $11.1 million.

The details of each deferral are contained in the attached reports.

GERALD R. FORD.

THE WHITE HOUSE, *December 3, 1976.*

MESSAGE FROM THE PRESIDENT RECEIVED DURING ADJOURNMENT—PM 5

Under authority of the order of the Senate, the Secretary of the Senate, on January 7, 1977, received a message from the President of the United States, which was referred jointly to the Committee on Appropriations, the Committee on the Budget, the Committee on Commerce, the Committee on Labor and Public Welfare, the Committee on Government Operations, the Committee on Banking, Housing and Urban Affairs, the Committee on Foreign Relations, and the Committee on Interior and Insular Affairs, pursuant to the order of January 30, 1975, as follows:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report four new routine deferrals of funds totalling $685.0 million. The deferred funds were provided for the U.S. Railway Association and the U.S. Information Agency.

In addition, I am reporting routine revisions to five deferrals previously transmitted. They relate to programs of the Departments of Commerce and Health, Education, and Welfare, the General Services Administration, and the American Revolution Bicentennial Administration. The combined effect of the revisions is to increase the amount deferred by $130,000.

The details of each deferral are contained in the attached reports.

GERALD R. FORD.

THE WHITE HOUSE, *January 7, 1977.*

THE UNITED STATES ENERGY PROBLEM—MESSAGE FROM THE PRESIDENT—PM 6

The ACTING PRESIDENT pro tempore (Mr. LEAHY) laid before the Senate the following message from the President of the United States, which was referred to the Committee on Banking, Housing, and Urban Affairs, the Committee on Finance, the Committee on Interior and Insular Affairs, the Joint Committee on Atomic Energy, and the Committee on Public Works, jointly, by unanimous consent:

To the Congress of the United States:

Three years have now passed since the Arab oil embargo demonstrated that the Nation had become overly dependent on other countries for our energy supplies. We have made progress in dealing with our energy problems but much more must be done if we are to achieve our objective of assuring an adequate and secure supply of energy at reasonable prices.

Action by the Congress is vitally important in the coming year on a number of matters affecting energy supply and demand. The outcome of that action will affect the Nation's security, economic strength and role in world affairs. Decisions made during this critical period will affect the health, welfare, quality of life and freedom of choice of our people for years to come.

A new Congress and change in Administration provide an appropriate occasion to review our energy situation, to summarize and share the knowledge that has been gained from analysis and debate over the past two years, and to outline the remaining need for action.

I am pleased that we have made a good start towards a comprehensive national energy policy; that we have taken major steps forward on programs to conserve energy, increase domestic energy production, develop strategic petroleum reserves, and develop new technology; and that our imports are less today than they would have been had we not begun

taking the steps I outlined in my State of the Union address two years ago.

But our imports are higher today than they were three years ago, and we have not yet as a Nation faced up to many of the hard decisions and choices that are necessary before we can achieve our energy objectives.

The lack of better progress is regrettable but I believe the reasons for it are quite clear:

—First, the real nature of the Nation's energy problem and the implications of leaving it unresolved are not fully understood or appreciated by many people.

—Second, many of those who recognize the problem and the implications of not solving it have looked for easy solutions. This has led often to proposals which:

Promise far more than can be delivered; or

Expand significantly the role of the Federal Government.

We are now beginning to recognize more clearly the dangers of a greatly expanded Federal role in energy. We also now realize that other "easy" answers are turning out to be impractical, ineffective, or oversold.

FUNDAMENTAL ISSUES AND CHOICES

The decisions which must be made are difficult and the implications of the choices are far reaching. Thus, the Congress and the public should have the best possible understanding of the fundamental issues and choices that are involved in my proposals and in the proposals that will be forthcoming from the new Administration and Congress. There are five matters that deserve special attention:

—The high cost to the Nation of delay in solving our energy problem.

—The illusions and false hopes that are involved in some of the "easy" answers that have been proposed.

—The dangers of expanding the Federal role in energy.

—The need to recognize the interdependence of the U.S. and other consumer nations in energy matters.

—The necessity of facing up to the hard choices that must be made in order to achieve a balance among our Nation's security, energy, economic, consumer price, and environmental objectives.

HIGH COST OF DELAY IN SOLVING OUR ENERGY PROBLEM

A better understanding of our energy problem and the high cost of delay in solving it should help restore the sense of urgency that was lost when the embargo ended, the gasoline lines disappeared, and an adequate supply of most forms of energy became available—though at higher prices.

OUR ENERGY PROBLEM

The principal energy problem now facing the United States is our excessive and growing dependence on imported oil from a relatively few foreign nations that own the majority of world oil reserves and have the ability to control world oil prices and production. We are also faced with a problem of shortages of natural gas in some areas. This problem will become more serious this winter if unusually cold weather continues and will grow each year as production and interstate sales decline—resulting in job losses and economic dislocation.

Our situation is the result of several factors. For example, our economy and style of life—neither of which can be altered quickly—have been built upon cheap and abundant energy. Low prices, resulting from government regulations and policies, and heightened environmental concerns encouraged excessive reliance on oil and natural gas, rather than coal which we have in plentiful supply. This led to wasteful and inefficient uses of oil and gas.

Our domestic production of oil and natural gas peaked in the early 1970's and has been declining steadily as cheap, easily developed reserves have dwindled. In the early 1980's, oil and natural gas from Alaska and the Outer Continental Shelf—our last frontiers—will help offset the decline in production from on-shore areas. But, overall, domestic oil and gas production will again decline precipitously unless higher prices are available to cover the costs of developing resources which are not now economically feasible to produce.

Meanwhile, our energy demands are increasing to meet the needs of a growing economy. We are not expanding the use of coal and nuclear energy fast enough as substitutes for oil and gas, where this is possible, or to meet growing energy requirements. Instead we have turned to imports, and imports will continue to grow as we face declining production and depletion of oil and gas reserves.

THE COSTS OF DEPENDENCE

The real price paid for our growing dependence on imported oil is our vulnerability to significant economic and social disruption from the interruption of oil imports. Apart from the inconvenience experienced by millions of people, the 1973–74 embargo and the resulting higher prices caused a loss of about 500,000 jobs and approximately $20 billion in our Gross National Product. The sudden four-fold increase in OPEC oil prices contributed significantly to inflation. Since 1974 our dependence on imports, particularly from Arab nations, has grown by a million barrels per day, so that an interruption of supply today would be even more disruptive of our economy than the 1973–74 embargo.

Another cost of energy dependence is the outflow of U.S. dollars to pay for imported oil, totalling about $34 billion in 1976 or $160 for each American, eleven times that in 1972.

Still another cost is the limitation on our freedom of action in international affairs due to our vulnerability to the threat of another interruption.

REALISTIC ENERGY GOALS

In my first State of the Union Message two years ago, I outlined a comprehensive energy program for the Nation with goals of:

—Halting our growing dependence on imported oil.

—Attaining energy independence by 1985 by achieving invulnerability to disruptions caused by oil embargoes, by reducing oil imports to between 3 and 5 million barrels per day with an accompanying ability to offset any supply interruption with stored petroleum reserves and emergency standby measures.

—Mobilizing our technological capability and resources to supply a significant share of the free world's energy needs beyond 1985.

These goals do *not* mean that we should seek to eliminate all energy imports, because generally it will be in the Nation's best interest to continue importing energy when it can be obtained at lower cost—as long as we have the ability to withstand interruptions of supply from insecure sources.

The goals *do* mean that we should reduce and then eliminate our vulnerability. In the longer term, we should better use our resources and technological capability to regain our ability to assure the reasonableness of energy prices.

Whether the date I set for achieving energy independence and the level of imports I proposed are realistic has been the subject of considerable debate. I believe the goals could be attained if the Congress approved the critical legislation I proposed, but that is not the major point. The essential point now is that we recognize that our excessive dependence and vulnerability are costly and that it is in the Nation's best interest to solve the problem as soon as possible.

AVOIDING ILLUSIONS

A number of well-intentioned proposals have been advanced for dealing with our energy problems which, when evaluated, are found to have far less potential or merit than is claimed by their proponents. Four such proposals warrant special attention: advanced energy technologies, energy conservation in lieu of increased production, abandoning nuclear fission energy or coal, and oil company divestiture. All four are likely to receive Congressional consideration this year.

CONTRIBUTION OF ADVANCED TECHNOLOGIES

There are repeated claims that fusion, solar or geothermal energy, or some other advanced technology, will soon provide a virtually risk-free answer to our energy needs. Such claims warrant and have been given very careful consideration because new technological developments have helped us solve many problems in the past.

There are three common myths about fusion, solar and geothermal energy:

—That major contributions to our energy supplies can be expected soon from these sources.

—That there are no serious economic, safety, technological or environmental problems to be overcome before these technologies are available for widespread use.

—That the remaining problems can be quickly resolved by greatly increasing Federal funding for R&D.

The facts are that major economic, safety and environmental problems must be solved and major technological breakthroughs are needed before these emerging technologies will be available for widespread commercial use.

Practical and economic applications are already available in the case of en-

ergy from geothermal steam. However, geothermal steam resources are geographically limited, and major technical, environmental and economic hurdles must be overcome before other sources of geothermal energy will be available for practical application.

Heating with solar energy is expected to become economically competitive soon in some areas with electrical heating by electricity—but not by oil and gas. Costs will have to be reduced substantially before solar heating and cooling systems will be competitive for widespread use. Major breakthroughs are needed before fusion and solar energy will produce economical electric power. Costs must be reduced and problems of safety and environmental impact must be solved.

Advanced technologies cannot contribute significantly to our energy supply in the near or mid-term. Even with intensive efforts to achieve necessary breakthroughs, solar, geothermal and fusion energy are expected to provide no more than one percent of our total energy supplies by 1985 and no more than five-seven percent by the year 2000. Until these advanced technologies are available and are acceptable from the standpoint of cost, safety and environmental impact, we must rely on resources and technologies which are available.

Federal funding for the development of advanced technologies has been increased substantially over the past two years in my budgets—to the point where Congressional add-ons above my requests generally cannot be used productively. When major breakthroughs are required, the necessary ingredients are ideas and time. Large funding increases are likely to be wasteful and often merely contribute to overly optimistic expectations.

ENERGY CONSERVATION IN LIEU OF PRODUCTION

There are some who believe that our energy needs for a growing population and expanding economy and workforce can be satisfied by eliminating wasteful and inefficient uses of energy. They point out correctly that the ready availability of cheap energy in the past tended to encourage uses of energy which now are wasteful.

There is no question but that energy conservation can and must contribute to the solution of our energy problems. In many cases it will be cheaper, more efficient, and involve less environmental impact, to reduce energy waste than it will be to produce a comparable amount of new energy. We have begun major efforts in energy conservation, and progress is being made in reducing growth in energy consumption. However, it takes time to achieve results from energy conservation because energy-intensive plants and equipment and consumer products (such as automobiles and appliances) will only be replaced gradually as they wear out.

Growth in our energy demands simply cannot be eliminated without severe economic impact. We must have *both* energy conservation and sharply increased energy production if we are to meet the needs for energy in a growing economy. To rely solely on energy conservation would soon mean a lower standard of living for all, and insufficient energy to keep people employed in productive and meaningful work.

ABANDONING COAL ENERGY OR NUCLEAR FISSION

Some believe that we should not continue or expand the use of coal and others have the same view about nuclear energy. But a careful look indicates that we do not have a *choice* between increasing the use of coal or nuclear energy. Instead, we must increase the use of *both* coal and nuclear energy until more acceptable alternate energy sources are available. Even with strong efforts to conserve energy, and increased efforts to produce domestic oil and natural gas, we must increase the use of both coal and nuclear energy if we are to meet the demands for energy for a growing economy. The only alternative is to increase our growing dependence on imported oil.

One example will illustrate the point: Nuclear energy now provides about nine percent of our electrical requirements. If this nuclear energy were not available and we substituted imported oil, our imports would increase by about one million barrels of oil per day. If we were to substitute coal for existing nuclear energy, additional annual production of 100 million tons would be required.

DIVESTITURE

Some suggest that our energy problem would be relieved by divestiture of the major oil companies—either by barring investments in other energy sources (horizontal divestiture) or by barring integrated operations whereby one company engages in production, refining, and marketing activities (vertical divestiture). They claim that divestiture would increase competition and thereby reduce petroleum prices and lead to a more intensive pursuit of alternative domestic energy resources and alternative energy technologies.

Experience has demonstrated important advantages from vertical integration in commercial and industrial activities in terms of efficiency of operation. Vertical divestiture may merely mean that petroleum products pass through the hands of more middle men—resulting in higher consumer costs. Horizontal integration has helped make private capital and managerial talent available to develop other alternative energy resources which will be used to supplement our declining oil and natural gas resources.

Proponents of divestiture have yet to present concrete evidence that divestiture would either increase domestic energy production or provide cheaper and more secure energy supplies. Such evidence should be required and weighed carefully along with the evidence against divestiture before the Congress acts.

DANGERS OF EXPANDING THE FEDERAL ROLE IN ENERGY

Much of the dispute over energy legislation has resulted from differing views as to the appropriate role of the Federal Government.

The primary responsibility for providing the Nation's energy needs has been and should continue to rest with the private sector. The amount and forms of energy that are produced and used depend upon literally millions of decisions reached daily by individuals and organizations throughout the country. Since energy is such a pervasive component of our economy and our daily lives, special care must be taken to assure that Federal actions affecting energy—including changes in the Federal role—will help solve the problem rather than make it worse or cause new problems.

The Congress should give particular attention to the growing concern throughout the country about the size and cost of Government, the extent of Government intrusion in individuals' activities, and the burden of regulations which restrict freedom of choice. Unfortunately, the people who develop Government rules and regulations often do not understand adequately the conditions they are regulating nor appreciate fully the impact of their decisions on the millions of people who are affected.

The question of the proper role of the Federal Government in energy has become important in the case of:

—Controls over decisions that would normally be made in the marketplace.
—Mandatory conservation measures.
—Resource exploration and energy production.
—Energy research, development, and demonstration.

GOVERNMENT CONTROLS OR MARKETPLACE DECISIONS

Many legislative proposals will involve the question of whether there should be greater reliance on decisions made in the marketplace or upon regulations, standards, and controls developed by the Federal Government.

Recent experience has again demonstrated that Federal price and allocation controls on energy ultimately work against the best interests of consumers because they reduce incentives to produce new supplies, they reduce competition and they reduce freedom of choice. For example, Federal price controls on natural gas have been a major factor leading to declining production and to wasteful and inefficient use of this resource. Also, controls on crude oil have contributed to a decline in production.

Federal price and allocation controls inevitably mean that the Government must employ people to develop, issue, and revise regulations; to sit in judgment on requests for exceptions when the regulations do not fit real world circumstances; and to enforce the regulations. Federal controls mean that millions of decisions by producers, distributors, wholesalers, retailers, *and* consumers must conform with Government-developed regulations—even when the people directly involved know that another course of action makes more sense and would still be in the national interest.

The principal alternative to Federal regulation and controls is to allow prices and allocation of energy supplies to be determined in the marketplace—with decisions made by individuals most directly affected. In some cases, avoiding or eliminating price controls can mean somewhat higher consumer prices in the short run. But the higher prices help

stimulate new production and cut down on wastefulness. Market decisions are also made faster and more efficiently, and often result in cheaper prices than if the government made the decision. For example, the higher prices that will be sult from removing price controls from new natural gas would be less costly for consumers than the expense of switching to higher priced alternative fuels.

MANDATORY CONSERVATION MEASURES

Most of the problems resulting from Federal price controls also result from Federal attempts to dictate specific actions by individuals to conserve energy. The prospect of higher energy prices already is stimulating major efforts by individuals and organizations throughout the country to use existing products and develop new means to reduce wasteful and inefficient uses of energy. Such voluntary action by consumers is far preferable to mandatory measures selected and enforced by a larger and more obtrusive Government.

RESOURCE EXPLORATION AND ENERGY PRODUCTION

The Congress will again be faced with the question of whether the Federal Government should be directly involved in energy resources exploration, development, production and refining activities.

Some argue that such activities can be performed better by the Federal Government, that it is necessary to have a Government "standard" to evaluate private industry performance and prices, or that subsidized Government performance is necessary to hold down consumer prices. Others argue that the Government should itself explore Federal lands to better ascertain the value of lands that it leases for the production of energy resources.

In fact, the Federal Government can seldom perform these functions faster, more efficiently or at lower cost than private industry. There is no convincing evidence that the competitive leasing system now used does not provide a fair return and adequately protect the public interest.

Despite this, proposals undoubtedly will continue to surface which would expand the size and role of the Federal Government to include exploration, production and related activities. Accordingly, the best course of action will be to insist upon hard facts to support the proposal and close scrutiny of each measure to see whether the advantages outweigh the disadvantages.

ENERGY RESEARCH, DEVELOPMENT AND DEMONSTRATION

Still other questions before the Congress involve the Federal role and funding for developing, demonstrating and promoting the use of new technologies for energy production and conservation.

I believe that Federal funding is necessary and appropriate for the development of new energy technologies which show promise of providing a significant and economical way of producing or conserving energy—but only when such technologies would not be developed by the private sector. During the past two years, I have requested major increases in funding for energy R&D to carry out this policy.

However, continued vigilance is needed to prevent the use of Federal funds to duplicate or displace funds which industry would otherwise spend, and to insure that the Federal Government does not fund efforts which industry has rejected for lack of merit.

In addition, new energy technologies must find acceptance and application in the private sector—unlike the situation in military and space exploration programs where the Federal Government is the only customer. This presents a special challenge because those responsible for managing Federal funds for energy R. & D. often are not in a good position to determine which technologies are likely to meet success in the private sector.

The Federal Government is not well equipped to carry out commercialization, marketing, promotional, and technical assistance for particular energy technologies, products, and services. Such activities should be left to private industry.

At present, the Federal activities that would contribute most to the resolution of our energy problem are:

—Adopting changes in laws, policies, and programs that will lead to a framework within which individuals and organizations outside the Federal Government can make efficient, effective, and equitable decisions about energy. Laws and policies which discourage energy production or energy conservation should be modified.

—Providing carefully targeted support for energy R. & D.

—Providing incentives and assistance where necessary—such as tax relief—in order to encourage energy conservation and aid low-income people in adjusting to higher energy prices which are necessary to generate new, adequate supplies.

INTERDEPENDENCE OF THE U.S. AND OTHER CONSUMER NATIONS

The 1973–74 embargo, and the impact of sharply increased prices for OPEC oil, demonstrated clearly that the interests of the United States are tied closely to those of other nations which are net importers of energy. Events in the last three years have demonstrated further that the economies of all nations are interrelated and that no nation can be truly economically independent in the world today. Many of our allies, and particularly the developing countries, do not have major undeveloped energy resources and therefore are even more dependent upon imported energy than is the United States.

Much progress has been made in strengthening energy cooperation among the industrialized nations through the International Energy Agency. Together we have coordinated efforts to reduce our collective vulnerability by establishing a long-term program for conservation and development of new energy sources, and an energy-sharing program to safeguard against supply interruptions. It is in the best interests of the United States to continue to work with and assist other energy-consuming countries in meeting their energy needs—by reinforcing their conservation efforts, accelerating development of conventional and new energy sources, and encouraging the application of practical new energy technologies.

Such efforts will help to achieve our objective over the long term of a better equilibrium between energy supply and demand in the world, so that no one group of nations will be able to impose its will on others. Unless we are willing to cooperate with others, and provide adequate assistance in this area, continued dependence by many nations on a few countries for energy supplies will remain a major source of world political instability, uncertainty, and economic hardship.

At the same time, of course, we must continue our efforts to strengthen relations between oil-importing and exporting nations, recognizing that cooperation is important to the future well-being of both.

ACHIEVING BALANCE AMONG CONFLICTING OBJECTIVES

In recent years, we have been faced more and more with the dilemma that actions taken to achieve one important objective conflict with efforts to achieve other objectives. For example, we learned that tough standards and deadlines applied in the early 1970's to reduce pollution from automobiles and improve air quality resulted in lower gasoline mileage and higher gasoline consumption, poorer vehicle performance and higher consumer costs.

Conflicting objectives are becomng more and more apparent as we recognize that the easy solutions are illusions and that there are major dangers in expanding the Federal role. The Nation must, therefore, face up to the task of achieving a balance among conflicting objectives involving energy.

LOW CONSUMER PRICES VS. ADEQUATE AND SECURE ENERGY SUPPLIES

The reality that must be faced which appears to cause the most difficulty for elected officials is the inevitability of higher energy prices. Energy prices, particularly for consumers, will increase in the future principally because prices in the past have been held artificially low through Government controls, because cheaper domestic energy resources are beng depleted, because past energy prices have not reflected the cost of environmental protection, and because foreign nations are charging more for the energy that they export. There simply are no cheap energy alternatives. Higher prices will continue to be a major factor in obtaining adequate and secure energy supplies.

This difficulty is compounded for elected officials because it takes a long time in energy matters for our actions to show results—a condition that is not readily accepted in a Nation that prefers quick results. The prospect of higher prices will provide the incentive for increased energy production but it then takes up to five years, for example, to bring a new off-shore oil well into production and up to ten years to bring a new nuclear electric generating plant on line.

ENVIRONMENT VS. ENERGY

An equally difficult problem is that of finding the best possible balance between

our energy and environmental objectives. Our environmental objectives are also important in protecting health and welfare, improving our quality of life, and preserving natural resources for future generations. On the other hand, an adequate energy supply is essential to our objectives for a strong economy, national defense and role in world affairs, and in achieving a better life for all.

The conflict between energy and environmental objectives will require attention when the Congress considers amendments to the Clean Air Act, changes in laws governing the development of Federally-owned energy resources, improvements in the processes for siting and approving energy facilities, and controls on domestic energy production activities such as the surface mining of coal.

More specifically, air quality requirements forced shifts away from the use of domestic coal to the use of oil and natural gas which are now in short supply. Some air quality requirements—particularly emission standards set by states—are far tighter than necessary to meet standards which have been set to protect human health.

Efforts are now underway to reverse this trend but it is clear that increased production and utilization of domestic coal in the short term requires either billion dollar investments in controversial control equipment or some relaxation of existing air quality requirements. Most such requirements were set before we were aware of our energy problems, and often without sufficient regard to energy or consumer price impact. They often prevent substitution of coal resources for oil and gas and prevent construction of new coal producing and burning facilities.

As another example, concerns about environmental protection and reclamation requirements for surface mining activities led to legislation—twice vetoed—which would have imposed unnecessarily rigid requirements, cut domestic coal production and employment and led to even greater reliance on imported oil. Under these bills, Federal regulations and enforcement activities—which would contribute to a larger more cumbersome Federal Government—would have supplanted State laws and enforcement activities which are now in place and which require reclamation as a condition of mining.

LIMITING GROWTH

The concept of limiting growth and development is an important ingredient in some efforts to halt increased domestic energy production or to develop and use newer energy technologies. Limits on growth and development may be necessary in particular areas, but I oppose strongly the concept of limiting growth as an objective in itself. For the Nation, I continue to believe that our best hope for increasing the standard of living and quality of life for all our people is to expand and strengthen our economy and, in this way, create meaningful and productive jobs for all who are willing and able to work. The energy policies and goals that I have advocated do not require limiting our economic growth below historic rates.

ELIMINATING RISK

In some cases, attempts to increase domestic energy production—particularly from nuclear energy and coal and oil and gas resources from Outer Continental Shelf—are met with demands that virtually all safety and environmental risks be eliminated.

There should be no disagreement that major efforts are necessary to protect human health and the environment. For example, strong efforts have already been made in the case of nuclear energy and an excellent record of safety and minimum environmental impact has been achieved. However, it must be recognized that there is no practical way of completely eliminating all risks. Further, each additional precaution adds cost in terms of reduced supplies or higher prices. Risk levels that have already been achieved in many energy producing activities are often far lower than those readily accepted in other human activities.

Because different Committees of Congress have responsibility for competing objectives, it is especially difficult to achieve a satisfactory balance among our national objectives in new legislation. This will be a continuing problem in the new Congress and I can only urge that each measure affecting energy supply and demand, which also involves other objectives, be evaluated carefully to assure that the resulting costs, risks and benefits are truly in the national interest.

THE NEED FOR SUBSTANTIVE LEGISLATION AFFECTING ENERGY

We have made significant progress over the past two years toward establishing the framework of law and policies that are needed to permit decisions and actions that will help solve our energy problem.

Nine of the proposals that I submitted have been enacted into law. However, there remains a long list of requirements for early Congressional action.

HIGHEST PRIORITY

Because of the large number of legislative proposals that need action, I want to make clear that I believe highest priority should be given to measures which:

—Remove Federal price regulation from new natural gas supplies. This action is crucial to increasing domestic production and reducing wasteful and inefficient uses.

—Revise domestic crude oil price controls to allow greater flexibility in establishing a pricing formula that will encourage increased domestic production and assist in phasing out controls. This action is needed to overcome problems in the current law and to reduce market distortions that have resulted.

—Make clear our determination to expand capacity in the United States, principally through the efforts of private industry, to enrich uranium needed to provide fuel for nuclear power plants. This action is necessary to permit increased use of nuclear power in the U.S. and to assure other nations that we will be a reliable supplier of uranium enrichment services—a step that is critical to our nuclear non-proliferation objectives.

—Amend the Clean Air Act to:

Change the statutory requirements for meeting auto emission standards so that there can be a better balance among our environmental quality, energy, economic and consumer price objectives.

Provide flexibility in meeting national air quality standards applicable to power plants and major industrial facilities so that the use of coal can be continued and expanded, and so that new energy-producing facilities can be constructed in selected areas that have not yet attained national air quality standards.

Remove the requirement imposed by the courts for preventing significant deterioration of air quality in areas already meeting air quality standards—until information is available on the impact of such actions and informed decisions can be made.

OTHER IMPORTANT PROPOSALS

In addition to the above select list, favorable action is needed from the Congress on legislation in all the following areas:

NATURAL GAS

Temporary emergency legislation to allow pipelines and high priority users to obtain intrastate gas at unregulated prices for limited periods—to help cope with shortages and curtailments.

OIL

Authorization for the President to impose fees and taxes as standby emergency measures to reduce energy consumption in the event of another embargo—to avoid the inefficiencies and burdens of mandatory conservation measures in such emergencies.

An Oil Spill Liability Act—to establish a comprehensive system of liability and compensation for oil spill damage and removal costs.

Authorization for private competitive exploration and development of the National Petroleum Reserve in Alaska.

COAL

Extension of the authority to require utilities and other major fuel-burning installations to convert from oil and gas to coal.

Changes in provisions of the Coal Leasing Amendments Act of 1976 which unnecessarily delay or restrict leasing and development of coal on Federal lands.

Authority for the use of eminent domain in the construction of coal slurry pipelines and authority for the Secretary of the Interior to issue certificates of public convenience and necessity to expedite slurry pipeline construction.

NUCLEAR ENERGY

Authority for the Energy Research and Development Administration to enter into cooperative agreements with firms wishing to finance, build, own and operate uranium enrichment plants—to assure the availability of required capacity and avoid the need for billions of dollars in Federal outlays when the private sector can provide the financing.

Authority to increase the price for uranium enrichment services performed in Government-owned plants—to assure a fair return to the taxpayers for their investment, to price services more nearly

comparable to their private sector value, and to end the unjustified subsidy by taxpayers to both foreign and domestic customers.

Criteria for the control of nuclear exports which is necessary to round out the comprehensive nonproliferation, export control, reprocessing evaluation and waste management program I outlined in my October 28, 1976, statement on nuclear policy.

Reform the nuclear facilities licensing process by providing for early site review and approval and encouraging standardization of nuclear facility design.

BUILDING ENERGY FACILITIES

Establishment of an Energy Independence Authority (EIA), a new Government corporation, to assist private sector financing of new energy facilities.

Legislation to encourage states to develop comprehensive and coordinated processes to expedite review and approval of energy facilities siting applications, and to assure the availability of sites.

ENERGY CONSERVATION

Tax credit for homeowners to provide up to $150 for purchasing and installing insulation in existing residences.

Reform of rate setting practices applicable to public utilities—to expedite consideration of proposed rate changes and assure that rates reflect full costs of generating and transmitting power.

1978 BUDGET REQUESTS

My 1978 Budget which will soon be forwarded to the Congress will include major new funding to:

—Continue and expand our extensive program of energy research and development in cooperation with private industry which is directed toward new technologies for conserving energy and for producing energy from fossil, nuclear, solar and geothermal sources.

—Implement the Early Storage Program as part of the Strategic Petroleum reserves which will provide up to 500 million barrels of oil for use in emergency situations such as an embargo.

—Implement my comprehensive nuclear policy statement issued on October 28, 1976.

—Continue ERDA's development program on the liquid metal fast breeder reactor—to resolve any remaining environmental, safety and safeguards questions—so that this technology will be available to bridge the gap until advanced technologies can make their contribution to our energy needs.

—Provide increased operating funds for other Federal energy activities.

I urge the Congress to approve these funding requests.

REORGANIZATION OF FEDERAL ENERGY ACTIVITIES

Under the provisions of the Energy Conservation and Production Act of August 1976, I am called upon to make recommendations to the Congress with respect to the reorganization of Federal energy and natural resource activities. At my direction, a major study of alternatives had already been undertaken in May 1976 under the leadership of the Energy Resources Council and the Office of Management and Budget.

I have reviewed the findings and recommendations from the study. Within the next few days, I will forward my recommendations to the Congress.

TIME TO ACT

The Nation has waited far too long for completion of a sound and effective national energy policy. In many cases, the issues are complex and controversial, the decisions are tough to make—particularly because the right decisions will be unpopular in the short run. The costs of continued energy dependence are far too great for further delay.

The Congress *can* act. It is a matter of organizing itself to make the tough decisions and choices and moving ahead with the task. I urge the Congress to weigh the alternatives carefully and proceed promptly.

GERALD R. FORD.

THE WHITE HOUSE, *January 7, 1977.*

Mr. ROBERT C. BYRD. I ask unanimous consent that a message from the President, received today, relative to energy, be jointly referred to Banking, Housing and Urban Affairs; Commerce; Finance; Interior and Insular Affairs; the Joint Committee on Atomic Energy; and Public Works.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

INTERNATIONAL FISHERY AGREEMENT BETWEEN THE UNITED STATES AND ROMANIA—MESSAGE FROM THE PRESIDENT—PM 7

The ACTING PRESIDENT pro tempore (Mr. LEAHY) laid before the Senate the following message from the President of the United States, which was referred to the Committee on Commerce, the Committee on Foreign Relations, and the Committee on Armed Services, by unanimous consent:

To the Congress of the United States:

In accordance with the Fishery Conservation and Management Act of 1976 (P.L. 94-265; 16 U.S.C. 1801), I transmit herewith a governing international fishery agreement between the United States and the Socialist Republic of Romania, signed at Bucharest on November 23, 1976.

This Agreement is significant because it is one of a series to be negotiated in accordance with that legislation. I urge that the Congress give favorable consideration to this Agreement at an early date. Since 60 calendar days of continuous session as required by the legislation are not available before March 1, 1977, I strongly recommend that the Senate consider issuance of a joint resolution with the House of Representatives in order to bring this Agreement into force by that date.

GERALD R. FORD.

THE WHITE HOUSE, *January 10, 1977.*

INTERNATIONAL FISHERY AGREEMENT BETWEEN THE UNITED STATES AND THE UNION OF SOVIET SOCIALIST REPUBLICS—MESSAGE FROM THE PRESIDENT—PM 8

The ACTING PRESIDENT pro tempore (Mr. LEAHY) laid before the Senate the following message from the President of the United States, which was referred to the Committee on Commerce, the Committee on Foreign Relations, and the Committee on Armed Services, by unanimous consent:

To the Congress of the United States:

In accordance with the Fishery Conservation and Management Act of 1976 (P.L. 94-265; 16 USC 1801), I transmit herewith a governing international fishery agreement between the United States and the Union of Soviet Socialist Republics, signed at Washington on November 26, 1976.

This Agreement is significant because it is one of a series to be negotiated in accordance with that legislation. I urge that the Congress give favorable consideration to this Agreement at an early date. Since 60 calendar days of continuous session as required by the legislation are not available before March 1, 1977, I strongly recommend that the Senate consider issuance of a joint resolution with the House of Representatives in order to bring this Agreement into force by that date.

GERALD R. FORD.

THE WHITE HOUSE, *January 10, 1977.*

INTERNATIONAL FISHERY AGREEMENT BETWEEN THE UNITED STATES AND THE GERMAN DEMOCRATIC REPUBLIC—MESSAGE FROM THE PRESIDENT—PM 9

The ACTING PRESIDENT pro tempore (Mr. LEAHY) laid before the Senate the following message from the President of the United States, which was referred to the Committee on Commerce, the Committee on Foreign Relations, and the Committee on Armed Services, by unanimous consent:

To the Congress of the United States:

In accordance with the Fishery Conservation and Management Act of 1976 (P.L. 94-265; 16 U.S.C. 1801), I transmit herewith a governing international fishery agreement between the United States and the German Democratic Republic, signed at Washington on October 5, 1976.

This Agreement is significant because it is one of the first to be negotiated in accordance with that legislation. I urge that the Congress give favorable consideration to this Agreement at an early date. Since 60 calendar days of continuous session as required by the legislation are not available before March 1, 1977, I strongly recommend that the Congress consider issuance of a joint resolution to bring this Agreement into force by that date.

GERALD R. FORD.

THE WHITE HOUSE, *January 10, 1977.*

INTERNATIONAL FISHERY AGREEMENT BETWEEN THE UNITED STATES AND THE REPUBLIC OF CHINA—MESSAGE FROM THE PRESIDENT—PM 10

The ACTING PRESIDENT pro tempore (Mr. LEAHY) laid before the Senate the following message from the President of the United States, which was referred to the Committee on Com-

merce, the Committee on Foreign Relations, and the Committee on Armed Services, by unanimous consent:

To the Congress of the United States:

In accordance with the Fishery Conservation and Management Act of 1976 (P.L. 94–265; 16 USC 1801), I transmit herewith a governing international fishery agreement between the United States and the Republic of China, signed at Washington on September 15, 1976.

This Agreement is significant because it is one of the first to be negotiated in accordance with that legislation. I urge that the Congress give favorable consideration to this Agreement at an early date. Since 60 calendar days of continuous session as required by the legislation are not available before March 1, 1977, I strongly recommend that the Congress consider issuance of a joint resolution to bring this Agreement into force by that date.

GERALD R. FORD.

THE WHITE HOUSE, *January 10, 1977.*

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that four messages from the President, in accordance with the Fishery Conservation and Management Act of 1976, transmitting four fishery agreements between the United States and Romania, the U.S.S.R., the German Democratic Republic, and the Republic of China, be jointly referred to the Committees on Commerce, Foreign Relations, and Armed Services.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

REPORT ON THE OREGON DUNES NATIONAL RECREATION AREA—MESSAGE FROM THE PRESIDENT—PM 11

The ACTING PRESIDENT pro tempore (Mr. LEAHY) laid before the Senate the following message from the President of the United States, which was referred to the Committee on Interior and Insular Affairs:

To the Congress of the United States:

I transmit herewith the report of the Secretary of Agriculture which was prepared in accordance with the Oregon Dunes National Recreation Act of 1972, P.L. 92–260.

The Secretary of Agriculture has concluded that the Oregon Dunes National Recreation Area is not suitable for inclusion in the Wilderness System and I concur with his recommendation.

GERALD R. FORD.

THE WHITE HOUSE, *January 10, 1977.*

REPORT ON THE PROBLEMS OF CYPRUS—MESSAGE FROM THE PRESIDENT—PM 12

The ACTING PRESIDENT pro tempore (Mr. LEAHY) laid before the Senate the following message from the President of the United States, which was referred to the Committee on Foreign Relations:

To the Congress of the United States:

This report is the seventh in a series of messages pursuant to Public Law 94–104 through which I have informed the Congress of my Administration's efforts to encourage progress toward a resolution of the problems of Cyprus. In addition to reviewing those efforts, this report will offer several conclusions with regard to the role the United States can and should play in settlement of the Cyprus dispute.

I know the Congress shares my views that a just and early settlement of the Cyprus issue is essential both for humanitarian reasons and to preserve peace in an area of great importance to the United States. For more than two years my Administration has actively sought to help the Cypriot communities find the basis for substantive and sustained negotiations. We have given the UN Secretary General our full and active support in the negotiations conducted under his auspices, negotiations which I believe continue to offer the best possible forum for progress.

I also know the Congress shares my deep regret that progress in the negotiations has been extremely slow. Inconclusive procedural disputes have diverted the parties from pressing issues of substance. Domestic pressures and international rivalries have detracted from the will and commitment that are essential to progress.

In an effort to break this impasse, my Administration has sought over the past several months to develop a set of basic principles that might provide a framework for continued and fruitful intercommunal negotiation. These principles are based on the concepts which I set forth in my sixth report to the Congress and which Secretary of State Kissinger expressed in his September 1976 UN General Assembly address. These concepts rest on a fundamental premise which I believe all concerned parties continue to share—that any settlement must preserve the independence, sovereignty, and the territorial integrity of Cyprus. These concepts emphasize the importance of territorial adjustments to reduce the area controlled by the Turkish side, while taking into account the economic requirements and humanitarian concerns of the two Cypriot communities, including the plight of those who remain refugees. Constitutional arrangements are of equal importance in providing conditions under which the two communities can live in freedom and have a large voice in their own affairs. Finally, security arrangements which would permit the withdrawal of foreign military forces other than those present under international agreement are essential for a lasting settlement.

Based upon these concepts, the United States has engaged over the past several months in extensive consultations on the Cyprus issue with the nine-member states of the European Community, seeking their support for a new and accelerated approach. Through these consultations we are jointly developing the basic principles which we hope will stimulate the negotiations. We have been greatly impressed and encouraged by the extent to which there is a consensus in these consultations on both the principles and the urgent need to reopen substantive intercommunal negotiations.

I remain convinced, however, that neither the United States nor any other outside country or group of countries should seek to impose a settlement on Cyprus. The principles we are developing should serve only as a basis for negotiation. It is the Cypriot communities themselves who must ultimately decide their relationship and final territorial arrangements.

In addition it is clear that a final solution must also have the support of the Greek and Turkish governments. It is my firm conviction that we must seek to maintain the trust and friendship of both these NATO allies. Thus my Administration has sought to strengthen through negotiation our security ties with both Greece and Turkey. We have consistently sought to follow a balanced course in strengthening our relations throughout the area. We therefore welcomed the steps taken by the Congress to relax the arms embargo on Turkey so that Turkey can better meet its NATO obligations. We have demonstrated through tangible assistance our support for Greece. We have worked actively, both directly and through the United Nations Security Council, to defuse recent tensions between Greece and Turkey over the Aegean. These two countries have now agreed to a negotiating process called for in the U.S. sponsored Security Council Resolution which I hope will lead to a settlement of their dispute.

It is essential to the success of an equitable and lasting Cyprus settlement that the United States maintain a balanced relationship among all concerned parties. It would be a mistake to place undue pressure on any one party for the sake of what appears to be a quick settlement. I believe the Congress would agree that such a path would neither promote lasting progress on Cyprus nor serve the cause of stability in the Mediterranean.

I am not pessimistic about the future of the Cyprus negotiations. I continue to believe that a way can and will be found to achieve a just and equitable settlement which will enable all of the people of Cyprus to shape a harmonious and prosperous future.

GERALD R. FORD.

THE WHITE HOUSE, *January 10, 1977.*

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

EC 1. A letter from the Director of the Office of Management and Budget transmitting, pursuant to law, the cumulative report on rescissions and deferrals for November 1976 (with an accompanying report); jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, Public Works, Interior and Insular Affairs, the Judiciary, Foreign Relations, Agriculture and Forestry, Commerce, Armed Services, Labor and Public Welfare, Finance, Government Operations, and Banking, Housing and Urban Affairs.

EC 2. A letter from the Director of the Office of Management and Budget transmitting, pursuant to law, the cumulative report on rescissions and deferrals for October 1976 (with an accompanying report); jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, Public Works, Interior and Insular Affairs, Commerce, Labor and Public Welfare, the Judiciary, Foreign Relations, Agriculture and Forestry, Armed Services, Finance, and Government Operations.

EC 3. A letter from the Acting Director of the Office of Management and Budget trans-

mitting, pursuant to law, the current services estimates for fiscal year 1978 (with an accompanying report); jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations and the Budget.

EC 4. A letter from the Comptroller General of the United States transmitting, pursuant to law, comments on three rescissions proposals and one supplementary message to a previously proposed deferral contained in the President's second special message for Fiscal Year 1977 (with accompanying papers); jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, Public Works, Interior and Insular Affairs, and Commerce, and ordered to be printed.

EC 5. A letter from the Comptroller General of the United States transmitting, pursuant to law, comments on two supplementary reports contained in the President's 22nd special message for Fiscal Year 1976; jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, Armed Services, and Labor and Public Welfare, and ordered to be printed.

EC 6. A letter from the Acting Comptroller General of the United States transmitting, pursuant to law, comments on 33 deferral proposals contained in the President's third special message for Fiscal Year 1977 (with accompanying papers); jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, Labor and Public Welfare, Interior and Insular Affairs, the Judiciary, and Commerce, and ordered to be printed.

EC 7. A letter from the General Counsel of the United States General Accounting Office transmitting a report on the status of budget authority involved in three rescissions that were proposed to, but rejected by, the Congress; jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, Labor and Public Welfare, and Banking, Housing and Urban Affairs, and ordered to be printed.

EC 8. A letter from the General Counsel of the United States General Accounting Office transmitting a report on the status of budget authority that was proposed, but rejected, for rescission in the President's 18th special message for Fiscal Year 1976; jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, Agriculture and Forestry, and Labor and Public Welfare, and ordered to be printed.

EC 9. A letter from the General Counsel of the United States General Accounting Office transmitting, pursuant to law, a report on the release of budget authority for the Legal Services Corporation; jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, and Labor and Public Welfare, and ordered to be printed.

EC 10. By Mr. CHILES (for himself and Mr. STONE):

S. 91. A bill to amend section 8e of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, to subject imported tomatoes to restrictions comparable to those applicable to domestic tomatoes; to the Committee on Agriculture and Forestry.

By Mr. WILLIAMS (for himself and Mr. PROXMIRE):

S. 92. A bill to amend and extend the Export Administration Act of 1969 to improve the administration of export controls pursuant to such act, to strengthen the antiboycott provisions of such act, and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

By Mr. HOLLINGS:

S. 93. A bill to establish an Energy Mobilization Board; to the Committee on Interior and Insular Affairs.

By Mr. HOLLINGS:

S. 94. A bill to improve the operation and efficiency of the U.S. Postal Service; to the Committee on Post Office and Civil Service.

By Mr. HOLLINGS:

S. 95, a bill to amend the Internal Revenue Code of 1954 to permit the deduction without limitations of medical expenses paid for certain dependents suffering from physical or mental impairment or defect; to the Committee on Finance.

By Mr. HOLLINGS:

S. 96. A bill to amend the Internal Revenue Code of 1954 to allow a credit against income tax to individuals for certain expenses incurred in providing higher education; to the Committee on Finance.

By Mr. BROOKE (for himself and Mr. McINTYRE):

S. 97. A bill to amend the Internal Revenue Code; to the Committee on Finance.

By Mr. CANNON:

S. 98. A bill to amend the Internal Revenue Code of 1954 to increase the limitation on the credit for certain State-imposed gaming taxes under section 4464; to the Committee on Finance.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 99. A bill to provide for the construction of a Veterans' Administration Hospital in the State of Nevada; to the Committee on Veterans' Affairs.

By Mr. INOUYE:

S. 100. A bill to amend section 1003 of title 38, United States Code, relating to memorial areas and appropriate memorials to honor the memory of certain deceased members of the Armed Forces whose remains were buried at sea, have not been identified, or were nonrecoverable; to the Committee on Veterans' Affairs.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 101. A bill to provide for the establishment of a national cemetery in the State of Nevada; to the Committee on Veterans' Affairs.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 102. A bill directing the Secretary of Agriculture to convey the property comprising the Lee Canyon Youth Camp, Toiyabe National Forest, Nev., to Clark County, Nev.; to the Committee on Agriculture and Forestry.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 103. A bill to convey to the Ely Indian Colony the beneficial interest in certain Federal land; to the Committee on Interior and Insular Affairs.

By Mr. INOUYE (for himself, Mr. BAYH, Mr. CLARK, Mr. HATFIELD, Mr. HUMPHREY, Mr. LEAHY, Mr. McINTYRE, and Mr. MATSUNAGA):

S. 104. A bill to amend the Social Security Act to provide for inclusion of the services of licensed registered nurses under medicare and medicaid; to the Committee on Finance.

By Mr. BROOKE (for himself, Mr. ALLEN, Mr. CASE, Mr. HEINZ, Mr. CLARK, Mr. DANFORTH, Mr. LEAHY, Mr. JOHNSTON, Mr. MATHIAS, and Mr. WALLOP):

S. 105. A bill to restore the applicability of the general statute of limitations for the prosecution of violations of Federal criminal law to the prosecution of violations of the Federal Election Campaign Act of 1971; to the Committee on Rules and Administration.

By Mr. HUDDLESTON (for himself, Mr. EASTLAND, Mr. TALMADGE, Mr. DOLE, Mr. McGOVERN, Mr. HUMPHREY, and Mr. CLARK):

S. 106. A bill to provide for furthering the conservation, protection, and enhancement of the Nation's land, water, and related resources for sustained use, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. PEARSON:

S. 107. A bill to reform veterans' pensions, to avoid a reduction in veterans' pensions, concomitant with increases in social security benefits; to the Committee on Veterans' Affairs.

By Mr. BARTLETT:

S. 108. A bill to allow incremental crude oil production from new secondary and tertiary recovery projects to receive free market prices; to the Committee on Interior and Insular Affairs.

By Mr. BARTLETT:

S. 109. A bill to assure the availability of natural gas in interstate commerce to essential agricultural uses; to the Committee on Commerce.

By Mr. BARTLETT:

S. 110. A bill to amend the Natural Gas Act to assure adequate supplies of natural gas in interstate commerce; to the Committee on Commerce.

By Mr. HOLLINGS:

S. 111. A bill for the relief of Dr. Jesus King Tan, his wife, Margaret Pearl Liyao Tan, and their son, Jesse William Liyao Tan; to the Committee on the Judiciary.

S. 112. A bill to promote commerce and establish a Council on Energy Policy, and for other purposes; to the Committee on Commerce.

By Mr. CASE (for himself, Mr. PROXMIRE, Mr. WEICKER, Mr. JAVITS, Mr. BROOKE, Mr. ALLEN, Mr. LEAHY, Mr. STAFFORD, Mr. CHURCH, Mr. ABOUREZK, and Mr. DOLE):

S. 113. A bill to promote public confidence in the legislative, executive and judicial branches of the Government of the United States; to the Committee on Government Operations.

By Mr. HOLLINGS:

S. 114. A bill to amend title 23 of the United States Code, relating to highways, in order to encourage the States to establish highway assistance patrols; to the Committee on Public Works.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 115. A bill to authorize the use of facilities at the Owyhee Indian Hospital of the Duck Valley Indian Reservation to provide certain medical care to non-Indians; to the Committee on Interior and Insular Affairs.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 116. A bill to authorize the Director of the Bureau of Mines to extend certain assistance to certain individuals engaged in mineral exploration and development; to the Committee on Interior and Insular Affairs.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 117. A bill to provide that four publications detailing the history of the Indian tribes of Nevada shall be subject to copyright by the Inter-Tribal Council of Nevada; to the Committee on the Judiciary.

By Mr. CANNON:

S. 118. A bill to provide for the suspension of annual assessment work on mining claims held by location in the United States; to the Committee on Interior and Insular Affairs.

By Mr. INOUYE:

S. 119. A bill to incorporate the Pearl Harbor Survivors Association; to the Committee on the Judiciary.

By Mr. ABOUREZK (for himself and Mr. TOWER):

S. 120. A bill to amend the Disaster Relief Act of 1974, and for other purposes; to the Committee on Public Works.

By Mr. BIDEN (for himself, Mr. BROOKE, Mr. CASE, Mr. KENNEDY, Mr. MUSKIE, Mr. HART, Mr. LEAHY, Mr. HATFIELD, Mr. HEINZ, Mr. RIBICOFF, Mr. MATHIAS, Mr. HATHAWAY, and Mr. HUDDLESTON):

S. 121. A bill to establish a uniform and comprehensive legal regime governing liability and compensation for damages and cleanup costs caused by oil pollution, and for other purposes; to the Committees on Commerce, Interior and Insular Affairs, and Public Works, by unanimous consent.

By Mr. BROOKE:

S. 122. A bill to reform electric utility rate regulation, to strengthen State electric utility regulatory agencies, and for other purposes; to the Committee on Commerce, by unanimous consent.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 123. A bill to amend the Social Security Act to provide for the payment of services by psychologists, and for other purposes; to the Committee on Finance.

By Mr. GLENN:

S. 124. A bill to amend the Internal Revenue Code of 1954 to provide a national energy conservation incentives program; to the Committee on Finance.

By Mr. GLENN (for himself, Mr. MUSKIE, Mr. GRAVEL, Mr. HASKELL, Mr. HATHAWAY, Mr. KENNEDY, Mr. LEAHY, Mr. MATHIAS, Mr. McINTYRE, and Mr. PROXMIRE):

S. 125. A bill to provide for review and reauthorization of tax expenditure provisions every 5 years, and for other purposes; to the Committee on Finance.

By Mr. CRANSTON (for himself, Mr. HAYAKAWA, and Mr. HOLLINGS):

S. 126. A bill to reduce the hazards of earthquakes, and for other purposes; to the Committee on Commerce.

By Mr. INOUYE:

S. 127. A bill to amend chapter 55 of title 10, United States Code, to require the armed forces to continue to provide certain special educational services to handicapped dependents; to the Committee on Armed Services.

By Mr. INOUYE:

S. 128. A bill to amend section 1002 of title 38, United States Code, to authorize the burial in a national cemetery of the parents of certain members of the Armed Forces who die in active service; to the Committee on Veterans' Affairs.

By Mr. INOUYE:

S. 129. A bill to restore the wartime recognition of certain Filipino veterans of World War II and to entitle them to those benefits, rights, and privileges which result from such recognition; to the Committee on Veterans' Affairs.

By Mr. INOUYE:

S. 130. A bill to allow an additional income exemption for a taxpayer or his spouse who is deaf or deaf-blind; to the Committee on Finance.

By Mr. INOUYE:

S. 131. A bill to amend the Internal Revenue Code of 1954 to provide credit against income tax for an employer who employs older persons in his trade or business; to the Committee on Finance.

By Mr. INOUYE:

S. 132. A bill to authorize the Secretary of the Army to make available to the State of Hawaii through it to the Queen's Medical Center physical facilities not needed by the Army at Fort DeRussy, Hawaii, for the purpose of establishing a mental health clinic in such facilities; to the Committee on Armed Services.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 133. A bill to amend the Public Health Services Act to provide for financial grants to States in order to insure the delivery of high quality health services for persons who have recently immigrated to the United States: to the Committee on Labor and Public Welfare.

By Mr. CURTIS:

S. 134. A bill for the relief of Herta Schleifer and her daughter, Renate Schleifer; to the Committee on the Judiciary.

By Mr. CURTIS:

S. 135. A bill for the relief of Leung, Tak-Ming; to the Committee on the Judiciary.

By Mr. CURTIS:

S. 136. A bill for the relief of Masumi Danzuka; to the Committee on the Judiciary.

By Mr. DOMENICI:

S. 137. A bill for the relief of Thi Lung Wang; to the Committee on the Judiciary.

By Mr. DOMENICI:

S. 138. A bill for the relief of Sin Thi Liu; to the Committee on the Judiciary.

By Mr. DOMENICI:

S. 139. A bill for the relief of Huai Yao Hsaio; to the Committee on the Judiciary.

By Mr. BAYH (for himself, Mr. ABOUREZK, Mr. ANDERSON, Mr. BAKER, Mr. BELLMON, Mr. BROOKE Mr. CHAFEE, Mr. CHURCH, Mr. CLARK, Mr. CRANSTON, Mr. DANFORTH, Mr. DECONCINI, Mr. DOLE, Mr. FORD, Mr. GLENN, Mr. GRAVEL, Mr. HART, Mr. HASKELL, Mr. HATFIELD, Mr. HATHAWAY, Mr. HUDDLESTON, Mr. HUMPHREY, Mr. INOUYE, Mr. JACKSON, Mr. JAVITS, Mr. KENNEDY, Mr. MAGNUSON, Mr. MATHIAS, Mr. MATSUNAGA, Mr. MCINTYRE, Mr. METZENBAUM, Mr. PACKWOOD, Mr. PELL, Mr. PROXMIRE, Mr. RANDOLPH, Mr. RIBICOFF, Mr. RIEGLE, Mr. SCHWEIKER, Mr. STAFFORD, Mr. STEVENSON, Mr. WILLIAMS, and Mr. ZORINSKY):

S.J. Res. 1. A joint resolution proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States; to the Committee on the Judiciary.

By Mr. BUMPERS (for himself and Mr. MORGAN):

S.J. Res. 2. A joint resolution proposing an amendment to the Constitution to provide that, except in time of war or economic emergency declared by the Congress, expenditures of the Government may not exceed the revenues of the Government during any fiscal year; to the Committee on the Judiciary.

By Mr. CRANSTON:

S.J. Res. 3. A joint resolution relating to the withdrawal of all minerals in certain areas of the Los Padres National Forest, Calif., from all forms of appropriation under the mining law and from disposition under all laws pertaining to mineral leasing; to the Committee on Interior and Insular Affairs.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S.J. Res. 4. A joint resolution establishing the Hawaiian Aboriginal Claims Settlement Study Commission, and for other purposes; to the Committee on Interior and Insular Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MATHIAS:

S. 1. A bill to establish improved policies and programs for the immediate reduction of unemployment and to provide for the improvement of employment opportunities for youth in America, and for other purposes; to the Committee on Labor and Public Welfare.

EMPLOYMENT RESOURCES ACT OF 1977

Mr. MATHIAS. Mr. President, I send to the desk, as the first bill of the 95th Congress, the Employment Resources Act of 1977. S. 1 constitutes a comprehensive approach to the problems of unemployment, inflation and economic growth. S. 1 is designed to enable our free enterprise system to offer job opportunities for every American willing and able to work.

I. THE ECONOMIC BACKGROUND

The severe recession of 1974–75 has left this Nation with unacceptably high levels of unemployment. Indeed, the figures for November 1976 show the unemployment level to have reached 8.1 percent, a 0.2 increase in the unemployment rate over the October figures—7.9 percent. More seriously, among the unemployed there was a shift toward those out of work for longer periods of time. Long-term unemployment—15 weeks or more—rose by 220,000 with most of this in the group unemployed from 15 to 26 weeks.

Unemployment is particularly high among young people, especially minority youth. In the second quarter of 1976, according to official Bureau of Labor Statistics' figures, the unemployment rate for white teenagers was 16.5 percent while black teenage unemployment stood at 40 percent. A National Urban League report showed black teenage unemployment at 63.8 percent for the second quarter.

The slide or pause in the recovery has now persisted 6 months. While employment has risen, it has not been sufficient to absorb the growing labor force as well as those displaced in the weaker segments of the economy.

Unemployment diminishes the lives and aspirations not only of the unemployed and their families, but of all Americans. The Nation is poorer by virtue of the lack of goods and services which the unemployed could have produced; and by the social problems, including crime, which accompany high unemployment.

Statistics tend to be cold, and sometime defy understanding, but the jobless numbers are harshly real. They are men and women who want to work, who are looking for work, and who need an income to put food on the table for their families. They are also disillusioned young people, many of minority groups, unable to find a job, and thus denied an opportunity to show they can contribute to this country.

We should look at unemployment for its harmful effect on individuals and our society. It is a waste of energy, a waste of creativity, and a waste of our most precious national resource—our people.

One possibility is to tolerate the human, economic, and social waste of unemployment. The second course is to adopt policies aimed at the sound expansion of our economy so as to provide a productive job for every person able and willing to work while, at the same time, we constantly monitor and review these policies to avoid overheating the economy and precipitating a new round of inflation. I choose the second course.

II. THE COMMITMENT TO JOBS

On September 6, 1976—Labor Day—I renewed my pledge to fight against unemployment. This bill represents a major step on the road to fulfillment of that pledge.

In my Labor Day statement, I said:

Labor Day in this Bicentennial Year 1976 should be a time for pride and rejoicing. In the 20 years of our history as a nation, we Americans have added unprecedented new dimensions to the dignity of man. We have explored avenues of freedom undreamed of before and we have proved, by our example, that there are virtually no limits to what determination and hard work can achieve.

We have tamed a continent and a wilderness. We have opened up the world and the universe. We walked on the moon and we landed a space craft on Mars. We have built cities more fabulous than Xanadu and we have nurtured a people with the vision and the vigor to transform the world.

All this we have done on our own, by the sweat of our brow, in a free society that is the envy of the world.

We should feel proud this Labor Day 1976. But do we?

I, for one, do not feel very proud when, on our Bicentennial Labor Day, more than 7 million Americans—close to 8 per cent of our work force—are jobless. I cannot feel proud when I know that the unemployment figures for black Americans are three or four times higher than this figure. And I feel desperate in the face of the Urban League estimate that 64 per cent of the nation's black teenagers could not find work during the second quarter of 1976.

This is an outrage.

Our Bicentennial celebration of freedom is disfigured by the stark facts of unemployment. Not until we are able to produce jobs for all those who seek them can we, in good conscience, celebrate our Bicentennial full-heartedly and joyously.

This Labor Day 1976 we must dedicate ourselves to bringing one final basic freedom to this "land of the free." Let us determine here and now for all time that freedom in America will not be complete until this nation is free from unemployment.

I intend to dedicate myself in the months ahead to achieving this ultimate indispensable freedom for all Americans. I urge other Americans to do the same. If we are to be truly worthy of our heritage and of the future, we can do no less.

I believe that the United States should not continue to condemn many millions of its citizens to enforced idleness, poverty, and isolation. The commitment to provide a useful and productive job for every American who wants to work carries the obligation of broadening access to educational, training, and advancement opportunities to all individuals, irrespective of sex, race, age, or ethnic origin. It is imperative that the inequities in the opportunities available to different groups to compete for jobs and income be eradicated. Equal opportunity for minorities and women is a necessary element in the Nation's employment policies. Equal opportunity will encourage people to put forward their best efforts to acquire, develop, and utilize their skills.

The achievement of a full employment economy requires coordination among economic, manpower, welfare, and education policies, and improved cooperation between the private and public sectors. Talk of full employment is not enough. I believe we must make a commitment to a policy of jobs for all Americans. I recognize this commitment entails costs and difficulties; it requires that we cope successfully with possible renewed inflationary pressures; and it involves Government action at a time when many suspect Government.

But it is my conviction that these costs are overshadowed by the human and economic costs of continued high unemployment. No worthy goal is ever attained with ease, and the overriding challenge to the United States today is to establish a system whereby free men and women, through their own efforts, can improve their lives and their society. To do otherwise is to diminish the lives and aspirations of all our people—and to default on the Constitution's promise "to establish Justice" and "promote the general Welfare."

III. THE POLICIES REQUIRED

To attain full employment we must develop a set of coordinated policies. These include stimulating the growth of the economy; increasing capital investment; special efforts to facilitate the entry of young people into productive work; enhancing the employability of the hard-to-employ; strengthening work incentives; improving the manpower system so that it can be more responsive to the challenges of a dynamic economy; and enlarging the options that people have with respect to the uses of time for work, education, family life, and leisure.

The bill I submit today is designed to begin to deal with this needed mix of policies.

One policy deserves particular emphasis. Our economic policies must include provisions for long term capital investment. As Prof. Paul McCracken of the University of Michigan, and a former Chairman of the Council of Economic Advisers, wrote recently:

If we do not set in motion forces that will expand our stock of capital more rapidly, we face chronically some combination of reduced gains in real incomes and high unemployment. For the fact is that no economy can deliver gains in real incomes that exceed gains in productivity. And though the forces giving us gains in productivity are complex, more capital backing up the labors of each worker is a major factor.

Without such long term capital investment, the rapidly expanding labor force that we have today, and will continue to have in the future, cannot be fully employed.

IV. THE PROVISIONS OF S. 1

MAIN FEATURES

The two titles of S. 1 are designed to provide a balanced set of policies and programs to reach the goals of economic growth and full employment, without costly inflation.

Title I establishes a process by which Congress, the President, and the Federal Reserve can fashion the fiscal and monetary policies that will enable our free enterprise system to offer full employment without overheating the economy. Title II is designed to cut the particularly high unemployment rate among young people. Title II establishes a new National Youth Service program to give young people, 16–24 years of age, the opportunity to work on neighborhood restoration and other vitally needed projects in their own communities. In addition, title II expands the Youth Conservation Corps from a summer to a year-round program to employ young people in environmental improvement projects on Federal and State lands.

Under the bill, the national youth service program and the Youth Conservation Corps would each employ 100,000 youths during their first year of operation, 200,000 during their second year, and 300,000 during their third year. Thus, by the end of the third year, the total capacity of both programs would be 600,000 young people. The bill authorizes approximately $2.8 billion for each program, for a total of $5.6 billion over 2 years.

We must work toward full employment in a sound way. S. 1 does not create an elaborate central planning system. Rather, through title I, the bill focuses on goals and mechanisms for developing the economy and restraining inflation. In large part, title I is based on the proposals and final report of a distinguished group of 75 Americans participating in the American Assembly on Manpower Goals for American Democracy, held at Arden House, Harriman, N.Y., May 20–23, 1976.

In summary, title I calls for a full employment economy. Title I sets forth as Federal policy a reduction of the unemployment rate by 1.5 percent per year, with the short-range goal of a 5-percent unemployment rate by 1978. In addition, S. 1:

Declares that inflation is a major national problem and requires the President to develop anti-inflationary techniques on a standby basis.

Requires the President to design and carry out fiscal and monetary policies to assure that the unemployment rate does not exceed 5 percent by the end of 1978. The bill requires the President to set forth in his annual economic report the fiscal, tax and monetary policies necessary to reach his goal.

Requires the Federal Reserve Board to report annually to the President and the Congress its intended policies and the extent to which they support the employment and anti-inflationary policies of the act. The Board must justify any substantial variation from the policies in the President's economic report.

Creates a National Occupational Assessment Center to identify new employment opportunities created by technology and production trends. With more and more Americans entering the job market, particularly women and young people, imaginative approaches are needed to insure that enough jobs are available. The Center will help us to identify new ways to match people with jobs and to see if new approaches, such as job sharing and flexible work weeks, can increase the number of jobs. In addition, the Act creates the post of Assistant Secretary of Labor for Veterans' Affairs to manage employment and training programs for veterans.

In brief, title II would employ youths to do productive work on urban and environmental projects. Title II:

First. Create a national youth service program under which public and private organizations, under contract with the Department of Labor, will employ youths from low-income families in local community projects to meet the need for housing and neighborhood rehabilitation, health care, crime prevention, and park and street maintenance;

Second. Expands the Young Adult Conservation Corps from a summer to a year-round program to employ youths from low-income families in environmental projects on Federal and State lands.

Third. To improve the long-term job prospects of youth in the national youth service program, title II also provides, on a trial basis, for an innovative approach to job training. Title II authorizes the Secretary of Labor to make payments to employers in the program who train youths in skills that will lead to permanent employment. Similar mechanisms are used in Western European countries and have been highly successful. In some Common Market countries the government pays employers $100 for every month they employ a youth in the first 6 months after school, and give approved training in skills beyond the initial job. Without undermining the minimum wage, the bill thus gives employers an incentive to hire young workers and give them the skills they need for permanent jobs.

B. SUMMARY OF PROVISIONS

TITLE I

FISCAL AND MONETARY POLICIES

S. 1 provides that fiscal and monetary policies be adapted to promote economic expansion at a pace that would reduce the overall unemployment rate by 1.5 percentage points a year until the general unemployment rate reaches 5 percent early in 1978. During this period, there should be continuing and systematic reassessment of employment and unemployment, and the behavior of wages and prices, so that the pace of further progress can be geared to the Nation's unused human and capital resources. The economic expansion can be partially stimulated by a tax cut, perhaps in the form of a rebate. This would provide productive influx of money into purchases when sustained consumer spending is needed at a significant time. This should be done early in 1977.

The bill requires that the President, in his economic report required to be transmitted to the Congress under the Employment Act of 1946, set forth the level and composition of Federal expenditure measures with respect to estimated capabilities of full employment and production, necessary to support the policy set forth in section 101 of S. 1, taking into account the role of the private sector and State and local governments.

The bill also requires the economic report to set forth a Federal tax policy that alines expenditure levels with revenue so as to balance the budget under conditions of full employment and production, restrain inflation, avoid fiscal drag during periods of slack, and contribute to the necessary level and distribution of purchasing power.

The report must also set forth a monetary policy designed to assure a rate of growth in the Nation's money supply, interest rate levels and such credit availability and international capital flows as are conducive to achieving and maintaining the full employment, production, and purchasing power of policies specified in section 101 of S. 1.

Title I further provides that the Board of Governors of the Federal Reserve Board must transmit to the President and the Congress within 15 days after the transmission of the economic report mentioned above, an independent statement setting forth its intended policies for the current and subsequent fiscal year, the extent to which such policies will support the achievement of the policies set forth in the report, and a full justification for any substantial

variation from the policies and recommendations of the President. If the President determines that the policies of the Board are inconsistent with the achievement of the policies proposed under this act, the President shall make recommendations to the Board and to the Congress to insure closer conformity to the policies set forth in the act.

ANTI-INFLATION STANDBY PROGRAMS

As part of the economic report submitted to Congress, the President must submit a comprehensive set of anti-inflation programs. Inflation is a critical problem for all Americans. As Richard J. Whalen noted recently:

> The cause of stagflation is not unemployment. It is inflation—remembered, present and anticipated. Inflation is a hidden tax, an extremely regressive levy that falls heavily on those low-income households with only a thin cushion in their budgets. The rising cost of necessities taxes away the low-income households' discretionary income and removes them from the marketplace—as is the case today.

The anti-inflation mechanisms that will be on standby under the bill will enable us to cope with inflation. These mechanisms include but are not limited to: First, a comprehensive information system to monitor and analyze inflationary trends in individual economic sectors, designed to assure that the President and the Congress can be altered to developing inflation problems and bottlenecks, after utilizing fully the services of the National Occupational Assessment Center established under S. 1; second, the use of monetary and fiscal policies geared to the capabilities of the economy operating at full employment; third, programs designed to increase the supply of goods, services, labor, and capital in structurally tight markets, with particular emphasis on increasing the supply of food and energy; fourth, provision for an export licensing mechanism for food and other critical materials when the national well-being is threatened because projected supplies are inadequate to meet domestic needs without drastically increasing prices, and the establishment of stockpile of reserves of food and other critical materials in order to meet emergencies and to maintain reasonable price stability and adequate farm income; fifth, encouragement to labor and management to increase productivity within the framework of full employment through voluntary arrangements in industries and economic sectors; sixth, recommendations to strengthen and enforce the antitrust laws, and such other recommendations as are necessary to increase competition in the private sector.

SPECIAL EMPLOYMENT NEEDS
PUBLIC SERVICE JOBS

Title I provides that the President shall develop proposals to expand the public service employment program enacted during the close of the 94th Congress with particular emphasis on jobs for the long-term unemployed—over 15 weeks. Many of these people have exhausted their unemployment insurance benefits. The expansion would include the following major features: First, eligibility would be limited to persons whose family income is below the Bureau of Labor Statistics low family income standard; second, employment under this program would not exceed 2 years; third, wages would be set at a level of about 50 percent above the national average unemployment insurance benefit; and, fourth, large families would receive income supplementation.

This program is, of course, supplementary to the jobs which need to be created in the private sector and which should result from the economic expansion pursuant to the fiscal and monetary policies provided for in title I.

SUPPORTED WORK AND OLDER AMERICANS

Title I directs the President to establish experimental programs to provide sheltered or supported work for those with special employment problems, such as ex-offenders, former drug addicts, the severely handicapped, followed by efforts to place as many as possible in regular employment after they have acquired work habits and marketable skills. The bill directs the Secretary of Labor to continue to explore innovative research and development projects such as the "supported work" project of the Department of Labor which has been so successful in New York.

The bill further directs the President and Secretary of Labor to give early attention to the special needs of older persons forced into premature retirement and women at home, many of whom would welcome an opportunity to work part or full time.

VIETNAM VETERANS

Title I directs that early attention be given to the special occupational skill training and employment needs of Vietnam-era veterans. The bill creates the post of Assistant Secretary of Labor for Veterans' Affairs within the Department of Labor to coordinate this effort. Veterans have suffered disproportionate unemployment. For over a year and a half now, Vietnam veterans between 20 and 24 years of age have suffered a jobless rate that persistently exceeds 15 percent, virtually double the national average. This past quarter the rate increased to over 18 percent. We cannot tolerate such neglect of those who fought for us. Though the war was controversial and unpopular, these men and women deserve our respect and gratitude. Vietnam veterans deserve an equal chance at employment.

THE NATIONAL OCCUPATIONAL ASSESSMENT CENTER

The ability of the Nation to meet its manpower goals depends on having in place a comprehensive and flexible manpower study system. The ad hoc nature of many of the responses to the recession of 1974–75 underscores the need for action in this area. Our Nation needs a system which can effectively meet the continually changing challenges which are characteristic of our dynamic economy.

Title I creates a National Occupational Assessment Center to achieve this goal. The Center would function with the visibility and status of the National Science Foundation or the National Academy of Sciences. The Center would use scientific techniques and methods comparable to those that are used to assess and forecast national finance, commerce and business trends. It will develop computer models to assess the impact of new technologies and industrial processes, as well as production trends in major industries in creating new jobs.

TITLE II—YOUTH EMPLOYMENT PROGRAM

The purpose of this title is to address the particular problems and needs of youth in the job market and to assist them in preparing themselves for and in ultimately obtaining meaningful and productive work.

A healthy and expanding economy will, of course, begin to provide the impetus for the employment of youth. But even the most successful economic policy will not reduce to an acceptable level the excessively high unemployment rate, particularly among inner-city youth which has averaged more than 30 percent over the past decade. A continued tolerance of such high unemployment can lead to only more alienation, drug addiction, and crime among many youths who, having no stake in the society, strike out against it.

The youth unemployment statistics I have cited earlier emphasize the urgent need for action. Today there are 3.5 million unemployed Americans under age 25, representing half the total number of jobless Americans. The time for action is now.

THE NATIONAL YOUTH SERVICE

Title II establishes a National Youth Service. The Service's main features are: a substantially enlarged commitment to assist poorly prepared youth to become productively employed in the regular economy; a jobs program for young people that emphasizes the performance of useful work in the community; the inclusion of a broad spectrum of the youth population; and an emphasis on full-time jobs with concurrent job counseling and training.

The Service would be primarily for out-of-school youth. There would also be openings for young people who are in school part time. The job projects would involve productive work aimed at the visible improvement of the local communities where the young people reside.

The Secretary of Labor would be authorized to enter into contracts with public—including Comprehensive Employment and Training Act prime sponsors—nonprofit—including community-based organizations—or private firms with the capability of managing such work projects.

Jobs in the Service may extend for 2 years and will be limited to young people from families with an income less than the lower living standard budget. Provision is also made, with appropriate safeguards, for inclusion of youthful offenders for whom such a program would be appropriate.

JOB TRAINING AND THE PRIVATE SECTOR

To encourage employers in the private and public sector to employ and train underqualified and needy youth, the bill provides for an innovative approach to job training.

Title II authorizes the Secretary of

Labor to make payments to employers in the program who train youths in skills that will lead to permanent employment. Without undermining the minimum wage, the bill gives employers an incentive to hire young workers and give them the skills they need for permanent jobs. A tax credit could also be used to encourage employers to use this apprenticeship approach, and it is my hope that during hearings on this bill this approach will be given full consideration.

I believe this proposal has great promise. Because the training is conducted by the employer who knows which skills he needs, permanent employment in a productive job in the private sector is more likely to result. In addition, the direct costs to the Federal Government can be lower by using the private sector for job training.

The Secretary of Labor is instructed to target these jobs so that funds will be effectively distributed to support jobs that would otherwise not have been created. One way of doing this, of course, is to limit the application of such a proposed wage subsidy—or employment tax credit—to the hiring of individuals with characteristics not normally attractive to private employers; for example, individuals drawn from high-unemployment inner-city areas and lacking adequate education and experience. Another way of increasing the potential effectiveness of such a scheme is to limit participation in the program to firms which have increased employment above the normal trend. This bill authorizes these approaches. In devising programs under this bill, the Secretary of Labor would concentrate on holding down the regulations and paperwork involved so as not to discourage the cooperation of business.

In establishing the National Youth Service, the bill seeks to particularly attack the high unemployment rate among disadvantaged and low-income youths by targeting education and manpower programs on these groups. In this regard, the Secretary of Labor is ordered to establish criteria for eligibility based upon: First, family income and assets; second, residence in areas with especially high unemployment and/or low income; third, duration of current unemployment; fourth, previous history of unemployment frequency and dead-end jobs; and fifth, those working full time, but having grossly deficient skills—frequently the case among high school dropouts.

YOUTH CONSERVATION CORPS AND THE YOUNG ADULT CONSERVATION ACT

Title II also expands the Youth Conservation Corps—YCC. The Corps currently involves only 25,000 youths. The YCC would be expanded to employ 100,000 young people in its first year, 200,000 in the second year, and 300,000 in its third year. Under the bill, the YCC would be a year-round employment program for youth aged 19–24, with individual jobs limited to 12 months.

COMPREHENSIVE EDUCATION AND TRAINING ACT AMENDMENTS

Title II also provides for the expansion of the two youth employment-training programs under CETA: the Job Corps under title IV and the summer job program under title III. The Job Corps currently operates on a scale of approximately 20,000 service-years—annual positions. The bill doubles this amount. The summer job program for youth from low-income families under title III provides funds to local governments to employ youth part-time for a 9-week period. Participants are paid the minimum wage. For the summer of 1976, it was estimated that this existing program would employ approximately 888,000 youths. The bill expands the potential for employment by a third.

Mr. President, I ask unanimous consent that the text of S. 1, The Employment Resources Act, along with various articles from the press detailing the scope and nature of the unemployment problem, be printed at this point in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1

Sec. 253. Compensation of the Director.
Sec. 254. Withholding of grants.
Sec. 255. Review and audit.
Sec. 256. Authorization of appropriations.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Employment Resources Act of 1977".

STATEMENT OF FINDINGS AND POLICY

SEC. 2. (a) The Congress finds that—

(1) the severe recession of 1974 and 1975 has left the United States with unacceptably high levels of unemployment;

(2) such high unemployment diminishes the lives, and aspirations not only of unemployed individuals and their families but of all Americans;

(3) that the United States is poorer by virtue of the lack of goods and services which unemployed individuals could otherwise have produced;

(4) that the United States is burdened as a result of the social problems (including increased incidents of crime), accompanying high unemployment.

(b) The Congress further finds—

(1) that to tolerate the human economic and social waste of unemployment in the misplaced hope of avoiding a rekindling of inflation is impossible; and

(2) that the development and implementation of policies to reduce unemployment should be accompanied by the development of policies designed to avoid over heating the economy, increasing inflation and precipitating a new recession.

(c) The Congress finds that the commitment to full employment is not enough, that an implementation of the full employment policy is imperative, and that such a policy should provide for every individual able and willing to work the opportunity of a job.

(d) The Congress declares that it is a continuing policy of the Federal government—

(1) to assure the opportunity of a productive job for every individual able and willing to work and thereby avoid condemning many millions of Americans to enforced idleness, poverty and isolation;

(2) to implement the obligation necessary to carry out the policies set forth in clause (1) by broadening access to educational training and advancement opportunities for all individuals without regard to sex, race, creed, color, ethnic origin or age;

(3) to develop and carry out new, and strengthen existing, programs to eradicate inequities in the opportunities available to different groups to compete for jobs and increased income with special attention to the equal opportunities for minorities and women and the elimination of any policies restricting entry to trades and jobs.

(e) The Congress declares that it is the policy of the United States to strengthen economic manpower, welfare, and education policies and to improve the cooperation between public and private sectors of the economy in order to assure the immediate reduction of unemployment and to stimulate the growth of the economy with special efforts directed at facilitating the entry of young people into productive work, enhancing the employability of the hard to employ, strengthening work incentives, improving manpower systems to make them more responsive, and enlarging the options available to individuals with respect to the use of time for family life, education, work and leisure.

TITLE I—EMPLOYMENT RESOURCES PROGRAM

DECLARATION OF POLICY

SEC. 101. Section 2 of the Employment Act of 1946 (15 U.S.C. 1021) is amended to read as follows:

"DECLARATION OF POLICY

"SEC. 2. (a) The Congress declares that it is the continuing policy and responsibility of the Federal government to use all practicable means, consistent with its needs and obligations and other essential national policies, with the assistance and cooperation of industry, agriculture, labor, and State and local governments, to coordinate and utilize all its plans, functions, and resources for the purpose of creating and maintaining, in a manner calculated to foster and promote free competitive enterprise and the general welfare, conditions which promote useful employment opportunities including self employment, for all individuals able, willing, and seeking to work, and to promote full employment, production, and purchasing power.

"(b) The Congress declares that it is the policy of the Federal Government to provide an opportunity for all adult Americans able, willing, and seeking work opportunities for useful paid employment at fair rates of compensation.

"(c) The Congress declares that it is the policy of the Federal Government to promote economic expansion at a rate designed to reduce overall unemployment in the United States by 1.5 per centum each year. In carrying out the policy required by this subsection the President shall design policies consistent with this Act to assure that the unemployment rate does not exceed 5 per centum by the end of calendar year 1978.

"(d) The Congress further declares that inflation is a major national problem requiring strengthened Government programs with particular emphasis upon new anti-inflationary techniques that are developed and available as standby programs."

FISCAL AND MONETARY POLICIES

SEC. 102. (a) The Employment Act of 1946 is amended by inserting after section 3, as amended by this Act, the following new section:

"FISCAL AND MONETARY POLICIES

"SEC. 3A. (a) The Economic Report required to be transmitted by the President under section 3 of this Act shall for each year after the date of enactment of the Employment Resources Act of 1977 set forth the following:

"(1) the level and composition of Federal expenditures, measured with respect to estimated capabilities of full employment and production, necessary to support the policy proposed in section 2, taking into account the role of the private sector and of State and local governments in supporting that policy. The President shall also make a determination of the extent to which the use of aggregate fiscal and monetary policy, without supplementary employment policies provided for in the Employment Resources Act of 1977, will achieve the production, employment, purchasing power, and other policies set forth in such section 2. Whenever the economy is operating at full production and employment or subjected to excessive strain, the President shall propose the set of standby programs having anti-inflationary characteristics which he determines to be appropriate.

"(2) Federal tax policy consistent with expenditure levels in paragraph (1) of this subsection necessary to (A) balance the Federal Budget or create a surplus under conditions of full production, employment, and purchasing power, (B) restrain excessive economic activity and inflation when total demand threatens to exceed the nation's capabilities at full employment, (C) avoid fiscal drag upon the economy during any periods of substantial economic slack, and (D) contribute to the necessary level and distribution of purchasing power to carry out the policies set forth in section 2.

"(3) A monetary policy designed to assure such rate of growth in the nation's money supply, such interest rates and such credit availability, including policies of credit reform allocation, and international capital flows as are conducive to achieving and maintaining the full employment, production, and purchasing power policies specified in section 2.

"(b) The Board of Governors of the Federal Reserve System shall transmit to the President and the Congress within 15 days after the transmission of the economic report required under section 3, an independent statement setting forth its intended policies for the current and subsequent fiscal year with respect to functions of the Federal Reserve System, the extent to which such policies will support the achievement of the policies set forth in section 3, and a full justification for any substantial variation from the policies and recommendations of the President set forth in such economic report. If the President determines that the policies of the Board are inconsistent with the achievement of the policies proposed under this Act, the President shall make recommendations to the Board and to the Congress to insure closer conformity to the policies set forth in this Act."

ANTI-INFLATION POLICIES

SEC. 103. Section 3 of the Employment Act of 1946 is amended by adding at the end thereof the following new subsection:

"(d) The Economic Report required by this section shall each year contain a comprehensive set of anti-inflation programs, including but not limited to—

"(1) a comprehensive information system to monitor and analyze inflationary trends in individual economic sectors, including information on the international sector, designed to assure that the President and the Congress can be alerted to developing inflation problems and bottlenecks, after utilizing fully the services of the National Occupational Assessment Center established under the Employment Resources Act of 1977;

"(2) the use of monetary and fiscal policies geared to the capabilities of the economy operating at full employment as provided in section 3A;

"(3) programs designed to increase the supply of goods, services, labor, and capital in structurally tight markets, with particular emphasis on increasing the supply of food and energy;

"(4) provision for an export licensing mechanism for food and other critical materials when the national well-being is threatened because projected supplies are inadequate to meet domestic needs without drastically increasing prices, and the establishment of stockpile reserves of food and other critical materials in order to meet emergencies and to maintain reasonable price stability and adequate farm income;

"(5) encouragement to labor and management to increase productivity within the framework of full employment through voluntary arrangements in industries and economic sectors;

"(6) recommendations to strengthen and enforce the antitrust laws and such other recommendations as are necessary to increase competition in the private sector; and

"(7) recommendations for administrative and legislative actions to promote reasonable price stability whenever the situation shows that national price stability is seriously threatened."

SPECIAL EMPLOYMENT NEEDS

SEC. 104. (a) The President shall prepare and develop proposals to strengthen the provisions of sections 607, 608, and 609 of the Comprehensive Employment and Training Act of 1973 relating to the public service employment of long term unemployed low income persons.

(b) (1) The President is authorized to establish experimental programs, including innovative research and development projects, to provide sheltered or supported work for individuals with special employment problems, particularly ex-criminal offenders, drug addicts, severely handicapped individuals, school dropouts, and the mentally ill.

(2) Any experimental programs and projects developed under the authority of this section shall be conducted by the Secretary of Labor or such other appropriate Federal officials as the President determines will best carry out the purposes of this Act in cooperation with supported work projects carried out by the Secretary of Labor.

(c) (1) The Secretary of Labor is authorized and directed to develop promptly programs and projects designed to meet the special needs of elderly persons forced to premature retirement, and for women in the home who require part time employment.

(2) The President shall transmit to the Congress not later than 90 days after the enactment of this Act proposals for the programs developed pursuant to paragraph (1) of this subsection.

NATIONAL OCCUPATIONAL ASSSESSMENT CENTER

SEC. 150. (a) There is established in the Executive Office of the President a National Occupational Assessment Center (hereinafter in this section referred to as the "Center").

(b) The Center shall be headed by a Director who shall be appointed by the President, by and with the advice and consent of the Senate.

(c) There shall be in the Center a Deputy Director who shall be appointed by the President by and with the advice and consent of the Senate. The Deputy Director shall perform such functions as the Director may prescribe and shall be Acting Director during the absence or disability of the Director or in the event of a vacancy in the position of the Director.

(d) The Director of the Office is authorized to—

(1) conduct a continuing assessment of employment and the need for new occupations, including the effect of—

(A) new research and development programs, particularly Federally assisted research and development programs,

(B) new technologies, industrial processes, production trends in major industries and commodities,

(C) long term financial developments, and

(D) national and international trade policies;

(2) identify the need for new careers and new occupations utilizing scientific procedures, techniques, and methodologies including the use of appropriate computer models;

(3) supervise, at the request of the President, such projects and activities as will contribute to the identification of new career fields and new occupations; and

(4) report to the President and to the Congress not later than 60 days after the end of each fiscal year on the activities of the Center together with such recommendations, including recommendations for legislation, as the Director deems appropriate.

(e) (1) The Director, subject to the direction of the President, is authorized to—

(A) appoint and fix the compensation of such scientists and other personnel as he deems necessary without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, at rates not in excess of the maximum rate for GS–18 of the General Schedule under section 5332 of such title and to appoint and fix the compensation of such additional technical personnel as he deems necessary;

(B) procure temporary and intermittent services to the extent as is authorized by

section 3109 of title 5, United States Code, but at rates not to exceed $125 a day for individuals;

(C) promulgate such rules and regulations as may be required to carry out the provisions of this section;

(D) enter into such contracts, agreements and other arrangements as the Director deems appropriate;

(E) appoint such advisory committees as the Director may determine to be desirable to carry out the functions of the Center under this section; and

(F) use the services, personnel, facilities, and information of Federal executive agencies and the services, personnel, facilities, and information of State and local public agencies and private research agencies, with the consent of such agencies, with or without reimbursement therefor.

(2) Upon request made by the Director, each Federal executive agency is authorized and directed to make its services, personnel, facilities and information (including suggestions, estimates, and statistics) available to the greatest practicable extent to the Center in the performance of its functions.

(f)(1) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"(105) Director, Center for Occupational Assessment.".

(2) Section 5316 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"(137) Deputy Director, Center for Occupational Assessment.".

(g) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section.

ASSISTANT SECRETARY OF LABOR FOR VETERANS' AFFAIRS

SEC. 106. (a) Section 2 of the Act of April 17, 1946 (60 Stat. 91), as amended (20 U.S.C. 553) is amended by—

(1) striking out "five" in the first sentence of such section and inserting in lieu thereof "six"; and

(2) adding at the end thereof the following new sentence: "One of such Assistant Secretaries shall be an Assistant Secretary of Labor for Veterans' Affairs."

(b) The Assistant Secretary of Labor for Veterans' Affairs established pursuant to subsection (a) of this section shall under the general supervision and direction of the Secretary be responsible for all employment and training programs relating to veterans, particularly Vietnam era veterans.

(c) Paragraph (20) of section 5315 of title 5, United States Code, is amended by striking out "(5)" and inserting in lieu thereof "(6)".

TITLE II—YOUTH EMPLOYMENT PROGRAM

SEC. 201. This title may be cited as the "Youth Employment Program."

STATEMENT OF PURPOSE

SEC. 202. It is the purpose of this title to use the nation's investment in its youth more effectively by providing an improved program to stimulate job opportunities for youths, by providing youths with opportunities for community service, both in neighborhood restoration and environmental improvement projects, by strengthening manpower and training programs for youth, by establishing a Young Adult Conservation Corps, and by strengthening the Youth Conservation Corps.

DEFINITIONS

SEC. 203. As used in this title, the term—

(1) "eligible applicant" means any public agency including any department or agency of the Federal government and any State or local government agency; any prime sponsor under title VI of the Comprehensive Employment and Training Act of 1973; any private institution or organization, including any labor union, any business enterprise, any volunteer organization, any neighborhood organization, and any community-based organization as defined in section 701(a)(1) of the Comprehensive Employment and Training Act of 1973;

(2) "youth" means any individual who—

(A) has attained age sixteen, but not age twenty-four,

(B) may be in school part-time, or out of school, and

(C) is looking for work and needs employment, guidance and counseling, or job placement services;

(3) "community service" means work in such fields as environment quality, health care, education, public safety, crime prevention and control, prison rehabilitation, transportation, recreation, maintenance of parks, streets and other public facilities, solid wastes removal, pollution control, housing and neighborhood improvements, rural development, conservation, beautification and other fields of human betterment and community improvement;

(4) "lower-living standard budget" means that income level (adjusted for regional and metropolitan, urban and rural differs in family size) determined annually by the Bureau of Labor Statistics of the Department of Labor and referred to by such Department as the lower living standard budget;

(5) "Agency" means the Youth Employment Agency established in the Department of Labor under section 212;

(6) "Service" means the Youth Employment Service established under section 216 of this title;

(7) "Secretary" means the Secretary of Labor; and

(8) "State" means any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, and the Trust Territory of the Pacific Islands.

PART A—NATIONAL YOUTH SERVICE AND JOB PROGRAM ELIGIBLE YOUTHS

SEC. 211. (a) An individual is eligible to participate in any program assisted by the Agency under this part if that individual is a youth who—

(1) is a member of a family with an income less than the lower living standard budget, or

(2) if not residing with his family, has an income less than the lower living standard budget adjusted pursuant to the regulations of the Secretary, and is not attending any educational institution (as defined by the General Education Provisions Act) on more than a half-time basis.

(b) Such youth participants must be citizens or permanent residents of the United States.

ESTABLISHMENT OF THE YOUTH EMPLOYMENT AGENCY

SEC. 212. (a) There is established within the Department of Labor a Youth Employment Agency. The Agency shall be headed by a Director appointed by the President, by and with the advice and consent of the Senate. The Director shall be under the supervision and direction of the Secretary of Labor.

(b) The functions of the Secretary under this part shall be administered through the Agency.

NATIONAL YOUTH SERVICE PROGRAM

SEC. 213. (a) The Secretary, through the Agency, is authorized, in accordance with the provisions of this part, to make grants to, and to enter into contracts with, eligible applicants to pay the costs of community service programs to be carried out by eligible youths employed by such applicants.

(b) No grant may be made and no contract may be entered into under the provisions of this section unless the agreement evidencing such grant or contract provides assurances that—

(1) eligible youths employed in community service jobs under this title shall be paid wages which are not lower than (A) the minimum wage which would be applicable to the employee under the Fair Labor Standards Act of 1938, if section 6(1) of such Act applied to the youth and if he were not exempt under section 13 thereof, (B) the State or local minimum wage for the most nearly comparable covered employment, or (C) the prevailing rates of pay for persons employed in similar public occupations by the same employer;

(2) all such youths employed in community service jobs under this title will be assured of workmen's compensation, health insurance, employment insurance, and other benefits at the same levels and to the same extent as other employees of the employer and to working conditions and promotional opportunities neither more nor less favorable than such other employees enjoy;

(3) the programs or activities subject to such agreement (A) will result in an increase in employment opportunities over those which would otherwise be available, (B) will not result in the displacement of currently employed workers (including partial displacement such as reduction in the hours of non-overtime or wages or employment benefits), (C) will not impair existing contracts for services or result in the substitution of Federal or other funds in connection with work that would otherwise be performed and (D) will not substitute jobs assisted under this title for existing Federally-assisted jobs;

(4) in the case of an eligible applicant that is a business enterprise (A) the project for which assistance is sought under this part will be operated at no profit to the applicant, (B) such project will not directly benefit the employees of that business enterprise, and (C) such project will be operated in a field separate from the normal activities of that business enterprise;

(5) the employer, to the extent practicable, will furnish counseling, testing, coaching, program orientation, and other appropriate services for such youth employed by the applicant designed to assure that the youth will obtain employment; and

(6) no person with responsibility in the operation of such an agreement will discriminate with respect to any eligible youth or any applicant for participation because of race, creed, color, national origin, sex, political affiliation, or beliefs.

YOUTH WAGE SUPPLEMENT VOUCHERS

SEC. 214. (a) (1) In order to demonstrate the feasibility of the payment of wage supplements on behalf of eligible youths—

(A) who are employed by an employer which is an eligible applicant, and

(B) who receives guidance, counseling, testing and other appropriate services designed to assure that such youth will maintain or retain gainful employment,

the Secretary is authorized to conduct demonstration projects either directly or by way of grant, contract, or other arrangement with eligibile applicants under which wage supplements are paid on behalf of such youths in accordance with the provisions of this section.

(2) The Secretary shall carry out the program authorized by this section so as to determine the feasibility of the payment of wage supplements for such youths on a nationwide basis and so as to assure that such payments are made in each region throughout the United States.

(b) No wage supplement payment may be made under this section unless an application is made by the eligible applicant. Each such application shall contain provisions to assure—

(1) that the employer will furnish appro-

priate training and other manpower services designed to assist any youth employed by such employer to maintain or retain permanent employment;

(2) that the provisions, except as provided in subsection (c) of this section, of paragraphs (1), (2), (3), (5), and (6) of section 213(b) are met; and

(3) that the employer will furnish to the Secretary such information including the identity of each eligible youth and a description of the manpower services being provided to such youth as the Secretary may reasonably require.

(c) The Secretary may waive any requirements under subsection (b) of this section as he determines is necessary to carry out an effective demonstration project under this section except that the Secretary may not waive the provisions of paragraphs (1), (3) and (6) of section 213(b).

(d) Notwithstanding any other provision of law, the payment of a wage supplement voucher on behalf of an eligible youth under this section shall not affect the eligibility of any youth or of any employer subject to the provisions of this section from receiving any benefit under any other provision of Federal law.

(e) Not later than , the Secretary is authorized to prepare and submit to the Congress a report on the program authorized by this section together with such recommendations, including recommendations for additional legislation as he determines desirable. In preparing such report, the Secretary shall plan for a capacity of the program authorized by this section to employ one hundred thousand young adults under this part during its first fiscal year of operation, three hundred thousand young adults during its second fiscal year of operation, four hundred thousand young adults during its third fiscal year of operation, and five hundred thousand young adults during its fourth fiscal year of operation.

FUNCTIONS OF THE AGENCY

SEC. 215. The Secretary, through the Agency, is authorized to—

(1) develop improved counseling, testing, coaching, program orientation, recruitment and placement services for youth, including necessary follow-up services designed to assist youth to secure and retain employment;

(2) review and recommend necessary changes in the manpower programs being assisted under the Comprehensive Employment and Training Act of 1973 designed to assist youth, especially programs for youth described in section 304(a) of that Act, in order to strengthen and improve such programs;

(3) make grants to and enter into contracts with eligible applicants for the employment of eligible youths in community service programs in accordance with section 213 of this title;

(4) develop, in cooperation with private business concerns, employment opportunities for youth, including the carrying out of experimental projects for the reimbursement of on-the-job training programs, to the extent authorized by any other provision of Federal law; and

(5) develop and carry out an experimental voucher supplemental wage program for youth in accordance with the provisions of section 214 of this title.

YOUTH EMPLOYMENT SERVICE

SEC. 216. (a) There is established in the United States Employment Service of the Department of Labor a Youth Employment Service which shall be responsible for administering section 217 of this title. The Service shall be headed by a Director.

(b) The Service shall be under the direct supervision of the Secretary. The Director shall report to the Secretary through the Assistant Secretary of Labor for Manpower.

YOUTH EMPLOYMENT SERVICE GRANTS

SEC. 217. The Secretary, through the Service, is authorized to make grants to State employment services to establish youth employment guidance and job placement programs designed to—

(1) provide opportunities for youth, particularly improved matching of youth career desires and job opportunities, both locally and regionally;

(2) furnish job counseling and job placement services to youths in secondary and post secondary schools and to youths who are out of school;

(3) furnish pre-employment counseling to youths in intermediate and secondary schools; and

(4) furnish information to youths on educational opportunities, job training, and vocational education programs, manpower development programs, and Federal, State and local assistance available to youths.

AMENDMENTS TO THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT OF 1973

SEC. 218. (a) Section 301(c) of the Comprehensive Employment and Training Act of 1973 is amended by adding at the end thereof the following new sentence: "In order to carry out his responsibilities under this subsection, the Secretary shall enter into whatever arrangements he determines necessary to encourage States and units of general local government to eliminate provisions of law and regulations that are unnecessary and prohibit or inhibit ex-criminal offenders from obtaining gainful employment.".

(b) Section 304 of such Act is amended by adding at the end thereof the following new subsection:

"(c) In addition to amounts authorized by any other provision of this Act there are authorized to be appropriated such sums as may be necessary for the fiscal year 1977 and for the succeeding fiscal year to carry out programs described in paragraphs (1), (2), and (3) of subsection (a) of this section.".

(c) Title IV of such Act is amended by adding at the end thereof the following new section:

"AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEARS 1977 AND 1978

"SEC. 420. In addition to amounts authorized by any other provision of this Act, there are authorized to be appropriated such sums as may be necessary for the fiscal year 1977 and for the succeeding fiscal year to carry out the provisions of this title.".

(d) Section 702 of such Act is amended by adding at the end thereof the following new subsection:

"(d) The Secretary is authorized to encourage prime sponsors under title I of this Act to maintain the percentage of youths served by each such prime sponsor at a level not less than the percentage of such youths served by such prime sponsor for the fiscal year 1975.".

AMENDMENT TO THE DOMESTIC VOLUNTEER SERVICE ACT OF 1973

SEC. 219. Section 103(b) of the Domestic Volunteer Service Act of 1973 is amended by inserting "(1)" after the subsection designation and by adding at the end thereof the following new paragraph:

"(2) The Director, to the extent feasible, shall encourage the use of youth volunteers and shall take steps to assure that each such youth volunteer is provided with an individual plan designed to furnish an opportunity for job advancement or for transition to a situation leading to gainful employment.".

PART B—YOUNG ADULT CONSERVATION CORPS

SHORT TITLE

SEC. 231. This title may be cited as the "Young Adult Conservation Corps Act".

PROGRAM AUTHORIZED

SEC. 232. The Act entitled "An Act to establish a pilot program in the Departments of the Interior and Agriculture designated as the Youth Conservation Corps, and for other purposes", enacted August 13, 1970 (84 Stat. 794; 42 U.S.C. prec. 2711 note; 16 U.S.C.A. 1701–06) (hereafter in this Act referred to as the Youth Conservation Corps title), is amended by adding at the end thereof the following new title:

"TITLE II—YOUNG ADULT CONSERVATION CORPS

"POLICY AND PURPOSE

"SEC. 201. The Congress finds—

"(1) that unemployment levels are excessively high among young adults;

"(2) that young adults have minimal or no job experience, and that considering our country's current economic situation, these young adults have a limited opportunity of gaining the necessary job experience, training, and fundamental skills required to enter the labor force at a competitive level;

"(3) that as a result of the high unemployment levels of this age group our country's social service resources are being unnecessarily drained, and the Government is losing tax revenues;

"(4) due to their limited opportunities, crime rates are higher among young adults;

"(5) that there are large inventories of conservation work and other work of a public nature within the national park system, the national forest system, States, municipalities, and other public land and water areas of the United States which require large amounts of labor and relatively small capital investments; and

"(6) that much of the conservation work and other work of a public and environmental nature on the lands and waters of the United States, such as reforestation, timber stand improvement, fighting forest fires, trail and campground improvements, and control of insects, diseases, soil erosion, and floods, can only be accomplished during certain seasons or by a year-round work program.

It is, therefore, the purpose of this title to complement the highly successful Youth Conservation Corps and to provide employment and other benefits to young adults who would not otherwise be currently more productively employed while reducing the inventory of conservation work and completing many other projects of a public nature on the lands and waters of the United States. This title shall in no way limit the requirement set forth in the Employment Act of 1946 (15 U.S.C. 1021 et seq.) that the Federal Government promote maximum production and purchasing power in the Nation's economy. This title supplements and extends the provisions of title I of this Act and does not limit or repeal any existing authority provided by title I of this Act.

"EXTENSION OF YOUTH CONSERVATION CORPS

"SEC. 202. The Secretary of the Interior and the Secretary of Agriculture (hereafter in this title referred to as the 'Secretaries') shall jointly extend the Youth Conservation Corps so as to make possible the year-round employment of young adults. Section 102 of this Act applies to the extended Corps under this title, except that individuals employed as Corps members under this title—

"(1)(A) shall have attained age nineteen but not attained age twenty-four or (B) shall have attained age sixteen (or completed high school) but not attained age nineteen, in the case of individuals who have left school and who give adequate assurances, under criteria established by the Secretaries, that they did not leave school for the purpose of obtaining employment under this title;

"(2) shall be physically capable, as determined under regulations established by the

Secretaries, to carry out the work of the Corps;

"(3) shall be given preference for employment if they reside in counties having a rate of unemployment equal to or in excess of 6 per centum for three consecutive months, as determined by the Secretary of Labor; and

"(4) may be employed for a total period of not more than twelve months, with such maximum employment period consisting of one continuous twelve-month period or of two or more periods which together total twelve months.

"SECRETARIAL DUTIES AND FUNCTIONS

"SEC. 203. (a) Section 103 of this Act, relating to the duties and functions of the Secretaries, applies to this title, except that in administering this title the Secretaries shall—

"(1) place individuals employed as Corps members into jobs which will diminish the backlog of relatively labor intensive projects which would otherwise be carried out if adequate funding were made available;

"(2) employ such individuals in such projects as but not limited to—

"(A) tree nursery operations, planting, pruning, thinning, and other cultural measures;

"(B) erosion control and flood damage;

"(C) wildlife habitat improvements;

"(D) range management improvements;

"(E) recreation development, rehabilitation, and maintenance;

"(F) forest insect disease control, road and trail improvements and wildlife preservation; and

"(G) general sanitation, cleanup, and maintenance of State and public lands;

"(3) in determining appropriate work projects for Corps members, give priority to projects that—

"(A) are relatively labor intensive;

"(B) have work plans or for which work plans could be readily developed;

"(C) may be initiated promptly; and

"(D) are productive;

"(4) to the maximum extent practicable employ such individuals in areas where existing residential facilities are available;

"(5) to the maximum extent practicable employ such individuals in activities similar to activities of those employed in seasonal and part-time employment, in the case of the Secretary of the Interior, in the National Park Service, Bureau of Outdoor Recreation, the United States Fish and Wildlife Service, the Bureau of Reclamation, the Bureau of Land Management, and the Bureau of Indian Affairs, and, in the case of the Secretary of Agriculture, in the Forest Service and the Soil Conservation Service, respectively and

"(6) determine rates of pay for Corps members by giving consideration to housing, transportation, food, medical, and other direct benefits of employment (except that supplies and equipment shall not be benefits of employment), but in no event shall the resulting rates be set at less than the current Federal minimum wage, set forth in section 6(a)(1) of the Fair Labor Standards Act of 1938.

"(b) In carrying out this title, the Secretaries shall provide, to the maximum extent practicable, that Corps members under this title shall not, at the same time, share common facilities or work on common projects with Corps members under title I of this Act.

"EXTENSION OF GRANT PROGRAM FOR STATE PROJECTS

"SEC. 204. (a) The Secretaries shall jointly extend the grant program for State projects required by section 104 of this Act so as to provide increased employment to young adults to develop, preserve, and maintain non-Federal public lands and waters within the States, as defined in section 104(a) (and such employment may include employment on projects which assist the selective cutting and thinning of timber on such lands for essential fuel purposes). Sections 104 (a), (b), and (c) of this Act apply to the extended grant program for State projects under this title, except that for the purposes of this title, each grant application shall contain assurances satisfactory to the Secretaries that individuals employed under the project for which the application is submitted—

"(1)(A) shall have attained age nineteen but not attained age twenty-four, or (B) shall have attained age sixteen (or completed high school) but not attained age nineteen, in the case of individuals who have left school and who give adequate assurances, under criteria established by the Secretaries, that they did not leave school for the purpose of obtaining employment under this title;

"(2) shall be physically capable, as determined under regulations established by the Secretaries;

"(3) shall be given preference for employment if they reside in counties having a rate of unemployment equal to or in excess of 6 per centum for three consecutive months, as determined by the Secretary of Labor;

"(4) be employed for a total period of not more than twelve months, with such maximum employment consisting of one continuous twelve-month period or of two or more periods which together total twelve months; and

"(5) shall be paid at the rate set under section 203(a)(3).

"(b) Thirty per centum of the sums appropriated to carry out this title for any fiscal year or for the period beginning July 1, 1976, and ending September 30, 1976, shall be made available for grants under this section for such fiscal year or for such period, respectively.

"(c) The States, in employing young adults in the extended grant programs authorized by this section, shall have the same duty, with respect to common facilities and projects, as is imposed on the Secretaries under section 203(b).

"SECRETARIAL REPORTS

"SEC. 205. The Secretaries shall prepare jointly and submit to the President and the Congress reports detailing the activities carried out under this title. The first such report, covering the period from the date of enactment of this title until September 30, 1976, shall be submitted not later than January 1, 1977, and reports covering fiscal years ending on September 30, 1977, September 30, 1978, September 30, 1979, and September 30, 1980, shall be submitted not later than January 1, 1978, January 1, 1979, January 1, 1980, and January 1, 1981, respectively.

"TIME PERIOD FOR PLANNING AND PREPARATION

"SEC. 206. (a) During the period beginning on the date of enactment of this title and ending on March 1, 1977, the Secretaries shall prepare a plan to carry out the activities authorized by this title and prepare the site locations, facilities, and equipment selected in the plan. Such plan shall contain an estimate of the annual costs of carrying out the activities authorized by this title, a procedure for selecting candidates for the extended Corps, a list and description of the work projects initially selected by the Secretaries for the extended Corps to carry out under this title, and a list and description of site locations, facilities, and equipment initially selected by the Secretaries for work camps to be used by the extended Corps under this title. In preparing such plan, the Secretaries shall plan for a capacity of the extended Corps to employ one hundred thousand young adults under this title during its first fiscal year of operation, two hundred thousand young adults during its second fiscal year of operation, and three hundred thousand young adults during its third fiscal year of operation. In selecting work projects for the extended Corps, the Secretaries shall give priority to reforestation, timber stand improvement, fighting forest fires, trail and campground improvements, and control of insects, diseases, soil erosion, and floods. In selecting facilities for Corps work camps, the Secretaries shall utilize existing facilities, including military facilities, whenever possible.

"(b) No young adults shall be employed in the extended Corps under section 202 and no grants shall be made to the States under the extended grant program of section 204(a) until June 1, 1977.

"(c) The Secretaries shall submit to the Congress the plan they prepared pursuant to subsection (a) on March 1, 1977. If neither House of Congress disapproves such plan within sixty days after its submission, such plan shall be deemed approved.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 207. (a) There is authorized to be appropriated to the Secretaries for preparing the plan required under section 206 of this Act, and for preparing the sites, facilities, and equipment selected in such plan, $50,000,000 for the period beginning on the date of enactment of this title and ending on the two hundred and fortieth day after such date.

"(b) There are authorized to be appropriated to the Secretaries for carrying out this title $700,000,000 for the first fiscal year during which young adults are employed under this title, $2,100,000,000 for the second fiscal year during which such young adults are so employed. Notwithstanding any other provision of law, funds appropriated for any fiscal year to carry out this title shall remain available for obligation and expenditure until the end of the fiscal year following the fiscal year for which appropriated.".

INCREASED AUTHORIZATIONS OF APPROPRIATIONS

SEC. 233. Section 6 of the Youth Conservation Corps Act is amended by striking out "60,000,000" and inserting in lieu thereof "$90,000,000".

TECHNICAL AMENDMENTS

SEC. 234. The Youth Conservation Corps Act is further amended by—

(1) inserting immediately after the enacting clause the following:

"TITLE I—YOUTH CONSERVATION CORPS";

(2) redesignating sections 1 through 6 as sections 101 and 106, respectively;

(3) striking out "section 6" in section 104 (d) (as redesignated by clause 2 of this section) and inserting in lieu thereof "section 106";

(4) striking out "Act" each place it appears in sections 101 through 106 (as redesignated by clause 2 of this section) and inserting in lieu thereof "title"; and

(5) adding after section 106 (as redesignated by clause 2 of this section) the following new section:

"SHORT TITLE

"SEC. 107. This title may be cited as the 'Youth Conservation Corps Act' ".

PART C—GENERAL PROVISIONS

PAYMENTS

SEC. 251. (a) The Secretary is authorized to pay any eligible applicant having an application approved pursuant to this title for that fiscal year the amount necessary to carry out such application as determined by him.

(b) Payments under this title may be made in installments, in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments.

ADMINISTRATIVE PROVISIONS

SEC. 252. (a) In carrying out his functions under this title the Secretary is authorized to—

(1) prescribe such regulations as he deems necessary;

(2) receive money and other property donated, bequeathed, or devised, without condition or restriction other than it be used for the purposes of this title; and to use, sell or otherwise dispose of such property for the purpose of carrying out the purposes of this title;

(3) receive, and use, sell, or otherwise dispose of, in accordance with paragraph (2), money or other property donated, bequeathed, devised to the Department with a conditional restriction, including the condition that the Secretary use other funds available to him for the purposes of the gift;

(4) appoint and fix the compensation of such personnel as may be necessary;

(5) obtain the services of experts and consultants in accordance with the provisions of section 3109 of title 5;

(6) accept and utilize the services of voluntary and noncompensated personnel and reimburse them for travel expensse, including per diem, as authorized by section 5703 of title 5, United States Code;

(7) enter into contracts, grants, or other arrangements or modifications thereof to carry out the provisions of this Act and such contracts or modifications thereof may be entered into without performance or other bonds and without regard to section 3709 of the Revised Statutes (41 U.S.C. 5) or any other provision of law relating to competitive bidding; and

(8) make other such expenses as he deems necessary.

(b) The Secretary shall submit to the Congress and to the President as part of the annual report of the Department, a report on his activities under this title, including a detailed statement of the number and types of community service jobs furnished to youths under part A of this title, and such recommendations, together with recommendations for legislation, as the Secretary deems advisable.

COMPENSATION OF THE DIRECTOR

SEC. 253. Section 5316 of title V, United States Code, is amended by adding at the end thereof the following new paragraph:

"(137) Director, the Youth Employment Department of Labor.".

WITHHOLDING OF GRANTS

SEC. 254. The Secretary is authorized to withhold funds otherwise payable under this title, but only in order to recover any amounts expended in the current or immediately prior fiscal year in violation of any provision of this title or any term or condition of assistance under this title.

REVIEW AND AUDIT

SEC. 255. The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination, to any books, documents, papers, and records of a grant or contract entered into under this title that are pertinent to that grant or contract.

AUTHORIZATION OF APPROPRIATIONS

SEC. 256. There are auhorized to be appropriated $700,000,000 for the fiscal year 1978, $2,100,000,000 for the fiscal year 1979 to carry out the provisions of title II of this Act.

[From the Washington Post, Aug. 13, 1976]

TO FIND A JOB

The number of people holding jobs in this country went up last month—and the number of unemployed people also went up. A paradox? On the contrary, it's just another lesson in the way the economy is working. The unemployment statistics count only people who are actively hunting for work. When things are very bad, a lot of people give up looking for jobs altogether. When a recovery gets under way. they start answering ads and filling out applications again. When they do that, they again begin to be counted as unemployed, in the numbers that the U.S. Department of Labor publishes every month.

Last May, the unemployment rate was 7.3 per cent. In July, it was 7.8 per cent. The rise is truly a dismaying one, and not only for an incumbent administration running for election. Two substantial monthly increases in a row are enough to cast a shadow over all of those forecasts of slow but steady decline in unemployment. It's worth taking a closer look at the numbers. In May, 87.7 million Americans held jobs. By July it was up to 87.9 million, an improvement of some 200,000 jobs. But the labor force—the total of all the people who have jobs and all the people who want them—had risen even faster. It had gone from 96.7 million in May to 97.5 million last month. Who were those 800,000 people who suddenly decided to go job-hunting?

Some 240,000 of them were adult men. But the vast majority, more than 600,000, were adult women. In the meantime, some of the teenagers who were looking for summer jobs last May apparently failed to find them and had dropped out of the labor market altogether by last month. The point here is that the labor force does not remain a fixed number of people to be employed. In a society as prosperous as ours, some people have a choice whether to look for work or to stay home. They are typically members of families in which someone else already is earning sufficient income to pay the basic bills. Other people in the family stop asking for jobs when there are obviously none to be had, but when they hear of openings they begin to look and get picked up by the Labor Department's statisticians. These workers who bring the second income into the household are typically women or teenagers. The second wage earner can also usually afford to look longer for a desirable job.

The dramatically peculiar nature of the past two months' pattern illustrate some of the trends that have changed the American labor force over the past 15 years or so. The proportion of adult men who are in the labor force has slowly declined, mainly because of great improvements in pensions and the opportunities for early retirement. At the same time women have poured into the job market, with sharp changes in the prevailing ideas about women's places and women's work. Over the past 15 years, the growth of the American economy has generated a net increase of 22 million jobs. Women hold 13.3 million, or 60 per cent, of those jobs. In 1961, about 38 per cent of the adult women in this country either had jobs or were looking for them. Today the proportion is up to 47 per cent.

At the same time, young people are coming into the job market in greater numbers than ever before in our history. More babies were born in 1960 than in any year before or since. Some of them are already looking for full-time jobs, but the main impact will come over the rest of this decade and the early 1980s. The significance for the unemployment rate lies in the fact that unemployment is always highest among the youngest workers. They are the least experienced and the least skilled. Most of them are still in the process of making up their minds regarding what they want to do. Some of them still live at home and, like the youngsters who vanished from the labor market this summer, they can afford to drop out if they do not find work they consider suitable.

The ominous rise in the monthly rates are a severe embarrassment to the Ford administration. But they also deserve to be read as a caution signal by the Democrats who hope to succeed it next January. Some Democrats hope to push down unemployment in the late 1970s merely by repeating the strategies of the early 1960s. There is an incautious line in the Democratic party platform (under the heading, "What the Democrats Can Achieve") that says: "The unemployment rate dropped from 6.7 per cent in 1961 to 3.6 per cent in 1968, and most segments of the population benefitted." All, you might say, but those who were caught up one way or another in Vietnam. By 1968, of course, the draft was running full blast, more than 3 million men were in the armed forces, and fiscal policies were emplanted here in Washington that had something to do with the subsequent inflation.

Whichever party wins in November, it will be committed to reducing unemployment in a labor force that differs markedly from that of 1961 when President Kennedy took office. It will be a labor force in which the youngest and most volatile age groups will be growing extremely rapidly. It will also be one in which there will be an unprecedented number of two-income households, in which workers can afford to move in and out of the labor force as opportunities arise or disappear. For some time there has been a tendency of employment and unemployment to move up and down together. That tendency is getting stronger. It is an economy in which growing opportunity itself generates a rising demand for new jobs.

[From the Wall Street Journal, Dec. 31, 1976]

NEW PROGRAMS FOR JOBLESS YOUTH

(By James C. Hyatt)

WASHINGTON.—Once again the politicians, scholars and economists are grappling with one of the most perplexing of all social and economic problems: the frustrated young job-seeker.

The statistics have long been distressing. Unemployment among all 16-to-19-year-olds has ranged between 18% and 20% for two years, and the rate for black youths alone approaches twice that level. Almost half of the 7.8 million jobless Americans are between the ages of 16 and 24.

Grim as the present figures may seem, the long-range implications are even more worrisome. Without jobs, skills or access to training, many youth "face enforced idleness, frustration, the temptations of the street, and lifetimes of poverty and dependence," declares Vernon E. Jordan Jr., head of the National Urban League.

So it's no surprise that youth employment is getting priority attention from the Carter transition team. Some advisers are talking of a $650 million national youth corps to provide public jobs and training for minority inner-city youngsters. A group of top corporate executives has proposed a similar urban youth corps, together with $300 million for an expanded Job Corps and another $1 billion for training programs aimed at youth. (Of course, any significant amount of help will be expensive. To employ only 100,000 youths at the minimum wage for a year would cost $460 million, not counting supervisory or training costs.)

Fresh looks at the problem, however, are reminding planners that unemployed youth present a far more complicated challenge than is generally understood. The army of jobless teenagers—1.7 million in November—represents a great variety of circumstances.

Many 16 and 17-year-olds, for instance, are still in school and mainly seeking part-time work, while most 18 and 19-year-olds are hunting full-time jobs. Many teenagers come from economically secure families, are reasonably skilled and aren't particularly in need of special aid so long as work is available. But hundreds of thousands of others

come from poor families where adult joblessness also prevails, and they live in inner cities where jobs are scarce.

WHO TO AID AND HOW?

As they survey this varied scene, policymakers must decide just how many and what kind of youth they plan to aid. The decision on what sort of help to offer is made more difficult by increasing disenchantment with many existing policies aimed at youth. There's considerable debate these days over whether the $2 billion or more the government spends a year on direct training and jobs for youth is truly productive.

One object of criticism is the perennial offering of summer jobs for youth, which pours millions into inner cities in a highly visible fashion. It is frankly viewed as a sort of "riot insurance" designed to cool the ghetto in June, July and August. Last summer's program paid 888,000 youth about $600 each, at a cost of about $528 million.

Wharton School economist Bernard E. Anderson calls the summer jobs "mainly an income transfer program" of limited value. And a Ford administration official grouses that teenagers holding such jobs often "don't feel any sense of accomplishment," because they do little significant work and often don't even put in many hours. That $528 million, the Congressional Budget Office estimates, would pay for about 114,000 year-round jobs at the minimum wage of $2.30 an hour.

Another major current program for youth, the Job Corps, was launched with much Great Society fanfare by Lyndon Johnson. Now almost a teenager itself, the program still operates about 60 centers costing $200 million a year, and training 20,000 youths at a time.

The intensive residential Job Corps experience shows that "the hardest-core youths could be changed," asserts Robert Taggart, executive director of the National Council on Employment Policy. But costs are high and dropout rates continue to be a problem. As recently as October, the Labor Department announced an experimental program of cash bonuses designed to persuade trainees to stay longer.

Moreover, Job Corps training has little value if there is no job to enter once training is completed. Only two-thirds of the 30,000 youths who finished the Job Corps in fiscal 1975 found work.

Cities and states operate still another major youth program of public-service jobs or training and work experience under the Comprehensive Employment and Training Act of 1973. In fiscal 1975, local governments spent about $1 billion on 800,000 youth under 22. But most of that money has gone to help fill public job vacancies; training has been cut back. Critics say that even if young people get a public-service job, they may have difficulty moving to private employment.

The criticism of current programs has led policy-makers to explore a variety of new approaches to unemployment among youth. The subject is certain to get attention early next year from both Congress and the Carter administration, but there's considerable controversy about what course to take.

Among many businessmen, it is an article of faith that thousands of jobs for teenagers could be generated simply by freezing or lowering the federal minimum wage for them. The National Association of Manufacturers calls such a move "a substantial step" toward providing more opportunities for youth. (Ironically, sizable numbers of youths already can work at less than minimum wage rates under present law; the government issued employers certificates permitting special rates for about 500,000 students during fiscal 1975, although many of the certificates went unused.)

However, the AFL–CIO is certain to resist any proposal to lower the wage floor for teenagers, fearing that youngsters would displace older workers. Indeed, the labor federation intends to make a higher minimum wage a top legislative goal in the next Congress.

Carl Madden, a professor at American University here and former chief economist for the U.S. Chamber of Commerce, would like to see the government issue "work scholarships" to young job-seekers. A youth might get a voucher worth $1 an hour for a year or two of work. Armed with that advantage, the youth would seek out attractive work; the employer would still have to pay the minimum wage.

More elaborate proposals are focusing on some form of domestic youth service—a sort of combination Peace Corps and 1930s-like Civilian Conservation Corps. Moves in this direction have already begun. The House last year passed a measure to create a year-round "Young Adult Conservation Corps" but it hasn't won Senate approval. (The government currently operates a small summer conservation program.) More recently, the National Commission for Manpower Policy, a federal panel, called for a year-round conservation corps to employ 50,000 youth, as well as a doubling of the size of the Job Corps.

Going farther, United Auto Workers President Leonard Woodcock has endorsed a larger voluntary youth service program open to all young people. He says it would prove "an opportunity to do meaningful work and to gain some level of training and job experience."

DIFFERING FUTURES

But such a plan has its skeptics. "The concept of a national service corps breaks apart when you try to think through a program to embrace both the college student bent on a year of service and the ghetto school dropout trying to cope with a very unpromising future," declares Bill Spring of Boston University's Regional Institute on Employment Policy.

He and a Boston University colleague, Paul Osterman, argue that government assistance should be designed to reflect the way youths typically enter the job market. The youngest job-seekers start out with casual, low-paying jobs, often while they're still in school. Older teens "begin attempting, seriously, to find a place" in the world, Mr. Spring notes. They often seek work in small businesses where they can learn a skill under close supervision.

Eventually, in their 20s, young workers with modest experience "are able to find jobs that offer advancement and security" at larger companies paying better wages, Mr. Spring says.

But too often, he adds, jobs programs have tried to move untrained youths directly into good, permanent jobs without providing the necessary "bridge" experience between school and work. Or these programs have sought to get youths to accept low-paying secondary jobs without worrying whether they will ever move to stable, attractive work.

Mr. Spring would like to see government attention paid first to minority youths in poverty areas, youngsters who seldom have family connections—fathers, uncles or other relatives—to help them locate jobs. He doubts that a program to aid them needs to be huge; it might aim at several hundred thousand unemployed, poor teenagers. "The numbers are manageable," Mr. Spring says.

He envisions modest part-time jobs for youths still in school. Older teenagers would get jobs in smaller firms where they wouldn't get lost in a mass of workers. Still older youths would get more substantial jobs designed for those who've been exposed to work and are ready to learn to settle down.

Designing an adequate program of assistance "will be an enormous job," Mr. Spring says, but he warns that failure to do so would mean "another generation is lost to the cycle of unemployment, poverty and crime."

[From the Wall Street Journal, Nov. 15, 1976]

TO MANY GHETTO BLACKS A STEADY JOB BECOMES ONLY A DISTANT HOPE: LEO BROWN OF CHICAGO IS AN OPTIMIST, BUT HE TIRES OF HEARING "NO, NO, NO,"—ONE RESULT: SOARING CRIME

(By Frederick C. Klein)

CHICAGO.—A couple of mornings a week Leo Brown fills out job-application forms somewhere or other, but mostly he stays home, watches television and thinks of what things will be like for him when he's working steady.

"Hey, it'll be real nice," says Leo, who is 19 years old and black. "I'll have some money, maybe get a car and my own place to live. Having something to do every day will make me feel good, you know? Like, "I'm a young dude, and I got a lot of pent-up energy. Once I start working, I bet I come up with an idea that'll help me move ahead. At the job, they'll say Leo Brown came up with this good idea."

All that, however, is pure surmise on Leo's part. Except for a nine-month stint in the Army, he has never held a full-time job even though he has been looking for one since he dropped out of high school three years ago. He is optimistic by nature, but he admits that the search for work sometimes gets him down. "I hear 'no,no,no' so much I wonder if I'm ever gonna hear yes," he says wearily.

A DISTANT HOPE

Leo Brown's situation points up the most disturbing aspect of a generally gloomy employment picture: the presence in the nation's big-city black ghettos of a large, growing and restless number of young people for whom a steady, decent-paying job is a distant hope at best.

Unemployment among young blacks long has been the highest of any group of Americans, but lately it has reached proportions not seen since the Depression of the 1930s. U.S. Labor Department statistics show that for most of this year, about 40% of blacks between the ages of 16 and 19 who want to work can't. This is about five times the overall jobless rate and more than twice that of teen-age whites. For blacks between the ages of 20 and 24, unemployment tops 20%, also more than twice the rate of whites of the same age.

Some groups contend that even those figures don't tell the full story. The National Urban League, a Washington-based civil-rights organization, notes that the Labor Department's measures of joblessness don't include people who have given up looking for work. And the department does count as employed those who have only part-time jobs but want or need full-time ones. If these groups are included, black teen-age unemployment could well exceed 65%, the league concludes.

ONE RESULT: CRIME

Thus, tens of thousands of young blacks are left to fend for themselves, and one result has been a level of juvenile crime that law-enforcement officials believe is without precedent in the U.S. These outbursts are mostly directed against other blacks (homicide is the leading cause of death among black men aged 16 to 25), but they occasionally spill out of the ghetto. In both Detroit and New York last summer, roaming gangs of black youths invaded mostly white sections to rob and assault whomever they encountered; it took huge turnouts of police to beat them back.

"What's surprising to me isn't that this sort of thing happens—it's that it happens so seldom," says a police official in one large Midwestern city.

Those who have studied the matter say

that the long-term implications of continuing very high unemployment among young blacks are no less unsettling. They assert that a person's first few years in the labor market are critical; unremitting failure then can cripple self-esteem and lead to a life of all but permanent unemployment, with sustenance obtainable only through public welfare or a mixture of crime, pickup jobs and "loans" from friends with a few dollars to spare.

THE PERMANENTLY DEPENDENT

Ronald Brown, the National Urban League's deputy executive director, says that roughly one million American blacks already fall into this category and that the number is rising fast. "We are creating a huge population of discouraged and permanently dependent people, with consequences we can only guess at," he asserts.

Making the situation all the worse is the growing conviction that the most obvious factors hindering young blacks in their search for jobs—lack of skills and poor academic training—actually may be among the least of their problems.

"The federal job-training programs of the 1960s showed us that given proper public commitment and funding, which, incidentally, I don't see now, fairly sophisticated job skills could be taught to youngsters with the least-promising school records," says Frank Cassell, a professor at Northwestern University's graduate school of management, who headed the U.S. Employment Service between 1966 and 1968. "They also showed us that even with training, a lot of things stand between a job and a black kid who might fill it.

"First, there's employer racism, conscious or not; without it, black unemployment wouldn't be twice that of whites at every level of education. Then there's the matter of companies and jobs moving out of the cities to the suburbs and beyond, where most blacks can't reach them. The importance of this can't be overstressed. Black unemployment is going to be high as long as present housing patterns continue.

"Finally, there's often a basic ignorance of what it takes to get and hold a job. Things like punctuality and the need to look presentable might be second nature to a middle-class kid, but it's altogether different with a kid raised in a ghetto slum."

A black man who works as a job counselor in a Chicago youth agency elaborates on the latter point. "You see black teen-agers on the street and they look tough and hip, but in some ways they're the exact opposite," he says. "It's hard for an outsider to realize how isolated a lot of them are.

"Take whites, for instance. A lot of ghetto kids have never known a white person, except for maybe a cop or a teacher. They see one in a job interview and they don't know how to act, so they clam up or act surly.

"They know their own neighborhoods, all right, but some of them have never been downtown, and the suburbs are another world. I've sent kids downtown for job interviews and later found out they never showed up because they got lost and didn't want to look uncool by asking directions.

"Take friends. To kids in the ghetto—especially the boys—the most important thing in the world is their buddies, and they can't imagine life without them. I've seen kids turn down jobs because they couldn't take their buddies with them. I've seen kids quit jobs because they want to be with their buddies on the street. They feel more important there than an a job with lots of strange whites."

THE WORLD OF LEO BROWN

It is in this milieu that Leo Brown, a young man of medium build who sports a mustache and goatee, hunts for a job. In some ways, he is better off than many unemployed blacks his age. Both his parents have steady jobs—his father in a factory that makes metal containers and his mother in the office of a downtown department store. He continues to live with them, along with a younger brother and sister. "They treat me nice considering I got no job," he says. "Sometimes they even give me a dollar or two to walk around with."

Their home is a neat, single-family dwelling on a street of such houses in an all-black section of this city's South Side. The setting is hardly pastoral; the area is partly industrial, and the street is just a block from a noisy, smoky, eight-lane expressway. What's more, evidence of unemployment is easily seen. At 11 a.m. on a recent sunny weekday, groups of men loitered on the steps of several of the houses, while others played catch with a softball or tinkered with their cars.

But it's a nicer block than some. About a half-mile away stands the Robert Taylor Homes, the very model of the type of stark high-rise, public-housing complex that has become known here and elsewhere as a breeding ground for crime. "That's a good place to go if you want to get beat up," Leo says. "The gangs over there are always fighting. If they don't have another gang to fight with, they fight themselves."

Leo, however, does share a number of important traits with others of his circumstance. For instance, the fact that he is a high-school dropout puts him among the majority of poverty-area blacks here. The dropout rate exceeds 60% at several Chicago ghetto high schools, and some youngsters don't even get that far.

SCHOOL "WAS NO THRILL"

Leo made it as far as grade 10. "School wasn't so bad, but it was no thrill either," he relates. "I was hanging out with some boys, and we started cutting classes. We'd fool around in the parks, shoot dice, rip off freshies (freshmen) for quarters . . . that kind of thing. I got me a big record around that school, and they didn't like me. When I hit 16, I quit." Leo can read adequately, but he says his math is poor.

Leo isn't a gang member, and adults who know him describe him as easygoing—a follower, not a leader. Still, he has had his share of run-ins with the police, something that's not uncommon in his neighborhood. "You hang around doing nothing, they (the police) pick you up for suspicion," he says with a shrug.

He got into more serious trouble when he helped himself to large cardboard container that he says some other boys had tossed off a freight car parked on a siding near his home. "The police came, and everybody ran off, but I got caught," he says. He was arrested, booked and placed under the supervision of a social worker. He stayed out of trouble for a year, so the affair didn't go on his record.

Leo took a stab at vocational training shortly after he left high school by enrolling in a course in auto repair offered by the city school system. He passed it but says it didn't prepare him to be a mechanic. "They taught us a few things, but not much," he says, adding that he didn't have the interest to pursue the subject further.

After about a year of fruitless job hunting, Leo joined the Army. That too, proved to be a disappointment. He wanted to go to Hawaii, where "it's always warm and nice," but was sent to Germany. His initial job as a tank-turret mechanic suited him well enough, but it was short-lived, and he was ordered to begin training to be a tank driver. He rebelled.

ONLY OCCASIONAL WORK

"I like being a mechanic," he says. "I was nothing but a private, but I was telling sergeants to hand me this, hand me that. When they said they wanted me to drive a tank instead, I got mad."

He complained to the judge advocate general's office that the change of assignment violated the terms of his enlistment. The complaint was upheld, and he was honorably discharged from the service in June 1975.

Since then, Leo has had only occasional work. He was a taxi driver for two days but was fired when he was involved in an accident and ticketed for making an illegal turn. Several days a month he does day labor for pocket money but says it's often more trouble than it's worth. "They pay you $18 a day, which is okay, but they take out $2 for taxes and it costs me $2 for carfare and lunch. Some days, you sit all morning, but there's no work so you are just out $2."

And so Leo looks through the want ads for jobs that don't require experience, sticking pretty much to the city. A friend once gave him a ride to a suburban factory, where he filled out an application, but he got lost on the way home and doesn't want to repeat that experience.

If the weather is nice, he might shoot baskets with some friends in a nearby park, but he usually sits around waiting for the telephone to ring. "The worst part is that nobody ever calls you back," he says. "You fill out a form and they say they'll let you know, but they don't. I got one call back, from the Prudential Life Insurance Co. They wanted a stock boy. They called to tell me they found a better-qualified man than me, but, hey, it was a thrill just to hear that phone ring."

MOST COUNTRIES SURPASSING U.S. IN PROGRAMS AND INCENTIVES TO INDUSTRY FOR EMPLOYMENT

(By Clyde H. Farnsworth)

PARIS, Dec. 13.—The British have started a crash program in youth work experience. Belgium is hiring more young civil servants. Most European governments are giving subsidies to employers who hire and train teenagers. Many are creating jobs for them in land reclamation, canal cleaning and other public works.

Though jobless rates among youth are rising on both sides of the Atlantic during the faltering economic recovery, the Europeans are ahead of the Americans in programs to deal with what has become a potentially explosive situation.

Most of the measures are still too recent to have had anything more than a marginal effect on figures showing a third of the five million unemployed in the nine-member European Economic Community to be under 25 years of age. But the action—and talk of more action in European capitals and in the international capitals and in the international agencies in which governments exchange ideas—is a sign of growing awareness of the vulnerability of youth during economic distress.

What the Europeans are doing could have some influence on the Carter administration in the United States, where unemployment is more acute and where the rate among teenagers is running two and a half times the national average.

LARGER NATIONAL PROGRAMS URGED

Some American businessmen, among them Irving S. Shapiro, chairman of Du Pont, have proposed greatly enlarged government programs to provide the kinds of financial incentives that the Europeans are already offering business to hire and train the underqualified.

Intervention by the state reflects a widely shared view that European economic growth, at the less hearty rates now forecast, will be incapable of absorbing much of the poten-

tial labor supply at least until the 1980's. As the Common Market's Commissioner for Social Affairs, Patrick J. Hillery of Ireland, put it: "It is illusory to think that growth alone can re-establish equilibrium in the labor market."

The French have the best-endowed incentive plan, under which an employer who recruits those under 25 gets $100 a month for six months. The plan includes safeguards to prevent employers from simply dismissing older workers, hiring younger ones and pocketing the subsidy.

Despite the plan France still has the highest unemployment rate among the young—two of five of the jobless are under 25—in the Common Market. This is an indication of deep structural problems, especially in bridging the gap between work and schools that assign vocational preparedness an unusually low priority.

BRITISH, DUTCH AND SWEDISH PLANS

Britain gives employers $8 a week for 26 weeks as an incentive to hire youths. Dutch employers who take on teen-aged apprentices are paid $25 a week by the state, and there is also a special incentive plan for the placement of 16-year-olds. In Sweden 35 percent of the wage costs of each young worker added to the rolls is paid by the state. West Germany also has an incentive program, but it is based on a tax levied on employers with payrolls of more than $150,000.

Several countries also provide allowances to help young workers leave their home regions. These have had mixed results. In France youths in depressed Britany do not make full use of the allowance, preferring to emigrate to West Germany, where they get no governmental help but where wages are higher. In Sweden there has been a high rate of return to home communities by workers dissatisfied with their moves.

Several countries have devised job programs on the model of the Civilian Conservations Corps of the Depression years in the United States, Britain has spent $60 million creating 30,000 jobs paying $55 a week, but the program has come under criticism as unnecessarily extravagant and excessively bureaucratic. Denmark and the Netherlands have similar programs, while Italy, provided its financial conditions permit, is considering a $500 million effort to generate jobs for those aged 15 to 28, especially in the depressed south.

EFFORT IN SHABBY LONDON AREA

All the programs are directed toward less privileged, less qualified youth and are specially designed to be labor-intensive. In some cases, such as public-works projects in Denmark, the young workers have commented that their tasks could have been more efficiently handled with excavators and dump trucks.

One of the more successful projects is in the shabby Brixton district of South London, where a large population of West Indians live in derelict semidetached homes and attend schools recalling the blackboard jungle. Here Courtney and Hamilton Laws brothers who are leaders of the black community, run community training classes, to help teen-agers find gainful employment.

On a tour of Brixton they show houses that have been restored by teen-aged work gangs, classes in typing for young people who are hoping to get office jobs, and a warehouse where Hamilton Laws is teaching 20 teen-agers the finer points of motor mechanics, electrical installation and home decoration.

"These kids have been hanging around for two years," Courtney Laws said. "We brought them off the streets."

The Brixton project is part of a British work-experience program that has helped 30,000 dropouts to find jobs.

DISADVANTAGED YOUTH GIVEN HELP WITH VOCATIONAL TRAINING FOR JOBS

(By Lana Williams)

David is a 19-year-old high school dropout with a police record who spends most of his time on the streets looking for a job or a victim.

He says he would like to tell the New York State Legislature about the frustration faced by youths like him who are poorly educated, out of work, out of money and who turn to street crimes because they say it is the only way to survive.

To meet this need, the Vocational Foundation Inc. is providing a forum through which they can address decision-makers, administrators, businessmen and advocacy groups in a position to respond to their call for help.

The 40-year-old nonprofit agency helps disadvantage youths, age 16 to 19, get jobs and give them vocational guidance.

Fifty teen-agers—many of them high school dropouts, former drug addicts, delinquency-prone and unemployed—are taking part in seminars at the agency's offices at 44 West 23d Street on what they perceive as their six critical problem areas: unemployment, crime, vocational/educational training, employment, adjustment and social development and deteriorating public education.

"We have been saturated by the sociologists' view of what the youths want and what their needs are, especially with minority youths," George W. Carson, executive director and vice president of the agency said yesterday. "So we have decided to let the youths speak. To let them tell us what they want and need. It is perhaps the first time that youths are telling us what their problems are."

KIDS HAVE A LOT TO SAY

Two 60-minute sessions on each of the six subjects have been videotaped, and the results were called "powerful" by the project's director, Leland Stokes Jr.

"These kids have a lot to say about the things that are affecting their lives," said Mr. Stokes.

"At first the kids were uptight. They didn't trust the group leader, and they were more concerned about their appearance than with what they had to say."

With only the first part of the project completed, much of what has been learned about the teen-agers reflects a common thread of disenchantment with the educational and employment system and a yearning for taking by force what cannot be obtained for the asking.

Several of these youths, who come from all parts of the city, have committed crimes for which they were never prosecuted.

"These kids operate alone, rather than in groups," said Joseph Dennis, a media-consultant for the project. "They are more likely to plan their crimes before committing them. And they feel there is nothing wrong in what they are doing.

"A few years ago, most youths had some ties to an adult—a mom, dad, grandmother, aunt, older sister or brother—but these youth are out here on their own, with no one to tell them what is right or wrong."

With funds from governmental agencies, foundations, corporations, individuals, the agency has been able to secure jobs for nearly 3,000 teen-agers a year.

Through the agency's remedial education program, nearly 2,000 youths each year are able to pass the high school equivalency test to obtain their diplomas.

By the end of February, when the project is expected to be completed, the agency hopes to have a better understanding of why so many disadvantaged youths are turning to the streets.

[From the Wall Street Journal]

STATE OF THE ECONOMY: JOBLESS RATE CLIMBS TO 8.1 PERCENT, WHOLESALE PRICE RISE IS LEVEL

WASHINGTON.—With the unemployment rate topping 8% for the first time this year, Jimmy Carter is being prodded to take early steps to stimulate the economy.

It is likely, the President-elect told a news conference, that the economy "will need help." But he said he would wait until after Jan. 1 to decide how much help it will need and what form the help should take.

Mr. Carter's statement Friday came on the heels of a Labor Department report that the unemployment rate in November was 8.1% of the work force, up from 7.9% in October and the highest since last December's 8.3% (see chart on page one). The number of people with jobs rose 357,000 to 88,130,000, but the ranks of unemployed increased at the same time by 200,000, to 7,769,000. The number of women in the labor force swelled 424,000, accounting for most of a 557,000 overall expansion.

Another Labor Department report showed wholesale prices in November rising at the same 7.2% annual rate as in October. Industrial prices increased at a 9.6% rate, marking a slowdown from October's 12% clip, and government analysts saw signs that there will be more abatement in industrial prices in coming months.

UNEMPLOYMENT

At the White House, Press Secretary Ron Nessen said, "Obviously we're unhappy with the rise in unemployment." However, Mr. Nessen said White House economists detected some positive signs in the latest report, notably increases in employment, the average workweek and overtime of factory workers, and hours worked last month.

The press spokesman said the November increase in hours worked by the labor force suggests that industrial production figures for last month will show a rise from October. Mr. Nessen also quoted Alan Greenspan, the President's chief economic adviser, as saying the jobless report's positive signs indicate that the current pause in economic growth "is coming to an end."

The rise in joblessness brought outcries from labor leaders for more economic stimulus. United Auto Workers President Leonard Woodcock said the unemployment figures show "the economy is in serious shape," and he added: "I'm just sorry that Jan. 20 (Inauguration Day) isn't closer than it is." AFL-CIO President George Meany said America "obviously" needs "programs that will encourage balanced growth and full employment"—programs, he noted, that "Mr. Carter discussed during the campaign."

Despite the big increase in the number of women in the labor force, the unemployment rate among adult women rose only slightly—to 7.7% from 7.6%—indicating that many of the female job seekers were successful.

Also relatively stable were the jobless rates for teen-agers and blacks—two groups that, because of their relatively high level of unemployment, are likely to be the object of special federal job programs in the Carter administration. The teen-age jobless rate was unchanged at 19%; the black unemployment rate rose to 13.6% from 13.5%.

The rate for adult men climbed to 6.5% from 6.3%, and for married men the increase was to 4.6% from 4.4%. Joblessness among household heads was unchanged at 5.4%.

Nonfarm payrolls expanded 260,000 to 79,711,000, but more than 100,000 of the increase consisted of Ford Motor Co. employes returning to their jobs after the recent strike.

The increase in employment was termed "good news" by John Kendrick, the Commerce Department's chief economist. Also in the good news category, Mr. Kendrick said, was the lengthening of the average workweek to 36.2 hours from 36.1 hours. The manufacturing workweek was 40.1 hours, up from 39.8 hours in October, and factory overtime

increased to an average 3.1 hours from 2.9 hours the month before.

The bad news in the latest report, aside from the increase in the overall unemployment rate, was that the average duration of unemployment stretched to 15.6 weeks from 15.4 weeks the previous month, Mr. Kendrick said.

Erratic jumps in the labor force continue to confound economic forecasters, the November report indicated. The sharp November upswing followed several months in which the civilian labor force—the number of people employed, plus unemployed job seekers—was unchanged. That, in turn, followed big bulges in the labor force earlier this year.

"This report illustrates the dilemma we're in," Mr. Kendrick said. "Employment and hours worked are expanding, but not fast enough to accommodate the labor force growth."

WHOLESALE PRICES

On the wholesale price front, there were indications that the big increase in natural-gas prices that has been behind much of the last two month's rises in industrial prices has been pretty much absorbed into the wholesale price index, meaning it won't boost wholesale prices in future months.

Of November's 0.8% rise in industrial prices, which translates to a 9.6% annual rate, nearly half was caused by natural gas, the Labor Department said. Overall prices rose 0.6%, or a 7.2% annual clip, adjusted for seasonal variations. Before adjustment, wholesale prices climbed only 0.2%. The Labor Department's wholesale price index for November stood at 185.6% of the 1967 average, up from 185.2% in October and 4.2% higher than in November 1975 (see chart).

Farm and food prices, which had declined in a number of recent months, turned slightly upward in November. Together they rose 0.2% after having fallen 0.9% in October.

Mr. Kendrick said it was "encouraging" that this reversal in direction didn't cause an acceleration of wholesale prices overall. Government analysts foresee modest food price increases in the months ahead, Mr. Kendrick said.

Mr. Kendrick also forecast continued moderation in consumer prices in coming months. Since June, consumer prices have risen no more than 0.5% in any one month despite sharper jumps in wholesale prices, which normally presage consumer price trends.

Government economists, including Mr. Kendrick, have ascribed this discrepancy to fears of price controls. Businesses are raising list prices, but selling at below list so that if prices are frozen, they'll be frozen at a high level, the economists believe. The wholesale price index records list prices.

[From the Wall Street Journal]

EMPLOYMENT SEEN RISING 20 PERCENT IN DECADE AS PROSPECTS AMONG JOBS RANGE WIDELY

WASHINGTON.—Total U.S. employment is expected to rise 20% between 1974 and 1985 with job prospects in particular occupations ranking from bountiful to dismal, new Labor Department projections show.

Rising population and personal income will generate a 35% increase in demand for service workers such as building cleaners, police officers, nurses and health aides, the study says.

But changes in technology and in the age makeup of the population will sharply cut back other needed tasks, including a projected 24% drop in the number of stenographers and a 20% decline in keypunch operators, according to the study. Lower birth rates mean an 8% decline in secondary-school teachers.

The job outlook for the 1974–1985 period, described by Max L. Carey, a Labor Department economist, in the November Monthly Labor Review magazine, contains a variety of good and bad news for prospective job seekers. According to the forecasts:

—About 13.1 million college graduates will enter the civilian job market in the decade, while job openings requiring college graduates will total only 12.1 million.

—Although the department's projection assumes a 4% unemployment by 1985, 69% of the 57.6 million job openings in that decade will come from retirements, deaths and transfers of already employed workers. Only 17.4 million of the new jobs will represent economic growth.

—Of the 103.4 million workers in 1985, more than half, or 53.2 million, will be in white-collar jobs. About 33.7 million will be in blue-collar jobs, 14 million will be service workers, and 1.9 million will be farm workers. (That's 39% fewer farm workers than in 1974.)

GROWTH BY CATEGORIES

The study expects a 29% growth in employment among professional and technical workers, with even stronger demand for civil engineers and geologists, up 35%; actuaries and mathematicians, 45%; surveyors, 59%; dental hygienists, 158% (the largest of any category); computer specialists, 55%; lawyers, 42%; and social workers, 43%. But the department projects a 2% drop in jobs for college and university teachers.

Among managers, officials and proprietors, demand will be particularly strong for bank officers and financial managers, up 47%; health administrators, up 67%, and school administrators, 43%, the study says. However, the number of funeral directors will decline 6% and postmasters and mail superintendents will drop 16%.

In the fast-growing clerical-worker category, the department forecasts a 50% increase in jobs for secretaries, but only a 9% growth for office-machine operators. Billing clerks will be up 46%; file clerks, only 16%. Mail handlers will increase 35% in private concerns, but only 3% at the Postal Service. The number of teachers' aides will increase 88% but the number of telephone operators will drop 1% by 1985, according to the report.

Among craft and industrial workers, where an overall 20% gain is forecast, a 27% increase in construction-trade workers is expected, including 51% more bulldozer operators, 44% more roofers and 33% more cement finishers. But demand for plasterers will drop 4%, and demand for painters will rise only 7%.

MORE MECHANICS NEEDED

"More mechanics will be needed to repair industrial and consumer machinery," the study says, forecasting a 37% increase in demand for air-conditioning and heating mechanics, an 86% increase for data-processing machine repairers, and a 49% boost in office-machine repairers. But printing trades will show only a 5% increase, railroad repairers will drop 20%, bakers will fall 2%, and demand for shoe repairers will decline 10%, the report says.

Jobs for textile workers will fall 15%; clothing ironers and pressers, down 20%; sailors and deckhands, down 12%, and cab drivers, down 18%, according to the report. But the study expects a 26% increase in jobs for welders, a 67% gain for asbestos and insulation workers, a 43% gain for photographic process workers and a 23% gain for bus drivers.

Among service workers, fewer baggage porters, elevator operators and private household workers will be employed. But a 70% boost is forecast for health-service workers, 56% for child-care workers and 46% for police and detectives.

The new survey updates projections previously prepared by the department in 1973, and boosts the former estimate of 1985 employment by about 1.9 million, or 1%.

ITALY PLANS YOUTH JOBS INCENTIVES

(By Sari Gilbert)

ROME, October 31.—Italian firms hiring recent high school or college graduates will receive special financial incentives under a new government plan to cut the socially explosive degree of unemployment among those young people seeking their first jobs.

Despite a continuing and serious recession, Italy's official statistics list only 850,000 persons currently unemployed. But both government and private-sector economists agree that the brunt of the recession has fallen on the young.

According to official projections—which in Italy are generally low—within three or four years, there could be as many as two million unemployed young people with secondary-school diplomas or college degrees.

The government's new proposal, announced on Friday by Tina Anselmi, the minister of labor and the only woman in the Cabinet, would allocate close to $500 million to provide work and training for up to 420,000 young people a year.

Presented after extensive talks with Italian business leaders and representatives of the powerful CGIL–CISL–UIL trade union federation, the new plan would involve the public sector as well as private industry.

The government's draft bill, which will be debated in Parliament later this year, will use incentives to businesses to encourage the employment of 300,000 young people between the ages of 15 and 22, or 28 in the case of college graduates.

Northern firms, which will be allowed to hire two youngsters for every 30 employees, will receive $40 a month from the state for every person hired under the new program. In the south, where the problem is even more acute, the proportion will be greater. Three young employees will be allowed for every 20 normally hired, and firms will receive a monthly state contribution of $80. The payments will be made for periods ranging from 18 months in the north to 2 years in the south.

The young unemployed, who will have to register on special state employment rolls, will be hired for 12-month periods that may be doubled in the case of those with special skills. The unskilled will have shorter working hours and will be required to follow special training courses expected to lead to regular jobs.

The plan also provides for civil service employment for an additional 120,000 young persons who would be given normal salaries and contracts running from four months to two years for work in understaffed government departments such as libraries, museums, archives and registry offices. Another provision reserves 25 per cent of all civil service jobs in the next three years for persons falling into the young-unemployed category.

Economists, sociologists and educational experts agree that the present situation has been created only in part by the recession, which has forced firms to combat rising labor costs by blocking employee turnover.

They say another cause is a total lack of planning in the education field that has allowed thousands of students to pursue studies in fields such as accounting, medicine and law that already are highly oversupplied.

The new plan therefore would use temporary employment and retraining to drain some of the current labor excess.

Queried about their reactions, several business representatives pointed out that the future employment of young graduates cannot be guaranteed without an overall plan for industrial expansion.

Those questioned added that they were particularly worried about the limited-term contracts which in Italy have been used in the courts by employees seeking full-time jobs. "One of the reasons firms are hesitant

to hire is that in Italy it is easier to divorce a wife than fire a worker," a top Milan industrialist told the city's prestigious daily, Corriere Della Sera.

CASTING A LIFEBUOY

(By Mitchell Sviridoff)

Hope dies hard. Even in that grim, disturbing portrait of a welfare mother that appeared in a recent issue of The New Yorker, there are a few barely detectable flashes of aspiration and ambition. Carmen Santana, the subject of the article, surveys the wreckage of her life and murmurs the faintest appeal for help, for some kind of work that will bring purpose and direction to her life.

She has not held a conventional job for more than ten years. Yet when she sees a file clerk working in her son's school, she thinks, "That's the kind of job I could do." But this flickering interest in work is quickly suppressed because "she has no idea what job there may be in New York City that will pay a living wage for a middle-aged Puerto Rican woman with an eighth-grade education who speaks so-so English, possesses no skills and suffers from bronchitis."

Or, it might be added, what jobs are there for an ex-convict who served 20 years, for a teen-ager who dropped out of school in the tenth grade possessing no work credentials aside from a fifth-grade reading level, for an addict who must report every day for his methadone dosage, and for a former mental patient who has been institutionalized for five years?

There are millions of Americans who belong to what might be loosely described as the underclass of this society and whom even an effective full-employment policy would not reach. For they are not counted in the unemployment rate because they have long since dropped out of the job market or, perhaps, never entered it. They are our civilian missing-in-action. Urban and rural, black and white, young and old, men and women, they wring whatever money they can out of the welfare system, are swept up in the dead-end cycle of selling and using drugs, frequently turn to crime and sometimes to violence.

The various employment-related programs of the last ten years were basically designed for people who retained enough self-esteem to believe that given a chance they could function in a job—not for Carmen Santana or millions of others who have lost faith in their ability to work or their chance to get or hold a job.

Today, an effort is under way that is addressed to this population. It is a test of the concept known as "supported work." It is an adaptation of the sheltered-work approach developed in the Netherlands, Sweden and Britain to provide subsidized employment to physically and mentally handicapped persons unable to find work in the job market.

It was introduced by the Vera Institute of Justice in New York in 1972 in cooperation with New York City's Department of Employment, and is run by the nonprofit Wildcat Corporation. Unlike the European model on which it drew, it was developed specifically for former addicts and former offenders. Also unlike previous efforts, it uses primarily existing resources rather than new funds.

The results of the Vera experiment showed enough promise to warrant a national demonstration. In January 1975, supported-work programs were established in thirteen states. In a unique pattern of cooperation on a national level, they are being funded by five Federal agencies (with the Labor Department in the lead), the Ford Foundation and local sources. The group participating in the national demonstration was expanded to include unemployed poor youth, female heads of households receiving public assistance, and the mentally ill. In the first year about 1,500 people have taken part. In the second and third years 3,000 people will work in this program. Like the Vera-Wildcat program, the national demonstration emphasizes sensitive supervision of the participants and peer-group supports.

Their paychecks may consist of social benefit payments, reimbursements by public or private employers for services rendered, and allocations from various government training and demonstration grants. A major feature is conversion of the benefits of participants on welfare into a salary pool. To the extent that the demonstration is successful, this kind of program may provide one way out of-the-welfare trap, with public funds going not to maintain dependency but to pay for useful work.

One key feature of the demonstration is its tight link to a rigorous evaluation, so that three years hence we shall know the cost and the benefits, how many participants can manage the transition into the open labor market, how many can function effectively in the supported-work environment, and how many cannot manage at all. In short, we shall know a lot more about what is possible under a paycheck instead of a welfare-check policy and to that extent be less likely to plunge into large-scale expenditures based on inadequate information.

In the long run it will be necessary to complement supported work with other efforts: The criminal-justice system has to be reformed, drug treatment and prevention programs must be improved and expanded, and the welfare system itself must be overhauled. Meanwhile, supported work is one attempt at a rational response to Carmen Santana's faint plea for help.

NEWARK PROJECT TRAINS HARD-CORE JOBLESS

(By Lawrence E. Pratt)

An innovative program designed to train and employ two groups of Newark's hard-core unemployed—welfare recipients and ex-offenders—is betting a million it can do the job without reverting to "sweeping sand" placements.

The program is operated by the Newark Services Corp., a nonprofit organization formed recently with a three-year Ford Foundation demonstration grant plus matching city and state funds.

One of only 13 such Ford-funded pilot projects in the nation (another is operating in Jersey City), the corporation has a $1-million annual budget.

NO FABRICATED JOBS

"We don't put persons into make-work situations," said Lawrence E. Pratt of Plainfield, president of the corporation.

Rather, Pratt explained, his organization enters into contracts with public agencies and private companies to perform what he terms "essential jobs."

The program's participants, or employes, are supervised by skilled consultants to improve their on-the-job performances in areas such as clerical and other office work, as graphics specialists and researchers and as construction workers.

Besides a security force and a clerical crew working in the corporation's executive offices at 215 Central Ave., Pratt said crews are also employed by the city's Department of Engineering and by the Newark Watershed Conservation and Development Corp. at the Pequannock Watershed.

NEGOTIATE OTHER CONTRACTS

Other contracts are being negotiated to provide transportation services, building rehabilitation and building maintenance services, Pratt said.

He said tuition funds are available for employes who wish to improve their academic skills.

The program, which began preparations in May, was funded to train and enhance employability of 80 former convicts and 80 welfare mothers. Participants are referred to the corporation by state and city agencies.

EX-OFFENDERS ELIGIBLE

Pratt, a former social worker, said ex-offenders are referred to the program within six months after their release from prison. Studies show, he noted, that recidivism usually occurs among ex-offenders in that time.

"Somebody is going to have to do something about ex-offenders and welfare mothers," Pratt said, "or the whole damn society is going to fall."

The corporation is directed by an 18-member board composed of Newark residents or persons working in New Jersey's largest city. Donald McCormick, a vice president of Howard Savings Bank, is board chairman.

COMMUNITY HELP IS THE NAME OF THE GAME

(By David Grossman)

At six in the morning, in a small warehouse in the shadow of the Jersey City Medical Center, a group of workers begins loading a truck with packages of breakfast food for delivery to thousands of hungry youngsters in the city's schools.

Unused to rising so early, the six workers hurry to meet the 8 a.m. delivery deadline. None has ever held a steady job. A few weeks before, they were on the street, with no skills, little job experience and backgrounds that made finding work almost impossible.

The warehouse workers are ex-addicts, ex-offenders and out-of-school teenagers.

The company that employs them and another 130 trainees is the Community Help Corporation, an innovative job training program for Jersey City's "hard core" unemployed.

Established last March as an affiliate of the Patrick House drug treatment program, the Community Help Corporation—CHC—is a private, publicly-funded supported work program.

In a closely supervised setting, CHC gives its employees 12 months of paid "transitional" employment, on-the-job training, counseling and health, legal and educational services.

Its goal is to provide the trainees with the skills, responsible work attitudes and job history that will enable them to find permanent, unsubsidized employment outside the corporation.

Funded by a federal grant and the Jersey City Manpower program, CHC develops training jobs—and generates additional income—by acting as a contractor for public and private projects ranging from the delivery of food packages for Jersey City's Board of Education and Department of Human Resources to painting houses and maintaining a parochial school.

The company is also involved directly in the rehabilitation of abandoned or foreclosed houses which it buys and refurbishes for resale. And, in order to keep all its trainees busy and to meet a second goal of community service, CHC performs some free work for city departments, social agencies and Patrick House.

The Community Help Corporation is aimed at three target groups among Jersey City's chronic unemployed—the ex-addict, the ex-offender and the out-of-school youth between the ages of 17 and 20.

The jobless rate for these groups is more than double the 12 per cent rate for the city as a whole, according to CHC. Handicapped

by the stigma attached to their criminal or drug backgrounds or their lack of schooling, they have worked only fitfully, if at all, moving from job to job. Their skills and motivation are poor and the chances are high, CHC says, that they will return or resort to crime or drugs.

The Community Help Corporation is one of 13 supported work programs in major cities across the country—including Philadelphia, Boston, St. Louis and Newark—funded on an experimental, three-year basis by the Manpower Demonstration Research Corporation.

The MRDC is, in turn, funded by six federal agencies, chiefly the Department of Labor, with some aid from the Ford Foundation.

In the year that ends Feb. 29, CHC received $630,000 from MDRC for 89 trainee slots.

The Jersey City Manpower program committed another $402,000 in federal CETA (Comprehensive Employment and Training Act) funds for 36 trainee and 20 staff positions for 17 months ending June 30.

Like the other supported work programs, CHC, at the urging of MDRC, is affiliated with local and state government through the membership of its board of directors.

Like the others, it works closely with and has been promised the support of city government. And like one other program—in Philadelphia—it evolved from and is still closely tied to the local drug program.

The Rev. Francis Schiller is executive director and a trustee of both CHC and Patrick House. Several top CHC employes are also current or former Patrick House employes.

CHC rents office and warehouse space for $49,000 a year in Patrick House's administration building on Cornelison Avenue. One-third of CHC's trainees are Patrick House clients.

The CHC board of directors also includes Wellington Davis, Jersey City personnel director and Board of Education president; Glenn Cunningham, a freeholder and Jersey City police detective; Bernard Hartnett, county Democratic chairman; and William Tracey a former Jersey City employe who now works for the State Labor Department.

CHC was formed when Jersey City Mayor Paul Jordan designated Patrick House as the contractor for an initial federal grant to the city to plan a supported work funding proposal to MDRC.

According to Brian Doherty, a former administrative assistant to Father Schiller, Patrick House since 1973 had been running a small supported work program for some of its clients, assigning them to maintain the drug program's clinics or renovate its alternate school.

Doherty said that when MDRC announced plans to fund pilot job programs, Patrick House contacted the agency and put it in touch with the mayor's office.

If CHC and its sister programs are successful in creating training opportunities, generating outside income and placing trainees in permanent jobs, MDRC will recommend to the federal government that it continue and increase supported work funding, according to MDRC Director William Grinker.

But Father Schiller says that the Jersey City program has already shown its success.

Seven CHC trainees have already found jobs. Although a high absenteeism rate and poor motivation might be expected, attendance is running at 78 per cent and three-quarters of those enrolled are still in the program.

The corporation's contract billings so far total $389,000, according to John Baker, CHC's assistant director in charge of marketing.

About 30 per cent of that amount, Baker said, is "cash flow" that can be turned back into the company to cover overhead, buy equipment, pay salaries or create more training slots.

In competitive bidding with private firms, CHC has won three city contracts that, by June, may total more than $600,000.

A 12-month contract for the supply and delivery of supplemental food items in the federally-funded women, infants and children (WIC) program administered by the city's Department of Human Resources has already generated $103,000 in billings.

If maximum program capacity of 4,000 recipients is reached, the WIC contract could generate as much as $362,000 by the time it runs out in June.

CHC was low bidder for two Board of Education contracts for the daily delivery of cold breakfast foods to some 5,100 school children in 11 schools.

A four-month contract—expiring today—grossed some $110,000 while a second five-month contract, running through June, could generate $145,000, depending on the final number of children enrolled in the breakfast program.

CHC has also drummed up—and its employes have completed—some 130 small, private home repair and renovation contract jobs.

According to Baker, they ranged from $50 to $2,000, from fixing a stoop to re-siding or painting a house.

In the city's Bergen-Lafayette section, CHC crews are also rehabilitating two houses purchased from the Federal Housing Administration and another donated by a local bank.

When the renovations are finished, CHC will sell the three homes to owner-occupants for the cost of labor and materials and look for other houses to fix up, Doherty said.

Baker said that CHC did another $4,600 of work for Jersey City in smaller jobs, including painting the Jones Hall basement and the Seventh Precinct police station and fencing in 30 empty lots.

Trainees also did some free work for the city, cleaning out parking lots, painting, and boarding up a city-owned house.

In addition, CHC performed another $38,000 in contract work for Patrick House including the renovation of its Cornelison Avenue headquarters and the maintenance of its drug clinics. Trainees also did about $26,000 worth of free work for Patrick House, including the refurbishing of a drug free residence and minor repair work.

The Jersey City chapter of the NAACP also received free CHC labor to paint and install partitions in its new offices.

But CHC's success has not gone unquestioned. Its food delivery performance has been criticized and some have questioned whether, with no track record, it should have received the city contract at all.

Others have questioned whether a publicly-funded job program should bid against private enterprise and then receive additional public funds for municipal contracts.

"I don't think our competition is unfair," said Father Schiller. "It's very fair to the guys who work here. Some haven't worked in 10 years, but they're working now.

"If tomorrow private business would take in these trainees, there would be no need for CHC," he said. "But in private enterprise, the moral consciousness and social responsibility is not there."

Father Schiller said that despite government subsidies, the program is not in an especially competitive position because its workers are less productive and require more supervision than those in private industry.

Richard DeCrescenzo, CHC's assistant director of operations, said that trainees are about two or three times slower than skilled craftsmen.

Although the Board of Education reports no problems with CHC's breakfast deliveries, the former director of the WIC program said that before she quit last November she was flooded with recipients' complaints of late deliveries or incomplete or damaged packages.

"CHC didn't do anything right from day one," said Martha Larkins, who directed the WIC program since it began in June.

"Packages were supposed to be delivered within five days after orders were received, but they were never on time," she said. "I got about 30 or 40 complaints a day."

The Human Resources Department's original plans for the WIC program are another example of the close city cooperation with Patrick House.

The Department at first wanted to delegate the contract, potentially worth some $350,000, without competitive bidding to CHC as a nonprofit, social service agency.

William Macchi, Human Resources director, at the time was a CHC trustee as well as a member of the Patrick House board of directors. Patrick House, meanwhile, was negotiating to buy for $7,000 a city-owned warehouse that the redevelopment agency had bought for $65,000.

But after talks with federal and state officials, Macchi decided CHC couldn't qualify as a social service agency and, resigning as a CHC trustee in May, put the WIC contract out to bid.

Baker said the WIC deliveries were "fantastic" until October, when the city suddenly doubled CHC's workload by asking for monthly, rather than the previous bi-monthly, deliveries.

Jack Morris, the city's current WIC director, says the deliveries are now up to date.

CHC now has the appearance of an up-and-coming business with its own uniforms, employe manual, a five-member trainee service unit, marketing division and 23-member management staff earning a total $270,000, and 16 instructors, counselors and supervisors earnings another $156,000.

CHC's trainees who are ex-addicts are referred by Patrick House. Ex-offenders and jobless teenagers are referred by the Vocational Service Center for parolees and probationers and by the Human Resources Department, respectively.

The trainees work a 40-hour week, starting at $2.60 an hour. Deserving workers are eligible for a 14-cent-an-hour raise, a $6 or $12 weekly bonus or promotion to assistant crew supervisor, for an extra $25 per week.

Trainees, DeCrescenzo explained, are organized into two types of work crews.

New trainees are placed in six-man general crews, under a supervisor. The crews are assigned either to the warehouse and delivery work or to simple painting, home repair, moving or maintenance jobs.

After a month, DeCrescenzo said, a trainee's progress is reviewed and he may be promoted to a housing rehabilitation crew supervised by a skilled craftsman.

According to Father Schiller, CHC is negotiating for an increase in MDRC funding to $2.1 million for the program's first two years, enough for 300 trainee slots this year, including 25 for alcoholics.

But MDRC Director Grinker says the $2.1 million figure is high, although CHC's 1976 funding will be "substantially increased."

Although it is questionable whether a supported work program can survive without subsidies—Grinker says it can't—Father Schiller says he hopes to make CHC eventually self-sufficient, in case government funding is reduced or cut off.

Income generated so far, he said, will reduce the program's need this year for CETA funding.

CHC, Father Schiller added, is planning more housing rehabilitation work—a buyer has already been found for one of the first three houses—and is also considering going into the printing business, using equipment owned by Patrick House.

The program is also looking for more food service and maintenance contracts, he said.

According to CHC, there are about 1,900

ex-offenders over 21 in Jersey City. There are some 4,900 jobless teenagers. And there are as many as 10,000 addicts in the Jersey City area.

Patrick House treats only 1,000 ex-addicts and CHC, even with expanded federal funding, will be able to train only a fraction of Jersey City's hard core unemployed in the next two years.

"I've got to make sure the programs survive to treat people and to train them," says Father Schiller in his dual role as director of CHC and of the Patrick House drug and alcoholism programs.

"We have to try and get as much independence as possible and not be dependent on the whims of some politicians.

"When you take someone in for long term treatment, you have to be reasonably assured you won't have to drop him back in the street. We have a tremendous moral responsibility to our clients, especially those on methadone maintenance."

FIRM PROVIDES JOBS FOR FELONS

(By Antoinette Marin)

Auto thieves, robbers, muggers: Jobs available, starting immediately. Only unskilled persons with police records need apply.

That's how an advertisement for Maverick Services Corp. might read, if executive director Daniel MacKinnon decided to publicize his job program.

As it is, he relies on "the word getting around the street" about the city-sponsored program and has plenty of felons and ? "unemployable types" clamoring to get in on the project.

MacKinnon, a former executive vice president of the Terry Corp., steam engine manufacturers, said when he turned 50 years old he decided he "didn't need any more money" and wanted to try something different.

He became director of prison industries at Somers State Prison for awhile and then took over development of the Maverick program for the city's "hard core unemployable."

MacKinnon said he only accepts persons who have committed a felony, served time and haven't been out on the street more than six months.

They start at $2.50 an hour, but earn a 17-cent an hour raise the first week just by showing up on time every day.

So far 80 ex-convicts have been employed at Maverick's various tiny industrial plants around the city. The nonprofit corporation runs a gasoline station on Homestead Avenue, a tire recapping business on Windsor Avenue, a concrete business, a printing and refinishing firm and a construction company.

The men on the construction crew probably have the best morale of any of the workers now employed, said MacKinnon, since they get to wear hard hats and boots and look like real workers every day."

"It's a whole different thing than the street scene with tight pants and high heels," said MacKinnon,. "We try to develop a manly, macho kind of person."

The construction workers now are attempting to rehabilitate a six-family apartment building on Elmer Street, MacKinnon said. "We're not saying we're out to save the city or anything," he said, "but we're going to do our best to do a job on Elmer Street."

MacKinnon also invited north Hartford residents interested in the future of the small two-block street to a meeting next week.

MacKinnon is aided by a black businessman, James Hoods, and Frank DeJesus, a Puerto Rican. A black former Army Lt. Col., Bill Dowdy, is the staff "salesman."

Dowdy visits area businesses and tries to encourage them to hire one of the Maverick graduates. So far, 15 persons have been placed with private companies, MacKinnon said.

"You've got to cut your hair and take off your earring or we won't help you," said MacKinnon. "I tell the men I'm sorry, but that's the way it is in this society."

MacKinnon's program is funded by Hartford's federal Comprehensive Employment Training Act (CETA) grant money and by the Ford Foundation. He has been hesitant about publicizing the project because he wanted it to build up a "respectable record" before attracting attention.

He didn't seek an interview Wednesday, but spoke at a Chamber of Commerce Board of Directors meeting, at first unaware that reporters were present.

"I just want to make clear that this is not a premature announcement that we have found a way to save the world," said MacKinnon after the meeting.

REHAB PROJECTS FOR PEOPLE AND HOMES

(By Kathy Walsh Nuffer)

FOND DU LAC.—Advocap's seven-month-old housing rehabilitation project, which aims to benefit the handicapped, elderly and low income families of Fond du Lac and Winnebago counties, as well as persons with a history of mental and emotional problems, is already showing positive results.

Homeowners, participants and staff members are pleased with the project's progress, so far, and its effectiveness has won national acclaim.

The project, part of Advocap's supportive work program, has a "double-edged purpose of rehabilitating both people and homes," explained Doug Pearson, housing director, "and judging from our statistics for the first six months, we're off to a good start."

On June 1, construction supervisors hired by Advocap began training the project's first housing specialists in three major rehabilitation categories—basic home maintenance, energy conservation and structural repair.

The "specialists" had all been referred to the project by social service agencies in both Fond du Lac and Winnebago counties because of their background of mental and emotional problems. All were unemployed before entering the supportive work program.

Slowly, as their training progressed, 35 housing specialists, working in crews of five, were phased into local communities where they could provide home services to the needy.

They raked lawns, shoveled walks, cleaned eaves troughs, washed windows, caulked, weatherstripped and insulated homes for the winter, repaired porches and installed siding and roofs.

The specialists were grouped according to the jobs they could handle, advancing from basic home maintenance to structural repair as their skills and confidence improved.

Winnebago County statistics for the first six months of operation show that the specialists provided a total of 82 services to 73 homes.

Two of the work crews have been stationed in the Neenah-Menasha area.

Pearson noted that the work crews provide the housing rehabilitation services to the elderly, handicapped and low income families free of charge.

He added that the project now has money available for grants for materials to winterize homes and is interested in recruiting more needy homeowners who qualify for the services. "Winterizing can save as much as 40 per cent of the fuel bill," said Pearson.

Local homeowners who qualify for the service can contact Advocap's Neenah-Menasha housing counselor for more information.

Pearson said he has received much positive feedback on the project from the homeowners. "They're very pleased with the work done. This is a service that was badly needed and never before available."

Several homeowners, he said, have written the project letters of appreciation for the services. Some have made lunch for the crews working at their homes or bought them gifts.

The crew members seem to be pleased with the project, too, said Pearson. "They feel their work is contributing to the Community."

James Blakeslee, director of Advocap's supportive work program, has seen considerable improvement in both the participants' work and social habits.

He noted that those who are in the housing project have shown improvement in their attendance, work attitudes, willingness to accept responsibility and ability to work with less supervision. The general state of their mental health has also improved, said Blakeslee.

When a participant has a rough day or has to face a crisis, there are two counselors available to help him solve his problems. There are also three coaches to help the participants rehabilitate themselves socially. The coaches act as advocates for the participants, providing them with a drop-in center after work hours, information on community resources and places to go for psychological services.

In addition to the training the project provides its work crews, individuals can take advantage of courses at local technical schools. Some are taking drivers education and advanced skill courses.

Blakeslee said he has received a number of positive comments on the housing rehabiliation project from the agencies who make the referrals.

In addition, the chief funding agency of the project—Manpower Demonstration Research Corporation—has called the Advocap project one of the best now being operated. There are 13 similar programs now underway in the United States.

The project is also funded by several other agencies, including the National Institute for Mental Health, the Area Agency on Aging, The Cities of Oshkosh and Fond du Lac and the Catholic Campaign for Human Development.

In the next year the project hopes to expand the number of its services and work crews. The work crews will be increased from seven to nine, three of which will operate in the Neenah-Menasha area.

Pearson said he is now working on a funding proposal for the second year of the three year project. What will happen to the project after the term is up, he doesn't know, although interest in this type of program is high. He noted that legislators are looking to establish this type of housing rehabilitation program nationwide on a long-term basis.

[From The Wall Street Journal, Apr. 1, 1976]

JOBS FOR THE "UNEMPLOYABLES"

(By Alan L. Otten)

Some people simply don't know how to work and hold a regular job. They never have, or have only occasionally, and they have all sorts of special problems. They're ex-offenders, drug addicts, welfare mothers, teenage dropouts, alcoholics, the mentally ill. Put them in a regular office, factory or other work setting, and they'll flounder and fail.

But put them in a special "low-stress" work situation—where fellow workers have similar backgrounds and problems, where they're not expected to be too efficient at first, where management initially takes a sympathetic attitude towards absences and tardiness. Then, perhaps, they can gradually learn normal work habits and skills, build self-confidence, and move on to a regular job and hold it—thus breaking out of welfare dependency, addiction and crime.

Such at least is the theory of "supported

work"—a concept developed in Western Europe primarily for the physically and mentally handicapped but now getting an extended test in this country for ex-criminals, addicts and other types of "unemployables." Thirteen projects, from Newark and West Virginia to San Francisco and Washington State, are putting the theory into practice in a variety of urban and rural work situations, with control groups and careful follow-up analysis to measure progress and assess real costs and benefits.

"We think there's value if we can show that people who've been looked on as burdens or dangers to society can produce services and work of social value, and can gradually develop into assets," declares Herbert Sturz, the innovative director of the Vera Institute of Justice, who first brought the supported-work approach to the U.S. "Society is already putting money into these people, through welfare and similar assistance programs, so why not put it into having them do something useful?"

That's one of the unique things about the supported-work experiments. Workers are paid wages out of a wage pool made up from several sources: payments for the work they do for local government agencies or private firms; special government and foundation training and research grants; and, to an important extent, from the diversion into the pool of some of the welfare benefits that these people would otherwise be getting directly. And that's the whole idea: instead of getting a welfare check for doing nothing, they get a paycheck for performing useful work, learning work habits, and developing an employment history.

HELPING THE ELDERLY

Vera's original supported-work experiment, started in 1972, used welfare funds and government grants to set up a nonprofit corporation known as Wildcat Service Corp. in New York City; it now employs some 1,200 people at any one time, and it's still expanding. Former offenders and ex-addicts still in treatment (averaging 8.6 arrests and four convictions,) have worked at providing messenger services, cleaned the New York Public Library, planted trees in parks, done maintenance work and painted police stations and courthouses, driven the elderly to doctors' appointments and delivered meals-on-wheels to them.

Wildcat's experience was encouraging enough to persuade five federal agencies and the Ford Foundation to finance the much broader three-year nationwide experiment that's now nearing the end of its first year. A special non-profit agency called the Manpower Development Research Corp. was set up and is monitoring the 13 individual projects; each is run locally by a special agency, sometimes sponsored by a state or local government, sometimes by a private do-good group.

About 1,600 people have taken part, and this figure is slated to grow to 3,000 over the next two years. Projects vary in size (from 75 to 300), in composition (some, are exclusively ex-offenders or welfare mothers or addicts, some mix various groups together) and in type of work. In general, the men and women work in small crews of five to 10, and crew chiefs and even some supervisors have similar backgrounds.

Mostly they do maintenance work in public buildings and housing projects, repair motor vehicles for local agencies, provide security for government buildings, clean up and landscape parks, demolish abandoned buildings. In Hartford, ex-offenders run a filling station, a small printing operation, a tire recapping project, and a furniture assembly operation. Ex-offenders in Washington State microfilm state records, guard a state office complex, reupholster furniture for state college dormitories. In West Virginia, welfare mothers, ex-offenders, and young dropouts serve as teachers' aides, kitchen helpers in schools and hospitals, day-care workers at housing projects, clerks in senior citizen centers. In Wisconsin, mentally ill persons, deinstitutionalized by last year's Supreme Court ruling, winterize and repair houses for the poor and elderly.

Wages start at about 75% of what the workers might expect to get for entry-level private jobs, but raises and promotions for staying with the project and assuming responsibility come frequently, and workers can earn a small additional bonus any week they meet certain standards of productivity, attendance, and punctuality—standards that are steadily made more difficult as the worker remains in the project. Supervisors, the key people for success or failure in most projects, try to handle their workers with great flexibility: finding the reasons for absenteeism or lateness and suggesting ways to improve, giving workers time off to get Methadone treatment or meet with a parole officer, trying to arrange outside help for the mother who can't get day care for her children or is having trouble with her former husband.

Theoretically at least, workers should move out of the project—into non-supported jobs, it's hoped—by the end of 12 to 18 months, to make way for new people. Each project has an active job-finding service to help line up permanent jobs with government agencies or private employers.

Vera claims a substantial success with Wildcat. Over half of those who started were still working a year later—42% at Wildcat and 12% in non-supported jobs, and of those who moved on to non-supported work, close to 80% had held the job for at least 18 months. Attendance rates are reported just barely below that of bluecollar workers in private industry, and sample surveys indicate productivity at about 98% of commercial standards. Vera figures taxpayers actually get back—in public services, reduced welfare payments, and taxes paid by the workers—$1.03 for each $1 invested in the project.

Most MDRC projects haven't been going long enough to show very meaningful results. Out of some 1,600 people who are in or have been in the project, 850 are still in, and 150 have moved onto non-supported jobs; the rest have quit or been fired (usually for absenteeism or insubordination) or are temporarily suspended.

Naturally, many don't or won't make it. Welfare mothers and the teenagers seem to do best; addicts and former offenders tend to lapse most easily. The recent recession made it harder for supported workers to find private jobs, and state and local budget stringency has limited the opportunities even for supported work. So far, the effort hasn't been extensive enough to draw unfair-competition complaints from private firms or unions, but these could come if the effort expands substantially.

KEEPING TABS ON RESULTS

Most MDRC projects have control groups of non-supported men and women with similar backgrounds, and a Princeton-based research firm, Mathematica Inc., is keeping tabs on all people in the projects and control groups and doing other detailed analysis. It will try to follow what happens to supported workers when they graduate or drop out, how they fare compared to those in control groups, how many go back to welfare or crime or drugs, whether one type of work or one type of worker seems to succeed better than others, and whether total costs outweigh benefits.

"We all want this to succeed," asserts William Grinker, MDRC president, "but we won't know for quite a while whether it does. It's already proven effective in terms of getting people to come into these programs and perform useful work, and in turnover rates that aren't out of line with private industry. By the end of the first year, I think we'll be able to show some pretty good in-program results and positive cost-benefit figures for the people in the program. But the decision will be out for quite a while on the long-term questions: whether these people are employable, can hold on to a job, what sort of recidivism there is, and what the costs and benefits are to society. We're not close to any answers there."

Both Mr. Sturz and Mr. Grinker doubt that the program can work without some continuing government subsidy (these are, after all, by definition low-productivity workers with special problems). But they agree that this subsidy might merely consist of capturing for the wage pool more of the public assistance, home relief, Medicaid and Medicare, veterans benefits, aid to the disabled or other help that these people would otherwise be getting directly from the taxpayers. Vera and MDRC engage in constant effort to persuade federal, state and local bureaucrats to divert more money this way—they encounter resistance even after top-level officials have indicated they want it done—and both men think success in this fight is critical.

A certain percentage of these "unemployables" may never be ready to move on to private jobs, the two men concede, and may need a permanent supported work setting. But that, too, might not be disastrous. "They still would be producing something useful," Mr. Sturz argues, "and would be kept together as human beings"—and probably at less cost than if they were on regular welfare.

"We're not going to change the world with this concept," says Mr. Grinker. "But maybe we can get a substantial number of people to function in a work setting so they can get jobs and hold them and begin to break that cycle of dependency and destructiveness. And that's not such a small accomplishment."

[From the Christian Science Monitor, Aug. 27, 1975]

WORK PROGRAM HELPS YOUTHS: EMPLOYMENT PROJECT AIMS TO REDUCE DELINQUENCY

(By Jo Ann Levine)

What were you doing at this time last summer?

"Hanging out."

"Mugging people for money."

"Walking around with my pieces [guns] and switchblade."

The teen-age boys who answered the question were at the moment raking, digging weeds, and cleaning up a small vacant lot on the Lower East Side.

What they were doing is quite new: It is called work—"supported" work. That means it is the kind of work which at first tolerates certain things, such as lateness. Its purpose is to enable people to move into a regular job. And it is aimed at those in the population who have been counted as superfluous people such as alcoholics, drug addicts, mothers who are receiving welfare, fathers who are chronically unemployed, and in the case of these boys, young people who have been in trouble with the law.

It is this vital, good-looking bunch cleaning up the park who represents the segment of the population of this country which statistics say has the greatest chance of ending up in prison or being chronically unemployed, like most adults they know.

Today they are involved in a $181,000 supported program called the SEA program (Supported Employment for Adolescents). It is funded by the federal Law Enforcement Assistance Administration, and run by the Henry Street Settlement.

But SEA is not the only such program. Since 1972 the Vera Institute of Justice has spent $24.5 million through its Wildcat Service Corporation employing over 3,000 former drug addicts and ex-offenders.

And now, in one of the biggest supported-

work experiments ever, involving $40 million, the Ford Foundation (in a move to help the very hard-to-reach unemployed) has joined in an alliance with five government agencies: Department of Labor; Department of Housing and Urban Development; Department of Health, Education, and Welfare; the National Institute on Drug Abuse; and the Department of Justice (through the Law Enforcement Assistance Administration).

Administered by a central organization called the Manpower Demonstration Research Corporation (MDRC) supported-work programs in 13 cities and areas of the U.S. are attempting to help through work the entry or reentry of the severely disadvantaged into the mainstream of society. They aim to reduce crime and delinquency, and to produce socially useful goods and services. They call it "working their way to work."

Dr. Eli Ginzberg, professor of economics at Columbia University and chairman of MDRC notes that "for once, we are trying to be very modest and careful" about claims of a program.

"But," he says, "the MDRC will be telling the U.S. Congress what they have discovered about supported work. And it can be expected that supported work may become a featured part of any major change in the country's welfare system."

In a film made by the Ford Foundation, Dr. Ginzberg adds, "We do believe that work is the factor that binds human beings together effectively with their society . . . people should have the opportunity to work."

Supported work may have good prospects with taxpayers. Even though it is expensive, it could prove more socially stabilizing and less expensive than the flat-out dependency provided by many welfare programs, or the punitive and demeaning aspects of the forced-work programs.

The SEA program is involved with the youngest group, the 14-to-16-years-olds.

Most young teen-agers who are arrested have a choice of going back to their neighborhoods (with only an occasional meeting with a probation officer), or of being sent to an institution. For most of them, there is nothing in between. The SEA program is a model of "something" in between and in many cases, it's the first "something" they have ever had.

"Something" is a big word for the 26 boys and two girls in the SEA program. All live in the Lower East Side. For most, it sums up their only goal in life: "I want to be something. I don't know what, but I want to be something."

For them work means an immediate something to do—and be. What they do is a service, such as working on parks, gathering clothing for evicted or burned out families, sewing clothes (from simple patterns) for small children, making wooden picture frames, growing vegetables and flowers.

Chris Sprowal, an employee of the SEA program who kept combing his hair (which is 1/32nd of an inch long) while we talked, grinned and said, "I don't have big hopes about the future of the U.S.A., but I have big hopes for my future. And I'm going to make the best of it."

The "something" given to the crew by the SEA program has given rise to some hopes:

"I want to be a cop," said Jose Polanco.

"I want to be a basketball player," said Luis Velasquez.

But almost always as soon as one said he wanted to be something, his voice would trail off with doubt. As one boy said, "I don't know. My old man never was anything and he got by. I guess I could too."

The despair in the 14-, 15-, and 16-year-olds was black, but bouncy. "I'll tell you what I'm going to do," wise cracked Tony Garcia, who carried a radio, "I'm going to be the owner of New York City."

"People who are 'something' are beyond them," explained Anne Rudenstein, the program director of SEA. "They already have a feeling that they don't make anything happen: it is happening to them; that somebody else (the courts, the schools) is in control of their lives. Their parents usually have the same feeling, not only about their children but about themselves. . . . Many of these kids have been labeled since the day they were born and the labels get worse and worse."

The SEA program tries to help its crew members to connect what they do with what they get.

"They are doing a real life thing for which they are getting real money," director Rudenstein continued. "If they are high or drunk, they are sent home. If they don't do their real work, they don't get their real money."

The salary is $95 a week.

"The money helps me with clothes and it helps my mother too," said Reyes Vega. Angel (Chino) Gonzales, the newest member of the crew, said, "The best thing is not the money, but that everybody is working together. . . . My goal now is to get myself together and get a job."

With fall approaching, the biggest gripe heard at a SEA meeting is, "I don't like winter, because then we don't have as much work."

By Mr. MUSKIE (for himself, Mr. ROTH, Mr. GLENN, Mr. RIBICOFF, Mr. PERCY, Mr. ALLEN, Mr. ANDERSON, Mr. BELLMON, Mr. BENTSEN, Mr. BURDICK, Mr. HARRY F. BYRD, JR., Mr. CANNON, Mr. CHAFEE, Mr. CHILES, Mr. CHURCH, Mr. CULVER, Mr. CURTIS, Mr. DECONCINI, Mr. DOMENICI, Mr. EASTLAND, Mr. GARN, Mr. GOLDWATER, Mr. HASKELL, Mr. HATFIELD, Mr. HATHAWAY, Mr. HELMS, Mr. HUDDLESTON, Mr. HUMPHREY, Mr. KENNEDY, Mr. LAXALT, Mr. LEAHY, Mr. MCCLURE, Mr. MCINTYRE, Mr. MATHIAS, Mr. NUNN, Mr. SCHMITT, Mr. SCHWEIKER, Mr. STAFFORD, Mr. STEVENS, Mr. WEICKER, Mr. DURKIN, Mr. MCGOVERN and Mr. LUGAR:

S. 2. A bill to require authorizations of new budget authority for Government programs at least every 5 years, to provide for review of Government programs every 5 years, and for other purposes; to the Committee on Government Operations.

SUNSET ACT OF 1977

Mr. MUSKIE. Mr. President, it is with a sense of great anticipation this morning that I am reintroducing the sunset bill, along with Senators ROTH, GLENN, RIBICOFF, PERCY, ALLEN, ANDERSON, BELLMON, BENTSEN, BURDICK, HARRY BYRD, CANNON, CHAFEE, CHILES, CHURCH, CULVER, CURTIS, DECONCINI, DOMENICI, EASTLAND, GARN, GOLDWATER, HASKELL, HATFIELD, HATHAWAY, HELMS, HUDDLESTON, HUMPHREY, KENNEDY, LAXALT, LEAHY, MCCLURE, MCINTYRE, MATHIAS, NUNN, SCHMITT, SCHWEIKER, STAFFORD, STEVENS, WEICKER, DURKIN, and MCGOVERN.

I say anticipation because sunset is an extremely important legislative idea. Its enactment by the 95th Congress would be a splendid accomplishment indeed.

I say anticipation also because within a matter of days, we will inaugurate a new President who was elected on a promise to the American people of making Government more effective. What better way to demonstrate our willingness to cooperate with this commitment than to move rapidly ahead to consider the sunset proposal.

Many of us in this Chamber have just come from an election in which perhaps the overriding concern of our constituents was that Government is not working as well as it should be.

And all of us in this Chamber have heard the American people voice time and again—in one public opinion survey after another—their concern that Government is no longer effective nor responsive to their needs.

The sunset bill I introduce today is an imaginative and indeed a revolutionary response to this concern.

In its simplest sense, sunset proposes nothing more than a process through which Congress can begin to exercise greater control over the results of its legislative work—the hundreds of individual programs we have created over the years and which affect the daily lives of all Americans in so many ways.

In its most far-reaching sense, sunset proposes nothing less than to make Government more effective, by improving the quality of services which Government programs are intended to provide.

These are lofty goals indeed. They have concerned many of us for years.

But they have also eluded us at every turn. Not because we have not tried. But I suspect because the solutions we saw required decisions we did not want to make.

As a result, we in Congress have too often satisfied ourselves with the rhetoric of legislation, leaving the hard work of oversight—a fundamental congressional responsibility—to be carried out in a hit-or-miss fashion rather than with the steady diligence it requires.

Sunset proposes one solution to these years of inattention, and a drastic one at that. To implement it seriously will be difficult medicine for us all.

Like budget reform, for example, the mechanics of sunset are not exciting press release material. On the contrary, sunset is concerned with the nuts and bolts budget decisions we in Congress have to make every day.

Moreover, sunset will not allow us to sidestep difficult decisions we may have preferred to avoid in the past. Each and every one of us will have to bite the bullet where our favorite programs and constituencies are concerned.

But as far as I can see, we have no choice.

And, in sunset, we have the best vehicle in my experience for setting about this all important task.

The job will be easier because we have taken the first step in budget reform. That new process, which has worked so well in its first 2 years, is an essential element in regaining control over the Federal budget—the most important statement of national priorities that we have. Budget reform has given us a badly needed method for looking at the picture as a whole.

Sunset will make us take a closer look at all the component parts of that budget, the individual building blocks of national priorities, to insure that we are getting the most for the tax dollars we

spend. As such, sunset is a logical second step.

Why do we need such a second step?

Because in the fiscal year 1977 budget, so-called uncontrollable spending—funds spent with little regular review by Congress—will take up 77 percent of the entire budget?

Because from 1966 to 1976, the fastest growing component of the Federal budget has been in permanent programs, those programs enacted forever, and subject to no regular review by Congress?

Because we have 302 different health programs, 259 community development programs, or 62 separate programs involved in providing social insurance and aid to the needy?

Or because no one really knows how many Federal programs there are altogether?

I suggest that any one of these answers by itself is reason enough for change. Taken together, they constitute an overwhelming case for far-reaching reform. For they tell us that every year we have fewer options open to us in determining the priorities for Federal spending. They suggest that Government in Washington has become so cumbersome and unwieldly that no one is really in charge.

And they underscore the need for a process like sunset to help us regain the balance we have lost.

In principle, the sunset bill is a relatively simple idea.

It assumes that there is no Federal program so important or so holy that it should escape regular and thorough review—to see if it is working, to see if it is still needed, to see if its funding level is justified by its contribution to society.

The principal provisions of the bill are as follows:

First, the bill sets out a 5-year schedule for the mandatory reauthorization of all Federal programs. Where no such reauthorization is provided, no money can be spent to carry out the program. The bill also requires the appropriate committees of the House and Senate to propose a similar schedule for the review and reenactment of tax expenditures.

Second, authorizations for Federal programs are grouped for reauthorization by budget function and subfunction, so that Congress will be forced to look at all programs in a given area at one time, rather than in bits and pieces as is now the case.

Third, no program scheduled for reauthorization can actually be reauthorized unless the authorizing committee with jurisdiction over it has completed a thorough review of the program and provided a substantial justification for the program's continuation. As part of the review, the authorizing committees are required to explore the potential consequences of cutting into the base of a program's funding rather than simply recommending an incremental funding increase.

By applying the sunset concept to all programs, Mr. President, we have tried to insure that the process is neutral to all sides. The only exceptions we have made are for interest on the national debt and a handful of programs like social security, into which people have paid with the expectation of later benefits from the Government.

By requiring the reauthorization of programs according to budget function, we have tried to insure that the potential for program duplication and overlap will be minimized, with the result that tax dollars are used more effectively.

And by encouraging review of programs from the ground up, we have tried to insure something more than a speeded up version of our current reauthorization process, where often it is only the increments that are reviewed, not the core program itself.

With these principal provisions, Mr. President, the legislation I am introducing today is substantially the same as S. 2925 which was considered and approved by the Government Operations Committee last year.

There have been two important modifications, however, which have been made in response to criticisms of the bill made by a number of Senators last year.

The single most controversial section of last year's bill was in title II, which set out the requirements and guidelines for the authorizing committees to follow in conducting their reviews of programs scheduled for reauthorization. These requirements were repeatedly singled out as being too burdensome on the committees.

In response to this criticism we have substantially simplified the title II requirements on the authorizing committees, in effect shortening the review process from four separate steps to one. In so doing, we have eased considerably the potential workload on the authorizing committees.

A second modification we have made, Mr. President, is in the inclusion of a 1-year grace period for programs which terminate unintentionally rather than by design—either through scheduling problems on the Senate floor or through a filibuster where a minority of the House or Senate prevents the majority from voting up or down on the reauthorization of a bill. With this change, we believe we have responded adequately to the concern that there may be contingencies we cannot now foresee when mandatory reauthorization according to the schedule would not be possible.

In making these changes, Mr. President, we have responded to the most oft-cited criticisms of last year's bill. Far and away the bulk of those comments were directed at the review process which many saw as so cumbersome as to be unworkable.

I might note here, Mr. President, that we are fully aware that the schedule set out in the bill can be refined to take into account any changes made in committee structures and jurisdiction as a result of the Stevenson committee recommendations.

We have retained without change the fundamental operative mechanism of this bill, which is the sunset principle itself. Of all provisions of the bill, it was the sunset idea which garnered the broadest political support—because it is totally neutral, and because, I believe, it makes such good sense.

The extent of support for the sunset idea is evidenced by the fact that last year, the legislation had 59 cosponsors in the Senate and well over 100 in the House. The bill was unanimously approved by the Senate Government Operations Committee last summer. And it was only the logjam of legislative activity at the end of the last session that kept the bill from consideration by the Senate as a whole.

In a colloquy on the Senate floor at that time, I and several other Senators expressed our hope that the sunset bill could be given the highest priority by the 95th Congress. In reintroducing the bill at this early date, we mean to underscore our intention to work toward that end.

More than anything else, Mr. President, sunset has opened up a much-needed dialog in the Congress on the important task of making Government more productive. We welcome all who would like to join us in this undertaking because we believe it is one in which liberals and conservatives alike have a vital stake.

Mr. President, I ask unanimous consent that the text of S. 2 be included in the RECORD at this point, as well as a summary of the bill and a sample of newspaper clippings on the sunset bill.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 2

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Sunset Act of 1977".

SEC. 2. (a) For purposes of this Act—

(1) The term "budget authority" has the meaning given to it by section 3 (a) (2) of the Congressional Budget Act of 1974.

(2) The term "permanent budget authority" means budget authority provided for an indefinite period of time or an unspecified number of fiscal years, but does not include budget authority provided for a specified fiscal year which is available for obligation or expenditure in one or more succeeding fiscal years.

(3) The term "Comptroller General" means the Comptroller General of the United States.

(4) The term "agency" means an Executive agency as defined in section 105 of title 5, United States Code, except that such term includes the United States Postal Service and the Postal Rate Commission but does not include the General Accounting Office.

(b) For purposes of this Act, functional and subfunctional categories are those set forth in the Budget of the United States Government, Fiscal Year 1977. All off-budget programs shall be assigned to functional and subfunctional categories by the Director of the Office of Management and Budget in consultation with the Committees on Appropriations and the Budget of the Senate and the House of Representatives. Each committee of the Senate or the House of Representatives which reports any bill or resolution which authorizes the enactment of new budget authority for a new program shall include, in the committee report accompanying such bill or resolution, a statement from the Committees on Appropriations and the Budget of its House of the functional and subfunctional category in which such program will be included.

(c) For purposes of titles I and II of this

Act, the first review date applicable to a program is the date specified for such program under section 101(a), and each subsequent review date applicable to a program is the date five years following the preceding review date.

TITLE I—AUTHORIZATIONS OF NEW BUDGET AUTHORITY

SEC. 101. (a) The first review date applicable to a Government program is the date specified in the following table:

Programs included within functional or subfunctional catgeory:	First review date
050 National Defense	
303 Recreational Resources	
351 Farm Income Stabilization	
453 Disaster Relief and Insurance	
552 Health Research and Education	
704 Veterans Housing	September 30, 1979
305 Energy	
306 Other Natural Resources	
450 (except 453) Community and Regional Development	
506 Social Services	
553 Prevention and Control of Health Problems	
702 Veterans Education and Training	
753 Federal Correctional and Rehabilitation	
806 Other General Government	
807 Federal Financing Bank	
850 Revenue Sharing and General Purpose Fiscal Assistance	September 30, 1980
150 (except 151) International Affairs	
404 Ground Transportation	
501 Elementary Education	
503 Research and General Education Aids	
600 Income Security	
705 Other Veterans Benefits	
754 Law Enforcement Assistance	
802 Executive Director and Management	September 30, 1981
250 General Sciences, Space, and Technology	
302 Conservation and Land Management	
304 Pollution Control	
403 Other Advancement and Regulation of Commerce	
502 Higher Education	
504 Manpower Training	
505 Other Manpower Services	
701 Income Security for Veterans	
752 Federal Judicial Activities	
804 General Property and Records Management	
900 Interest	September 30, 1982
151 Foreign Economic and Financial Assistance	
301 Water Resources and Power	
352 Agricultural Research Services	
400 (except 403 & 404) Commerce and Transportation	
551 Health Care Services	
554 Health Planning and Construction	
703 Hospital and Medical Care—Veterans	
751 Federal Law Enforcement	
801 Legislative Function	
803 Central Fiscal Operations	
805 Central Resource Management	September 30, 1983

(b)(1) No new budget authority (including permanent budget authority) which is provided for a program for a fiscal year beginning after the first review date applicable to such program under subsection (a) may be obligated or expended unless (A) the enactment of such new budget authority is authorized by the provisions of a law enacted after the date of the enactment of this Act, or (B) the provisions of this paragraph are deferred for such fiscal year by an extension resolution enacted under the procedure provided for in section 504.

(2) Paragraph (1) shall not apply to programs which are included within functional category 900, or are funded through trust funds and which are included within subfunctional categories 551 (Health care services), 601 (General retirement and disability insurance), or 602 (Federal employee retirement and disability).

(3) Paragraph (1) shall not apply to new budget authority initially provided for a program for a fiscal year beginning before the first review date applicable to such program which is available for obligation or expenditure in a fiscal year beginning after such date.

(c) It shall not be in order in either the Senate or the House of Representatives to consider any bill or resolution (or amendment thereto)—

(1) which authorizes the enactment of new budget authority for a program for a fiscal year beginning after the next review date applicable to such program, unless the report required under section 201(b) on the sunset review of such program has been submitted to the Senate or the House of Representatives, as the case may be; or

(2) which changes (or has the effect of changing) budget authority for or outlays under any program which is included within functional category 900, or within subfunctional category 551, 601, or 602 and which is funded through a trust fund, if such change is to take effect after the next review date applicable to such program, unless the report required under section 201(b) on the sunset review of such program has been submitted to the Senate or the House of Representatives, as the case may be.

(d) Nothing contained in this Act shall be construed to require the enactment of authorizations of new budget authority for a program for a period of five fiscal years. In any case in which it is determined necessary or desirable to enact authorizations of new budget authority for a program on an annual basis, or for any period of less than five fiscal years, such new budget authority may, subject to the provisions of subsection (c)(1), be authorized for the period so determined.

SEC. 102. (a) On or before January 1, 1978, the Comptroller General, in cooperation with the Director of the Congressional Budget Office and the Director of the Office of Management and Budget, shall submit to the Committees on Appropriations and the Committees on the Budget of the Senate and the House of Representatives a report setting forth each program new budget authority for which is by law—

(1) authorized for a definite period of time;

(2) authorized without limit of time;

(3) not specifically authorized; and

(4) permanently provided.

(b) The report submitted under subsection (a) shall also set forth—

(1) the law or laws under which each such program is carried on;

(2) in the case of programs to which paragraphs (1), (2), and (3) of subsection (a) apply, the annual appropriation bill which provides new budget authority for each such program;

(3) the amount of new budget authority provided for each such program for each of the last four completed fiscal years ending before January 1, 1978; and

(4) each program for which no outlays have been made during each of the last two completed fiscal years ending before January 1, 1978.

The information required by this section shall be cross-indexed so as to provide information to the committees of the Senate and the House of Representatives with respect to programs under their jurisdiction.

(c) The report submitted by the Comptroller General under subsection (a) shall identify programs in a manner which—

(1) assures that all provisions of law which serve as authorization of new budget authority are included in the identification of programs;

(2) classifies each program in only one functional and only one subfunctional category;

(3) provides, to the maximum extent feasible, that each program is administered by only one department or agency of the Government;

(4) is consistent with the structure of national needs, agency missions, and basic programs developed pursuant to section 201(i) of the Budget and Accounting Act, 1921;

(5) to the maximum extent feasible, is consistent with the appropriation account structure of the United States Government; and

(6) to the extent appropriate, classifies related authorizations within a single program.

SEC. 103. (a) On or before March 1, 1978, the Committees on Appropriations and the Committees on the Budget of the Senate and the House of Representatives, acting jointly, shall review the report submitted under section 102 and submit it to their respective Houses together with a report setting forth, with respect to each program—

(1) the functional or subfunctional category in which such program is included; and

(2) the first review date of each such program.

(b) At the request of the Committee on Appropriations or the Committee on the Budget of the Senate or the House of Representatives, the Comptroller General, the Director of the Congressional Budget Office, and the Director of the Office of Management and Budget shall furnish to such committee such assistance as it may request in carrying out its functions under susbection (a).

SEC. 104. (a) New budget authority shall not be provided for any program for any fiscal year beginning after the first review date applicable to such program under section 101 (a), unless the provision of such new budget authority is specifically authorized by law.

(b) Subsection (a) shall not apply in the Senate or the House of Representatives with respect to new budget authority if the committee report in that House accompanying the bill or resolution which provides such new budget authority states that the provision of such new budget authority is necessary because of an emergency and sets forth the conditions which caused such emergency, and budget authority was not available for the program in the preceding fiscal year.

(c) Subsection (a) shall not apply in the Senate or the House of Representatives with respect to new budget authority for a program for one fiscal year beyond the year in which the program would terminate under section 101 if—

(1) the provision of such new budget authority is authorized by a bill or resolution which has been passed by that House or has been reported in that House; and

(2) new budget authority was available for such program for the preceding fiscal year.

SEC. 105. (a) All proposed legislation, messages, petitions, memorials, and other matters relating to changes in the review dates applicable to programs under this title and title II shall be referred in the Senate to the Committee on the Budget of the Senate, and shall be referred in the House of Representatives to the Committee on the Budget of the House, and each such committee shall have jurisdiction to report to its House, by bill or otherwise, proposed changes in such dates.

(b) Notwithstanding the provisions of subsection (a), any committee of the Senate or the House of Representatives may report

bills and resolutions changing the review date applicable to any program under its legislative jurisdiction. Any such bill or resolution so reported shall then be referred to the Committee on the Budget of its House, which shall report such bill or resolution to its House within fifteen days after such bill or resolution is referred to it (not counting any day on which its House is not in session), beginning with the day following the day on which such bill or resolution is so referred, accompanied by its recommendations. If the Committee on the Budget does not report such bill or resolution to its House within such fifteen-day period, it shall automatically be discharged from further consideration of such bill or resolution and it shall be placed on the appropriate calendar of the Senate or the House of Representatives, as the case may be.

TITLE II—REVIEW OF PROGRAMS

SEC. 201. (a) Each committee of the Senate and the House of Representatives shall conduct a sunset review of each program within its legislative jurisdiction prior to each review date applicable to such program.

(b) For purposes of this title, the term "sunset review" means, with respect to any Government program, a systematic evaluation by the committees of the Senate and the House of Representatives which have legislative jurisdiction over the program, with the assistance of the appropriate agencies and congressional support agencies, to determine if the merits of the program justify its continuation rather than termination, or its continuation at a level less than, equal to, or greater than the existing level. Such review shall be undertaken in the scope and the detail the committee having jurisdiction deems appropriate and shall include, but not be limited to, an assessment of the degree to which the original objectives of the program have been achieved (including a statement of the number and types of beneficiaries or persons served) expressed in terms of the performance, impact, or accomplishments of the program and of the problem it was intended to address, and an analysis of the costs of the program.

(c) Each such committee shall submit a report on each sunset review of a program conducted under subsection (a), together with its recommendations, to the Senate or the House of Representatives, as the case may be, on or before May 15 of the year in which occurs the review date for such program. A committee may submit the results of the sunset reviews of two or more related programs in a single report.

(d) Whenever a committee recommends the authorization of new budget authority for the program under review or the authorization of new budget authority for a new program with objectives similar to the reviewed program, the report accompanying the first bill or resolution reported by such committees which authorizes the enactment of such new budget authority or any portion thereof shall include the report required by subsection (c), and shall include but not be limited to the following—

(1) an identification of the problem or the needs that the program is intended to address;

(2) a statement, to the extent practicable, in quantitative and qualitative terms of the objectives of such program and its anticipated accomplishments;

(3) an identification of any other programs having similar, conflicting, or duplicate objectives, and an explanation of the manner in which the program avoids duplication or conflict with such other programs;

(4) an assessment of the consequences of eliminating the program of consolidating it with another program, or of funding it at a lower level, taking into consideration similar or duplicate programs in the public or private sectors of the economy; and

(5) a projection of the anticipated needs for the program, including an estimate of when, and the conditions under which, the program will have fulfilled the objectives for which it was established.

SEC. 202. (a) To assist in the sunset reviews of a program under section 201, the agency which administers such program, and any other agency when requested, shall provide to each committee of the Senate and the House of Representatives which has legislative jurisdiction over such program such information and assistance as the committee may request.

(b) On or before October 1 of the year preceding the year in which occurs the review date for a program, the Comptroller General shall furnish to each committee of the Senate and the House of Representtaives which has legislative jurisdiction over such program the results of prior audits and reviews of such program.

(c) Consistent with the discharge of the duties and functions imposed by law on them or their respective Offices or Service, the Comptroller General, the Director of the Congressional Budget Office, the Director of the Congressional Research Service shall furnish to each committee of the Senate and the House of Representatives such information, analyses, and reports as the committee may request to assist it in conducting sunset reviews of programs under section 201.

SEC. 203. (a) Section 236 of the Legislative Reorganization Act of 1970 (31 U.S.C. 1176) is amended to read as follows:

"AGENCY REPORTS

"SEC. 236. Whenever the General Accounting Office has made a report which, in the judgment of the Comptroller General, discloses any substantial deficiency in the achievement of the objectives of any agency program, or which contains recommendations to the head of any Federal agency, such agency shall—

"(1) not later than six months and not later than twelve months after the date of such report, submit a written statement to the Committees on Government Operations of the House of Representatives and the Senate, the committees of the House of Representatives and the Senate which have legislative jurisdiction over such agency program, and the Comptroller General of the action taken with respect to such deficiency or recommendations and of the specific progress made toward eliminating such deficiency;

"(2) at such times thereafter as any of such committees may specify, submit a written statement to such committee of further action taken with respect to such deficiency or recommendations and of further specific progress made toward eliminating such deficiency; and

"(3) provide, in connection with all applicable requests for appropriations for that agency submitted to the Congress, a copy of all written statements submitted during the past fiscal year in accordance with paragraphs (1) and (2) to the Committees on Appropriations of the House of Representatives and the Senate.".

(b) The Comptroller General shall furnish to the Committees on Appropriations of the Senate and the House of Representatives, and to the committees of the Senate and the House which have legislative jurisdiction over any Government program, the report of each audit or review conducted by the General Accounting Office involving such program.

TITLE III—CITIZENS' COMMISSION ON THE ORGANIZATION AND OPERATION OF GOVERNMENT

SEC. 301. There is established, as an independent instrumentality of the United States, the Citizens' Commission on the Organization and Operation of Government (hereafter in this title referred to as the "Commission").

SEC. 302. It is hereby declared to be the policy of the Congress to promote economy, efficiency, and improved service in the transaction of the public business in the departments, agencies, independent instrumentalities, and other authorities of the executive branch of the Government.

SEC. 303. (a) The Commission shall conduct a nonpartisan study and investigation of the organization and methods of operation of all departments, agencies, independent instrumentalities, and other authorities of the executive branch of the Government, and shall make such recommendations as it determines necessary to—

(1) increase the effectiveness of Government services, programs, functions, and activities by changing the structure and execution of administrative responsibilities;

(2) improve delivery of services through elimination of needless duplication or overlap, consolidation of similar services, programs, activities, and functions, and termination of such services, programs, activities, and functions which have outlived their intended purpose;

(3) maintain expenditures at levels consistent with the efficient performance of essential services, programs, activities, and functions;

(4) simplify and eliminate overlaps in agency regulatory functions by review of the laws, regulations, and administrative reports and procedures; and

(5) determine the appropriate responsibilities of each level of government, the manner and alternative means for each level of government to finance such responsibilities, the forms and extent of intergovernmental aid and assistance, and the organization required for proper balance and division of respective Federal, State, and local government roles, responsibilities, and authorities.

(b) The Commission shall submit to the President and to the Congress such interim reports as it deems advisable, and, not later than September 30, 1980, shall submit a final report together with its findings and recommendations.

(c) At least once every year for two years after the submission of the final report, the Comptroller General shall report to the Congress on the status of actions taken on the Commission's final report.

SEC. 304. (a) The Commission shall be composed of eighteen members appointed from among individuals with extensive experience in or knowledge of American Government as follows:

(1) Eight members shall be appointed by the President, by and with the advice and consent of the Senate.

(2) Five members shall be appointed by the President pro tempore of the Senate, three upon recommendation of the majority leader and two upon recommendation of the minority leader of the Senate.

(3) Five members shall be appointed by the Speaker of the House of Representatives, three upon recommendation of the majority leader and two upon recommendation of the minority leader of the House.

(b)(1) Two members appointed under subsection (a)(1) shall be appointed to serve as chairman and vice chairman (as provided in paragraph (2) of this subsection) and shall not engage in any other business, vocation, or employment. Such two members shall not be of the same political affiliation.

(2) The member described in paragraph (1) who is not of the same political affiliation as the President shall serve as Chairman of the Commission and the other member shall serve as Vice Chairman of the Commission.

(c) Of the members appointed under subsection (a)(1) (other than the members to whom subsection (b) applies), not more than three shall be of the same political affiliation.

(d) Any vacancy in the Commission shall not affect its powers, but shall be filled in the same manner in which the original appointment was made.

(e) Ten members of the Commission shall constitute a quorum, but the Commission may establish a lesser number to constitute a quorum for the purpose of holding hearings.

SEC. 305. (a) The Commission or, on the authorization of the Commission, any subcommittee or member thereof, may, for the purpose of carrying out the provisions of this title, hold such hearings and sit and act at such times and places, administer such oaths, and require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memoranda, papers, and documents as the Commission or such subcommittee or member may deem advisable.

(b) (1) Subpenas shall be issued under the signature of the Chairman or any member of the Commission designated by him and shall be served by any person designated by the Chairman or such member. Any member of the Commission may administer oaths or affirmation to witnesses appearing before the Commission.

(2) The provisions of section 1821 of title 28, United States Code, shall apply to witnesses summoned to appear at any such hearing. The per diem and mileage allowances to witnesses summoned under authority conferred by this section shall be paid from funds appropriated to the Commission.

(3) Any person who willfully neglects or refuses to appear, or refuses to qualify as a witness, or to testify, or to produce any evidence in obedience to any subpena duly issued under the authority of this section shall be fined not more than $500, or imprisoned for not more than six months, or both. Upon the certification by the Chairman of the Commission of the facts concerning any such willful disobedience by any person to the United States Attorney for any judicial district in which such person resides or is found, such attorney may proceed by information for the prosecution of such person for such offense.

(c) The Commission is authorized to secure directly from the head of any department, agency, independent instrumentality, or other authority of the executive branch of the Government, available information which the Commission deems useful in the discharge of its duties. All departments, agencies, independent instrumentalities, and other authorities of the executive branch of the Government shall cooperate with the Commission and furnish all information requested by the Commission to the extent not prohibited by law.

SEC. 306. (a) Subject to such rules and regulations as may be adopted by the Commission, the Commission shall have the power—

(1) to appoint and fix the compensation of an Executive Director, and such additional staff personnel as it deems necessary, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but—

(A) in the case of the Executive Director, at a rate equal to that for level V of the Executive Schedule under section 5316 of title 5, United States Code; and

(B) in the case of all other personnel, at rates not in excess of the maximum rate for GS–18 of the General Schedule under section 5332 of such title; and

(2) to procure temporary and intermittent services to the same extent as is authorized by section 3109 of title 5, United States Code.

(b) The Commission is authorized to enter into agreements with the General Services Administration for procurement of necessary financial and administrative services, for which payment shall be made by reimbursement from funds of the Commission in such amounts as may be agreed upon by the Chairman and the Administrator of the General Services Administration.

SEC. 307. (a) The Chairman of the Commission shall receive compensation at a rate equal to the rate prescribed for level III of the Executive Schedule under section 5314 of title 5, United States Code, and the Vice Chairman shall receive compensation at a rate equal to the rate prescribed for level IV of the Executive Schedule under section 5315 of title 5, United States Code.

(b) All other members of the Commission who are not officers or employees of the Federal Government shall receive compensation at the rate of $200 for each day such member is engaged in the performance of the duties vested in the Commission.

(c) Members of the Commission shall be reimbursed for travel, subsistence, and other necessary expenses incurred in connection with their activities as members of the Commission.

SEC. 308. The Commission shall cease to exist ninety days after the submission of its final report.

SEC. 309. There is authorized to be appropriated, without fiscal year limitations, the sum of $12,000,000 to carry out the provisions of this title.

TITLE IV—TAX EXPENDITURES

PART 1—TERMINATION AND CONTINUATION OF TAX EXPENDITURE PROVISIONS

SEC. 401. (a) For purposes of this title—

(1) The term "tax expenditure provision" means any provision of the Internal Revenue Code of 1954 or any other law, or of any regulation or ruling, which allows a special exclusion, exemption, or deduction in determining liability for any tax or which provides a special credit against any tax, a preferential rate of tax, or a deferral of tax liability.

(2) The term "Committee on Ways and Means" means the Committee on Ways and Means of the House of Representatives.

(3) The term "Committee on Finance" means the Committee on Finance of the Senate.

(4) The term "sunset review" means, with respect to any tax expenditure provision, a systematic evaluation by the Committee on Ways and Means and the Committee on Finance, with the assistance of the Department of the Treasury and other appropriate agencies and congressional support agencies, to determine if the merits of the tax expenditure provision justify its continuation rather than termination, or its continuation at a level less than, equal to, or greater than the existing level. Such review shall be undertaken in the scope and the detail the committees deem appropriate and shall include, but not be limited to, an assessment of the degree to which the original objectives of the tax expenditure provision have been achieved (including a statement of the number and types of beneficiaries or persons served) expressed in terms of the performance impact, or accomplishments of the provision and of the problem it was intended to address, and an analysis of the costs of the provision.

(b) For purposes of this title, the first review date for a tax expenditure provision is the termination date of such provision prescribed by law enacted pursuant to section 402, and each subsequent review date for a tax expenditure provision is the date five years following the preceding review date.

SEC. 402. (a) The Joint Committee on Taxation shall conduct a study for the purpose of identifying and recommending termination dates for all tax expenditure provisions. The termination date for each tax expenditure provision shall be on December 31 of one of the five years beginning with 1979. The Joint Committee, after consultation with the Secretary of the Treasury and the Committees on the Budget of the House of Representatives and the Senate, shall submit its recommendations to the Committee on Ways and Means and the Committee on Finance as soon as practicable, but not later than January 1, 1978.

(b) During the Ninety-fifth Congress, the Congress shall complete action on a bill prescribing termination dates for all tax expenditure provisions in effect on the date of the enactment of the bill. The termination date for each tax expenditure provision shall be on December 31 of one of the five years beginning with 1979, and shall be effective with respect to taxable years beginning after the termination date of such provision.

(c) Any tax expenditure provision which is enacted after the enactment of the bill described in subsection (b), first applies to a taxable year beginning before January 1, 1980, and is to remain in effect (but for this subsection) for taxable years beginning after December 31, 1979, shall have a termination date which shall be effective with respect to taxable years beginning after December 31 of one of the five years beginning with 1979.

(d) Any tax expenditure provision which is enacted after the enactment of the bill described in subsection (b) and first applies to taxable years beginning after December 31, 1979, shall have a termination date which shall be effective with respect to taxable years beginning after December 31 of one of the five years beginning with the first taxable year to which such provision applies.

(e) Insofar as possible, termination dates shall be prescribed under subsections (b), (c), and (d)—

(1) for all tax expenditure provisions so as to provide an even distribution of the work of reviewing tax expenditure provisions during each year, and to take into consideration the economic impact of this process; and

(2) for each tax expenditure provision so as to provide for a review of such provision during the same period as the review under title II of programs having similar objectives.

(f) The Committee on the Budget of the House of Representatives and the Senate shall report to the Joint Committee on Taxation and to the House of Representatives and the Senate on the relationship between the purposes of tax expenditure provisions and those of related programs as both are identified by functional and subfunctional categories, as soon as practicable, but not later than September 1, 1977.

(g) The Joint Committee on Taxation shall assist the Committee on Ways and Means and the Committee on Finance in identifying tax expenditure provisions which become effective or are proposed after the date on which it submits its recommendation under subsection (a). The Committees on the Budget of the House of Representatives and the Senate shall report to such committees on the relationship between the purposes of such new or proposed tax expenditure provisions and those of related programs as both are identified by functional and subfunctional categories.

SEC. 403. It shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution (or amendment thereto)—

(1) which contains a tax expenditure provision which does not comply with section 402 (c) or (d); or

(2) which continues any tax expenditure provision (whether or not in a modified form) for any taxable year beginning after the next review date for such provision, unless the report required under section 411(b) on the sunset review of such provisions preceding such review date has been submitted to the House of Representatives or the Senate, as the case may be.

PART 2—REVIEWS OF TAX EXPENDITURES

SEC. 411. (a) The Committee on Ways and Means and the Committee on Finance shall

conduct a sunset review of each tax expenditure provision prior to each review date applicable to such provision.

(b) Each such committee shall submit a report on each sunset review of a tax expenditure provision conducted under subsection (a), together with its recommendations, to the House of Representatives or the Senate, as the case may be, on or before May 15 of the year in which occurs the review date for such provision. A committee may submit the results of the sunset reviews of two or more related tax expenditure provisions in a single report.

(c) Whenever the Committee on Ways and Means or the Committee on Finance recommends the continuation of the tax expenditure provision under review (whether or not in a modified form) or the enactment of a new tax expenditure provision with similar objectives, the report accompanying the first bill or resolution reported by such committee which continues such provision or contains such new tax expenditure provision shall include the report required by subsection (b) and shall include, but not be limited to the following—

(1) an identification of the problem or the needs that the tax expenditure provision is intended to address;

(2) a statement, to the extent practicable, in quantitative and qualitative terms of the objectives of the provision and its anticipated accomplishments;

(3) an identification of any other tax expenditure provisions or any other programs having similar, conflicting, or duplicate objectives and an explanation of the manner in which the program avoids duplication or conflict with such other provisions or programs;

(4) an assessment of the consequences of eliminating the provision, of consolidating it with another tax expenditure provision, or of reducing the revenue loss from the provision, taking into consideration similar and duplicate tax expenditure provisions and similar or duplicate programs in the public or private sectors of the economy; and

(5) a projection of the anticipated needs for the provision, including an estimate of when, and the conditions under which, the provision will have fulfilled the objectives for which it was established.

SEC. 412. (a) To assist in the sunset reviews of a tax expenditure provision under section 411, the Department of the Treasury, any agency which administers a program having objectives similar to the objectives of such provision, and any other agency when requested, shall provide to the Committee on Ways and Means and the Committee on Finance such information and assistance as the committee may request.

(b) On or before October 1 of the year preceding the year in which occurs the review date for a tax expenditure provision, the Comptroller General shall furnish to the Committee on Ways and Means and the Committee on Finance the results of prior reviews of such tax expenditure provisions and the results of prior audits and reviews of programs having similar objectives.

(c) Consistent with the discharge of the duties and functions imposed by law on them or their respective Offices or Service, the Comptroller General, the Director of the Congressional Budget Office, the Director of the Office of Technology Assessment, and the Director of the Congressional Research Service shall furnish to the Committee on Ways and Means and the Committee on Finance such information, analyses, and reports as the committee may request to assist it in conducting sunset reviews of tax expenditure provisions under section 411.

TITLE V. MISCELLANEOUS

SEC. 501. (a) The head of each agency shall transmit to the Senate and the House of Representatives a statement of each request for new budget authority for a fiscal year, and a statement of estimated outlays during a fiscal year, which that agency has submitted to the President or the Office of Management and Budget.

(b) The statements required to be transmitted to the Senate and the House of Representatives under subsection (a) shall be transmitted on the day after the day on which the President transmits the budget to the Congress under section 201 of the Budget and Accounting Act, 1921, for the fiscal year.

(c) At the request of any committee of the Senate or the House of Representatives, the head of any agency shall furnish to such committee such information as the committee may request with respect to (1) requests submitted to the President or the Office of Management and Budget for supplemental new budget authority for a fiscal year and statements of supplemental proposed outlays during a fiscal year and (2) requests for new budget authority and statements of proposed outlays made to the head of such agency, or any officer or employee acting for him, by any component of such agency.

SEC. 502. (a) Nothing in this Act shall require the public disclosure of records which are specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and are in fact properly classified pursuant to such Executive order, or which are otherwise specifically protected by law.

(b) Nothing in this Act shall require the committees of the Senate or House of Representatives to publicly disclose records described in subsection (a) except as otherwise provided by the rules of the respective House.

SEC. 503. The provisions of this section and sections 101(c), 103(a), 104, 201, 402, 403, 411, and 504 of this Act are enacted by the Congress—

(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

SEC. 504. (a) For purposes of this section and section 101(b)(1), the term "extension resolution" means a joint resolution, the matter after the resolving clause of which is as follows: "That the provisions of section 101(b)(1) of the Sunset Act of 1977 are deferred with respect to ———— for the fiscal year ——." (with the first blank space being filled with a description of the program to which the extension is to apply and the second blank space being filled with the appropriate fiscal year).

(b) It shall not be in order in either the Senate or the House of Representatives to consider an extension resolution relating to a program until 15 calendar days (not counting any day on which that House is not in session) after May 15 of the year in which occurs the review date for such program under Titles I and II of this Act.

(c) An extension resolution relating to a program introduced in the Senate or the House of Representatives shall be referred to the appropriate committee of that House.

(d)(1) If the committee to which an extension resolution relating to a program has been referred has not reported it at the end of 15 calendar days (not counting any day on which its House is not in session) after May 15 of the year in which occurs the review date for such program under Titles I and II of this Act, it is in order to move either to discharge the committee from further consideration of the resolution or to discharge the committee from further consideration of any other extension resolution relating to the same program which has been referred to the committee.

(2) A motion to discharge may be made only by an individual favoring the resolution, may be made only if supported by one-fifth of the Members of the House involved (a quorum being present), and is highly privileged in the House and privileged in the Senate (except that it may not be made after the committee has reported a resolution with respect to the same program); and debate thereon shall be limited not more than 1 hour, the time to be divided in the House equally between those favoring and those opposing the resolution, and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader or their designees. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(e)(1) When the committee of the House of Representatives has reported, or has been discharged from further consideration of, an extension resolution, it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) move to proceed to the consideration of the resolution. The motion be highly privileged and not debatable. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(2) Debate in the House on an extension resolution shall be limited to not more than 2 hours, which shall be divided equally between those favoring and those opposing the resolution. A motion further to limit debate shall not be debatable. No amendment to, or motion to reconsider the resolution shall be in order. It shall not be in order to move to reconsider the vote by which an extension resolution is agreed to or disagreed to.

(3) Motions to postpone, made in the House with respect to the consideration of an extension resolution, and motions to proceed to the consideration of other business, shall be decided without debate.

(4) All appeals from the decisions of the Chair relating to the application of the Rules of the House of Representatives to the procedure relating to any extension resolution shall be decided without debate.

(5) Except to the extent specifically provided in the preceding provisions of this subsection, consideration in the House of any extension resolution shall be governed by the Rules of the House of Representatives applicable to other resolutions in similar circumstances.

(f)(1) Debate in the Senate on any extension resolution, and all debatable motions and appeals in connection therewith, shall be limited to not more than 10 hours. The time shall be equally divided between, and controlled by, the majority leader and the minority leader or their designees.

(2) Debate in the Senate on any debatable motion or appeal in connection with an extension resolution shall be limited to 1 hour, to be equally divided between, and controlled by, the mover and the manager of the resolution, except that in the event the manager of the resolution is in favor of any such motion or appeal, the time in opposition thereto shall be controlled by the minority leader or his designee. Such leaders, or either of them, may, from the time under their control on the passage of a waiver resolution, allot additional time to any Senator during the consideration of any debatable motion or appeal.

(3) A motion in the Senate to further limit

debate on an extension resolution, or any debatable motion or appeal in connection therewith, is not debatable. No amendment to, or motion to recommit, an extension resolution is in order in the Senate.

BRIEF SUMMARY OF S. 2—THE SUNSET ACT OF 1977

TITLE I

Sets out a five-year schedule for review and reauthorization of all Federal programs, according to budget function and subfunction.

Requires that no program which has not been specifically reauthorized by the Congress shall continue to function after the review date set out in the schedule.

TITLE II

Requires the authorizing committees of the Senate and House to conduct a "sunset" review of all programs prior to the review date applicable to such program and to issue a report on the findings of the review.

Sets out guidelines for the content of the sunset reviews, including an identification of programs with similar objectives and an assessment of the impact of eliminating the program or funding it at a lower level.

Provides authorizing committees with assistance from executive branch and congressional support agencies—GAO, CBO, OTA and CRS—in carrying out their sunset reviews.

TITLE III

Establishes a Citizens' Commission on the Organization and Operation of Government, modeled after the two previous Hoover Commissions, to study and make recommendations on ways to improve the effectiveness of the Federal government.

TITLE IV

Requires the Joint Committee on Taxation, after consultation with Secretary of the Treasury and the Budget Committees of the House and Senate, to prepare a reauthorization schedule for all tax expenditures, similar to the schedule set out in Title I for Federal programs, and to report its recommendations to the Committees on Ways and Means and Finance.

Requires the Congress to take final action before the end of the 95th Congress on the schedule for tax expenditures.

Following the adoption of the schedule, the Committees on Ways and Means and Finance are required to conduct "sunset" reviews of tax expenditures according to the schedule. Guidelines for such reviews are similar to those set out in Title II for programs.

TITLE V

Requires Executive Department agency heads to submit to Congress (after the President has submitted his budget) a statement of that agency's request for new budget authority as transmitted to the Office of Management and Budget.

Requires agency heads to furnish the authorizing committees of Congress information regarding supplemental budget requests and supplemental estimates of outlays.

Sets out the procedures for a one-year grace period for programs which have not been specifically reauthorized by the scheduled time.

[From the Arizona Republic, Feb. 25, 1976]

WHY NOT LOOK FIRST?

In the past year, as chairman of the Senate Budget Committee, Edmund S. Muskie, the Lincolnesque Democrat from Maine, has been attempting to keep federal spending within bounds.

Muskie is not a conservative by any means, but, as a Down Easter, he does have a native aversion to waste. Unfortunately, not many of his fellow Democrats share his attitude, so his admonitions against waste generally have fallen on deaf ears.

Muskie has now come up with an idea so eminently sensible that it also is likely to fall on deaf ears. He has introduced a bill requiring Congress to review every four years all federal programs except those which are not subject to review, like the interest on the national debt and Social Security payments.

Muskie points out that Congress is forever starting programs and creating agencies, advisory boards, commissions and committees to run them, and that, once it does so, Congress never bothers to find out whether they are serving the purpose they're supposed to.

It simply renews them automatically.

There are now, he points out, 228 health programs, 156 income-security and social-service programs and 83 housing programs. Supervising them are not only 11 cabinet departments and 44 independent agencies but 1,240 boards of various sorts, as well.

Congress establishes dozens of these boards every year. It rarely abolishes one.

Many of the programs overlap, many are redundant, many that once served a purpose no longer do. The bureaucracies running them are snarled in red tape.

Muskie cites a city where one General Accounting Office found eight clinics operating in one neighborhood under different programs, with none of them having any knowledge of what the others were doing.

He cites complaints from citizens who had to wait 18 months for a ruling on claims for disability compensation. He cites complaints from towns which had to wait months for federal approval of sewer systems mandated by federal law.

The GAO, he says, has found agencies unable to say how much they were spending on administrative costs as compared with actual services.

In effect, what Muskie's bill proposes is that every agency, commission, committee, what-have-you be forced to justify its existence and the existence of the programs it administers every four years.

Then Congress would have to determine whether they should be continued or killed, whether the programs should be curtailed, expanded or eliminated.

Forced to re-examine the agencies and programs, Congress might discover that it had been voting money for no purpose except to keep people on the federal payroll.

Muskie's bill deserves support. The trouble is that, when it comes to money, Congress so rarely does the obvious.

[From the Washington Post, July 21, 1976]

PROGRAMS THAT SELF-DESTRUCT

(By Neal R. Peirce)

The "sunset" law idea—to force government agencies and programs to justify their own existence or face extinction—is advancing rapidly in Congress and spreading like a prairie grassfire among the states.

Sunset measures were introduced this spring in California, Florida, Illinois and Louisiana—even before Colorado, in April, could complete action on its pioneering bill to put 40 state regulatory agencies on a seven-year life cycle. Maryland has set up a 15-member commission to study the feasibility of a sunset law.

The Colorado chapter of Common Cause, which originated the sunset idea, reports inquiries from 30 states. "I wouldn't be surprised if two dozen legislatures were debating sunset bills by next winter," says Rosalie Schiff, executive director of Colorado Common Cause.

On Capitol Hill, 47 senators, of every ideological hue, are sponsoring sunset legislation requiring federal government programs, grouped by functional area, to come up for renewal every five years. Programs that couldn't pass muster would be cut back or eliminated altogether. Those that proved themselves would be given a new lease on life by Congress.

The bill cleared the Senate Intergovernmental Relations Subcommittee by a 7–0 vote May 13, and sponsors Edmund S. Muskie (D-Maine) and William V. Roth (R-Del.) hope it will reach the Senate floor this summer.

On the House side, a companion bill has more than 100 sponsors including 41 members of the freshman class lined up by chief backers James J. Blanchard D-Mich.) and Norman Y. Mineta, (D-Calif.). House committee hearings are scheduled to begin this month.

Broad support—from Common Cause to the Chamber of Commerce of the U.S.—for the sunset legislation was forthcoing during Senate hearings. Only one interest group—the veterans—had the temerity to oppose the idea in public, out of fear that Congress might cut back their benefits.

Blanchard says he's "absolutely convinced" sunset legislation will eventually pass Congress. If he's right, the results could be revolutionary: the most effective brake on federal spending and programs in modern times—perhaps ever.

Muskie and Roth see sunset as a logical extension of the new congressional budget process, now in its second year. Whereas the budget process lets Congress establish spending priorities and overall ceilings, the sunset mechanism would force Congress to make periodic decisions on whether federal programs are really working so that duplicative or unnecessary ones can be weeded out.

Up to now, bureaucratic and political pitfalls have made it almost impossible to eliminate programs or agencies once they're on the statute books.

The sunset bill tries to avoid those pitfalls in three ways. First, a triggering mechanism requires that Congress must act every five years to keep a program alive. The burden of proof is shifted to a program's backers, to show that it deserves continued life. According to Alvin From, staff director of the Senate Intergovernmental Relations Subcommittee, "it will be very hard for a committee to justify reauthorizing the Tea-Tasters Board or 228 individual health programs."

Second, the sunset measure requires that all related programs—in manpower or health or national security, for example—come up for review and a decision on extension in a single year. Under strict budget guidelines, Congress will have to decide which programs are the most worthwhile which might be dropped or consolidated.

Finally, the sunset bill as it's now written requires a zero-based review of each federal program. to be prepared for Congress by executive agencies and the General Accounting Office. Zero-based review shows the consequences of cutting any program's budget 25 percent or more, eliminating it altogether, or providing the services another way.

The zero-based review process alarms professional budget-makers. Roy Ash, former director of the Office of Management and Budget, says that zero-based review of an average of 250 programs a year "is like attempting to jump aboard a 747 in full flight." Others say the bill is overly ambitious, would set a "papermill" in motion and create "a modest pilot or test runs."

Muskie and Roth show little patience with such arguments. If Congress proceeds at the pace predicted by many critics, Roth says, "I will be dead by the time the work is completed." Much of the resistance, sunset law backers believe, stems from normal bureaucratic terror of any radical change in their way of doing business.

Even federal tax incentives are the target of a sunset provision suggested by Ohio's Sen. John H. Glenn (D). However noble their original purpose, Glenn says, tax incentives

often degenerate into loopholes that cause an annual loss of $101 billion in tax revenue—as much as the entire national defense budget.

Common Cause urges a kind of sunset for Congress itself—reorganizing committees into more clear-cut functional areas and forcing members to rotate committee assignments every few years to break up "unholy" alliances between committee members and special interest lobbyists.

Even an imperfect sunset system, however, could help breathe life into the oft-neglected oversight role of the legislature, prompt the executive to be more accountable, and begin the arduous process of rescuing government from its own cumbersome inefficiencies and the nadir of public esteem where it finds itself today.

[From the New York Times, Aug. 5, 1976]

SPENDING REVIEW BACKED IN SENATE—COMMITTEE APPROVES BILL TO RESTUDY PROGRAMS AT FIVE-YEAR INTERVALS

(By Edwin L. Dale, Jr.)

WASHINGTON, August 4.—The Senate Government Operations Committee approved today legislation, applying to Congress, that would end nearly all Government spending programs unless each one was specifically approved again over a five-year review cycle.

Known as the "sunset" bill, it is the legislative counterpart of the "zero-based budgeting" concept embraced for the executive branch of government by Jimmy Carter, the Democratic Presidential nominee.

If enacted, the bill would amount to a revolution in Congressional procedures almost comparable to the Budget Reform Act, which is in full operation this year for the first time. That reform requires Congress to set an overall spending ceiling each year and live with it.

Enactment of the "sunset" bill by both houses of Congress this year is regarded by Congressional staff experts as doubtful but not impossible. Hearings on companion legislation in the House have been conducted by both the Rules Committee and the new Budget Committee.

The bill approved today would exempt from the automatic termination, or "sunset," process only a few programs of the insurance type, such as Social Security, where individuals contribute to a retirement or other benefit.

Thus, even longstanding "entitlement" programs such as veterans' combat-related disability benefits would be subject to review every five years, though there is little expectation that cash payments now received by individuals will be taken away.

More likely to be modified or possibly terminated would be some of the more than 1,000 grant programs, often through state and local government, that deliver services of various kinds.

The committee report on the bill will begin as follows:

"The purpose of S. 2925, as amended, is to close the gap between Congress and the results of its legislative work—the actual performance and accomplishments of Federal programs paid for out of the Federal budget."

The bill sets up a schedule of "functional" programs—health, education, income security, veterans, agriculture, natural resources—for review and possible termination every five years. Under an amendment adopted today, the reform itself would have to be reenacted by Congress after five years of experience. If it was not re-enacted, the old procedures would resume.

The bill must now be considered by the Senate Rules Committee. It must also be considered by the Finance Committee because one of its provisions requires a five-year review cycle of "tax expenditures"—that is, special tax deductions, exemptions or exclusions that are aimed at achieving results in such areas as mining and health or home ownership outlays by taxpayers.

The chief sponsor of the legislation was Senator Edmund S. Muskie, Democrat of Maine, who is chairman of the subcommittee of Government Operations that drafted the bill. Senator Muskie's perception of the need for "sunset" grew as a result of his other role as chairman of the new Senate Budget Committee.

The committee report on the bill says, "The committee would like to state at the outset that S. 2925 does not require the re-enactment of the entire United States code every five years. Rather it only affects those provisions of law authorizing the expenditure of funds. Accordingly, substantive provisions of law—antitrust, civil rights, occupational safety laws, etc.—are not affected by the termination provisions . . . the focal point of the termination and review process in S. 2925 is intended to be those provisions of law which authorize or provide budget authority for the delivery of services or goods by the Federal Government."

The term "sunset" apparently arose as a verbal counterpart to "sunshine" legislation, which relates to the conduct of Government business in the open. Both terms originated in the states, not Washington. Colorado has just enacted the first state sunset law.

The committees that handle the basic legislation would conduct the reviews, with help from the Office of Management and Budget, the General Accounting Office and the new Congressional Budget Office.

The Ford Administration has been lukewarm to the legislation, though not overly opposed. Paul H. O'Neill, deputy director of the Office of Management and Budget, told the House Budget Committee last week that he feared it could produce "mountains of paperwork" with few substantive results in cutting back ineffective programs.

However, there was also much skepticism about the radical Congressional budget reform. While it remains to be fully tested, there is now much more optimism than there was a year or two ago, both in and out of Congress, that it will work in restraining the Congressional "propensity to spend" under its old procedures of passing bills one at a time with no control over the total.

The committee report on the "sunset" bill says that the "number and complexity of Federal programs," the great increase in "uncontrollable" outlays and the "rapid growth in the number of Federal programs with permanent appropriations" have made the new system of review necessary.

[From the National Observer, June 5, 1976]

"SUNSET" BUDGETING: HIGH NOON FOR FEDERAL WASTE?

(By Mark R. Arnold)

WASHINGTON, D.C.—The hottest political idea of the year is something called the sunset bill. It has nothing to do with daylight-saving time. It has everything to do—or so its sponsors say—with making the Federal Government more accountable and more efficient.

A response to a widely held view that the Federal bureaucracy is wasteful and inept, sunset is being eagerly embraced by liberals such as Hubert Humphrey and Charles Percy and conservatives such as Barry Goldwater and James Eastland.

The measure would set a termination date—a date for the sun to set—on every Federal program. Each would be renewed only if, after rigorous analysis by Congress its performance could justify its existence and spending level.

Every five years each Federal program would face extinction unless a "zero-based budgeting" review demonstrated its value to the nation. Such a review would weigh the effect of various levels of spending—beginning with zero, or termination—upon the program's goals.

Sunset is modeled in part on the zero-based budgeting techniques instituted by former Gov. Jimmy Carter in Georgia in 1972. The measure would reverse the assumption under which most bureaucracies operate—that programs, once established, should be continued (and usually grow). Sunset, says chief Senate sponsor Edmund Muskie of Maine, "offers one of the few chances we have to clear out some bureaucratic deadwood to make way for the nation's changing agenda."

Muskie and Delaware Republican William Roth introduced the sunset bill in the Senate on Feb. 3. "We hoped to get some hearings going and build a record that would lead to passage in the next Congress," says Alvin From, staff director of Muskie's Intergovernmental Relations subcommittee, which reported the bill May 13. But the proposal has attracted so much attention—and the support of both Majority Leader Mike Mansfield and Minority Leader Hugh Scott—that the Senate could vote on it before the July recess. House action may not be far behind.

As of last week, 48 of the 100 senators and 110 of 435 House members were cosponsoring sunset or zero-based budget legislation in Congress, representing all viewpoints on the ideological spectrum. "Conservatives see this as a way of reducing the responsibilities of Government, liberals as a way of getting our house in order to take on new responsibilities," says Muskie. Adds House sponsor James Blanchard of Michigan: "This is a good-government issue, not a liberal or conservative issue."

Interest in the idea is not confined to Washington. Colorado recently became the first state to adopt sunset legislation when Gov. Richard D. Lamm signed into law a bill that swept through the legislature with strong bipartisan support. The measure requires that all of the state's 43 regulatory agencies undergo a complete performance audit every seven years. Other sunset bills have been introduced this year in the legislatures of Minnesota, Florida, Louisiana, California, Illinois, and Alaska.

Behind the interest in sunset legislation lies a popular reaction against the growth of government. The largest increase in public-sector spending over the past 20 years has come at the state and local levels, but the growth rate of government at all levels has exceeded the growth rate of the economy during the period, according to studies by the Senate subcommittee. One consequence: The average family's tax burden has doubled in 20 years.

The period has also seen a dramatic rise in the most visible kind of Federal aid—that earmarked for domestic social programs. The Federal Government today has roughly the same number of employes it had a decade ago (2.8 million), but they administer more than 1,000 programs of assistance to all 50 states and 80,000 units of local government. In the health field alone, 10 agencies run 228 different programs.

"Government has become out of touch and out of control," says Muskie. Proponents see the sunset bill as a way of regaining control over the services that the Federal dollar buys. This is "a logical second step," adds Muskie, to the Budget Reform Act of 1974, which gave Congress a framework to help set national priorities. "No one in the executive branch or Congress really knows if we're getting the most for the money we spend."

The sunset bill is officially known as the Government Economy and Spending Reform Act of 1976. It would require that all Federal

programs—including income-tax deductions—be reauthorized every fifth year or go out of existence. The only exemptions to the termination edict are payments for interest on the national debt and programs under which individuals make payments to the Government in the expectation of future benefits, such as Social Security.

THE ZERO-BASED PROCEDURE

Programs would be grouped for review by functional purpose (all defense programs would be reviewed in one year, all health programs in another, and so on). The President would submit with his budget request a zero-based review of all programs earmarked for termination in the coming fiscal year and an independent evaluation of their effectiveness.

The appropriate committees of Congress would consider the President's zero-based reviews and evaluations, perform any additional studies deemed warranted, and recommend to the House or Senate how much—if anything—to spend on each program. Its backers believe the process would identify numerous areas of waste and duplication. "There's the potential for billions of dollars of savings," says Muskie.

The House bill introduced by freshman Democrat Jim Blanchard of Michigan is modeled after Muskie's. It has been endorsed by 106 House Members, including 45 of the 75 freshman Democrats. Blanchard says the bill is particularly appealing to liberals:

"We all want new programs, but we know it's politically unacceptable these days to raise taxes to finance them. The only way to pay for them is to weed out programs that have outlived their usefulness. Zero-based budgeting is how you find them."

BENEFITS AND DRAWBACKS

The oldest and most comprehensive use of zero-based budgeting is Jimmy Carter's Georgia system, which has been continued and refined by his successor, Gov. George Busbee. National Observer interviews in Atlanta with state budget officials, agency administrators, and legislators suggests that the process can yield some benefits but that political factors limit its potential. In addition, because that system calls for *annual* zero-based review, some administrators complain that it causes needless paper work.

Georgia officials cannot recall a single program that has been "zero-budgeted" out of existence. But administrators say the system keeps them on their toes and makes programs more efficient. In addition, argues Clark Stevens, who oversees the system for Governor Busbee, "we can look at all expenditures and measure them off against each other better. Old programs compete for resources with new proposals, and ideas don't get squeezed out on the grounds that the money has already been committed."

POLITICS OVER PERFORMANCE?

As a governor's management tool, the Georgia system has important advantages over traditional budgeting techniques, but its utility is severely hampered because the state legislature ignores it. "We prepare a continuation budget, and so does the governor," says Georgia legislative-budget analyst Pete Hackney. "Then they decide which items in addition to that ought to be funded. If old things get cut out, it's usually because they've proved pretty unpopular."

No one has yet opposed the legislation in Congress, but numerous skeptics wonder if political considerations, rather than performance, might not sway Congress' deliberations. "Any ongoing program has a constituency around the country that is going to be mighty unhappy with anyone trying to tamper with their line into the Treasury," says a White House official.

PROGRAMS SEEN JEOPARDIZED

Sunset's backers insist that it would give reformers ammunition they now lack in facing down defenders of ineffective programs. "We'd be viewing programs as they relate to other programs and spending options, not in a vacuum as we do now," says Blanchard. "That's got to be a plus."

Another criticism holds that program evaluation is too primitive an instrument—"more art form than science," says James Lynn, director of the Office of Management and Budget—to produce the standardized measures of effectiveness that the legislation would seem to require. Lynn, testifying on the Muskie bill in April, called the Senate formula "too mechanical and inflexible." His lieutenants are working with Senate aides to try to iron out the difficulties.

Requiring periodic reauthorization for all Federal spending "might put suicidal demands on Congress," worries a legislative-appropriations expert. Without additional resources to undertake thorough reviews, he adds, "We might end up with a BS type of recertification procedure, a paper exercise."

PILOT PROJECTS SUGGESTED

Moreover, a functional approach to consideration of Federal spending would require a thorough realignment of the present haphazard committee structure. No longer, for example, would 17 committees of Congress have jurisdiction over energy legislation. Muskie thinks sunset would spur this needed realignment, but he concedes, "If we don't solve the jurisdiction problem, implementation will be weakened."

These problems prompt some sunset backers to conclude that the legislation should be implemented in phases, beginning with some pilot projects. "We don't want to bite off more than Congress can chew and discredit the whole idea," says a strategist for Common Cause, which is pushing sunset in Washington and in state legislatures.

Whatever approach prevails, the idea behind sunset—to force a systematic and periodic re-evaluation of Government programs—is gainng strength. Says Muskie:

"People are fed up. They read about abuses in the Medicare program and cost overruns in defense spending. They don't know if it's the tip of an iceberg or the whole iceberg. I don't know either. The fact is, nobody knows. But we, as their representatives, have an obligation to find out."

AUTOMATIC "SUNSET" MAY FACE U.S. SPENDING PROGRAMS

(By Martha Angle)

Archy the cockroach and Mehitabel the cat are alive and well on Capitol Hill.

It figures, if you stop to think about it.

These days, the spirit of Archy seems to have slipped into Sen. Edmund S. Muskie, D-Maine. The free-wheeling Mehitabel, never one for modesty, has reappeared in the Congress as a whole.

Archie, as readers of a certain age may recall, was a *vers libre* poet returned to life as a cockroach. Mehitabel, Cleopatra in an earlier existence (or so she always claimed), was a fun-loving cat of easy virtue, perpetually producing kittens which she promptly forgot about.

Archy, with some social conscience, regularly inquired about the well-being of Mehitabel's offspring—only to be met by a blank stare and innocent query, "What kittens, Archy?"

Like Mehitabel, the Congress for a decade or so has been happily producing programs—health programs, education programs, veterans programs, energy programs, environmental programs, transportation programs, every size, shape and price program you can name.

And like Mehitabel Congress never checks up on its progeny. Each new program is sent out into the world to fend for itself and grow willy-nilly. Until Ed Muskie started asking a few months ago, no one ever bothered to inquire how all those programs were faring.

In the last dozen years, the number of federal domestic programs multiplied from 50 to nearly 1,000. The federal budget climbed from $158.2 billion in 1967 to an estimated $413 billion for fiscal 1977.

But the good old days are over. Vietnam, inflation and recession have bent the federal budget all out of shape. There's no longer enough money in the treasury to feed all those programs Congress created, let alone provide sustenance for a new generation.

The American taxpayers are tired of government profligacy. Nothing seems to work right. Benefits don't trickle down to the average citizen. Promises go unfulfilled. Taxes go up, and up, and up—with no corresponding increase in results. People have had it with big government, and the message is sinking in with a few legislators like Muskie.

"Government has become out of touch and out of control," said Muskie, chairman of the new Senate Budget Committee, in a Feb. 3 speech to his Senate colleagues.

"We in Congress have not paid enough attention to how well the programs we adopted were working—and now these years of inattention to performance are taking their toll as we reap a bumper crop of public disenchantment with the government."

Under the guidance of the Maine Democrat, a Senate Government Operations subcommittee is preparing landmark legislation that would automatically abolish almost all federal programs every four years unless Congress specifically reauthorizes them.

The only exemptions from the quadrennial review would be interest payments on the public debt and programs like Social Security where individuals contribute to the system with the promise of receiving future benefits.

All programs in a specific budget function would be scheduled for expiration at the same time, to force the executive branch and Congress to examine the total federal effort in a particular field, such as health.

And when a program comes up for evaluation, Congress and the President would have to apply "zero-base budgeting" techniques to the review—a fancy way of saying the program managers would be required to explain what would happen if they go zero funds, half their current funds, three-quarters of their present budget, and so forth.

The Muskie bill, cosponsored by a remarkable array of senators of every ideological stripe, is known as "sunset" legislation. It embodies, at the federal level, a concept which is catching fire all over the country.

Colorado has just enacted the first major state "sunset" law, which will require automatic termination of dozens of state regulatory boards and commissions every seven years unless reauthorized.

The measure, first proposed by the Colorado chapter of Common Cause, the self-styled citizens lobby, was guided through the legislature by a coalition of liberal Democrats and conservative Republicans and was signed into law last week by Gov. Richard Lamm.

In Florida, where the state legislature is now in session, a similar "sunset" bill has been introduced with the support of 33 of the 40 state senators.

In Maryland, Del. David L. Scull, D-Mont., succeeded in winning approval during the final days of the legislative session of two resolutions dealing with sunset review and zero-base budgeting.

The first resolution calls for creation of a 15-member commission to assess the feasibility of enacting a sunset law like Colorado's. The second asks Gov. Marvin Mandel to select one state agency for zero-base budget review as a pilot program.

And Georgia, although lacking a sunset law, was the first state in the nation to adopt zero-base budgeting—the other half of the Muskie bill. It did so at the insistence of former Gov. Jimmy Carter, now the front-running contender for the Democratic presidential nomination.

A Carter spokesman said last week the former Georgia governor is unfamiliar with

the specifics of the pending federal legislation, but said "it appears to entail the sort of philosophy and approach that he would take as president."

Carter has already pledged to implement zero-base budgeting in the federal government, if elected, and to reorganize the bureaucracy—a step which would necessarily include termination of some agencies, the spokesman noted.

As it happens, Peter H. Pyhrr, a business executive who helped Carter establish zero-base budgeting in Georgia five years ago, is working with the Muskie subcommittee in drafting the federal legislation.

Pyhrr said Carter deserves full credit for initiating the system in Georgia. "He is not an executive who is run by his staff. He has his own ideas, and he is a very quick study. He personally decided to do it, even before his staff knew what the hell zero-base budgeting was."

Pyhrr, now vice president of Alpha Wire, Inc., a New Jersey firm which manufactures electronic wire cable and tubing, said Carter contacted him just before taking office after reading an article on zero-base budgeting Pyhrr had written in the Harvard Business Review.

"There aren't too many politicians who read the Harvard Business Review, but Carter did. He called me and asked if I could spend a couple of days with him explaining zero-base budgeting," Pyhrr recalled.

The days stretched into weeks, and by his second year in office, Carter had implemented zero-base budgeting for every executive branch agency in Georgia.

Pyhrr conceded many agency heads in the Georgia government were initially "very hostile" to the concept, having become accustomed to justifying only the annual increases in their budgets—not every penny spent.

"But we gave them no choice. They either produced zero-base budgets, or they didn't get any money. It was a super incentive to cooperate," Pyhrr said.

Muskie and his staff are acutely conscious of the technical and political hurdles which must be cleared to win enactment of effective sunset and zero-base budgeting requirements for the entire federal government.

They know federal agencies have never before been required to justify their existence and aren't anxious to start now. They realize special interest groups with a stake in existing federal programs will descend upon Congress to plead for their favorite causes.

They anticipate an epidemic outbreak of the "Washington Monument" syndrome, a standard bureaucratic response to proposed budget reductions which features threats to eliminate the affected agency's most popular program unless funds are restored.

(The syndrome first appeared one year when the Interior Department, ordered to cut spending by a certain percentage, quickly announced it would be forced to limit visiting hours at the Washington Monument. The cuts were then rescinded.)

During hearings on the Muskie bill in recent weeks, nearly every executive branch official who testified praised the aims of the legislation but insisted they can't be accomplished—at least not all in one swoop.

James T. Lynn, director of President Ford's Office of Management and Budget, called the bill "far too mechanical and inflexible," predicting it would produce mostly "unneeded paperwork and wasted effort."

Secretary of Commerce Elliot L. Richardson suggested a four-year zero-base review of every federal program is "overly ambitious," warning, "If we attempt too much, the effort may simply become one of satisfying the form without addressing the substance."

And William A. Morrill, assistant secretary of Health, Education and Welfare, noted his agency alone has over 370 programs, "Undertaking zero-base reviews of all these would be a major burden requiring extreme amounts of staff time," he said.

Muskie and other sponsors of the sunset legislation are neither surprised nor discouraged by the dire predictions. Much of the resistance, they suspect, stems from normal bureaucratic terror of anything which challenges business-as-usual.

The subcommittee plans to move to mark-up of the sunset bill in about two weeks, hoping to steer it through the full Government Operations Committee and onto the Senate floor before the Democratic National Convention in July.

Enhancing prospects for action on the bill is the striking breadth of support it enjoys. Cosponsors range from Democratic liberals like Mike Mansfield to conservative Republicans like Barry Goldwater. Common Cause and the U.S. Chamber of Commerce, groups which seldom agree on the time of day, both vigorously support sunset legislation.

"There's terrific political momentum for this concept right now," said one Muskie aide. "With all the public concern about big government, excessive spending and overlapping programs, it's a natural for an election year."

[From the Washington Star, Feb. 5, 1976]

MORE BANG FOR THE BUCK

Senator Edmund Muskie has come up with a legislative proposal that has the look of a winner.

Instead of following the usual practice of plowing more money into federal programs year after year whether they work or not, Mr. Muskie says, why not take a fresh look at them periodically?

Indeed, why not? Congressional failure to reexamine what it creates is a major reason why the budget keeps getting bigger, the bureaucracy keeps growing, and the taxpayers keep wondering why they don't get more bang for their bucks.

The way Mr. Muskie and the bill's cosponsors—Republican William Roth of Delaware and Democrat John Glenn of Ohio—see it, the government will never have enough money for new initiatives if it continues to throw good money after bad programs.

Under the Muskie bill, beginning in 1979 almost all federal programs would be put on a four-year authorization cycle. This means that each program, with the exception of such things as servicing the federal debt and Social Security pensions, would be examined every four years to see if it is doing what it was established to do. Any program that was not reauthorized would automatically be abolished.

There's more. Programs deemed worthy of keeping would not necessarily be retained at existing or greater size. Congress would start at "zero base" in its re-examination and every dollar of authorization would have to be justified as to the job it is supposed to do and the impact on overall government spending.

To help the process, the executive branch would be required to make a "zero-base review and evaluation" of programs scheduled for extension or termination.

Enacting the Muskie proposal will not be easy. Congress is a world of 535 fiefdoms and each potentate has pet programs that he's determined to hang onto. Then there are the special interests—the lobbyists, if you will—that cajole, badger and even now and then bribe congressmen to keep programs going that benefit the special interests. The government bureaucracy itself is an important influence in keeping programs going long after they have served their purpose or proved to be inadequate; abolished programs mean abolished jobs, and paper shufflers can always find arguments to keep them in business.

Inertia is a factor in keeping programs going. Unless there is an external force to change its direction, a program continues on its course. Congress is not a body that works very hard at overcoming inertia.

As Senator Muskie said, there is no valid basis for the assumption that old programs and old agencies deserve to be continued simply because they existed the year before. "Government," he said, "has become out of touch and out of control." The time may be ripe for doing something about it, given the growing public sentiment for cutting back the government—and the Muskie plan seems a good place to start.

[From the Atlanta Constitution, Sept. 10, 1976]

CARTER ENDORSES "SUNSET LEGISLATION"

(By Jim Merriner)

COLUMBUS, OHIO.—Democratic presidential nominee Jimmy Carter Wednesday endorsed "sunset legislation" which would abolish federal agencies after a certain time period unless Congress renewed them.

Carter said it was his first endorsement of the idea, although he made favorable statements about it last June after meeting with Sen. Edmund Muskie, D-Maine, sponsor of the legislation.

At the time, Carter likened the "sunset" bill to the zero-based budgeting concept he had introduced as governor of Georgia.

"The instinct for bureaucratic survival, the political inertia which keeps old agencies afloat, is too strong to be overcome except by drastic measures," Carter said Thursday.

"If elected, I will actively support a strong sunset law. . . . I want a law which will shut down outdated agencies and programs once and for all," he said.

Carter was flanked by Sen. John Glenn, D-Ohio, a sponsor of the legislation along with Muskie. Both senators had been considered for the job of Carter's running mate, which was won by Sen. Walter F. (Fritz) Mondale, D-Minn.

"Up to the present time, I have not taken a position on this issue. Today, I have decided to do so," Carter said.

He said, "The Republican administration, despite campaign rhetoric about controlling government waste, has testified against enactment of sunset legislation before both houses of Congress."

Meanwhile, Carter accused President Ford Thursday of trying to "cloud the issue" about FBI Director Clarence Kelley's acceptance of gifts and FBI work in his apartment by bringing up the fact that Kelley's wife was dying of cancer.

Ford had accused Carter of a "lack of compassion" in saying Kelley should have been fired. Ford said Kelley's wife was dying of cancer at the time he accepted federally financed improvements for his apartment and gifts from subordinates.

Reacting to the death of Chairman Mao Tse-tung in China, Carter said, "I want to know if this death signifies a shift toward or away from friendship with the American people" during the transition of leadership.

[From the Washington Post, Apr. 27, 1976]

SUNSET FOR BUREAUCRACIES

Out in Colorado, an intriguing experiment in regulating bureaucratic growth is getting under way. Gov. Richard D. Lamm has just signed a novel "sunset law" which would terminate every one of the state's regulatory agencies—let the sun set on them—within seven years unless the legislature votes to continue them. This unique self-destruct measure, initiated by Colorado Common Cause, was passed with broad bipartisan support, extending from consumer-oriented legislators to Republican conservatives. However much these factions may disagree

about the proper role of regulation in the state, they shared a desire to make the regulatory agencies leaner and more accountable.

The great advantage of the "sunset" approach is that it establishes a framework for systematic, periodic scrutiny of the bureaucracies involved, and makes the advocates of each agency openly justify continuing public investment in it. This can focus legislative and public attention on some corners of government that have grown very cluttered and musty over the years. The Colorado law, for instance, is aimed at the more than 40 boards and commissions in the states that regulate or license various occupations, from barbers to morticians. Such agencies, which are usually fairly small and obscure, can easily become captives of the professions they are supposed to regulate—or can do nothing at all except provide sinecures for a few employees.

Since cutting back government regulation has become a popular cause, the Colorado "sunset law" may become a model for other states that are also burdened with inefficient or antiquated agencies. At the federal level, a number of similar bills have been introduced in Congress during the past several months. One of the most ambitious, sponsored by Senate Budget Committee Chairman Edmund S. Muskie (D-Maine) and others, would require a "zero-based" review, or total reassessment, of every single federal program every four years. Other bills would impose periodic termination dates on all or some regulatory agencies. Along this line, the House wrote a 7-year expiration clause into its version of the consumer advocacy agency legislation last fall.

One reason for all the congressional interest in the "sunset" concept is that most other methods of congressional oversight of the executive branch do not work very well. The appropriations process is an inadequate tool for comprehensive evaluation of agencies' performance. Unless deadlines are imposed or great public pressure is brought to bear, authorizing committees seldom bestir themselves to consider structural changes in programs and agencies. Oversight panels tend to function in a scattershot way, directing their attention primarily at programs that become generally controversial or particularly irksome to powerful congressmen. There is widespread interest right now in reining in agencies through legislative review of administrative rules and regulations, but this raises substantial issues of separation of powers.

All in all, some kind of federal "sunset" plan could have considerable benefits both for the taxpayers and for the government. In exploring such possibilities, however, it is vital to recognize that serious attempts to discipline the federal bureaucracy require considerable effort and self-discipline by Congress too. In fact, the broader proposals now pending would involve a staggering amount of legislative coordination and concentration. A few years ago, we might have said that Congress could never manage it. Since the new budget process has begun to take hold, the prospects for more orderly and effective congressional operations have improved substantially. Even so, the Senate and House committee structures are so sprawling, and committees' performance so uneven, that Congress might profitably start by devising a "sunset" program for itself.

[From the Los Angeles Times, Feb. 18, 1976]

MUSCLE-BOUND—AND FAT-BOUND

Sen. Edmund S. Muskie (D-Me.) has come up with the refreshing idea that the best way to restore public faith in government is to weed out federal programs that, however well-intentioned, aren't working well enough to earn their keep. More refreshing still, he has gone beyond easy rhetoric to offer a practical means of achieving this result.

Legislation introduced by Muskie early this month would require virtually every federal program to be reviewed by Congress every four years to determine if it should be continued—and, if so, at what level of spending. Those failing to win reauthorization would expire.

The only spending programs exempt from the automatic quadrennial review would be interest payments on the national debt and programs, such as Social Security, under which individuals make payments to the national government in the expectation of later compensation.

Because Muskie's proposal calls for fundamental changes in the psychological atmosphere in Washington, as well as in actual procedures, it is likely to encounter stiff resistance.

But it strikes us as one of the most sensible ideas to come along in years.

The way the political system now operates, members of Congress concentrate on generating new programs to solve real and not-so-real national problems. But once the legislation is enacted, they move on to new frontiers and show scant interest in following up to determine whether the hoped-for results are in fact achieved. In the meantime, the programs gain powerful constituencies of their own in the bureaucracy and in the public. Social and defense programs alike generate pressures for their continuance, and against their reexamination. The question. "Should we be doing it at all?" is too seldom asked.

The cumulative result is a government in which performance increasingly falls short of promise.

Muskie notes that the Catalog of Federal Domestic Assistance lists, among other things, 228 health programs, 156 income-security and social-service programs and 83 housing programs. The federal government annual lists not only 11 Cabinet departments and 44 independent agencies, but also 1,240 advisory boards, committees, commissions and councils. And while dozens of new such bodies are created each year, the old ones rarely go out of business.

As an all-too-typical case of overlapping social programs, the Maine senator told of one city where the General Accounting Office found eight clinics operating in one neighborhood under several different programs—each proceeding without regard to what the others were doing. The GAO has found agencies that were unable to say how much they spend on administrative costs as opposed to actual services.

The American people are understandably turned off, Muskie added, by a government that is too muscle-bound to do the things it is trying to do. He cited complaints from citizens who had to wait 18 months for a ruling on claims for disability compensation, and from towns that had to wait many months for federal approval of sewer systems mandated by federal law.

Muskie, who has done a highly creditable job as chairman of the Senate Budget Committee, says the point is not that there should be a freeze on new programs to help people, but that the country cannot afford new programs unless Congress is willing to eliminate old ones that are ineffective, unnecessary or redundant.

The same sort of waste and duplication is to be found in military programs; they would be subject to the proposed reauthorization procedure, too.

As part of the quadrennial review process that would be required by Muskie's bill, congressional committees would have to make "zero-base" evaluations. That is, they would consider the comparative effects of eliminating a program, of funding it at existing or greater levels, or of funding it at various levels in between. Their findings would be reported to the full House and Senate.

Congress took a big step toward rational setting of national priorities when it established the House and Senate budget committees last year. The Muskie proposal is a natural follow-up; it deserves the support of everybody in and out of Congress who believes in responsible, effective government.

Mr. MUSKIE. Mr. President, I further ask unanimous consent that the text of Senator ROTH's remarks on the sunset bill be included in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

SUNSET REFORM: FIRST PRIORITY OF THE 95TH CONGRESS

(Statement of WILLIAM V. ROTH, Jr., U.S. Senator)

There is no more pressing need facing this Congress than to strengthen the control we exercise over federal spending for federal programs. The American public deserves and will be satisfied with nothing less than full scrutiny of every federal program expenditure. We must adopt procedures to assure that the operations of government are periodically reviewed and measured against tough standards of performance. The average taxpaying citizen of this country is demanding stronger controls over our vast national budget and expanding national debt.

Last year I authored a proposal with Senator Muskie to confront the need for stricter control over our national budget authorizations. Our bill—S 2925—became known as the sunset bill because, under the procedures in the bill, the "sun" would set on outmoded or inefficient government programs.

The authorizations for nearly every program would automatically terminate after five years unless a convincing case is made that the program is satisfying its objectives at reasonable cost. Today the need for such sunset legislation is greater than ever, and accordingly, I am again submitting comprehensive spending reform legislation to the Senate for its careful consideration and approval. The Government Economy and Spending Reform Act of 1977 reflects many of the changes made in our original proposal after consideration by the Government Operations Committee. I am pleased to re-introduce this legislation with Senator Muskie and Senator Glenn and Senator Ribicoff.

Congress must recognize the urgent need to restore fiscal responsibility to government spending. In a scant ten years our federal budget has increased from $158 billion to over $414 billion. Yet the system of budgetary checks and balances to administer and control expenditure of these funds is woefully antiquated. The nation's inability to manage its budget resourcefully and to achieve program goals is a serious national failing. The Congress must fulfill its responsibility to the citizens by confronting this problem and narrowing the gap between government performance and public expectation. The public has a right to expect its government to be wise and frugal with its tax dollars. The unmet promises of government programs reduces the credibility of Congress and the confidence of our citizens in government. I urge my colleagues to adopt remedial procedures such as those contained in the sunset bill to restore people's trust in their government and their faith in our nation's future.

The sunset bill which I am introducing today is familiar to most of my colleagues. During the last Congress, 58 senators endorsed the Government Economy and Spending Reform Act of 1976 in principle and agreed to co-sponsor the sunset legislation. I

urge my colleagues to consider this proposal and renew their pledge of support for improved fiscal management and program oversight in this Congress.

Let me review for a moment the case for comprehensive spending reform. Today we are speaking up for an important new principle for making Government more responsive to the public. The Government Economy and Spending Reform Act of 1977 offers Congress a procedure to review all spending by Government and to restore the confidence of our citizens that big Government is under control. The procedures in this bill for termination, review, and reordering of our Nation's programs and priorities will assure that no Government program is immune from review.

OPEN GOVERNMENT

Much attention was focused on "sunshine" reforms and "sunset" reforms during the last Congress. I have the distinction of being a principal sponsor of both of these reforms and can speak about the legislative intent for both. Despite the similarity of the popular names, each of these reforms was developed independently of one another.

However, together these reforms represent a major breakthrough in the conduct of Government business. The basis for these reforms is that all areas of Government conduct ought to be fully open to public scrutiny as a matter of right. The sunshine reform was a first effort to win acceptance of the principle that meetings in the departments, agencies, and the Senate itself should be open to the public as a general rule. Citizens have a basic right to know how their elected representatives and their agents in the departments conduct the public's business. We established the sunshine principle for the Federal government during the last Congress.

The sunset proposal would establish the principle that every program must be open for review at least once every 5 years and prove its worth before being continued. No dollar of spending should be sealed from public scrutiny. There should be no sacred cows when it comes to proving the effectiveness of public programs. The sunset bill is consistent in principle and philosophy with the effort to open up all Government business to the public. I think it is an idea which is long overdue and which deserves a trial.

FISCAL REFORMS

The sunset bill is also consistent with the reforms in fiscal management and the budget process which we developed with the Budget Reform and Impoundment Control Act of 1974. The budget process establishes a procedure to set national spending totals and to keep outlays for spending functions within that ceiling. However, the budget process provides no fiscal control over the parts of the budget.

Congress cannot maintain discipline over the budget as a whole unless it can exert control over spending among the separate parts of the budget. The heart of the sunset approach is to review spending or programs grouped together by function to assure that effective programs will continue and that ineffective programs are terminated.

S. 2 would change several of the assumptions about budget authority and the way Congress spends the tax dollars of our citizens. It would end the unspoken rule that money spent on a program in 1 year must be continued or increased in the following year. There would be no permanent authority for spending which places Government programs effectively beyond periodic review. The new assumption of program spending will be that budget authority will be renewed only when a program is shown to be worthwhile and cost effective.

NEED FOR SUNSET

In principle these new assumptions have broad appeal and have gained acceptance as a basic element of sound fiscal management. However, in practice, existing Congressional procedures provide no assurance of comprehensive review and evaluation. There is no process which gives Congress control over its spending practices and requires programs within the same spending function to be considered with other programs serving the same basic objectives. The sunset bill would establish such a procedure in Congress and assure comprehensive oversight of spending by budget function.

There is a risk with any process that the procedure will be too rigid or become a mere formalism. The termination and review cycle in S. 2925, however, provides a firm schedule for review yet retains flexibility for congressional committees in the performance of their oversight role. The sunset process establishes an action-forcing mechanism that demands periodic review, but permits committees to exercise considerable discretion in the execution of their oversight responsibilities.

Our Federal budget has grown so large that effective management is exceedingly difficult. We are making decisions daily in the Congress which have enormous impact on the national economy and the disposition of our Nation's resources. Unless we have a process which permits Congress to develop a national budget which is arrived at rationally and by choice, wasteful Federal spending will continue to burden the economy. Without a process to assure that all programs in one functional area are reviewed at the same time, the overlapping and duplicative programs will never be consolidated or weeded out.

Congress has no more important responsibility to the citizens of this country than to make Government responsive and effective. Programs which have missed their intended mark, outlived their usefulness, or failed to measure up to standards of effectiveness do not deserve to remain on the books. Congress has the responsibility to provide this oversight function to make sure Government is working.

It is evident that public confidence in the Federal Government is low. A recent Harris survey showed that a 58 to 8 percent majority of citizens believe the Federal Government is "more wasteful" than State governments. When the public demands better Government, Congress has a responsibility to examine its own role and to find a practical solution that will improve Government effectiveness. I believe the sunset bill is such a practical approach which will permit Congress to scrutinize Federal spending and answer to the American public for the performance of the Federal Government.

Public attitude surveys have shown a steadily declining confidence in Government among citizens. There is a widespread concern that Government over-promises, yet fails to deliver. And there is a general perception that Washington mismanages and spends irresponsibly. I would like to see Congress come to grips with the consequences of its free-spending attitude. I believe the public is demanding a major reexamination of Government programs, Government regulation, and bureaucratic growth. I believe the public favors a reorganization of existing bureaus, and departments if necessary to make Government more effective in conducting public affairs.

The Federal Government is larger than any major corporation, yet the process in Congress for determining how our resources are spent is dominated by an antiquated network of legislative committees with overlapping jurisdictions and uncoordinated agendas. It is exceedingly difficult for 100 Senators working full-time in 18 separate committees to coordinate and manage the Nation's overall budget. It is small wonder that our Federal budget is the source of outrage and concern to many citizens today.

There can be no greater priority during this Congress than to make the Federal Government more accountable and more effective in serving the American people.

CITIZENS COMMISSION TO AID REORGANIZATION PROCESS

I am pleased that S. 2 provides for a Citizen's Commission to reexamine government structure and administration, and sort out the basic responsibilities for different levels of government. This approach is modeled after the Hoover Commissions which conducted an independent and thorough review of the operation and effectiveness of Government in the 1950's. Citizen panels were organized to review all areas of Government and recommend changes. I know the effectiveness of this kind of approach first-hand because I was involved in a citizen review panel in Delaware.

The Citizen's Commission would have a broad charter to examine and review government operations. Panels of citizens would again be invited to participate in the evaluation and reorganization process. A government which is open and responsive to its citizens should seek to involve private citizens and invite their counsel and recommendations for government reorganization.

KEY CONCERNS

The sunset bill this year includes several technical revisions to make it a flexible instrument for Congressional oversight of federal programs.

The procedures for sunset review have been considerably simplified in Title II of S. 2 to allow committees broad discretion in setting appropriate standards for review of programs within their jurisdiction. A waiver provision has also been added to permit a one year grace period for review of programs which cannot be reconciled with the initial reauthorization cycle. The sunset bill has been tightened and revised this year to keep it as simple and direct as practicable.

Several concerns about what sunset will mean to the legislative process if the process is fully implemented were raised last year during the bill's consideration in the Government Operations Committee and during its joint referral to the Finance Committee and the Rules Committee.

WORKLOAD

First, much attention was focused on the added workload for Congress which a periodic and comprehensive review entails.

Under the sunset review procedures programs would have to be reviewed at least once every 5 years. This would also apply for programs which are now "permanent" and do not require periodic review or renewal for budget authority. It seems to me that Congress is shrinking from its basic oversight responsibilities unless we subject programs to review at least once every 5 years.

The concern about excessive workload is a tacit admission that Congress has passed more programs than it can reasonably check up on. If this is true, Congress has not acted responsibly to control how the citizen's tax dollars are spent. The evaluation process of this bill reserves considerable discretion to the committees in determining which programs will have highest priority for review. But, unless programs are scheduled for review, there is no assurance that wasteful spending will be discovered and terminated.

SUNSET REVIEW

There has also been special interest in the sunset review procedure in this bill. Many are confused by this. It does not impose zero-base budgeting for the annual budget cycle. The requirements which are enumerated in the bill will give a committee considerable discretion in determining the method of review and relative concentration for each program. At the same time no program would be immune from review within a 5-year

period and in no event will the review fail to provide some basis for evaluation of a program's effectiveness. This seems to be a reasonable compromise between an inflexible universal standard of review and no requirement for review at all.

The sunset bill is a reform proposal which will serve to focus our attention on the task of delivering effective services to the citizens we serve. Congress must find a reliable means to come to terms with this basic responsibility. I urge my colleagues to examine S. 2 and pledge their support in this historic effort.

Mr. GLENN. Mr. President, it gives me great pleasure to join Senator MUSKIE in introducing "The Sunset Act of 1977." This legislation requires a zero-base review and termination, unless reauthorized, of all Federal Government budget authorizations and tax expenditure provisions on a 5-year cycle. This legislation is essentially the same as S. 2925, the Government Economy and Spending Reform Act of 1976 which I coauthored with Senator MUSKIE during the 94th Congress.

I consider this Sunset bill to be extremely significant and necessary. It is designed to impose discipline and restraint on the proliferation of Federal programs, and to restore confidence in the ability of Congress to control Federal Government. I believe that this bill meets some of the demands of the American people concerning the way in which our Government operates. Our citizens are demanding an efficient, responsive, and competent government—one that delivers what it promises, one that makes its decisions humanely, clearly, and understandably, not one that merely grows unrestrained without any real direction. The Sunset Act of 1977 is an important step in meeting these demands.

I believe that the Sunset Act of 1977 has the potential for substantially upgrading the performance of government. The once ever-expanding pie of Federal expenditure has begun to reach its limits. Within that limitation, competition for program priority and preference will be severe. That competition must be rational, sane, and substantive. The Sunset Act of 1977 provides a framework for serious evaluation of our programs and our spending. Basically and fundamentally, the bill requires that congressional committees take a hard look at programs under their jurisdiction and report among other things:

First, whether they are, indeed, working as Congress intended;

Second, whether the program is duplicative of others; and

Third, the impact the program has on the national economy.

In other words, we are asking that congressional committees assume their oversight function with increased vigor and vitality and with more quantitative stringency. With the exception of programs to which individuals make payments to the Federal Government in expectation of later compensation—social security, railroad retirement, civil service retirement, medicare, et cetera—all Government programs would have to be reauthorized after stringent review every 5 years.

An amendment which I offered to S. 2925, the Sunset bill which Senator MUSKIE and I introduced in the 94th Congress, which was approved unanimously by the Senate Government Operations Committee and incorporated into that bill as title V, and which has been retained as title IV of the present bill, would apply this same zero-base review and "sunset" mechanism to what are commonly known as "tax expenditures"—tax incentives. To my mind this is essential if we are to effectively achieve the objectives of the bill, for example to get a firm hold on Federal spending.

It would seem to follow that if the termination and reauthorization process of the bill is confined to spending programs alone, we will leave a substantial portion of our job undone. The Congress recognized this basic problem in 1974 by including in the Congressional Budget Act the tax, as well as the spending side of the equation.

My proposal would require that each Federal tax expenditure be investigated systematically to determine whether it has been effective or whether it is being used for purposes not originally intended by Congress. It must be emphasized that the review procedure is totally neutral. All that is called for is a zero-base review; title IV does not suggest that the tax incentives under consideration should be terminated. In fact, they could be increased if found to be working well for the purpose intended.

Today there are scores of tax incentives built into the Federal income tax system. All were created with a specific goal in mind. Some were intended to stimulate or move the economy in certain directions; others were motivated by social concerns and were intended to encourage individuals and businesses to move toward various national goals. Yet, whatever their original purposes, the fact remains that some of these tax incentives have grown to the point where they are tax loopholes, going far beyond their original purposes and eagerly sought as a means of avoiding taxes. The result has been that the revenue loss due to these tax expenditures has mounted each year to the point where, in fiscal year 1977, it is estimated that they may approximate the amount our Nation spends for defense.

This upward trend in revenue loss gives no indication of abating. It is certainly disturbing that there are no clear limitations on how much each tax expenditure provision could ultimately cost the Treasury. Presently there is insufficient analysis of each tax expenditure to determine whether some have grown out of control and should be eliminated because the orginal purposes have been obscured. Efforts toward tax reform reflect how difficult it is to revoke or even modify tax expenditure provisions once they take effect and become entrenched. It is my hope that this proposal will greatly facilitate such revisions of the tax code whenever circumstances warrant them.

Due to the hard work and diligent efforts of Senator MUSKIE, the sunset bill which we introduced last year attracted considerable attention and support both outside and within the Congress. The bill was reported out unanimously from Senate Government Operations Committee but, unfortunately was not considered by the full Senate because of the press of business at the end of the session. I am hopeful that these efforts have laid the groundwork for full enactment in the 95th Congress.

It is also my fervent hope that President-elect Carter will lend his full support in favor of this legislation. In my discussions with the President-elect I have been impressed with his earnest desire to reorganize the Federal Government. He recognized that the sunset concept can be an effective means of gaining control of the Government for that purpose, and, during the Presidential election campaign, specifically endorsed a strong sunset law covering both Federal programs and tax expenditures. I am eagerly looking forward to working closely with the President-elect on this extremely important issue.

Mr. BENTSEN. Mr. President, during the 1976 political campaign, both parties seemed to recognize that the people have become disenchanted with the operation of their Federal Government. It is now up to those of us who have been given high public responsibility to build a better, not a bigger, Federal Government. It is time for the Federal Government to more effectively and efficiently carry out its mandate to serve the American people.

In the past, the Federal Government's efforts to solve pressing social problems have frequently resulted in the creation of new programs rather than effective solutions. These new programs have generated their own bureaucracy. The result has been the proliferation of duplicating and overlapping programs. The executive branch of the Federal Government now includes 11 cabinet departments, 59 independent agencies, 1,240 advisory boards, committees, councils, and commissions, 1,026 aid programs, almost 400 programs dealing with higher education, 228 health programs, 158 income security programs, and 83 housing programs. This bureaucratic growth has generated a concomitant increase in the Federal Government's gargantuan appetite for more and more information. By some accounts, paper generated in 1 year by the Washington bureaucracy would fill the astrodome 51 times, and the Government's records would fill 11 Washington Monuments.

Federal paperwork now costs the American people over $40 billion a year. The Federal Government now spends $1 billion annually just explaining to the public how to complete its forms.

Swift and sure execution of outmoded and ineffective programs is the way to end this extravagance. That is why I am cosponsoring the Sunset Act which my distinguished colleague, Senator MUSKIE, introduces today. This bill would end the unspoken rule that money spent for a program this year must be continued next year. In fact, the basic premise of the Sunset bill is that no new budget authority is necessary until a program is

proven worthwhile. The bill sets up a schedule under which Government agencies would have to come before Congress for review and possible termination every 5 years. This is the application of zero-base budgeting—a reasonable budgeting tool that is effective in business.

Enactment of this legislation will finally do something about bureaucratic boon-doggles and redtape. In the words of Mark Twain:

Thunder is good, thunder is impressive, but it is lightning that works.

It is time for the Federal bureaucracy to be given a long overdue jolt.

I do have one reservation about S. 2. The bill requires the periodic review of Federal "tax expenditures." While systematic review of all tax incentives in the Federal tax code is necessary to make sure they are achieving their intended purpose, I strongly object to the term "tax expenditures." This term implies that all income earned by American taxpayers somehow belongs to the Federal Government. Therefore, it is a "tax expenditure" if the Federal tax code allows these taxpayers to keep part of their own income. I object to this term and more importantly, I reject the philosophy which it implies.

SUNSETTING OUTDATED GOVERNMENT BUREAUCRACIES

Mr. GOLDWATER. Mr. President, it is my pleasure today to join once again in sponsoring legislation which will offer the American public a way to send outdated Government bureaucracies riding into the sunset.

The idea of this legislation is simple. The whole purpose is to end an agency or program which is no longer needed. If a particular program, or even an entire agency or department, is wasting the taxpayer's money, or has done more harm to the public good than help, that program or that agency will come to an end without expecting a perpetual renewal.

The basic notion is as old as the original Hoover Commission. And, as surprising as it may seem to some people, two former Supreme Court Justices noted for their liberal attitudes, Justices Black and Douglas, recommended some years ago that new regulatory agencies and new government programs should be dismantled after a fixed period of time unless their need was clearly demonstrated. With such support coming from spokesmen of all political and philosophical shadings, this proposal must have merit.

Unfortunately, the idea itself faded away until 1969 when a young Congressman, and now our colleague, Senator ROTH of Delaware, published the first overall catalog of Government assistance programs. It took him 2 years to find out that there were over 1,300 Federal programs, many of which were unknown, even by the people they were supposed to help. That study was the steppingstone for the introduction of legislation in 1973 by Senator HOWARD BAKER and 13 other Senators, including myself. The objective of our proposal was to terminate all Federal spending programs every 3 years, unless a powerful reason existed for keeping any of them. Early last year, the chairman of the Subcommittee on Intergovernmental Relations, Senator MUSKIE, introduced a similar reform proposal cosponsored by Senator ROTH, myself, and 56 other Senators, and now a revised version of that bill is being introduced in the 95th Congress.

Mr. President, although some technical changes have been made in the bill, its basic features remain intact. Most importantly, the sunset features have not been narrowed at all. In fact, my decision to join again as a sponsor of this legislation is based upon the personal assurance of the Senator from Maine (Mr. MUSKIE) that the commitment to sunset means what it says.

Upon reading the Government Operations Committee report on the sunset bill in the last session of Congress, I was concerned at first that certain statements contained in the report might infer that sunsetted agencies would go on and on with merely their enforcement power being temporarily suspended. However, I have been assured in an exchange of letters with Senator MUSKIE that this was not the intent of the amended bill. In fact, in his reply to my inquiry about this, Senator MUSKIE stated:

The commitment to a periodic termination and review of federal programs and agencies remains as firm today as when we first discussed the bill some months ago.

It is technically true, as the committee report describes, that an agency "would remain in existence" if Congress decides not to extend its basic authority. Senator MUSKIE's letter explains:

Substantive laws which relate to the operation of government agencies would technically remain on the books.

This is because sunset is linked to authorizations. According to Senator MUSKIE's reply, and I agree, the authorization process "offers an effective means for terminating a program or agency without specifically repealing every law that relates to its operation."

Senator MUSKIE's letter continues:

But this does not mean . . . that all officials and employees of a sunsetted agency would remain on its payroll. Quite the opposite; lacking authorization and appropriations, such an agency could not continue in operation.

Mr. President, I certainly agree that using the authorization process and through it the appropriation of funds, we can compel a review of all Government bodies and programs without repealing every provision of law relating to those agencies or programs. I am satisfied that should Congress not act to renew the authorization of funds for an agency it will, for all practical purposes, come to an end. Nor will the officials and employees stay on the payroll, since there will be no authority for funds to pay them.

A second matter that had given me trouble in the committee-amended bill has also been cleared up. I had been disturbed at the description given in the committee report of last August that during any period when an agency had been sunsetted, all its previously issued rules would remain in effect. It occurred to me that if a person violated a rule while the agency itself was put in some sort of legislative "limbo" the person may be subject to prosecution whenever Congress restored the agency's authority. Since no one knows when or if, Congress would decide to restore the authority of an agency whose powers had been sunsetted, the particular regulatory field affected would be placed in total confusion. As the bill stood, it seemed possible that an agency would not be able to make changes in its rules which may be demanded by equity due to new circumstances, but a private citizen or business who violated one of the agency's prior rules could be prosecuted for that conduct if funding for the agency were reenacted.

This interpretation, if it occurred, would have created the worst of all possible worlds for citizens affected by governmental regulation. Moreover, by possibly allowing the prosecution of someone later for committing a violation at a time when an agency's powers were under suspension, it may have run afoul of the prohibition against ex-post facto laws.

Now, I am delighted to know that this interpretation is most certainly not what the committee intended. Senator MUSKIE's letter of October 22 makes it clear that the real problem which the committee was addressing was the situation where there is only a temporary failure of Congress to act on renewing an agency's charter. Senator MUSKIE states that the committee was concerned that "an agency's rules and regulations should not have to be readopted upon a reauthorization measure becoming law" if there is only a temporary lapse of an authorization.

The bill has now been changed to remove this problem. In Senator MUSKIE's words, as set forth in his letter to me:

It is not at all our intention to impose ex-post facto conditions on citizens affected by government regulations or to confuse them about what they may or may not do under law.

The bill corrects this problem by entirely removing the provision concerned.

Mr. President, the third and final problem that I raised with Senator MUSKIE is the question of whether or not the procedures required by the sunset bill might create more paperwork and need for staff to comply with its reporting requirements than it saves by its other provisions. My question arose out of uncertainty as to how many programs would be identified for review and reporting by Government agencies and congressional committees.

Once again, I am satisfied with the answer which Senator MUSKIE has provided. In the first place, the preliminary estimates of the number of different programs for which a congressional committee would be responsible were too high. The General Accounting Office has been preparing a list of Federal programs by functional budget category which is running far smaller than the "worst case" estimates had first assumed. Moreover, amendments have been developed which would give the authorizing com-

mittee a greater role in the sunset process.

Mr. President, with the assurance I have been given by the primary sponsors of the bill and in view of their willingness to make remedial changes, wherever reasonable suggestions are made, I am pleased to continue as a cosponsor of the sunset proposal and to urge its prompt adoption. The need for this kind of law is obvious. Government spending has grown too burdensome as well as becoming fiscally irresponsible. As an example of the burden upon the U.S. taxpayer, I might mention that the number of Federal domestic programs has multiplied 20 times in the last dozen years. And right now, there are at least 44 independent agencies, 11 cabinet departments and 1,240 other units of the Federal Government in existence.

With this unchecked growth, it is urgent that we attempt a new approach in order to get a handle on bureaucracy. We in Congress have simply not been as responsible as we should have. We have not paid sufficient attention to how well the programs that are already on the books have been working and we have been too concerned with initiating new programs as fast as every special interest group can think one up.

As might be expected, the entrenched bureaucrats are resisting any change. These people have little or nothing to gain by reform or innovation. But the problem of an enormous, uncaring and insulated bureaucracy is one of the major concerns of the American public. I only hope that this concern by the ordinary citizen is strong enough so that it will finally force enough office-holders to take drastic action to clear the Government of dead-weight and abuses, to rid ourselves of the notion that the bigger government is, the better it is. We must force these agencies to come in and prove they have been worth their salt and if they cannot do it, then let us get rid of them. Now, what is wrong with that?

By Mr. KENNEDY:

S. 3. A bill to create a national system of health security; jointly, by unanimous consent, to the Committee on Finance and the Committee on Labor and Public Welfare.

S. 3

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a bill, introduced by Senator KENNEDY, relative to creating a national system of health security, be jointly referred to the Committees on Finance and Labor and Public Welfare.

By Mr. DOLE (for himself, Mr. RIBICOFF, Mr. MCCLURE, Mr. BROOKE, Mr. NUNN, Mr. RANDOLPH, Mr. SCOTT, Mr. WILLIAMS, and Mr. EAGLETON):

S. 4. A bill to provide that the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay shall only apply to taxable years beginning after December 31, 1976; to the Committee on Finance.

Mr. DOLE. Mr. President, today, on behalf of the Senator from Connecticut (Mr. RIBICOFF), the Senator from Idaho (Mr. MCCLURE), the Senator from Massachusetts (Mr. BROOKE), the Senator from Georgia (Mr. NUNN), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Virginia (Mr. SCOTT), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Missouri (Mr. EAGLETON), I am introducing legislation which makes a simple but important change in the Tax Reform Act of 1976 by delaying the effective date of one of its provisions.

Before October 4, 1976, when the Tax Reform Act became law, an employee who retired on disability or was off the job for an extended period due to ill health could exclude from Federal taxation up to $100 per week or $5,200 per year in sick pay benefits. Sick pay is the designation for the money that a worker who has been the victim of illness or serious personal injury receives under a wage continuation plan. The tax reform bill repealed this exclusion retroactively to January 1, 1976, except for persons who are permanently and totally disabled.

As a result of the retroactivity, many taxpayers who received excludable sick pay during 1976 are now faced with greatly increased tax liability on April 15. Most of our Nation's retired and disabled workers—who live on fixed incomes which are constantly being eroded by inflation—simply do not have the resources to pay the Government hundreds of dollars on such short notice. And I do not think they should have to.

But unless corrective legislation is passed, tens of thousands of retirees will be forced to make a large lump sum tax payment on April 15. For example, a retired couple with a taxable income of $8,000, including the $5,200 in sick pay, could have their tax bill increased by over $550.

The bill I am introducing today will give these retired and disabled citizens an opportunity to adjust to the change in the tax law. S. 4 simply delays the change in the taxation of sick pay until January 1, 1977. No substantive alteration is made in the tax reform act. The only change is the elimination of the unfair retroactive provision.

Excluding sick pay payments from income when an employee is absent from work while taxing the same payments if termed as wages while he is at work may not be justified. That issue is not addressed by this simple bill. But I agree with the hundreds of affected persons who have contacted my office since I announced my intention to offer this legislation that it is unfair to completely alter a longstanding tax policy without any warning.

Mr. President, a recent article in the Washington Star titled "Tax 'Reform' Bill Is Going To Cost Thousands of Disabled Retirees" shows the effect on and the feelings of many retired Federal employees and other disabled workers. I ask unanimous consent that this article be inserted in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TAX "REFORM" BILL IS GOING TO COST THOUSANDS OF DISABLED RETIREES

(By John Cramer)

Thousands of federal employes retired on disability face what amounts to a retroactive tax increase by reason of the tax "reform" bill enacted by Congress last October.

This is the story:

The bill sharply restricts the so-called sick pay exclusion formerly available to the disabled.

Under former law, they could exclude from federal income taxation up to $100 per week—$5,200 per year—of pension income.

And since most states follow federal rules on such things many could exclude the same amounts from state taxation, too.

The new law, however, makes the exclusion available only to those totally and permanently incapacitated for gainful employment.

It, thus, will deny the tax break to a great many—probably the majority—of those now on Civil Service Commission disability retirement rolls.

That's because employes don't have to be totally and permanently disabled in order to qualify for CSC disability retirement. By rule and law, they must be disabled only for the duties of their own jobs.

And some—the official estimate as reported in a recent piece here was "scores"—actually have returned to government as reemployed annuitants.

The new law also terminates the sick pay exclusion for all disabled at age 65. Previously, it was 70 for federal disabled.

But its real joker lies in the fact that its tight new rule on eligibility for the sick pay exclusion applies to all on the disability rolls as of last Jan. 1.

Thus, in all effect, it creates a retroactive tax liability for them.

Robert Handler, Rockville, himself a disabled retiree, explained the impact in a recent excellent letter to the AFL–CIO American Federation of Government Employes.

He wrote in part:

"I have no quarrel with the premise promulgated by the tax bill writers who felt that the sick pay exclusion was neither feasible or sensible. My quarrel lies with the arbitrary and capricious manner by which the exclusion limitation was made effective at the beginning of THIS YEAR, resulting in what only can be classified as retroactive taxation.

"To maintain some vestige of fairness, it appears that the elimination of this provision should have been made effective on either the effective date of passage of the bill or on Jan. 1, 1977.

"Since the sick pay exclusion was in effect at the beginning of 1976, it was logical and indeed necessary to predicate your income (and your spouse's if applicable) on this provision and adjust your withholding amounts accordingly. . . .

"But by making this portion of the bill retroactive to the first of the current year, the government has made thousands of retirees liable for a heavy additional tax which will have to be paid in a lump sum prior to April 15, 1977.

"In my own case, the bill works an extreme hardship in that I find myself in a position of owing hundreds of dollars because of having to pay a tax on the $5,200 which had previously been exempt from taxation."

Handler then went on to suggest the possibility of a class action suit seeking to invalidate the retroactive taxes as unconstitutional.

And he might just have an excellent idea there!

Mr. DOLE. I believe that Congress will agree that whatever the merits of the re-

peal of the sick pay exclusion, the injured, disabled, and retired workers of America deserve better treatment from their Government than they have received under the Tax Reform Act. I sincerely hope that every Member of this body will assist me in gaining rapid consideration and passage of this bill. If thousands of retired Americans are to be relieved of the unfair imposition of this retroactive tax, we must act soon.

Mr. President, I ask unanimous consent that the full text of S. 4 be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 4

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That—

(a) section 505 of the Tax Reform Act of 1976 (relating to changes in exclusions for sick pay and certain military, etc., disability pensions; certain disability income) is amended by adding at the end thereof the following new subsection:

"(f) EFFECTIVE DATE FOR SUBSECTION (a).— The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1976."

(b) Subsection (c) of section 505 of such Act is amended by striking out "January 1, 1976" each place it appears and inserting in lieu thereof "January 1, 1977."

(c) Subsection (d) of Section 505 of such Act is amended—

(1) by striking out "January 1, 1976" and inserting in lieu thereof "January 1, 1977"; and

(2) by striking out "December 31, 1975" and inserting in lieu thereof "December 31, 1976".

SEC. 2. The amendments made by the first section of this Act shall take effect on October 4, 1976.

Mr. RIBICOFF. Mr. President, I am pleased to join with Senator DOLE in cosponsoring S. 4, a bill which will alter the effective date of the "sick pay exclusion" changes made by the Tax Reform Act of 1976.

Unless S. 4 is enacted promptly, thousands of retired employees will not only be required to pay more taxes on April 15, but also they will be exposed to possible penalties.

While I agree with the basic decision Congress reached in repealing the "sick pay exclusion," I disagree with the retroactive application of this provision of the Tax Reform Act.

By making the new rules effective retroactive to January 1, 1976, the Tax Reform Act signed into law October 4, 1976, imposes an additional "lump sum" tax liability on retired employees they would have had no reason to anticipate paying.

Even more disturbing is the "Catch 22" feature of the retroactive effective date. Those retirees required to file an estimated income tax form each April and pay the tax quarterly are now technically in violation of the law. Without the change recommended in S. 4 these retirees could be subject to penalties of up to 25 percent of the tax they failed to pay.

Fairness and equity requires early enactment of S. 4.

My Mr. MCINTYRE:

S. 5. A bill to amend the Internal Revenue Code of 1954 and the Social Security Act to provide a comprehensive program of health care by strengthening the organization and delivery of health care nationwide and by making comprehensive health care insurance (including coverage for medical catastrophes) available to all Americans, and for other purposes; to the Committee on Finance.

NATIONAL HEALTH CARE ACT OF 1977

Mr. MCINTYRE. Mr. President, today I am introducing the National Health Care Act of 1977, legislation that I believe can provide comprehensive health insurance for all Americans without preempting other, vital national priorities.

I believe the goal of guaranteeing all Americans access to comprehensive health insurance, including preventive care and protection against catastrophic illness can be realized if we utilize and strengthen the private insurance sector through Federal standards, and move on a phased-in basis. In contrast, a national health insurance plan financed entirely by Federal tax dollars could jeopardize our ability to deal with other urgent problems.

The need has been articulated time and time again and we have come to a point where we must focus on what is best for the people and best for the Government. I believe that with this piece of legislation we can prove to the American people that we intend to keep our promise of comprehensive health care for every individual regardless of income or physical condition, while at the same time continuing our pledge to be fiscally responsible.

Initially, we must enact Federal minimum standards for comprehensive health insurance benefits, including and encouraging ambulatory care and preventive care. Further, this benefit package should include dental care, vision care, and mental health benefits.

Those least able to obtain these benefits should be our first priority. Benefits now available to the poor through medicaid vary widely from State to State. Through Federal tax dollars from general revenues, we should guarantee this uniform benefit package to all Americans who cannot provide for themselves.

At the same time, we should now require that all employee health insurance plans meet these same benefit standards. These plans should also have to meet other Federal standards such as continuation of coverage in case of layoff and limitations on the contributions required from employees.

Employers should be required to meet these standards or lose their Federal income tax deduction for their cost. In this first stage, however, employers who do not have a plan should not be required to provide one. This follows the pattern of pension reform in the Employee Retirement Income Security Act of 1974 and the tax treatment of pensions under the Internal Revenue Code, and avoids for the present the cost and complexities of subsidies to marginal employers who might be put out of business by the added cost. An employer is not compelled to provide a plan, but if he does it must meet Federal standards. Requiring all employers to have a plan can, and should, be considered as a later phase.

For the self-employed, and those whose employers do not provide a plan, individuals should be encouraged to buy, and insurers to sell, individual plans which are fully tax deductible to the individual if they meet the same applicable Federal standards.

Insurers should be required to cover all individuals who want coverage, regardless of their health, without Government subsidy and at a reasonable rate. All insurers should be required to participate in the losses incurred in covering high-risk individuals in each State as the price of doing business in that State, as is currently done in Connecticut.

This is what the National Health Care Act of 1977 does.

Furthermore, a national health insurance bill must place a strong emphasis on ambulatory and preventive care.

The National Health Care Act does that.

A national health insurance bill must build in strong and effective measures to control rapidly rising medical costs.

The National Health Care Act does that.

A national health insurance bill must recognize the breadth and diversity of this great land.

It must build into the system equity and fairness for those living in rural areas as well as the city dwellers.

The National Health Care Act does that.

A national health insurance bill should encourage experimentation and innovation in the delivery of care.

The National Health Care Act does that.

A plan such as this, incorporating cost control features such as prospective rate review for hospitals, would add only $7.7 billion in Federal Government health expenditures by 1980, according to an HEW cost study done last September. That same study, incidentally, concluded that a totally tax-financed national health insurance plan could require as much as $130 billion in new Federal taxes over the same period.

In weighing these contrasting approaches to national health insurance, it is also well to remember that 9 out of 10 Americans now have some form of private health insurance protection. Most of the balance have some form of Government protection, such as medicaid for the poor, the military and their dependents, and VA health programs.

One hundred and fifty million Americans already have protection against catastrophic illness by major medical plans, high benefit basic plans, or health maintenance organizations—HMOs—and that number is growing rapidly, with many insurers selling unlimited medical benefits with annual limits on out-of-pocket expenses, typically $1,000 and $2,000. Major medical policies available now cover not only hospital care but outpatient care, office visits, prescription drugs,

preventive care, dental care, and vision care.

An ancillary consideration of no small consequence is the fact that the private health insurance industry now provides jobs for half a million Americans, all of whom pay taxes to our Federal, State, and local governments.

But despite the differing viewpoints on national health insurance, I hope my colleagues agree with me that the clear obligation of the Congress to our people is to pass a program that is both generous in its benefits and rational in its costs and administration.

If there are differences as to benefits required, eligibility standards and income definition of the needy, let us work together on these differences.

I welcome your comments and suggestions, as I welcome your support.

But let us move and move quickly, let us reconcile differences and agree to compromise where we must, and let us thus bring forth from this Congress a plan to insure the health care and health costs of every American in every part of the country.

It is my sincere hope, Mr. President, that a strong coalition of all of those who agree that we must have national health insurance will seek quick consensus on the vehicle itself. The argument on need has been made and made well. The debate now must focus on precisely how we achieve our goal.

There is a job to be done, Mr. President. I urge my colleagues to join with me to do it.

Mr. President, I ask unanimous consent that an analysis of the bill be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

THE NATIONAL HEALTH CARE ACT OF 1977

The National Health Care Act has five Titles.

Title I contains Findings and Declaration of Purpose.

Title II contains provisions to strengthen the health planning and health resource development process. It provides, among other things, for the establishment of health data consortiums, strengthens certificate-of-need programs, provides funds for the closing of surplus health facilities, and increased funding for health systems agencies.

Title III contains provisions to encourage comprehensive ambulatory health care centers. This encouragement comes through the awarding of grants and loans for the construction and modernization of ambulatory health care centers, which concentrate on ambulatory services and which meet certain other criteria. It also provides for the training of personnel for comprehensive ambulatory health care centers and professional standards review organizations.

Title IV establishes a Health Policy Board in the executive branch. The board will be made up of three members, appointed by the President with the advice and consent of the Senate. The board will be authorized to employ such staff as necessary to carry out its functions. Among those functions is the preparation for an annual health report of the President. The Title outlines the additional functions of the board as well as the issues to be examined in the President's report.

Title V. Provisions to make comprehensive health care insurance available to all. This title outlines a plan for the delivery of comprehensive health care insurance.

The bill sets minimum standards to be met by health insurance policies and provides incentives for compliance with these standards. There are three types of plans: those purchased by Employers and Employees, those purchased by individuals, and those offered through a State plan. Minimum standards for all these plans are the same and are phased in in two stages as follows:

PHASE I—1979

1. Unlimited hospital in and out-patient services for physical care.
2. All professional services for the diagnosis or treatment of injuries, illnesses or conditions other than dental and mental, by or at the direction of a physician.
3. The first 20 out-patient mental health visits.
4. 90 days hospitalization for mental conditions.
5. Drugs and contraceptive devices that require a prescription.
6. 180 days of skilled nursing care.
7. 270 days of home health care.
8. Use of radium or radioactive materials, ogygen, anesthetics, prostheses, and medical equipment.
9. Oral surgery on impacted teeth, and for a tooth root.
10. Diagnostic x-ray and laboratory tests performed other than while an inpatient in a hospital or skilled nursing facility.
11. Well child care, including immunizations for children under age five.
12. One oral examination per year, including prophylaxis, dental x-rays, topical application of fluoride and insertion of space maintainers, by a dentist or, at his direction, a dental hygienist, for children under age thirteen.
13. One eye refraction per year for children under age 13.
14. One pre-natal examination by a physician during each trimester of a pregnancy.

PHASE II—1987

15. Dental care for fillings and extractions.
16. Other dental services and prostheses, except orthodontia.
17. Services of a Physical Therapist.
18. Services of a Speech Therapist.
19. One eye refraction every three years.
20. Eye glasses, one per year for under 19, one every three years for over 19.
21. One hearing exam every three years.
22. Hearing aids, one per three years under 19, one per lifetime for over 19.
23. One physical every 5 years for individuals 5 years old or older.
24. Counseling on family planning and fitting of contraceptive device.
25. One PAP smear every 2 years for women 19 and over.

LIMITATION ON DEDUCTIBLES AND COPAYMENTS

The maximum allowable deductible is $100 and the maximum co-payment is 20 percent with the exception of items 3 and 16 in which the maximum is 50 percent.

To encourage out-patient treatment and diagnosis, a separate hospital deductible equal to the hospital's first day room and board charge is allowed.

Conversely, no copayments or deductibles are allowed with regard to out-patient diagnostic x-rays and tests, well child care, oral and vision exams for children, and pre-natal care. A qualified plan must pay 100 percent of these benefits.

There is a limit of $1,000 on total co-payment and deductible charges per family in any benefit year. All these payments (deductible, co-payment, and total) are adjusted according to ability to pay under the state plan.

QUALIFIED EMPLOYEE HEALTH CARE PLANS

This plan would be purchased by the employer for the employees and their families. The maximum allowable employee contribution would be 50 percent of the cost of the plan, with a special income related limit on contributions by low income employees.

Provided that the plan at least met minimum standards, it would be deemed a Qualified Employee Plan (QEP), and the employee's share, if any, would be an allowable tax deduction.

Any employer whose health benefit plan does not meet the minimum standards in 1979 would lose 50 percent of his allowable income tax deduction attributable to his plan. After 1980 his deduction would be totally eliminated unless the minimum standards were met.

Further the plan must include the following:

Provisions to continue coverage of an employee who is laid off or terminated to the end of the second calendar month following the calendar month in which employment terminated. At the end of that period, the individual could be enrolled in the State plan, thus providing continuing health care coverage while unemployed.

Provisions to continue coverage of the dependents of an employee who dies to the end of the second calendar month following the calendar month in which death occurred.

Provisions to continue coverage a minimum of 30 months for an employee absent due to illness or injury.

Provisions to allow dependent children to be covered beyond the child's 19th birthday.

Provisions must be allowed for continuity of coverage during employment changes.

QUALIFIED INDIVIDUAL HEALTH CARE PLANS

A 100 percent income tax deduction would be allowed on any plan purchased by an individual from a third party carrier or health maintenance organization which meets the minimum standards. This would take effect upon passage of the Act which changes the current IRS deduction provision.

STATE HEALTH CARE PLANS FOR POOR AND NEAR POOR

Benefits

In order to be a qualified plan, the Qualified State Health Care Plan would have to provide exactly the same benefits as the Qualified Employee Health Care Plan and the Qualified Individual Health Care Plan. Deductibles and co-payments would be restricted and scaled to income.

Eligibility

Any individual or family (1) on welfare or (2) who has income of less than $5,000 as an individual, $7,500 as a family of two, or $10,000 as a family of three or more and is not eligible to join a qualified employee plan is eligible to join the State plan on a subsidized basis. The poor would pay no premium; others would pay a partial premium scaled to income. Laid-off employees who meet the income test for two consecutive months would also be eligible.

Administration

The plan would be administered by an administering carrier designated by the State and approved by the Secretary of HEW. The premium rates for the plan would be set by the carrier and reviewed by the State Insurance Commissioner and the Chief Actuary of the Social Security Administration.

Funding

The plan would be financed by the State, less the partial premiums paid by the insureds. The State, in return for having a qualified plan, would be reimbursed by the Federal government for from 70 to 90 percent of its cost, depending on the income level of the state. After July 1, 1979, no state would

be reimbursed under Medicaid for any service included in health care benefits.

Cost control

All payments for health care under Federally-supported programs would be tied to prevailing fees and to peer review of those professional services that fall outside of professionally established guidelines, assuring appropriateness of treatment, quality of care, and reasonableness of physician fees. Review and approval would come from an appropriate health services review organization or, in its absence, by the organizations administering Federal programs.

Benefits could be assigned physicians only if the physician agrees to accept assignments all of the time for all of his patients. Such physicians would be known as Participating Physicians, and their names would be made known to the public.

Payment to hospitals or other health care institutions under Federal programs would be subject to approval by a State Healthcare Institutions Cost Commission appointed by the Governor. All such institutions would be required to:

(a) Have an active review committee to check appropriateness and quality of services.

(b) Utilize a standard system of accounts and cost finding.

(c) Use "prospective approved charges" for all patients. Such a system would involve review and approval in advance by the State Commission of the proposed charges, assuring charges reasonably related to the cost of effectively providing necessary services.

BENEFITS FOR THE PREVIOUSLY UNINSURABLE

The risk for those previously uninsurable for health reasons would be borne entirely by the health insurance industry.

HEALTH CARE PROGRAM COST

A cost study done for HEW by Gordon Trapnell Associates in September 1976 estimates that passage of the National Health Care Act would result in increased Federal expenditures of $7.7 billion by 1980.

By Mr. METCALF (for himself, Mr. JACKSON, Mr. HASKELL, Mr. BUMPERS and Mr. BAKER):

S. 7. A bill to provide for the cooperation between the Secretary of the Interior and the States with respect to the regulation of surface mining operations, and the acquisition and reclamation of abandoned mines, and for other purposes; to the Committee on Interior and Insular Affairs.

SURFACE MINING CONTROL AND RECLAMATION ACT OF 1977

Mr. METCALF. Mr. President, I was greatly heartened by President-elect Jimmy Carter when, during the course of his final television debate with President Ford, he stated unequivocally that he would have signed the strip mine bill which Congress twice sent to the White House, only to see it twice vetoed. As far as I am concerned, this statement by our new President was one of the high points of the whole election campaign. It showed clearly that Jimmy Carter is a man who will not kow-tow to the economic moguls when it comes to preserving our environment and protecting the rights of the ordinary people of this Nation.

It would serve no useful purpose for me to recapitulate the sorry story of how the Ford administration joined forces with powerful and reactionary corporate interests in the mining and utility industries to defeat the strip mine bill. I will spare you a review of the long, painful process by which this bill was fine-tuned. It is in fact designed to meet the need for preservation of our land and water resources, for stabilization of our long-neglected coal industry, and for satisfaction of a national determination that our enormous coal deposits be exploited expeditiously so as to fill the energy gap caused by our declining domestic oil and natural gas reserves.

With a new President, who fully appreciates the validity of the approach adopted by Congress, it is now time to get a law on the books so that we can establish a rational and uniform system of reclamation out on the mountains and plains where every week thousands of acres of land are being strip mined, often with disastrous results.

Mr. President, upon completion of the reorganization of the Senate, hearings will be held at an early date on this vital bill. Our new President should have the opportunity to sign this legislation during his first year in office.

I am, therefore, introducing today the Surface Mining Control and Reclamation Act of 1977. This bill is substantially the same as the measure vetoed by President Ford in 1975. The principal differences are as follows:

First. State mining and mineral resources institutes. Old title III has been deleted and in section 102(1) reference to research and training purposes has been eliminated accordingly. The broad scope of the proposed institutes would be better encompassed within a separate bill. I plan to introduce such a bill soon.

Second. Designation of lands unsuitable for noncoal mining. Old title VI has also been deleted. The problems it addressed are outside the scope of a surface coal mining bill.

Third. Reclamation fee. The reclamation fee in section 301(d) has been made to apply only to Federal coal in order to avoid any question as to whether the constitutional constraint on origination by the Senate of bills providing for the raising of revenues would be applicable.

Fourth. Orphan lands program. Various changes in the orphan lands program in title III have been incorporated to enable State regulatory authorities to participate more fully in the reclamation of orphaned lands. Also, reference to the Interior Secretary's land development authorization in section 305 has been deleted as being unnecessary. Many of these changes were adopted by the House Interior Committee during the last Congress.

Fifth. Special treatment. The special provisions for anthracite coal mines in old section 529 and for Alaska coal mines in old section 708 have been deleted as unnecessary.

Sixth. Surface owner consent. The provisions granting the owner of private land overlying Federal coal a veto power over surface mining (old section 714) have been deleted. They have been replaced by the provisions of the original Senate bill (S. 425, 93d Congress), the so-called Mansfield amendment, which impose a ban on the surface mining of Federal coal underlying privately owned surface. This will protect ranchers and farmers without giving them control over public resources.

Seventh. State regulation of surface mining of Federal coal. States with federally approved surface mining programs would be permitted to regulate all coal mining in the State, including operations on Federal lands. (Section 423(c).) If a State decides to regulate mining of Federal coal, it would receive additional funds in an amount equal to the savings to the Federal Government. I believe this new approach will simplify development of Western coal. At the same time, it will protect the Federal Government's interest by requiring reclamation standards in a Federal law and providing continuing Federal oversight of each State's enforcement of these standards.

Eighth. Federal coal exploration. The provisions for coal exploration permits on Federal lands have been deleted, because similar provisions were enacted into law last year as part of the Federal Coal Leasing Amendments Act.

Mr. HASKELL. Mr. President, I join Senator METCALF in sponsoring the Surface Mining Control and Reclamation Act which he has introduced today.

The Congress has been working on this much-needed legislation for over 4 years. During that time, it has passed both Houses twice by overwhelming margins only to be vetoed by the President. On the second such occasion, the House came within three votes of overriding the veto.

Federal surface mining legislation is long overdue. It has been supported by almost two-thirds of the legislature almost since its inception. Now that we have a firm commitment from President-elect Carter to sign this bill into law, we should waste no time giving him that opportunity. Federal surface mining standards will not only help to protect the environment from undue damage as a result of coal surface mining, it will assist in creating the atmosphere of regulatory stability which the energy industry insists is essential before it can proceed with large scale energy projects.

I commend Senator METCALF for his continued leadership on this legislation. He has redrafted the vetoed bill in many respects, however, he has not altered the all important reclamation standards. I am in general agreement with most of the changes which he has made in this current edition of the bill. However, I believe that the resolution of the critical issue of surface owners rights would better be resolved by the formula which was worked out over a several week period by the House-Senate Conference Committee in 1974.

While the so-called Mansfield amendment language which Senator METCALF has chosen to replace the surface owners' consent provision has merit, I believe that, based on the considerable difficulty we faced in coming to an agreement on this issue, we would be wiser to retain the agreed upon provision.

Therefore, when the bill is considered by the Interior Committee, I intend to offer an amendment which will replace the "Mansfield" language with a provision identical to that contained in the vetoed bill.

I look forward with great anticipation to the day that this bill will become the law of the land.

By Mr. DOLE (for himself and Mr. CURTIS):

S. 8. A bill to amend the Watershed Protection and Flood Prevention Act; to the Committee on Agriculture and Forestry.

Mr. DOLE. Mr. President, in recent years we have witnessed the near paralysis of one of the Nation's most popular and cost-effective natural resource efforts—the Public Law 83–566, small watershed development program. I am pleased today to offer legislation to expedite this program and restore a reasonable rate of progress in watershed improvement projects.

NEED FOR WATERSHED DEVELOPMENT

Since its inception back in 1954, the watershed program has been the vehicle by which the Federal Government cooperates with communities to prevent floods by applying land treatment effecting streambank stabilization and building water-retaining structures. The Department of Agriculture's Soil Conservation Service provides technical assistance and pays for most construction costs, but local residents must purchase land rights and pay for administration and maintenance of the projects when they are completed. These activities are financed by local taxes and administered through watershed districts.

In addition to curtailing floods, watershed works of improvement have resulted in benefits to fish and wildlife and downstream water quality. The small lakes which build up behind earthen dams create recreational opportunities, facilitate groundwater recharge and provide additional supplies of water for irrigation, municipal, and industrial needs.

CANEY RIVER EXAMPLE

In my State of Kansas, the example of the Caney River provides an instructive example of the benefits of the watershed program. Almost every year, spring rains brought floods on the Caney River and caused thousands of dollars of damage to crops, livestock, and homesteads. In 1961, after 7 inches of rain, the Caney River crested at 19.6 feet with disastrous results in the surrounding region.

Last summer, after completion of the Big Caney Watershed Project, the region experienced a torrential 12½-inch rainstorm. But the river crested at only 13 feet, and damage was negligible. This kind of protection means that the project will pay for itself many times over in the years to come.

LENGTHY DELAYS

Since 1969, watershed program applicants in Kansas and throughout the Nation have experienced long delays in attaining approval and implementation of watershed work plans. Much of the problem stems from budgetary and personnel constraints on the Soil Conservation Service, coupled with new paperwork requirements mandated by recent environmental protection laws. Consequently, SCS is now faced with massive backlogs of unprocessed applications and incompleted technical assistance.

Specifically, SCS is now confronted with 1,134 unserviced watershed applications. Only 316 projects are currently approved for planning assistance, and progress toward plan development is proceeding at a snail's pace on many of those projects. Further delays are occurring at the construction stage. In 1975, for example, SCS began construction on 41 projects, but was able to complete only 17. This is a far cry from the goal, set in the early days of the program, of completing 200 projects each year.

CAUSES FOR DELAY

Many of the factors which have brought the watershed program to a near standstill do not lend themselves to easy or immediate solutions. Given the bleak fiscal picture, it is unlikely that the program's budget or personnel level will be expanded to any significant degree in the near future. The inflated costs of planning and construction will not decline. Nor can we return to the days when watersheds were developed with little or no regard to their environmental impact.

Nevertheless, steps can be taken to accelerate the program by removing several bottlenecks in the administrative process.

PROPOSED CHANGES

One cause of delay concerns the congressional review requirement. Watershed projects which cost the Federal Government more than $250,000 must be approved on an individual basis by the Agriculture or Public Works Committee of both Houses of Congress. This requirement causes delays, not so much in Congress, but in the Department of Agriculture and the Office of Management and Budget where project work plans go for additional review before they arrive on the Hill.

I propose to exempt most projects from congressional review by lifting the review ceiling to $1 million. This figure is appropriate because construction costs have almost quadrupled since the current ceiling of $250,000 was established in the 1950's.

Another delaying factor is the ceiling imposed on the amount of money a watershed district may borrow from Farmers Home Administration to finance the local share of a project's cost. The current ceiling, established in 1956, is $5 million.

I propose to raise this limit to $10 million. I am informed that Farmers Home Administration will have no difficulty in accommodating this change, and a higher loan ceiling will certainly aid communities in financing their share of project costs.

A third section of my bill simply requires the Soil Conservation Service to begin construction on a project within 1 year of the date it is approved for construction, provided funds are available. This provision puts into law a guideline currently in effect at Soil Conservation Service.

ENVIRONMENTAL IMPACT STATEMENTS

The final section of my bill exempts watershed projects which do not entail stream channelization and which do not include structures with a water capacity in excess of 15,000 acre feet from the necessity of filing environmental impact statements as mandated by the National Environmental Policy Act.

However, eligible projects seeking an exemption must notify the council on environmental quality of the nature of their construction work. The council will then publish notice of the exemption request in the Federal Register and accept comments for a period of 60 days. The notice and comments are then forwarded to the relevant committees of Congress for final approval.

It is not my purpose, in proposing this exemption, to excuse any project from the need to assess environmental impacts. All projects must continue to assess environmental impacts in complying with the water resources council's principles and standards. My sole intention is to reduce the costly and time-consuming paperwork associated with these documents.

Threatened by public interest litigation, watershed sponsors have felt obligated—perhaps unjustifiably—to submit longer and longer impact statements. Some now reach 200 pages in length and cost up to $100,000. Surely these documents, which constitute the single greatest cause of project delays, have grown out of all proportion to their purpose as originally intended by Congress.

I am certain that this exemption, utilized in the carefully prescribed manner I have outlined, will greatly facilitate work on the smaller projects. I am also sure that this provision, together with the provisions in my bill, will go a long way toward expediting the entire process in getting the watershed program back on track.

Mr. President, I ask unanimous consent that my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 8

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. The Watershed Protection and Flood Prevention Act (16 U.S.C. 1001 et seq.) is amended as follows:

(1) Section 2 is amended by deleting the figure "$250,000" and inserting in lieu thereof the figure "$1,000,000".

(2) Section 5(3) is amended by deleting the figure "$250,000" and inserting in lieu thereof the figure "$1,000,000."

(3) Section 5(4) is amended by deleting the figure "$250,000" and inserting in lieu thereof the figure "$1,000,000".

SEC. 2. The last sentence of section 8 of the Watershed Protection and Flood Prevention Act (16 U.S.C. 1006a) is amended by striking out "five million dollars" and inserting in lieu thereof "$10,000,000".

SEC. 3. The Watershed Protection and Flood Prevention Act (16 U.S.C. 1001 et seq.) is amended by adding the following new section at the end thereof:

"SEC. 13. Any construction work which is assisted by this Act, and does not include a structure having a total water capacity in excess of 15,000 acre feet, nor requires the channelization of any body of water for such a structure, shall be exempt from the requirements of section 102(2)(c) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(c) upon—

"(1) the applicant for assistance under this Act notifying in writing the Council on Environmental Quality, established by title II of the National Environmental Policy Act of 1969, of the nature of the construction work;

"(2) the Council publishing notification of its receipt of the applicant's notice in the Federal Register (such notification shall be published within fourteen days of its receipt) that the applicant elects to be exempted under this section whereupon the Council shall for sixty days accept comments relative to the applicant's exemption;

"(3) The council transmitting within thirty days after the comment period described in paragraph 2 the applicant's notice, comments received by the Council, and a summary of the comments to each of the committees of the House of Representatives and the Senate having jurisdiction over legislation concerning the Watershed Protection and Flood Prevention Act or the National Environmental Policy Act of 1969; and

"(4) any committee receiving the notification, comments, summary, and not objecting to the exemption permitted under this section within sixty days.

Monitoring of the status of the applicant's exemption shall be maintained by the Council on Environmental Quality and the Council shall inform the applicant regularly of the status of the exemption request.".

By Mr. JACKSON (for himself and Mr. METCALF):

S. 9. A bill to establish a policy for the management of oil and natural gas in the Outer Continental Shelf, to protect the marine and coastal environment, to amend the Outer Continental Shelf Lands Act, and for other purposes; to the Committee on Interior and Insular Affairs.

OUTER CONTINENTAL SHELF LANDS ACT AMENDMENTS ACT OF 1977

Mr. JACKSON. Mr. President, I am introducing today, on behalf of myself and Senator METCALF, the Outer Continental Shelf Lands Act Amendments of 1977.

During the next decade, development of conventional oil and gas from the U.S. Outer Continental Shelf may well provide the largest single source of increased domestic energy; supply this energy at a lower average cost to the U.S. economy than any alternative; and supply it with substantially less harm to the environment than almost any other source.

Despite the intense and justified concern of many Americans over the potential social, environmental and economic impacts of OCS oil and gas development on the ocean and its resources and onshore, there is increasing evidence that careful OCS development may be more acceptable environmentally than development of any other potential domestic energy resources.

The major policy issues concerning OCS oil and gas development are: First, the rate and location of development; second, environmental safeguards; third, impacts on coastal States; fourth, the resource allocation system—that is, the method of bidding, and so forth;—fifth, information disclosure to potential competition, government, and the public; sixth, the role of Federal Government, as owner of the resources, in exploration and development; seventh, separation of exploratory and development rights in lease terms; and eighth, the disposition of bonus and royalty revenues.

The major provisions would: First, establish policy guidelines; second, require a 5-year leasing program; third, give the coastal States an increased role in Federal OCS decisions; fourth, improve safety requirements; fifth establish unlimited absolute liability for oil spill damage with payments from a liability fund; sixth, provide for a two-step decision process to separate exploration from development and production; and seventh, authorize new leasing systems and require their use on an experimental basis.

The Senate has been working on legislation to reform our national policy for development of the oil and gas resources of the Outer Continental Shelf since 1974. In September of that year, the Senate passed the bill (S. 3221) which I had introduced in March. There was no action in the House of Representatives.

In July, 1975, the Senate passed the legislation (S. 521) again. A year later the House passed its version of the legislation, which had been developed by the Ad Hoc Select Committee on the Outer Continental Shelf, ably chaired by Representative JOHN MURPHY.

In the closing days of the 94th Congress the conference committee reached agreement on a bill (S. 521) which would have made major reforms in the OCS oil and gas leasing program. After intensive lobbying in opposition to the bill by the Ford administration and the major oil companies, the conference report was ordered to be recommitted by the House by a four-vote margin 3 days before Congress adjourned. Further action was impossible. The bill I am introducing today is identical to the conference report on S. 521.

Mr. President, I am confident that we will enact this legislation early in the Congress. I expect that the Carter administration will support OCS leasing reform. I regard this bill as a starting point and intend to work closely with the new administration to refine it and have a new policy enacted into law as soon as possible.

It is also my hope that the Congress will move swiftly to enact comprehensive legislation governing liability for all oil spills in the ocean. When enacted, the legislation would replace the oil spill liability provisions in the bill I am introducing today.

By Mr. INOUYE:

S. 10. A bill to amend title 39 of the United States Code to provide that Federal income tax returns may be mailed free of postage; to the Committee on Post Office and Civil Service.

Mr. INOUYE.. Mr. President, in fiscal year 1975, over 85.5 million individual and fiduciary tax returns were filed. These returns generated nearly 156.4 billion dollars, or well over half of the total tax revenue of 293.8 billion dollars generated that year.

Since most other revenue comes to the Government earmarked for a specific program or trust fund, such as social security, personal income taxes provide the bulk of funds available to the Government for ongoing operations and new programs. The payments of 85.5 million individuals and fiduciaries help the United States maintain its defenses, feed its hungry, and clean up its environment. Those payments finance a system of agencies, bureaus, and regulators that enforce standards for everything from meat to auto emissions.

Since individual taxpayers play such a large role in maintaining the financial solvency of the Federal Government, Congress has an obligation to make it as easy as possible for Americans to pay their taxes. And over the years, Congress has done this. We have simplified the return itself. We have financed the establishment of IRS field offices throughout the country, making it easy and free for people to get expert tax advice. A toll-free telephone service gives persons additional access to free advice.

Continuing in this vein, I propose Congress amend chapter 34, title 39 of the United States Code, to permit postage-free mailing of Federal income tax returns. This would permit people to meet their legal obligation without the ever-rising cost of a stamp. Making tax returns postage-free would recognize the vital role individual taxpayers play in financing their Government and, in this light, might be seen as a small token of appreciation from that Government.

Over the years, we in Congress have enjoyed franking privileges that allow us to mail free of charge. The taxes of our constituents pay for this privilege. It seems only fair to me that we extend our constituents the opportunity once a year to share the privilege their taxes allow us to enjoy year round.

By Mr. McCLELLAN (for himself, Mr. BURDICK, Mr. BAYH, Mr. ROBERT C. BYRD, Mr. EASTLAND, Mr. KENNEDY, Mr. SCOTT, Mr. THURMOND, and Mr. ABOUREZK):

S. 11. A bill to provide for the appointment of additional district court judges and for other purposes; to the Committee on the Judiciary.

APPOINTMENT OF ADDITIONAL DISTRICT COURT JUDGES

Mr. McCLELLAN. Mr. President, for myself, Mr. BURDICK, Mr. BAYH, Mr. BYRD of West Virginia, Mr. EASTLAND, Mr. KENNEDY, Mr. SCOTT, Mr. THURMOND, and Mr. ABOUREZK, the majority of the members of the Committe on the Judiciary, I am today introducing a bill to create 45 new district judgeships in 40 judicial districts located in 28 States and the Commonwealth of Puerto Rico. This bill passed the Senate in the 94th Congress on March 31, 1976, as S. 287 by a vote of 87 to 1. However, the House failed to act on the measure. The bill last year contained the recommendation of the Judiciary Committee for judgeships based upon need determined through application of a three-part statistical standard to measure the workload on a per judge basis.

The first standard required that the new case filings in a court must equal or exceed 400 per judge per year. This standard of 400 filings was recommended by the Judicial Conference.

The second standard adopted to assess workload was that the judges of the court be able to dispose of cases equal to or in excess of the national average of 358 cases terminated per judge. This standard was adopted as one of the in-

dicia of workload because it afforded a yardstick to measure whether the judges of the court were performing up to the national average as far as the terminations were concerned.

The third standard adopted by the committee as an indication of the workload required that the judges of the court spend approximately 110 days or more per year actually on the bench as distinguished from working in chambers. If you exclude Saturdays, Sundays, vacation time, and holidays, there are approximately 220 working days in a year. Under this standard, the judge would still have one-half of his time available for work in chambers, including research, study, and writing opinions.

Having adopted this tripartite standard, the committee applied the standard to all the districts in an objective fashion.

Mr. President, beginning with the omnibus judgeship bill of 1961, Congress developed the practice of reviewing the ever-increasing workload of the Federal courts and authorizing new judgeships about every 4 years. The failure to act upon S. 587 in the 93d Congress and S. 287 in the 94th Congress was a departure from this practice and has resulted in an emergency situation in many of the district courts. Indeed, Chief Justice Burger noted on January 2, 1977, that the need for new judgeships has increased to the point that the Judicial Conference now recommends creation of 106 additional district judgeships—61 more than contained in the bill the Senate passed last year.

Mr. President, current statistics may well justify far more than 45 new positions. If hearings so indicate, the Judiciary Committee can and should add the additional judgeships necessary for the effective and efficient operation of our district courts. I sincerely hope Congress will move quickly to alleviate a growing crisis in our judicial system.

I shall make every effort to obtain early hearings on this measure and to expedite its processing to the floor of the Senate for final disposition by this body.

Mr. President, I ask unanimous consent to print in the RECORD at this point excerpts from the statement made by Chief Justice Burger on January 2 and a report on the status of judicial business in the Eastern District of Arkansas as presented to me by the Honorable G. Thomas Eisele, chief judge of that district. Judge Eisele strongly urges that the Eastern District of Arkansas requires now two additional district judgeships.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXCERPTS FROM YEAR-END REPORT BY CHIEF JUSTICE WARREN E. BURGER

JANUARY 2, 1977.

The need for new judgeships continues to grow. After careful analysis, in September, 1976, the Judicial Conference recommended creation of 106 District judgeships and 16 new judgeships in Courts of Appeals; about one-half of these had been identified as needed four years earlier. Case filings in the Courts of Appeals will have increased more than 140 percent between the last new judgeships of 1968 and the authorization and filling of any new judgeships.

Fortunately, federal judges, with the aid of new techniques and research of the Federal Judicial Center have continued to improve procedures and work long days. As a result, the average federal judge completed work on 36 percent more cases this past year than eight years ago.

Court filings were up 11.3 percent in fiscal 1976 to 130,597. Dispositions increased five percent. A grave problem is emerging, however, due in large part to the rigidities of the Speedy Trial Act—a recent piece of legislation consistently opposed by the Judicial Conference as unnecessary. District Courts are complying with time limits imposed for criminal cases, but some overloaded courts have not been able to try a civil case in many months, other than emergency matters.

REPORT ON THE STATUS OF JUDICIAL BUSINESS IN THE EASTERN DISTRICT OF ARKANSAS

"In crisis"—that is the only phrase that can describe the condition of the federal court for the Eastern District of Arkansas. With existing resources, the court cannot expect to deal effectively with the caseload. In subtle, and in not-so-subtle ways, citizens are not getting the quality of justice that they are entitled to expect—at least on the civil side of the docket.

For well over two years the situation has been deteriorating at an ever accelerating rate. As it gets worse and worse, the efficiency and effectiveness of the judges diminish as the "paper work" and management of the problem take more and more time away from the judicial responsibilities of the judges.

One index of the situation will be found in the satistics relating to pending cases. In 1972 we were 36th in the nation in pending cases, although we were second in the nation in "weighted filings"; in 1973 we were 25th; in 1974 we were 10th; and in 1975, sixth in pending cases. To illustrate the situation more dramatically our pending cases per judgeship in the Eastern District for the years 1972–76 were as follows:

1972	306
1973	352
1974	465
1975	616
1976	696

As of December, 1976, we have over 700 pending cases per judgeship.

What are some of the manifestations of this crisis? In 1974 the period of time from issue to trial in civil cases in our district was 10 months; in 1975, 12 months; in 1976, an unbelievable 18 months. To do even this well the judges have had to make the choice between "dealing with numbers" or effectively dealing with the issues in each case as and when they arise in their natural order. More or less out of necessity we have chosen the former course with the result that the matters under advisement for excessive periods of time in this district are probably not exceeded by a handful of the district courts in the United States. By following this course the principal burden of our lost efficiency has fallen on a relatively few litigants, but, as is readily seen, the entire civil side is suffering dramatically. Our judges recognize that justice delayed may mean justice denied. But great frustration sets in when we realize that we are terminating more cases per judgeship than 80% of the other district courts and are still falling farther and farther behind. (Note: last year we terminated 517 cases per judgeship as compared to the national average of 371.)

When things get sufficiently bad, a new dynamic manifests itself. In anticipation thereof, we attempted to explain it to Circuit Judge John Butzner, chairman of the Subcommittee on Judicial Statistics, by our letter to him back in February, 1976:

"There is a phenomenon with which you are probably familiar that should be considered when you review the most current filings in May. When a district court is adequately staffed and disposes of its business expeditiously, the data with respect to filings can be relied upon. However, where a court is understaffed and unable to dispose of its civil business efficiently and expeditiously, there is a natural tendency for the bar, especially where there is a state court option available, not to file in the affected federal district court. Judge Henley, who was then on the district court (and is now serving on the Eighth Circuit Court of Appeals) observed this phenomenon in the 1969–70 period during which the vacancy created by Judge Gordon Young's death was not filled for a year. After the court came up to full strength with my appointment, the situation dramatically reversed itself and the filings increased as we became more able to deal with the situation. The point is this: I do not know what the statistics will reveal for the first three quarters of fiscal 1976, but I would not be surprised to see a drop in the civil filings because of the impossibility of adequately and properly dealing with the civil docket in this district under current conditions."

We have just received the statistics for 1976 and, as predicted, they reflect a very slight decrease in "weighted filings" over last year. There is, of course, absolutely no satisfaction in this development. The courts must be staffed to meet the true need. When our court is, in fact, so staffed, the upward movement of the filings will resume.

What is our need? Of course, we have had a vacancy for Judge Harris's position since February of this year. In addition, the Senate passed the Omnibus Bill which would have created a new judgeship in the Eastern District of Arkansas, but that bill failed in the House at the last minute. A few months ago, in September, the Judicial Conference of the United States recommended still another judgeship for the Eastern District of Arkansas. So we are short approximately two and one-half judges for this district. If we had these judges on board, we would still be carrying an average caseload calculated on a national basis.

The agencies supporting the court have grown dramatically in the last five years, reflecting the court's ever increasing activity. The number of employees in the probation office has grown from five to 17. The number of employees in the clerk's office has gone from nine to 15. The number of employees in the marshal's office has gone from four to 13. The number of employees in the bankruptcy court has gone from seven to 11. We have a full-time magistrate and his staff. Those increased staffs have continued to serve the same number of judges, so it is obvious that the bottleneck of the problem is the lack of judicial manpower.

If the additional judgeship recommended by the Judicial Conference in September can be included in the Omnibus Bill (so that it would include two new judgeships for the Eastern District of Arkansas) without significantly delaying that measure, the judges of this court would strongly urge legislative action to accomplish that objective. If this is not possible, then we would urge the very earliest passage of the "old" Omnibus Bill so that we would at least have one new judgeship which could be filled, along with the vacancy in Judge Harris's position, in 1977.

We have a strange situation with respect to physical facilities. Primarily as a result of the efforts of our Congressional delegation, we have, located throughout the State of Arkansas, some of the finest federal court facilities that can be found in the nation. There are new, or relatively new, court facilities in Fayetteville, Helena, Pine Bluff, and Batesville. A new facility is presently under construction in Jonesboro, and we

are informed that a new federal building is in the offing at Harrison. Such facilities, of course, are of considerable benefit to the courts of the Eastern and Western Districts. However, in the Eastern District the situation now, and in the foreseeable future, will result in approximately two-thirds of the judicial business of the district being conducted in Little Rock. Even before the Speedy Trial Act, approximately 95% of the criminal cases in the Eastern District were tried in Little Rock. To meet the requirements of the Speedy Trial Act, that percentage will increase. On the civil side, the nonprisoner petition filings reveal the following: out of the total of such filings, 416 arose in the Little Rock division, 117 in Jonesboro, 102 in Pine Bluff, 49 in Batesville, and 57 in Helena. The prisoner petitions amount to another 193 cases. These are Pine Bluff filings, but those prisoner petitions assigned to Judge Eisele and Judge Shell are usually tried or otherwise disposed of in Little Rock.

As you know, Judge Oren Harris has been our "traveling judge". He has had significant duties in the Eastern and Western Districts which have kept him constantly "on the road". Since his appointment he has been operating out of El Dorado, but we recently heard him observe that, if he had to do it again, he would make Little Rock his base of operations. It is our opinion that Judge Harris's successors will come to the same conclusion. Even assuming no change in the duties or responsibilities of that particular position, those duties and responsibilities could be accomplished more efficiently if the judge operates out of Little Rock. So, add another "resident" judge to Little Rock. Judge Shell and Judge Eisele are already based in Little Rock. It would be our firm recommendation that *both* of the new judgeships, presently contemplated for the Eastern District, also be based in Little Rock. It is our opinion that a court can operate most effectively when the judges of that court are housed in the same building and have quick and ready access one to the other. Furthermore, even at the district court level there is a measure of collegiality which supports and enhances the work product of that court.

So we go from a situation where there are two resident judges having full court facilities in Little Rock and a "visiting" judge having very inadequate facilities (Judge Harris's) to a situation where we could have four or five resident judges, each of whom would probably spend more time in the Little Rock Division than at all the other divisions combined.

It has proved to be difficult for the judges of our court to bring the Administrative Office of the United States Courts to a full understanding of this developing "housing" problem. Still we are working at it and will continue our efforts in that regard.

Because of the great time lag in federal courtroom construction the judges of this court urge the members of our Congressional delegation to keep abreast of developments and to support a prompt resolution of such judicial "housing" problems. For their part, the judges will make every effort to keep our Congressional delegation advised of the facts and circumstances so that the members of that delegation can exercise their own judgments as to the proper course of action.

On an entirely different subject, we have just received copies of a study prepared by our probation office indicating the effectiveness of our local federal probation system as an alternative to incarceration. That study indicates that this probation office has had remarkable success. The data therein seems to run contrary to the information which has been developed elsewhere in the nation. We shall make copies of this report available to the members of our Congressional delegation so that they can be aware of our local experience.

Mr. McCLELLAN. Mr. President, if I may say for the benefit of colleagues, this is the bill that passed the Senate last year. It does not include many judgeships, I am sure, that are needed, but these have been passed on. The bill will be subject to amendment. I intend to offer an amendment for my own State to increase the judgeships there over that contained in the present bill.

But I do feel that the need for additional judgeships is an urgent matter, and I introduce this bill so that we can get it in process.

I hope hearings will be held on it soon and other judgeships that are not covered in the bill that are meritorious will be processed in this measure.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. McCLELLAN. I yield.

Mr. BAKER. Mr. President, this is a bill entered for the purposes of reference to the Committee on the Judiciary; is that correct?

Mr. McCLELLAN. That is correct.

Mr. BAKER. Mr. President, I am sympathetic to the action taken by the distinguished Senator from Arkansas. I would have hoped that many of these judgeships could have been filled before now. In some cases nominations that were pending were not acted on before the end of the last session. But notwithstanding that and notwithstanding the change in administrations, I think it is clear that we do require additional judicial manpower, and it is not the intention of the minority to obstruct that effort to create additional judgeships.

We will look with great interest to the recommendations of the Committee on the Judiciary, and we very much hope that they can be brought to the floor in an orderly way.

Mr. McCLELLAN. I thank the distinguished minority leader. My only purpose in this is to introduce a bill to create those judgeships that are justified and that have been passed on. Others may be added by the committee. I thank the Senator.

By Mr. DOLE (for himself and Mr. HUDDLESTON):

S. 12. A bill to extend the rural community fire protection program, and for other purposes; to the Committe on Agriculture and Forestry.

Mr. DOLE. Mr. President, last session I offered legislation to renew the rural community fire protection program through fiscal year 1980. My bill passed the Senate on the Consent Calendar, but it passed so late in the session that the House of Represenatives did not have time to consider the bill or take action on it.

Today I offer similar legislation with the reminder that the program is scheduled to expire at the end of this fiscal year. My purpose in proposing renewal legislation is identical to my purpose in sponsoring the program at its inception back in 1972; it is to assure improved fire protection throughout large sections of rural America where protection is inadequate or nonexistent.

Every year uncontrolled fires claim many lives and millions of dollars of damage in rural communities and on forests, rangelands, and croplands. The threat of wildfire is even greater this year as the result of a lack of moisture in several drought areas of the Nation. In California, for instance, the lowest annual rainfall in 150 years set forest fires raging over 150,000 acres of timber and grazing land early this summer, with worse conditions expected. Given this great and growing need for improved rural fire protection, I urge the Senate to take favorable action on my legislation to renew the rural community fire protection program.

PROVEN EFFECTIVENESS

Unlike many other Federal grant programs, the rural community fire protection program has achieved an inpact far out of proportion to its modest cost to the taxpayer. It has sparked a renewed local commitment to better and stronger firefighting forces throughout rural America. Since the inception of the program, the volume of applications has remained consistently high, and the program's matching grants have succeeded in generating almost twice as much non-Federal money. In 1975, the first year the program operated, 5,376 applications for assistance were received, and the allocated funds were distributed among 2,167 approved projects. Federal grants totaled $3.5 million and generated an additional $5.2 million in non-Federal matching money.

While much of the total funds were used to purchase or refurbish basic equipment, a significant share was expended on training programs and on organizing new fire departments. During 1975 alone, more than 18,000 rural firemen received training through the program, and 19 new fire districts were established resulting in improved insurance rates in 18 communities. The full data for program operations in 1976 are not yet compiled but I am assured that the statistics will further support my conviction that the rural community fire protection program is a sound and cost effective national investment.

PROGRAM STRUCTURE

My renewal legislation maintains the basic structure of the program. As now, the program will continue to provide technical and financial assistance to State foresters who, in turn, help train, equip, and organize rural firefighting units. Matching grants will continue to be provided on a project basis for the purpose of purchasing or upgrading equipment, establishing fire departments and training firemen in structural and wildland fire suppression techniques. The program, which is restricted to unprotected or poorly protected communities of under 10,000 population, represents a joint Federal-State-local effort.

OVERSIGHT PROVISION

The bill also adds a new provision requiring the U.S. Forest Service to furnish a brief annual report to Congress for oversight purposes. The report will appraise Congress of the number and origin of applications received, the number and amount of grants and matching funds, and the uses to which they are put. In this way, Congress will be able to meas-

ure results and judge whether the program is continuing to serve as a strong incentive for better fire protection.

In addition, my legislation underscores the importance of achieving maximum effectiveness by coordinating the program with such complementary programs as Farmers Home Administration's community facilities loans, the Federal excess property loan program, and the volunteeer firemen provisions in section 816 of the Agricultural and Consumer Protection Act of 1973.

Mr. President, the capacity to cope with fires depends on the availability of equipment and trained personnel. The rural community fire protection program provides these conditions and has demonstrated its effectiveness. I urge Congress to renew this program in the expectation that we may continue to reduce losses of life and property caused by uncontrolled fires in rural America. I ask unanimous consent that the bill and a summary be printed in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 12

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 402 of the Rural Development Act of 1972 (7 U.S.C. 2652) is amended by inserting "(a)" before the first sentence and by\adding at the end of such section the following new subsections:

"(b) The Secretary, with cooperation and assistance from the Administrator of General Services, shall encourage the use of excess personal property (within the meaning of the Federal Property and Administrative Services Act of 1949) by rural fire forces receiving assistance under this title.

"(c) To promote maximum program effectiveness and economy, the Secretary shall closely coordinate the assistance provided under this title with assistance provided under other fire protection and rural development programs administered by the Secretary.".

SEC. 2. Section 403 of the Rural Development Act of 1972 (7 U.S.C. 2653) is amended by (1) striking out "Report.—" and inserting in lieu thereof "Reports.—(1)"; and (2) adding at the end of such section a new subsection as follows:

"(b) Not later than March 1 of each year, beginning in the calendar year 1978, the Secretary of Agriculture shall submit a report to the Congress regarding the operation, during the preceding fiscal year, of the program provided for under this title. The Secretary shall include in such report the number of applications for assistance filed by each State during such fiscal year, the number of such applications approved by the Secretary, the amounts allocated to each State and the purposes for which such allocations were made. The Secretary shall also include in such report such comments and recommendations for improving such program as he deems appropriate.".

SEC. 3. Section 404 of the Rural Development Act of 1972 (7 U.S.C. 2654) is amended by adding at the end thereof the following new sentence: "There is further authorized to be appropriated to carry out the provisions of this title not to exceed $7,000,000 for each of the fiscal years ending September 30, 1978, September 30, 1979, and September 30, 1980."

RESUME OF BILL TO EXTEND THE TITLE IV FIRE PROTECTION GRANT PROGRAM

(1) Extends the Rural Community Fire Protection Grant Program (Title IV of Rural Development Act of 1972) for three years with an authorized annual expenditure of $7 million. (Existing authority is for $9 million, but no more than $3.5 million has ever been appropriated)

(2) Emphasizes need to co-ordinate program with complementary programs such as the Excess Property Loan Program, FmHA's Community Facilities Loan Program and the volunteer fire fighters provision in the Agriculture and Consumer Protection Act of 1973.

(3) Requires brief annual report to Congress for oversight purposes specifying the number and amount of grants, where they're given, and how much non-federal matching money is being raised as a result of the program.

(4) At the present time, funds for the program are included in appropriations for the Farmers Home Administration, but the funds are then transferred within the Department to the Forest Service which actually administers the program. This arrangement is maintained.

Mr. HUDDLESTON. Mr. President, I am delighted to join my distinguished colleague from Kansas (Mr. DOLE) in introducing S. 12, which extends the rural community fire protection program through September 30, 1980. For the past 2 years this program has been funded at the $3.5 million level.

The rural fire protection program provides technical and financial assistance to rural communities to organize, train and equip local forces for fire prevention and suppression. State foresters and officials of the Commonwealth of Puerto Rico, Guam, and the Virgin Islands administer the program through cooperative agreements with USDA Forest Service.

In 1975 the first year the program operated, 5,376 applications for assistance were received. The allotted funds were distributed among 2,169 approved projects. Rural communities and States from across the Nation provided $5.2 million of their own in over-matching the $3.5 million Federal program. The $8.7 million was used to organize 19 fire departments, acquire 240 fire trucks and other necessary equipment, and train over 18,000 people.

Mr. President, since the rural community fire protection program has been in existence it has never been included in the administration's budget. In fact there have been proposals to terminate the program.

But I submit that fire losses to farm property jumped from $165 million in 1960 to a preliminary estimate of $242 million in 1970.

The annual death toll from rural fires in the United States is estimated at 1,000 lives.

The rate of fire deaths per 100,000 white Americans in nonmetropolitan areas is 50 percent greater—4.0 versus 2.7—than the rates for whites in metropolitan areas. The disparity in the rate among nonwhites who live in nonmetropolitan areas versus those who live in metropolitan areas is even greater; 15.3 versus 8.1 per 100,000 population.

Mr. President, the Insurance Information Institute expresses the rural fire problem in America in the following way:

When fire occurs on rural property, damage is 3 to 6 times greater on the average than when it occurs on city property. Isolation, lack of fire fighting facilities in many rural areas, less rigid wiring and construction standards, and poorer heating equipment in some instances, have contributed to this situation. Fires and lightening strike 2 out of every 100 farms each year.

The organization of well-planned fire protection agencies and the training of local fire forces in both wildlife and structural fire techniques are primary goals of this program.

The renewal legislation we are introducing today will maintain the basic structure of the rural community fire protection program. It will provide the same technical and financial assistance to enable rural firefighters to do a better job in protecting lives and property.

Mr. President, Federal grants were made available for 1976 to each State, Puerto Rico, Guam, and the Virgin Islands. I ask unanimous consent that the list of Federal grants be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Ala., $54,000; Alaska, $64,300; Ariz., $49,700; Ark., $55,200; Calif., $134,800;

Colo., $63,800; Conn., $24,800; Del., $17,600; Guam, $15,000; Fla., $72,100;

Ga., $65,600; Hawaii, $24,000; Idaho, $37,700; Ill., $131,300; Ind., $89,900;

Iowa, $117,300; Kan., $115,100; Ky., $59,400; La., $74,700; Maine, $26,800;

Md., $37,600; Mass., $27,900; Mich., $94,400; Minn., $133,000; Miss., $54,800;

Mo., 97,600; Mont., $66,100; Neb., $87,200; Nev., $26,300; N.H., $19,400;

N.J., $37,900; N. Mex., $31,000; N.Y., $92,200; N.C., $78,200; N. Dak., $106,000;

Ohio, $101.900; Okla., $67,100; Ore., $45,400; Pa., $102,100; P.R., $15,000;

R.I., $14,700; S.C., $50,200; S.D., $81,300; Tenn., $62,300; Tex., $175,700;

Utah, $32,900; Vt., $20,100; Va., $53,600; V.I., $15,000; Wash., $56,800; W.Va., $34,200; Wis. $88,400; Wyo., $25,600.

Mr. HUDDLESTON. The rural community fire protection program has proved its effectiveness during the past 2 years which it was funded. I urge my colleagues to support this measure which will extend the authorization of this program for 3 years and will allow for the upgrading of fire protection for rural people.

By Mr. INOUYE (for himself and Mr. WILLIAMS):

S. 13. A bill to amend chapter 13 of title 38, United States Code, to make eligible for dependency and indemnity compensation widows of veterans who die of nonservice-connected causes but who were at the time of death totally disabled as the result of one or more service-connected disabilities; to the Committee on Veterans' Affairs.

S. 24. A bill to authorize the widows of certain former members of the Armed Forces of the United States to use the services and facilities of post exchanges and commissaries; to the Committee on Veterans' Affairs and Armed Services, by unanimous consent.

Mr. INOUYE. Mr. President, today, I am introducing two measures which are designed to rectify obvious inequities in the existing law relating to Government benefits for the widows of veterans who had 100-percent service-related disabilities at the time of death.

The first is a bill to amend chapter 13

of title 38, United States Code, to make eligible for dependency and indemnity compensation widows of veterans who die of nonservice-connected causes but who were at the time of death totally disabled as the result of one or more service-connected disabilities.

The other is a bill to authorize the widows of certain former members of the Armed Forces of the United States to use the services and facilities of post exchanges and commissaries.

Mr. President, the widow of a serviceman who is 100 percent service disabled is not entitled to exchange and commissary privileges if her husband dies while on active duty. However, if he dies after being honorably discharged from the service, she is eligible for these privileges.

If the death of the disabled veteran is due to his service-connected injury, then the widow is eligible to receive death compensation or dependence and indemnity compensation. Unfortunately, if this veteran with a 100-percent service-connected disability dies of a cause other than his technical disability, his widow is not eligible for compensation. In many cases the actual cause of death is directly or indirectly connected with the disability, but it may not always be.

These measures will help only a small number of people. But it is this very group which has paid such an extraordinarily high price on behalf of their country, and whose lives thereafter have been dictated by their disabilities. In their national service these veterans gave literally all that they had and became 100 percent disabled. Due to these disabilities these men could no longer properly care for their families or themselves. Their wives usually spend much of their lives tending and caring for their broken husbands and find it difficult if not impossible to work outside the home. Therefore, they cannot build up their social security which for most older Americans is vitally important for self-sufficiency. For these widows and families it is a vicious circle which must not be allowed to continue. I therefore ask that my colleagues give their full support to these bills.

Mr. President, I request unanimous consent that the text of these bills be printed in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 13

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 410(a) of title 38, United States Code, is amended by adding after the first sentence a new sentence as follows: "When any veteran dies after December 31, 1956, from any cause other than a service-connected or compensable disability but was at the time of his death totally disabled as the result of one or more service-connected disabilities, the Administrator shall pay dependency and indemnity compensation to his widow.".

(b) Section 410(b) of such title is amended by (1) inserting "under the first sentence of subsection (a)" immediately after "paid"; and (2) adding at the end of such section a new sentence as follows: "Dependency and indemnity compensation shall not be paid under the second sentence of subsection (a) to the widow of any veteran described in such sentence unless such veteran was discharged or released under conditions other than dishonorable from the period of active military, naval, or air service in which he suffered his service-connected disability or disabilities.".

SEC. 2. (a) Section 417(a) of title 38, United States Code, is amended by striking out "Dependency" and inserting in lieu thereof "Subject to the provisions of subsection (d), dependency".

(b) Section 411 of such title is further amended by adding at the end thereof a new subsection as follows:

"(d)(1) The dependency and indemnity compensation to which the widow of any veteran who died of a non-service-connected or compensable disability is otherwise entitled under this chapter shall be reduced by an amount equal to one-half of all payments of any kind or from any source except those payments specified in section 415(g) of this title.

"(2) In determining the amount of reduction in the monthly dependency and indemnity compensation to be made in the case of any widow under this subsection, the Administrator shall, if practicable, pro rate on a monthly basis any payments received by a widow on other than a monthly basis.

"(3) The Administrator shall have authority to implement the provision of this section by such regulations as he deems necessary.

"(4) Notwithstanding the foregoing provisions of this title, no widow made eligible for dependency and indemnity compensation by reason of the second sentence of section 410(a) of this title shall be paid dependency and indemnity compensation in any amount less than she would be paid under section 541 of this Act if she were eligible for pension under that section."

SEC. 3. The amendments made by this Act shall become effective on the first day of the second month following the month in which this Act is enacted.

S. 24

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 53 of title 10, United States Code, is amended by adding at the end thereof a new section as follows:

"§ 1041. Post exchange and commissary privileges for widows of certain former servicemen

"Subject to such rules and regulations as the Secretary may prescribe, the spouse of any former member of the armed forces who is entitled to dependency and indemnity compensation under chapter 13 of title 38 or to death compensation from the Veterans' Administration and the spouse of any former member of the armed forces who, at the time of his death, was totally disabled as the result of one or more service-connected disabilities (as determined by the Veterans' Administration) shall be entitled to use the services and facilities of post exchanges and commissary stores operated under the jurisdiction of any military department."

SEC. 2. The table of sections at the beginning of chapter 53 of title 10, United States Code, is amended by adding at the end thereof a new item as follows:

"1031. Post exchange and commissary privileges for widows of certain former servicemen.".

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that two bills, introduced by the Senator from Hawaii (Mr. INOUYE), relative to authorizing the widows of certain former members of the Armed Forces of the United States to use the services and facilities of post exchanges and commissaries, be jointly referred to the Committees on Armed Services and Veterans' Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. MATHIAS:

S. 14. A bill to protect citizens' privacy rights, establishing guidelines for access to third-party records, regulating the use of mail covers, limiting telephone service monitoring, and protecting nonaural wire communications; to the Committee on the Judiciary.

BILL OF RIGHTS PROCEDURES ACT OF 1977

Mr. MATHIAS. Mr. President, I send to the desk the Bill of Rights Procedures Act, a bill designed to enforce the fourth amendment's protections against unreasonable searches and seizures.

The primary purpose of S. 14 is to create standard procedures for government access to a citizen's records held by banks, telephone companies, and credit card companies. This legislation would protect the privacy of such records by permitting Federal agents to obtain them only if they follow one of the following procedures:

Obtain the written consent of the customer;

Serve a subpena or a summons on the institution, with a copy to the customer. The information sought must be relevant to a legitimate law enforcement purpose and the customer must be given the right to challenge the subpena;

Obtain a judicial search warrant.

The Bill of Rights Procedures Act also establishes procedures for examining the outside envelopes of first class mail, and telephone company monitoring of calls for service quality. It extends the present wiretap law to cover telephone and telex messages, computer data transmissions, and other nonverbal messages.

Mr. President, in my view this proposal strikes an equitable balance between the right to privacy in one's business records and the legitimate needs of law enforcement.

The need for comprehensive legislation to protect individuals from Government intrusion into their private affairs has become urgent in recent years. Revelation after revelation of unwarranted invasions of privacy by Government officials have awakened Americans to the need for congressional action. The final report of the Senate Select Committee on Intelligence, on which I served, detailed the steady erosion of constitutional protections as the whim and convenience of the Government became the standard for access to citizens' records.

The necessity for congressional action was again revealed by the recent decision of *United States* v. *Miller*, 425 U.S. 435 (1976), which gives a narrow interpretation to an individual's right to privacy in his bank records and related accounts.

The decision held that a citizen's banking records are not his private papers, protected by the fourth amendment. The court ruled that these records—checks, balances, loan data, and other information—belong to the bank, thus leaving a citizen no right to a court contest, or even to be notified, when a Government agency seeks to obtain bank records.

The fourth amendment provides that—

The right of the people to be secure in their . . . papers and effects against unreasonable searches and seizures shall not be violated.

The Miller case was a great disappointment to those of us who had hoped for a definitive decision applying the fourth amendment to a citizen's bank records. Such a ruling by the U.S. Supreme Court would have been consistent with the decision by the California supreme court in *Burrows* v. *Superior Court*, 13 Cal. 3d. 238, 529 p. 2d 590, 118 C la. Rptr. 166 (1974). In Burrows the court ruled that under a provision in the California State constitution—virtually identical to the fourth amendment in the U.S. Constitution—an individual has a reasonable expectation of privacy in his bank records and that the voluntary surrender of such records by a bank to law enforcement was an illegal search and seizure.

In my view, the decision in Burrows is far more in line with the economic realities of modern finance—and the Constitution—than that of the U.S. Supreme Court in Miller. The importance of maintaining a bank account in our contemporary society is beyond dispute. What alternative is there for an individual who wishes to keep his financial records private? Must a depositor run the risk that his or her records will be subject to arbitrary review by Government agents? Is he or she to abandon the bank in favor of the stuffed mattress? I hope not. Congress must act to provide the privacy protections that the Supreme Court declined to bring to bear.

The need for Congress to enact corrective legislation in this area is compelling when one considers the nature of the records maintained by banks. As I have stated:

As all of us know, an individual's bank account is not just another collection of paper. It is extremely rich in details of the consumer's personal and political life. The information revealed by checks, withdrawals or deposits mirror the activities or the account holder—the political causes he supports, the publication he subscribes to, the debts he owes, the purchases he makes, the source of his income and so forth.

Because information in bank accounts is so rich in details, it is quite understandably sought after by various government agencies and officials . . . the characteristics which make informaion contained in bank accounts useful to government agencies also mean that basic individual rights and liberties can be trampled by abuse of the information or of the process by which the information is obtained.

It is my firm belief that similar privacy interests attach to other types of personal papers, including those maintained by telephone and credit card companies.

Mr. President, I am convinced that Congress must take the initiative and enact legislation to create statutory procedures to govern Federal agent access to private business records. Without such procedures, citizen privacy is unevenly protected, depending on the inclination of the firms with which they deal. The Bill of Rights Procedures Act will write such procedures into law and thus end the almost unlimited access of Government investigators to an individual's bank, telephone, and credit card records.

As some of my colleagues may recall, I first introduced the Bill of Rights Procedures Act, in the 93d Congress as S. 3440, and again early in the 94th Congress as S. 1888. Former Congressman Mosher, long a supporter of citizens' right to privacy and a most able legislator, introduced H.R. 214, in the 94th Congress, the House counterpart to S. 1888. As first introduced, the legislation would have required a court order before any Federal agent could inspect or obtain records of bank, credit, telephone, medical, or other related transactions. Probable cause that a crime has been or is about to be committed was required before a warrant could issue.

During the 94th Congress, the House Judiciary Subcommittee on Courts, Civil Liberties, and the Administration of Justice, under the leadership of Representatives KASTENMEIER and RAILSBACK, conducted extensive hearings on H.R. 214, and following a lengthy markup, reported the bill to the full House Judiciary Committee. On April 29, 1976, I introduced as S. 3349 in the Senate the version of the Bill of Rights Procedures Act which had been reported out by the House Judiciary Subcommittee. Unfortunately, further progress on the Bill of Rights Procedure Act was not made in the remaining months of the 94th Congress. Nevertheless, the bill received widespread support from citizens and organizations. For example, the bill was endorsed by the AFL–CIO, the American Express Co., the Communications Workers of America, the Bank of America, the House Republican task force on privacy, the Maryland Bankers Association, and the National Association of Mutual Savings Banks.

I am optimistic that the Bill of Rights Procedures Act will become law in the 95th Congress.

Mr. President, S. 14 is virtually identical to the version of the Bill of Rights Procedures Act which I introduced as S. 3349 last year. The primary substantive change is a new provision which provides that—

Any financial institution, communication common carrier, credit card issuer or consumer reporting agency to which a subpoena is directed pursuant to sections 5 and 7 of this Title shall be entitled to reasonable costs incurred in compliance with such subpoenas and summonses.

I believe this to be a reasonable provision, one which is consistent with a related provision of the Tax Reform Act of 1976, which awarded such costs for IRS administrative summonses, and also with lower Federal court decisions which have awarded such reimbursement costs.

Mr. President, there is nothing startling or new in the Bill of Rights Procedures Act. It merely provides Americans with the privacy protections that they had thought were mandated by the fourth amendment, only to learn differently when Miller was decided by the Supreme Court.

Mr. President, I am most pleased to report that my State of Maryland has its own version of the Bill of Rights Procedures Act. Legislation passed this year makes it illegal for a bank or credit union to give out a client's records without that client's permission or in response to a subpoena or court order. In fact, Maryland is in the vanguard of States that have acted to guarantee the privacy of medical, psychological, adoption, welfare, personnel ,and school records. The records and data assembled by our State board of health and mental hygiene must remain confidential. And Maryland has a consumer reporting act, which limits the dissemination of consumer credit information.

I urge my colleagues to follow the lead of Maryland and other enlightened States and enact The Bill of Rights Procedures Act.

Mr. President, I ask unanimous consent that the text of the Bill of Rights Procedures Act be printed at this point in the Record. I also ask unanimous consent that press articles published in the aftermath of the Miller decision and commenting on the need for congressional action to protect the privacy of citizen's bank records, Justice Brennan's dissenting opinion in the Miller case, which discusses at length the decision of the California supreme court in Burrows against Superior Court, and the text of my address to the American Bar Association's annual meeting in Atlanta, in August 1976, titled "The Fourth Amendment in the Electronic Age," be printed in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 14

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Bill of Rights Procedures Act of 1977."

TITLE I—CONFIDENTIALITY OF FINANCIAL, TOLL, AND CREDIT RECORDS

DEFINITIONS

SECTION 1. For the purposes of this Act:

(a) The term "financial institution" means—

(1) a bank or trust company organized under the laws of any State or of the United States;

(2) a savings and loan association or building and loan association, or homestead association organized under the laws of any State or of the United States;

(3) a credit union organized under the laws of any State or of the United States; and

(4) any other organization chartered under the banking laws of any State and subject to the supervision of the bank supervisory authorities of a State.

(b) The term "financial records" means any original or any copy of—

(1) any debit or credit to a customer's deposit or share account with a financial institution; or

(2) any record held by a financial institution containing information pertaining to a customer's relationship with the financial institution.

(c) The term "person" means an individual, partnership, corporation, association, trust, or any other legal entity organized under the laws of a State or the United States.

(d) The term "customer" means any person who is patronizing or has patronized a financial institution and who is utilizing or has utilized a service offered by that financial institution, or who is subscribing or has subscribed to the services of a communication common carrier, or who is utilizing or has utilized the services of a credit card issuer,

or who is the subject of a consumer report assembled by a consumer reporting agency.

(e) The term "supervisory agency" means—

(1) the Federal Deposit Insurance Corporation;

(2) the Federal Savings and Loan Insurance Corporation;

(3) the Federal Home Loan Bank Board;

(4) the National Credit Union Administration;

(5) the Federal Reserve Board;

(6) the Comptroller of the Currency;

(7) the Federal Communications Commission.

(f) The term "communication common carrier" shall have the meaning given to "common carrier" in section 153(h) of title 47 of the United States Code.

(g) The term "toll records" means tickets, lists, or other detailed records of individual calls or messages, telegrams and similar messages, and messenger service charges, whether or not used as a basis for billing to customers.

(h) The term "credit card issuer" means any person which offers to the public any card, plate, coupon book, or other device which may be utilized in lieu of cash, check, or similar method of payment for the purpose of obtaining money, property, labor, or services.

(i) The term "consumer reporting agency" means any person which, for monetary fees, dues, or on a coopertaive nonprofit basis regularly engages in whole or in part in the practice of assembling or evaluating consumer credit information on consumers for the purpose of furnishing consumer reports to third persons, and which uses any means or facility of interstate commerce for the purpose of preparing or furnishing consumer reports as defined in the Fair Credit Reporting Act (Public Law 91–508, October 26, 1970, 84 Stat. 1136.).

(j) The term "credit records" means any record held by a credit card issuer which contains information pertaining to a customer's relationship with the credit card issuer or information relating to a customer contained in a consumer report assembled by a consumer reporting agency.

ACCESS TO RECORDS

SEC. 2. (a) No officer, employee, or agent of the United States, or any agency or department thereof, may obtain copies of, access to, or information contained in the financial records, toll records, or credit records of any customer in the possession of a financial institution, communication common carrier, credit card issuer, or consumer reporting agency unless the records are described with sufficient particularity to identify the information sought and:

(1) such customer has authorized such disclosure in accordance with section 4;

(2) such financial, toll or credit records are disclosed in response to an administrative subpena or summons which meets the requirements of section 5;

(3) such financial, toll or credit records are disclosed in response to a search warrant which meets the requirements of section 6; or

(4) such financial, toll or credit records are disclosed in response to a judicial subpoena which meets the requirements of section 7; or

"(5) such financial, toll or credit records are disclosed in accordance with the requirements of section 604(3) A, or C, of the Fair Credit Reporting Act (Public Law 91–508, October 26, 1970, 84 Stat. 1136)."

(b) Any customer whose records are subpoenaed pursuant to this Act shall have standing to move to quash or to seek other relief.

RESTRICTIONS ON THE RELEASE OF RECORDS

SEC. 3. (a) No financial institution, communication common carrier, credit card issuer, or consumer reporting agency, or any officer, employee, or agent thereof, may provide to any officer, employee, or agent of the United States, or any agency or department thereof, copies of, access to, or the information contained in, the records of any customer except in accordance with the requirements of section 4, 5, 6, or 7 of this title or section 604(3) (A) or (C) of the Fair Credit Reporting Act (Public Law 91–508, title VI, October 26, 1970, 84 Stat. 1136).

(b) This section shall not preclude a financial institution, communication common carrier, credit card issuer, or consumer reporting agency from notifying appropriate officials of suspected violations of the criminal law: *Provided, however,* That any access to customer records shall be governed by sections 2 and 3(a) of this title.

CUSTOMER AUTHORIZATIONS

SEC. 4. (a) A customer may authorize disclosure under section (2)(a)(1) if he or those seeking disclosure furnish to the financial institution, communication common carrier, credit card issuer, or consumer reporting agency a signed and dated statement by which the customer—

(1) authorizes in writing such disclosure in accordance with this section, which authorization shall not exceed a period of one year;

(2) identifies the financial, toll or credit records which are authorized to be disclosed;

(3) specifies the agencies or authorities to which such records may be disclosed;

(4) states that he understands that he has the right at any time to revoke the authorization; and

(5) states that he understands that he has the right at any time to obtain from the financial institution, communication common carrier, credit card issuer, or consumer reporting agency a copy of the record of examinations.

(b) No such authorization shall be required as a condition of doing business with such financial institution.

(c) The financial institution, communication common carrier, credit card issuer, and consumer reporting agency shall keep a record of all examinations of the customer's records made pursuant to this section, including the identity of the person examining toll or credit records, the governmental agency or department which he represents, and a copy of the authorization.

ADMINISTRATIVE SUBPOENAS AND SUMMONSES

SEC. 5. An officer, employee, or agent of the United States, or any department or agency thereof, in accordance with section 2(a)(2) and if otherwise authorized by law, may obtain from a financial institution, communication common carrier, credit card issuer, or consumer reporting agency copies of, access to, or information contained in the financial, toll, or credit records of any customer pursuant to an administrative subpoena or summons issued by the agency or department if—

(1) such subpoena or summons is sought in order to obtain information relevant to a legitimate law enforcement purpose; and

(2) a copy of the subpoena or summons has been personally received by the customer or mailed to his last known address by registered or certified mail on the date on which the subpoena was served on the financial institution, communication common carrier, credit card issuer, or consumer reporting agency together with the following notice:

"Records or information concerning your transactions held by the organization named in the attached summons are being sought by this (agency or department) for the following purpose: If you desire that such records or information not be made available, you should immediately notify this agency or department (self-addressed and postage paid envelope enclosed) in writing, signed, and dated.

"If neither you nor the organization named in the subpoena objects to the records or information being made available the records or information requested will be made available upon the expiration of 18 days from the date of delivery or mailing of this notice. If you or the organization named in the subpoena do object or otherwise fail to comply with the subpoena or summons this agency (department) shall have the option to apply to the United States District Court for the ——— District to seek enforcement of such subpoena or summons. If such action is taken you and the organization named in the subpoena shall be notified and shall have standing in court to object to enforcement of the subpoena or summons."

(3)(a) eighteen days have expired from the date of personal delivery or mailing of notice to the customer and within which time period neither the customer nor the financial institution, communication common carrier, credit card issuer, or consumer reporting agency has refused to comply with the subpoena or summons or has objected in writing to the record or information being made available and written certification of such failure to object is supplied to the person to whom the subpoena is directed; or

(b) if, after eighteen days have expired from the date of personal delivery or mailing of notice to the customer and the customer or the financial institution, communication common carrier, credit card issuer, or consumer reporting agency has objected in writing to the record or information being made available, or otherwise refused to comply with the subpoena or summons, and the agency or department which issued such subpoena or summons has made application to a judge of the appropriate United States District Court to seek enforcement of such subpoena or summons, and such judge has ordered the customer and the financial institution, communication common carrier, credit card issuer, or consumer reporting agency to comply. The customer and the financial institution, communication common carrier, credit card issuer, or consumer reporting agency shall have standing in any such action to enforce such subpoena or summons; and

(4) concurrent with service of an administrative subpoena or summons a notice is provided to the financial institution, communication common carrier, credit card issuer, or consumer reporting agency stating the rights, obligations, and liabilities of such organization under this Act.

The notice to the customer required pursuant to subsection (2) and (3) of this section may be waived in the case of an administrative subpoena or summons issued by the Internal Revenue Service in the interest of the collection of the tax liability of any customer against whom an assessment has been made or judgment rendered; or the liability at law or in equity of any transferee or fiduciary of any person against whom an assessment has been made or judgment rendered. Such administrative subpoena or summons shall be permitted only for the purpose of determining the existence and extent of the assets of the customer against whom the assessment has been made or judgment rendered.

SEARCH WARRANTS

SEC. 6. An officer, employee, or agent of the United States or of any agency or department thereof, may obtain the financial, toll, or credit records of any customer, from a financial institution, communication common carrier, credit card issuer, or consumer reporting agency under section 2(a)(3), if he obtains a search warrant pursuant to the Federal Rules of Criminal Procedure or to applicable State law.

JUDICIAL SUBPOENAS

SEC. 7. (a) An officer, employee, agent, or authority of the United States or any agency

or department thereof in accordance with section 2(a)(4), may request from a financial institution, communication common carrier, credit card issuer of consumer reporting agency copies of, access to, or information contained in, the financial, toll, or credit records of any customer pursuant to a judicial subpoena if—

(1) such subpoena is authorized by law and—

(A) for a grand jury subpoena, that such subpoena will produce information relevant to a legitimate law enforcement purpose;

(B) for any other judicial subpoena, that such subpoena will produce information relevant to the proceedings for which the subpoena has been issued; and

(2) a copy of the subpoena has been personally received by the customer or mailed to his last known address by registered or certified mail on the date on which the subpoena was served on the financial institution, communication common carrier, credit card issuer, or consumer reporting agency together with the following notice:

"Records or information concerning your transactions which are held by the organization named in the attached subpoena are being sought by this (agency or department or authority) for the following purpose:

If you desire that such records or information not be produced, you should within eighteen days apply to the court named in the subpoena to prohibit its enforcement. Otherwise, upon the expiration of eighteen days from the date of the delivery or mailing of this notice the records or information requested therein will be made available."; and

(3) eighteen days have expired from the date of personal delivery or mailing of notice to the customer within which period either the customer or the financial institution, communication common carrier, credit card issuer, or consumer reporting agency or both may move to quash such subpoena in the court named in the subpoena; and

(4) concurrent with service of a subpoena a notice is provided to the financial institution, communication common carrier, credit card issuer, or consumer reporting agency stating the rights, obligations, and liabilities of such organization under this Act.

(b) Upon application of an officer, employee, agent or authority of the United States, the court may grant such subpoena in accordance with subsection (a)(1) with a temporary delay of delivery or of mailing to the customer a copy of the subpoena and any notification of the existence of the subpoena, which delay shall not exceed ninety days following the date of issuance, if the court finds, on the basis of an affidavit or sworn testimony, that it has been affirmatively demonstrated that such notification would seriously jeopardize a continuing investigation of any of the criminal offenses listed in subsection (c). If the court so finds it shall enter an ex parte order granting the requested delay. Additional delays may be granted by the court upon application, but only in accordance with this subsection. The total period of time from service of the subpoena to notification of the customer shall not exceed one year, except of a judge of the Court of Appeals for the appropriate circuit finds on the basis of an affidavit or sworn testimony that there is probable cause to believe that a criminal offense listed in subsection (c) is being committed, has been committed, or is about to be committed, and that the records sought or made available pursuant to this Act are relevant to a continuing investigation of such offense; in which case such judge shall enter an ex parte order granting the requested delay. Such additional delays are not limited in number, but shall not exceed one hundred and eighty days each. Upon the expiration of the period of delay notification of the customer the following notice shall be delivered or mailed to him along with a copy of the subpoena:

"Records or information concerning your transactions which are held by the organization named in the enclosed subpoena were supplied to the authority named in the subpoena on (date) . Notification was withheld pursuant to a determination by the court that such notice would seriously jeopardize an investigation concerning .".

(c) Delay of notification of issuance of a subpoena may be sought pursuant to subsection (b) if such subpoena is issued in regard to any of the following offenses: Title 18, United States Code, section 201 (bribery of public officials and witnesses), section 224 (bribery in sporting contests), subsections (d), (e), (f), (g) (h), or (i) of section 844 (unlawful use of explosives), section 1084 (transmission of wagering information), section 1503 (influencing or injuring an officer, juror, or witness generally), section 1510 (obstruction of criminal investigations), section 1511 (obstruction of State or local law enforcement), section 1751 (Presidential assassinations, kidnaping, and assault), section 1951 (interference with commerce by threats of violence), section 1952 (interstate and foreign travel or transportation in aid of racketeering enterprises), section 1954 (offer, acceptance, or solicitation to influence operations of employee benefit plan), section 1955 (prohibition of business enterprises of gambling), section 659 (theft from interstate shipment), section 664 (embezzlement from pension and welfare funds), section 2314 and 2315 (interstate tranportation of stolen property), section 1963 (violations with respect to racketeer influenced and corrupt organizations) or section 351 (violations with respect to congressional assassination, kidnaping and assault), appendix, section 1202 (receipt, possession, or transportation of firearms); any offense punishable by imprisonment for more than one year under sections 2274 through 2277 of title 42, United States Code (relating to the enforcement of the Atomic Energy Act of 1954), or under title 18, United States Code, chapter 37 (relating to espionage), chapter 105 (relating to sabotage), chapter 115 (relating to treason), or chapter 102 (relating to riots); a violation of section 186 or section 501(c) of title 29, United States Code (dealing with restrictions on payments and loans to labor organizations), or any offense which involves murder, kidnaping, robbery, or extortion, and which is punishable under title 18, United States Code; any offense involving counterfeiting punishable under title 18, United States Code, sections 471, 472, or 473; any offense involving bankruptcy fraud or the manufacture, importation, receiving, concealment, buying, selling, or otherwise dealing in narcotic drugs, marihuana, or other dangerous drugs, punishable under any law of the United States; any offense including extortionate credit transactions under title 18, United States Code, sections 892, 893, or 894; or any conspiracy to commit any of the foregoing offenses.

(d) Within thirty days after the expiration of a delay (or each extension thereof) granted under subsection (b), the judge granting or denying the delay shall report to the Administrative Office of United States Courts—

(1) the fact that a delay or extension of delay was requested;

(2) the offense the investigation of which was the basis for the request for delay;

(3) the disposition of the request for delay;

(4) the total period of time for which notice had been previously withheld; and

(5) the identity of the investigative or law enforcement officer, authority or agency requesting the delay.

In April of each year the Director of the Administrative Office of the United States Courts shall transmit to the Congress a full and complete report concerning the number of applications for extension of delay and the number of extensions granted or denied during the preceding calendar year. Such report shall include a summary and analysis of the data required to be filed with the Administrative Office pursuant to this section. The Director of the Administrative Office of the United States Courts is authorized to issue binding regulations dealing with the content and form of the reports required to be filed by this section.

STATUTES OF LIMITATIONS

SEC. 8. Whenever a customer or other party has moved to quash a subpoena issued pursuant to sections (5) or (7), the running of the statutes of limitations for the offenses under investigation shall be suspended with respect to such customer or other party until the disposition of the motion by the court.

ACCESS

SEC. 9. Copies of, or the information contained in, financial, toll, or credit records obtained pursuant to this Act shall not be used or retained in any form for any purpose other than the specific statutory purpose for which the information was originally obtained, nor shall such information or records be provided to any other Government department or agency or other person except where the transfer of such information is specifically authorized by statute.

EXCEPTIONS

SEC. 10. (a) Nothing in this title prohibits the dissemination of any financial, toll, or credit information which is not identified with or identifiable as being derived from the financial, toll, or credit records of a particular customer.

(b) Subject to the limitations of section 9, nothing in this title prohibits examination by or disclosure of records to any supervisory agency solely in the exercise of its supervisory function or the making of reports or returns required under the Internal Revenue Code of 1954.

JURISDICTION

SEC. 11. An action to enforce any provision of this title may be brought in any appropriate United States district court without regard to the amount in controversy, or in any other court of competent jurisdiction, within three years from the date on which the violation occurs or the date of discovery of such violation, whichever is later.

CIVIL REMEDIES

SEC. 12. DAMAGES.—(a) Any person, financial institution communication common carrier, credit card issuer, consumer reporting agency, or any officer, employee, or agent of a financial institution, communication common carrier, credit card issuer consumer reporting agency, or of the United States Government or any agency or department thereof who knowingly obtains or discloses one or more financial toll, or credit records in violation of this title is liable to the customer or other party to whom such records relate for—

(1) any actual damages sustained by the customer as a result of the disclosure,

(2) such punitive damages as the court may allow, where the violation is found to have been willful, and

(3) in the case of any successful action to enforce liability under this section, reasonable attorney fees and other litigation costs reasonably incurred.

(b) INJUNCTIVE RELIEF.—In addition to any other remedy contained in this section or otherwise available, injunctive relief shall be available to any person aggrieved by a violation or threatened violation of this title. In any case in which the complainant

has substantially prevailed reasonable attorney fees and other litigation costs reasonably incurred may be recovered."

SEC. 13. COSTS OF COMPLIANCE WITH SUBPOENAS

Any financial institution, communication common carrier, credit card issuer or consumer reporting agency to which a subpoena is directed pursuant to sections 5 and 7 of this Title shall be entitled to reasonable costs incurred in compliance with such subpoenas and summonses.

TITLE II—MAIL COVERS

DEFINITION

SEC. 1. A mail cover is the procedure by which a systematic record or inspection is made of any data appearing on the outside cover of any mail matter, including, but not limited to, the name and address of the sender, the place and date of postmarking, and the class of mail.

WHEN PERMITTED

SEC. 2. No mail cover shall be initiated—

(a) without the written authorization of the chief postal inspector, a regional chief postal inspector, or an inspector in charge of the United States Postal Service, except that if requested by the United States Attorney General the chief postal inspector shall authorize a mail cover pursuant to the requirements of this section; and

(b) unless the chief postal inspector, a regional chief postal inspector, an inspector in charge, or the United States Attorney General has good cause to believe, on the basis of an affidavit setting forth the specific reasons for the proposed mail cover and the facts on which the applicant relies, that such procedure is necessary in regard to a continuing investigation of the commission or attempted commission of a felony or is necessary to secure information in the interest of locating a fugitive; and

(c) unless the chief postal inspector, a regional chief postal inspector, or an inspector in charge has received a written request for such mail cover from the director or chief officer of an authority of a Federal, State, or local government one of whose primary functions is to investigate the commission or attempted commission of a felony, or unless the chief postal inspector, a regional chief postal inspector, or an inspector in charge has good cause to believe that the initiation of such mail cover is necessary to the investigation of the commission or attempted commission of a postal felony.

TIME PERIODS

SEC. 3. A mail cover may be conducted for a period of thirty days. Authorization for continuance of a mail cover for additional periods of thirty days may be obtained, but only in accordance with this title. In no event shall the total period of time for a mail cover exceed one year, unless a judge of a United States court finds on the basis of an affidavit or sworn testimony that the termination of such mail cover would seriously jeopardize a continuing investigation of the commission or attempted commission of a felony or of the location of a fugitive. If such judge so finds he may authorize the continuance of the mail cover for additional periods not exceeding one year each. In such event, the requesting authority shall make application for continuance of the mail cover for periods not exceeding thirty days pursuant to section 2.

EMERGENCY AUTHORIZATION

SEC. 4. If the chief postal inspector or a regional chief postal inspector has good cause to believe that a speedy initiation of a mail cover is necessary in regard to a continuing investigation of the commission or attempted commission of a felony, or of the location of a fugitive he may authorize such mail cover on the basis of an oral request from the director or chief officer of an authority of a Federal, State, or local government one of whose primary functions is to investigate the commission or attempted commission of a felony: *Provided*,

That such oral request is followed within forty-eight hours by a written request and supporting affidavit to the chief postal inspector or regional chief postal inspector who authorized the mail cover, and

That no record of any data received from such mail cover shall be made available to the requesting authority until such written request and supporting affidavit have been received and such mail cover has been approved pursuant to the requirements of section 2.

NOTICE

SEC. 5. Within a reasonable time, but not later than ninety days after the termination of the period for a mail cover, the chief postal inspector, regional chief postal inspector, or inspector in charge who authorized the mail cover, shall provide to the person whose mail is the subject of the mail cover a notice of the existence, dates, and purpose of such mail cover, except that such notice shall be waived if a judge of a United States court finds on the basis of an affidavit or sworn testimony that the notice of such mail cover would seriously jeopardize a continuing investigation of the commission or attempted commission of a felony or of the location of a fugitive.

RECORDS

SEC. 6. (a) All requests for mail covers, with records of action thereon, shall be within the custody of the chief postal inspector.

(b) The regional chief postal inspectors and the inspectors in charge shall submit a copy of each mail cover request received together with a report of any action thereon to the chief postal inspector.

(c) If the chief postal inspector determines that a mail cover was improperly initiated by a regional chief postal inspector or an inspector in charge, all date and records of information received from such mail cover shall be impounded and the requesting authority notified of the discontinuance of the mail cover and the reasons therefor.

(d) No file or record pertaining to a mail cover shall be retained for a period in excess of eight years.

REPORTING REQUIREMENT

SEC. 7. In April of each year the chief postal inspector shall transmit to the Congress a full and complete report for the immediately preceding year of—

(a) the number of requests for mail covers and the number of authorizations granted listed by each Postal Inspection Service division for which such authorizations were made;

(b) the identity of the law enforcement agencies making requests for mail covers listed by each Postal Inspection Service division for which such requests were made; and

(c) a list of the offenses for which mail cover requests were received listed by each Postal Inspection Service division for which such requests were made.

CIVIL REMEDIES

SEC. 8. DAMAGES.—(a) Any officer, agent, or employee of the United States or any department or agency thereof or of a State or political subdivision thereof who initiates a mail cover in violation of this title is liable to the addressee for—

(1) any actual damages sustained as a result of the mail cover, but not less than liquidated damages computed at the rate of $100 a day for each day of violation or $5,000, whichever is higher;

(2) such punitive damages as the court may allow, where the violation is found to have been willful, and

(3) in the case of any successful action to enforce liability under this section, reasonable attorney fees and other litigation costs reasonably incurred.

(b) INJUNCTIVE RELIEF.—In addition to any other remedy contained in this section or otherwise available, injunctive relief shall be available to any person aggrieved by a violation or threatened violation of this title. In any case in which the complainant has substantially prevailed, reasonable attorney fees and other litigation costs reasonably incurred may be recovered.

TITLE III—AMENDMENTS TO CHAPTER 119, TITLE 18, UNITED STATES CODE

COMMUNICATION COMMON CARRIER PRACTICES

SECTION 1. (a) Section 2510 of title 18, United States Code, is amended by adding the following new definitions:

"(12) 'supervisory observing' means the interception by an officer, employee, or agent of a communication common carrier of any oral or wire communication of an officer, employee, or agent of such communication common carrier;

"(13) 'service observing' means any interception which is a necessary incident to the rendition of service, by a communication common carrier, of the voice content of a customer-to-customer oral or wire communication for purposes other than supervisory observing or protection against theft of service; and

"(14) 'protection against theft of service' means any action on the part of a communication common carrier the purpose of which is to protect such communication common carrier against a violation of section 1343 of title 18, United States Code (fraud by wire, radio, or television) or similar State statute.".

(b) Section 2511(2)(a)(i) of such title 18 is amended to read: "It shall not be unlawful for an officer, employee, or agent of a communication common carrier, acting in the official capacity of his employment, to engage in—

"(A) supervisory observing: *Provided*, That—

"(1) the officer, employee, or agent against whom such interception is directed has been given prior notice in writing of the likelihood of such interception,

"(2) such interception is engaged in solely for the purposes of training or evaluation of employee performance,

"(3) such interception is engaged in solely on communication facilities which are clearly identified as being subject to possible interception, and

"(4) such interception involves no recording of the voice content of any communication;

"(B) service observing: *Provided*, That—

"(1) the interception of the voice content of any customer-to-customer oral or wire communication shall not exceed ten seconds without the imposition of an intercept announcement signal or other actual notice to the customer, and

"(2) such interception involves no recording of the voice content of any communication;

"(C) interception of any oral or wire communication for purposes of protection against theft of service: *Provided*, That—

"(1) such communication common carrier shall not intercept or record more than one hundred and twenty seconds of the voice content of any oral or wire communication intercepted in the interest of protection against theft of service.".

SUPERVISORY OBSERVING BY OTHER THAN COMMUNICATION COMMON CARRIERS

SEC. 2. Section 2516(2)(d) is amended by adding at the end thereof the following:

Provided, That no interception of any wire or oral communication by a person directed against an employee which is authorized by

prior consent of such employee, shall be lawful under this Chapter unless:

(i) such employee against whom such interception is directed has been given prior notice in writing of the likelihood of such interception, and

(ii) such interception is engaged in solely for the purpose of training or evaluation of employee performance, and

(iii) such interception is engaged in solely on communication facilities which are clearly identified as being subject to possible interception, and

(iv) such interception involves no recording on tape or wire or other comparable device of the voice content of any communication."

COURT ORDERED INTERCEPTIONS IN TOLL FRAUD CASES

SEC. 2. Section 2516(I)(c) of such title 18 is amended by deleting the semicolon and adding at the end thereof the following: ", section 1343 (fraud by wire, radio, or television):".

REPORTING REQUIREMENTS

SEC. 3. Section 2519 of such title 18 is amended by adding at the end thereof the following new subsection:

"(4) in January of each year, each communication common carrier shall report to the Federal Communications Commission concerning the interceptions made by it during the preceding calendar years for the protection of its service against theft of service, including a description of all such interceptions, the nature and frequency of the incriminating communications intercepted, the number of persons whose communications were intercepted, the total number of hours of recording of communications intercepted, and the average minutes of such recording for each communication intercepted. In April of each year the Chairman of the Federal Communications Commission shall transmit to Congress a full and complete report of the information received by the Commission pursuant to this subsection.".

POSSESSION OF DEVICE FOR THEFT OF SERVICE

SEC. 4. Sections 2512 and 2513 of such title 18, are amended to read as follows:

"§ 2512. Manufacture, distribution, possession, and advertising of wire or oral communication intercepting devices or devices for theft of service prohibited

"(1) Except as otherwise provided in this chapter, any person who willfully—

"(a) sends through the mail, or sends or carries in interstate or foreign commerce, any electronic, mechanical, or other device, knowing or having reason to know that the design of such device renders it primarily useful for the purpose of the surreptious interception of wire or oral communications or the surreptitious theft of a communication common carrier's service;

"(b) manufactures, assembles, possesses, or sells any electronic, mechanical, or other device, knowing or having reason to know that the design of such device renders it primarily useful for the purpose of the surreptitious interception of wire or oral communications or the surreptitious theft of a communication common carrier's service, and that such device or any component thereof has been or will be sent through the mail or transported in interstate or foreign commerce; or

"(c) places in any newspaper, magazine, handbill, or other publication any advertisement of—

"(i) any electronic, mechanical, or other device knowing or having reason to know that the design of such devise renders it primarily useful for the purpose of the surreptitious interception of wire or oral communications or the surreptitious theft of a communciation common carrier's service; or

"(ii) any other electronic, mechanical, or other device, where such advertisement promotes the use of such device for the purpose of the surreptitious interception of wire or oral communications or the surreptitious theft of a communication common carrier's service,

knowing or having reason to know that such advertisement will be sent through the mail or transported in interstate or foreign commerce, shall be fined not more than $10,000 or imprisoned not more than five years, or both.

"(2) It shall not be unlawful under this section for—

"(a) a common carrier or an officer agent, or employee of, or a person under contract with, a common carrier, in the normal course of the common carrier's business, or

"(b) an officer, agent, or employee of, or a person under contract with, the United States, a State, or a political subdivision thereof, in the normal ocurse of the activities of the United States, a State or a political subdivision thereof, to:

Send through the mail, send or carry in interstate or foreign commerce, or manufacture, assemble, possess, or sell any electronic, mechanical, or other device knowing or having reason to know that the design of such device renders it primarily useful for the purpose of the surreptitious interception of wire or oral communications or the surreptitious theft of a communication common carrier's service.

"§ 2513. Confiscation of wire or oral communications intercepting devices or devices for theft of service

"Any electronic, mechanical, or other device used, sent, carried, manufactured, assembled, possessed, sold, or advertised in violation of section 2511 or section 2512 of this chapter may be seized and forfeited to the United States. All provisions of law relating to (1) the seizure, summary and judicial forfeiture, and condemnation of vessels, vehicles, merchandise, and baggage for violations of the customs laws contained in title 19 of the United States Code, (2) the disposition of such vessels, vehicles, merchandise, and baggage or the proceeds from the sale thereof, (3) the remission or mitigation of such forfeiture, (4) the compromise of claims, and (5) the award of compensation to informers in respect of such forfeitures, shall apply to seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this section, insofar as applicable and not inconsistent with the provisions of this section; except that such duties as are imposed upon the collector of customs or any other person with respect to the seizure and forfeiture of vessels, vehicles, merchandise, and baggage under the provisions of the customs laws contained in title 19 of the United States Code shall be performed with respect to seizure and forfeiture of electronic, mechanical, or other intercepting devices or devices for the surreptitious theft of a communications common carrier's service under this section by such officers, agents, or other persons as may be authorized or designated for that purpose by the Attorney General.".

TITLE IV—CRIMINAL PENALTIES

Whoever, being an officer, agent or employee of the United States or any department or agency thereof—

(a) willfully violates any provision of Title I or II of this Act shall be fined not more than $5,000 or imprisoned not more than 6 months, or both;

(b) having knowledge of the commission of a violation of any provision of Title I or II of this Act by another officer, agent or employee of the United States or any department or agency thereof, fails to report as soon as possible such violation to an attorney in the Office of Professional Responsibility of the Department of Justice shall be fined not more than $1,000.

TITLE V—CONGRESSIONAL SUBPOENAS

Nothing in this Act shall apply to subpoenas issued by the United States Congress.

[Supreme Court of the United States—No. 74-1179]

ON WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE FIFTH CIRCUIT

[April 21, 1976]

United States, Petitioner, *v.* Mitchell Miller.

Mr. JUSTICE BRENNAN, dissenting.

The pertinent phrasing of the Fourth Amendment—"The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures shall not be violated"—is virtually in *haec verba* with Art. I, § 13, of the California Constitution—"The right of the people to be secure in their persons, houses, papers, and effects against unreasonable seizures and searches may not be violated." The California Supreme Court has reached a conclusion under Art. I, § 13, in the same factual situation, contrary to that reached by the Court today under the Fourth Amendment.[1] I dissent because in my view the California Supreme Court correctly interpreted the relevant constitutional language.

In *Burrows* v. *Superior Court*, 13 Cal. 3d 238, 529 P. 2d 590, 118 Cal. Rptr. 166 (1974), the question was whether bank statements or copies thereof relating to an accused's bank accounts obtained by the sheriff and prosecutor without benefit of legal process[2] but with the consent of the bank, were acquired as a result of an illegal search and seizure. The California Supreme Court held that the accused had a reasonable expectation of privacy in his bank statements and records, that the voluntary relinquishment of such records by the bank at the request

---

[1] The expectation of privacy relied upon by respondent to support his Fourth Amendment claim is similar to that rejected as to similar documents in *Couch* v. *United States*, 409 U.S. 322 (1973). But in *Couch* the taxpayer had delivered the documents to her accountant for preparation of income tax returns "knowing that mandatory disclosure of much of the information therein is required in an income tax return." *Id.*, at 335; see *id.*, at 337 (BRENNAN, J., concurring). In contrast, in the instant case the banks were obliged only to respond to lawful process, *California Bankers Assn.* v. *Shultz*, 416 U.S. 21, 52–54 (1974), and had no obligation to disclose the information voluntarily. The expectation of privacy asserted in *Fisher* v. *United States*, —— U.S. —— (1976), is distinguishable on similar grounds.

[2] The Court distinguishes *Burrows* on the ground that it involved no legal process, while the instant case involves legal process in the form of subpoenas *duces tecum*. *Ante*, at 10 n. 7. But the Court also states that the Fourth Amendment issue does not turn on whether the subpoenas were defective. *Ante*, at 6 n. 2.

In any event, for present purposes I would accept the Court of Appeals' conclusion that the subpoenas in this case were defective. Moreover, although not relied upon by the Court of Appeals, neither the bank nor the Government notified respondent of the disclosure of his records to the Government. In my view, the absence of such notice is not just "unattractive," *ante*, at 8 n. 5; a fatal constitutional defect inheres in a process that omits provision for notice to the bank customer of an invasion of his protected Fourth Amendment interest.

of the sheriff and prosecutor did not constitute a valid consent by the accused, and that the acquisition by the officers of the records therefore was the result of an illegal search and seizure. In my view the same conclusion, for the reasons stated by the California Supreme Court, is compelled in this case under the practically identical phrasing of the Fourth Amendment. Addressing the threshold question whether the accused's right of privacy was invaded, and relying in part on the decision of the Court of Appeals in this case, Mr. Justice Mosk stated in his excellent opinion for a unanimous court:

"It cannot be gainsaid that the customer of a bank expects that the documents, such as checks, which he transmits to the bank in the course of his business operations, will remain private, and that such an expectation is reasonable. The prosecution concedes as much, although it asserts that this expectation is not constitutionally cognizable. Representatives of several banks testified at the suppression hearing that information in their possession regarding a customer's account is deemed by them to be confidential.

"In the present case, although the record establishes that copies of petitioner's bank statements rather than his checks were provided to the officer, the distinction is not significant with relation to petitioner's expectation of privacy. That the bank alters the form in which it records the information transmitted to it by the depositor to show the receipt and disbursement of money on a bank statement does not diminish the depositor's anticipation of privacy in the matters which he confides to the bank. A bank customer's reasonable expectation is that, absent compulsion by legal process, the matters he reveals to the bank will be utilized by the bank only for internal banking purposes. Thus, we hold petitioner had a reasonable expectation that the bank would maintain the confidentiality of those papers which originated with him in check form and of the bank statements into which a record of those same checks had been transformed pursuant to internal bank practice.

"The People assert that no illegal search and seizure occurred here because the bank voluntarily provided the statements to the police, and the bank rather than the police conducted the search of its records for papers relating to petitioner's accounts. If, as we conclude above, petitioner has a reasonable expectation of privacy in the bank statements, the voluntary relinquishment of such records by the bank at the request of the police does not constitute a valid consent by this petitioner. . . . It is not the right of privacy of the bank but of the petitioner which is at issue, and thus it would be untenable to conclude that the bank, a neutral entity with no significant interest in the matter, may validly consent to an invasion of its depositors' rights. However, if the bank is not neutral, as for example where it is itself a victim of the defendant's suspected wrongdoing, the depositor's right of privacy will not prevail.

"Our rationale is consistent with the recent decision of *United States* v. *Miller* (5th Cir. 1974), 500 F. 2d 751. In *Miller*, the United States Attorney, without the defendant's knowledge, issued subpoenas to two banks in which the defendant maintained accounts, ordering the production of 'all records of accounts' in the name of the defendant. The banks voluntarily provided the government with copies of the defendant's checks and a deposit slip; these items were introduced into evidence at the trial which led to his conviction. The circuit court reversed the conviction. It held that the defendant's rights under the Fourth Amendment were violated by the search because the subpoena was issued by the United States Attorney rather than by a court or grand jury, and the bank's voluntary compliance with the subpoena was irrelevant since it was the depositor's right to privacy which was threatened by the disclosure.

"We hold that any bank statements or copies thereof obtained by the sheriff and prosecutor without the benefit of legal process were acquired as the result of an illegal search and seizure (Cal. Const., art. I, § 13), and that the trial court should have granted the motion to suppress such documents.

* * * * *

"The underlying dilemma in this and related cases is that the bank, a detached and disinterested entity, relinquished the records voluntarily. But that circumstance should not be crucial. For all practical purposes, the disclosure by individuals or business firms of their financial affairs to a bank is not entirely volitional, since it is impossible to participate in the economic life of contemporary society without maintaining a bank acount. In the course of such dealings, a depositor reveals many aspects of his personal affairs, opinions, habits and associations. Indeed, the totality of bank records provides a virtual current biography. While we are concerned in the present case only with bank statements, the logical extension of the contention that the bank's ownership of records permits free access to them by any police officer extends far beyond such statements to checks, savings, bonds, loan applications, loan guarantees, and all papers which the customer has supplied to the bank to facilitate the conduct of his financial affairs upon the reasonable assumption that the information would remain confidential. To permit a police officer access to these records merely upon his request, without any judicial control as to relevancy or other traditional requirements of legal process, and to allow the evidence to be used in any subsequent criminal prosecution against a defendant, opens the door to a vast and unlimited range of very real abuses of police power.

"Cases are legion that condemn violent searches and invasions of an individual's right to the privacy of his dwelling. The imposition upon privacy, although perhaps not so dramatic, may be equally devastating when other methods are employed. Development of photocopying machines, electronic computers and other sophisticated instruments have accelerated the ability of government to intrude into areas where a person normally chooses to exclude from prying eyes and inquisitive minds. Consequently judicial interpretations of the reach of the constitutional protection of individual privacy must keep pace with the perils created by these new devices." 13 Cal. 3d, at 243–248, 529 P. 2d, at 593–596, 118 Cal. Rptr., at 169–172 (footnote omitted).

The California Supreme Court also addressed the question of the relevance of *California Bankers Assn.* v. *Shultz*, 416 U.S. 21 (1974). In my view, for the reasons stated in *Burrows*, the decision of the Court of Appeals under review today, is in no way inconsistent with *California Bankers*.[3] The court said:

"[*California Bankers*] held, in a six-three decision, that the bank's rights under the Fourth Amendment were not abridged by the regulation, and that the depositor plaintiffs lacked standing to challenge the reporting requirement because there was no showing that they engaged in the type of transaction to which the regulation referred.

"The concurring views of two justices who provided the necessary votes to create a majority are of particular interests. Justice Powell's opinion, joined by Justice Blackmun, [416 U.S., at 78,] makes clear that a significant extension of the reporting requirement would pose substantial constitutional questions, and that concurrence with the majority was based upon the provisions of the act as narrowed by the regulations. He wrote, 'In their full reach, the reports apparently authorized by the open-ended language of the Act touch upon intimate areas of an individual's personal affairs. Financial transactions can reveal much about a person's activities, associations, and beliefs. At some point, governmental intrusion upon these areas would implicate legitimate expectations of privacy. Moreover, the potential for abuse is particularly acute where, as here, the legislative scheme permits access to this information without invocation of the judicial process. In such instances, the important responsibility for balancing societal and individual interests is left to unreviewed executive discretion, rather than the scrutiny of a neutral magistrate. United States v. United States District Court, 407 U.S. 297, 316–317.' [416 U.S., at 78–79.]

"Justices Douglas and Marshall dissented on the ground that the act violated the Fourth Amendment. Justice Brennan also filed a dissent, stating that the recordkeeping and reporting requirements of the act constituted an impermissibly broad grant of power to the Secretary.

". . . [T]he only federal case decided after *Shultz* and directly confronting the issue of the depositor's rights is entirely consistent with the views we have set forth above. . . . *Miller* holds that *Shultz* may not be interpreted as 'proclaiming open season on of particular interests. Justice Powell's opin ion, joined by Justice Blackmun, [416 U.S., at 78,] makes clear that a significant extension of the reporting requirement would pose substantial constitutional questions, and that concurrence with the majority was based upon the provisions of the act as narrowed by the regulations. He wrote, 'In their full reach, the reports apparently authorized by the open-ended language of the Act touch upon intimate areas of an individual's personal affairs. Financial transactions can reveal much about a person's activities, associations, and beliefs. At some point, governmental intrusion upon these areas would implicate legitimate expectations of privacy. Moreover, the potential for abuse is particularly acute where, as here, the legislative scheme permits access to this information without invocation of the judicial process. In such instances, the important responsibility for balancing societal and individual interests is left to unreviewed executive discretion, rather than the scrutiny of a neutral magistrate. United States v. United States District Court, 407 U.S. 297, 316–317.' [416 U.S., at 78–79.]

"Justices Douglas and Marshall dissented on the ground that the act violated the Fourth Amendment. Justice Brennan also filed a dissent, stating that the recordkeep- ing and reporting requirements of the act constituted an impermissibly broad grant of power to the Secretary.

". . . [T]he only federal case decided after *Shultz* and directly confronting the issue of the depositor's rights is entirely consistent with the views we have set forth above. . . . *Miller* holds that *Shultz* may not be interpreted as 'proclaiming open season on personal bank records' or as permitting the government to circumvent the Fourth Amendment by first requiring banks to copy their depositors' checks and then calling upon the banks to allow inspection of those copies without appropriate legal process." 13 Cal. 3d, at 246–247, 529 P. 2d, at 595–596, 118 Cal. Rptr., at 171–172 (footnote omitted).

---

[3] I continue to believe that the reporting and recordkeeping requirements of the Bank Secrecy Act are unconstitutional. *California Bankers Assn.* v. *Shultz*, 416 U.S. at 91 (Brennan, J., dissenting). But I disagree with the Court's reasoning in this case even assuming the constitutionality of the Act, and therefore it is unnecessary for me to rely on the infirmities inherent in the Act.

I would therefore affirm the judgment of the Court of Appeals. I add only that *Burrows* strikingly illustrates the emerging trend among high state courts of relying upon state constitutional protections of individual liberties [4]—protections pervading counterpart provisions of the United States Constitution, but increasingly being ignored by decisions of this Court. For the most recent examples in this Court, but only in the privacy and Fourth Amendment areas, see, *e.g.*, *Kelly* v. *Johnson*, 425 U.S. —— (1976); *Doe* v. *Commonwealth's Atty.*, 425 U.S. —— (1976); *Paul* v. *Davis*, 424 U.S. —— (1976); *United States* v. *Watson*, 423 U.S. —— (1976).

[From the Washington Star, Apr. 23, 1976]

PRIVACY AT THE BANK

No doubt about it—easy government access to personal banking records is, as Congress found when it wrote the 1970 Bank Secrecy Act, marvelously useful in "criminal, tax and regulatory investigations and proceedings." It facilitates the pursuit of white-collar crime—as we are reminded in "All The President's Men" by the tracing of the so-called "Dahlberg check" as a link between the Nixon re-election committee and the Watergate burglary.

One doesn't ordinarily think of the distilling of non-taxpaid whiskey as an exalted example of "white-collar" crime. But a whiskey tax case gave rise this week to an important Supreme Court pronouncement on the Bank Secrecy Act. The result, in our view, is a disturbing aggression against personal privacy.

Mitch Miller of Macon, Ga., a distiller in question, had his records at two Georgia banks subpoened and examined, without notice, by U.S. Treasury agents. The records showed he had rented a truck in which authorities had found a whiskey still and "raw material" for the making of whiskey; also that Mr. Miller had purchased "a quantity of sheet metal and metal pipe." Thus his private bank records linked him to a crime. He was indicted, tried and convicted; but the Fifth Circuit Court of Appeals threw out the conviction—justifiably, in our view—on Fourth Amendment grounds. The Supreme Court this week reinstated his conviction.

The line of reasoning pursued by Congress in passing the Bank Secrecy Act (which requires banks to retain records) and the casual investigative procedures ratified by Justice Powell's opinion in the Georgia case greatly diminish the privacy one may expect in bank transactions. The Court had already upheld the act itself. But in the earlier case it had said little concerning the control of investigative access to bank records. This week the Court spoke on the latter issue, and in our view spoke with scant consideration for inherent rights of privacy.

Indeed, Justice Powell's argument seems to us to dismiss common-sense notions of privacy almost cavalierly. The thrust of the argument is that bank transactions, however personal they may seem to us, are far more public than personal. Statements, balances checks, loan information, etc., are not the customer's private papers; they are "the business records of the banks." Checks "are not confidential communications but negotiable instruments to be used in commercial transactions." Moreover, "all the documents obtained (from Mr. Miller's Georgia banks) . . . contain only information voluntarily conveyed to the banks and exposed to their employees in the ordinary course of business"! The gist of Justice Powell's opinion seems, then, to be this: If you use a bank, use it at your own risk and be ready for the world—and the police and G-men and God knows who else who happens to be curious about your financial affairs—to know everything about your banking transactions. And expect no protection from the Fourth Amendment: its guarantees of security for "personal papers and effects" don't apply at the neighborhood bank.

The other side of the argument—to our minds a more appealing side than the Supreme Court majority perceived—was well stated in a recent opinion by the California Supreme Court:

"For all practical purposes," said that court, "the disclosure by individuals or business firms of their financial affairs to a bank is not entirely volitional, since it is impossible to participate in the economic life of contemporary society without maintaining a bank account. In the course of such dealings, a depositor reveals many aspects of his personal affairs, opinions, habits and associations. Indeed, the totality of bank records provides a virtual current biography."

Well said. And true. And since it is true, the use of search warrants, together with prior notice to a subject of investigation and his lawyers, seems more than a mere amenity. Otherwise, the way is open to every imaginable kind of fishing expedition into the financial affairs of any citizen with a bank account. In the words of the California Supreme Court, again, unregulated access to personal bank records "open the door to a vast and unlimited range of very real abuses of police power."

It is shocking that the law of the United States should now hold otherwise.

[From the Washington Post, Apr. 26, 1976]

THE NONPRIVACY OF BANK ACCOUNTS

The Supreme Court is continuing to interpret the right of privacy so narrowly as to give citizens little or no protection against governmental intrusion into many aspects of their everyday personal affairs. A notable example was the Court's 7–2 ruling on Wednesday that no constitutionally protected zone of privacy has been invaded when the government subpoenas records of a person's banking transactions from the bank.

The decision upheld the traditional view that the records of banks, like those of telephone companies, credit-card firms and other businesses, belong to the company, not the customer. Even though sensitive personal information is often involved, this approach gives the customer no right to intervene—or even to be notified—before the business opens up the records to a law-enforcement officer. In the case decided the other day, the citizen involved—who happened to be accused of operating an illegal still—claimed that his banks' compliance with federal subpoenas violated his expectation of privacy in dealing with the banks. A lower federal court had agreed, but the High Court did not.

The most disturbing aspect of this decision is the Court's refusal to recognize that banking involves any reasonable claims of confidentiality at all. Justice Lewis F. Powell Jr., for one, seems to have modified his views along the way to this result. In an earlier case upholding government record-keeping rules, Justice Powell wrote, "Financial transactions can reveal much about a person's activities, associations and beliefs. At some point, governmental intrusion upon these areas would implicate legitimate expectations of privacy." The other day, however, Justice Powell wrote for the Court that checks and deposit slips "are not confidential communications but negotiable instruments" and "contain only information voluntarily conveyed to the banks and exposed to their employees in the ordinary course of business." Thus he concluded that no legitimate expectation of privacy is involved; on the contrary, any depositor "takes the risk" that a bank will share this information with the government.

That concept of the banking relationship is not, obviously, the one held by most bankers or most of their customers. The average citizen assumes that his transactions will be kept confidential, and that bank employees will use information about his accounts only for banking purposes. Even this limited disclosure is not entirely voluntary; as the California Supreme Court said recently, "It is impossible to participate in the economic life of contemporary society without maintaining a bank account." And it is precisely the "ordinary" kinds of personal business that should enjoy the most protection against improper or excessive scrutiny by government.

By refusing to acknowledge any legitimate confidentiality in this field, the Court has left the privacy of a wealth of detailed information about virtually all Americans entirely in the hands of the banks and other firms with which they deal. Many companies do regard this as a solemn trust; a growing number, for example, notify a customer when information about his account is demanded by the government. Others do not. Some do not even wait for proper subpoenas, but turn over information in response to the most casual request by law-enforcement officers. Thus individuals enjoy uneven protection at best, while the companies bear the burdens of trying to judge the propriety of official demands in cases they know little about.

Since the Court has refused to find any constitutional defect in this state of affairs, the remedy will have to come from Congress. After years of intermittent discussion, a House Judiciary subcommittee has recommended legislation that would insure citizens notice and a chance to challenge official demands for records of their dealings with financial institutions, telephone companies, credit-card issuers and the like. The notice requirement could be waived only if a judge found that advising the individual would seriously jeopardize the investigation of specified crimes. The bill (H.R. 214) ought

See also Wilkes, The New Federalism in Criminal Procedure: State Court Evasion of the Burger Court, 62 Ky. L. J. 421 (1974); Wilkes, More on the New Federalism in Criminal Procedure, 63 Ky. L. J. 873 (1975); Falk, The State Constitution: A More Than "Adequate" Nonfederal Ground, 61 Cal. L. Rev. 273 (1973); Project Report, Toward an Activist Role for State Bills of Rights, 8 Harv. Civ. Rights-Civ. Lib. L. Rev. 271 (1973). In the past, it might have been safe for counsel to raise only federal constitutional issues in state courts, but the risks of not raising state law questions are increasingly substantial, as revealed by a colloquy during argument in *Michigan* v. *Mosley*, *supra*:

"QUESTION. Why can't you argue all of this as being contrary to the law and the Constitution of the State of Michigan?

"Mr. ZIEMBA. I can because we have the same provision in the Michigan Constitution of 1963 as we have in the Fifth Amendment of the Federal Constitution, certainly.

"QUESTION. Well, you argued the whole thing before.

"Mr. ZIEMBA. In the Court of Appeals?

"QUESTION. Yes.

"Mr. ZIEMBIA. I really did not touch upon—I predicated my entire argument on the Federal Constitution, I must admit that. I did not mention the equivalent provision of the Michigan Constitution of 1963, although I could have. And I may assure this Court that at every opportunity in the future, I shall.

[Laughter.]

"QUESTION. But you hope you don't have the opportunity in this case.

"Mr. ZIEMBA. That's right." Tr. of Oral Arg. 43–44.

It would be unwise for counsel to rely on state courts to consider state law questions *sua sponte*. But see *State* v. *Johnson*, 68 N.J. 349, 346 A. 2d 66 (1975).

to be passed. It would give force to the concept of confidentiality in everyday financial dealings which most people have been banking on, but which the high court has unaccountably failed to grasp.

[From the CONGRESSIONAL RECORD, Sept. 14, 1976]

THE FOURTH AMENDMENT IN THE ELECTRONIC AGE

(By Senator CHARLES McC. MATHIAS, JR.)

In 1817 former President John Adams wrote to a friend who had asked him to recall the genesis of the American Revolution. Age had not dimmed Adams' passion, or his memory of the events that had liberated his country from England. He went straight to the first of the great dramas in our long advance toward libertarianism. Richard Harris, in his New Yorker essay on the fourth amendment, has given us a detailed account of that drama, and those events. Today I'd like to touch the highlights.

"The scene", Adams wrote, "is in the council chamber in the month of February, 1761 . . . in this chamber, round a great fire, were seated five judges, with lieutenant-governor Hutchinson at their head, as chief justice, all arrayed in their new, fresh, rich robes of scarlet English broadcloth; in their large cambric bands, and immense judicial wigs".

John Adams was a young lawyer of 25. He and every other member of the bar of Middlesex County and Boston sat in the chamber that day, also arrayed in the gowns and wigs of English tradition. Adams took notes, and 57 years later resurrected the scene, which echoes today as powerfully as ever, vital in our law and heritage.

At issue were the general warrants called writs of assistance, a legacy of the repressive court of star chamber. The writs authorized officers of the crown to search homes and property for smuggled goods, and to compel any British subject to assist in the search. They did not specify whose property, or what evidence was to be looked for.

The merchants of Boston demanded a hearing. They asked James Otis, Jr. of the Bay Colony to represent them, and offered him a generous fee. Otis accepted the job and declined the fee. "In such a cause", he said, "I despise all fees".

The Revolution had found one of its first heroes, a man usually overlooked in the liturgies of the Bicentennial. Otis resigned as advocate general of the admiralty court, a position with promise of wealth and advancement, and went to work for the Colonists against the writs of assistance.

John Adams never forgot Otis' 5-hour performance that day. According to Adams, Otis wove a spellbinding mix of classical allusion, history, legal precedent, constitutional law, prophecy. When he was done, opposition to the writs was unalterably set in the minds of the Colonists, and one of the fundamental principles of English common law had been indelibly written in our history.

"I will to my dying day", Otis began, "oppose with all the powers God has given me all such instruments of slavery on the one hand and villainy on the other, as this writ of assistance. It appears to me the worst instrument of arbitrary power, the most destructive of English liberty and the fundamental principles of law that ever was found in an English lawbook. . . ."

A warrant, he said, must designate the place to be searched, the evidence to be looked for, and the person in question. It can be issued only upon a sworn complaint. A general warrant, in Otis' view, was in dead conflict with the British constitution.

"One of the most essential branches of English liberty", he said, "is the freedom of one's house. A man's home is his castle, and whilst he is quiet he is as well guarded as a prince in his castle".

It was America's first defense of the right to privacy; a first glimmer of the notion that a citizen has the right to be let alone.

After Otis' peroration, the colonists followed events in England, where in 1763 a pamphleteer named John Wilkes was arrested and his home ransacked on the authority of a general warrant. Wilkes sued the officer for trespassing, claiming that a general warrant was illegal under the unwritten constitution. The jury found in his favor.

At the same time another incendiary writer, John Entick, was arrested on a warrant that did bear his name but ordered the seizure of all his books and papers, without specifying any particular ones. Entick sued and won. The Government appealed, and the Court of Common Pleas found unanimously in Entick's favor. "Papers", wrote Lord Camden, "are the owner's goods and chattels; they are his dearest property, and are so far from enduring a seizure that they will hardly bear an inspection". Soon afterwards, the House of Commons declared general warrants illegal.

William Pitt the elder, the Great Prime Minister who was dismissed by George III for his sympathy toward American grievances, put it most eloquently of all: "the poorest man may in his cottage bid defiance to all the force of the crown. It may be frail; its roof may shake; the wind may blow through it; the storms may enter, the rain may enter,—but the King of England cannot enter; all his forces dare not cross the threshold of the ruined tenement!"

In 1791, the Founding Fathers compressed these events and utterances, and the tradition that shaped them, into the succinct injunction of the fourth amendment: "the right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue, but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the person or things to be seized".

To procure this right was one of the overriding aims of the American Revolution. It is a right no despotism can accommodate. It is a right no free society can be without.

It is fair, I think, to suppose that Madison and his colleagues were satisfied that they had guaranteed the people from intrusion, search and seizure beyond all doubt. The Bill of Rights was written to clarify. It drew lines around the individual freedoms, intended to be unalterable and plainly visible.

But the Founding Fathers could not foresee the electronic age. They coulld not foresee telephonec, wiretaps, bugging devices, computers and data banks. Technology has cluttered the domain of the constitution. It has confused things. It has made our homes and our private lives accessible, even when our doors are locked and our shades are drawn. It has created a new kind of intrusion, invisible, unannounced, often untraceable.

Unauthorized intrusions have almost always been a temptation to police in search of evidence, and to governments troubled by national security. With the electronic age, the temptations have proliferated. The meaning of privacy has become blurred in many minds, and in the confusion, electronic prying has outrun the restraints of the fourth amendment.

In 1928, the Supreme Court dealt for the first time with wiretapping in Olmstead versus United States. The plaintiffs were bootleggers who had been convicted on the evidence of recorded telephone conversations. They claimed that the use of such evidence violated the fourth and fifth amendments. The Supreme Court upheld the convictions. Chief Justice William Howard Taft wrote the opinion. Wiretapping, he ruled, was not a search and seizure and not an illegal entry, because the tap had been placed outside. Only the spoken word had been seized, and the spoken word was not protected by the fourth amendment.

In spite of Taft, the Olmstead case produced an historic definition of privacy: the famous dissent by Mr. Justice Brandeis. "The makers of our constitution", he wrote, "sought to protect Americans in their beliefs, their thoughts, their emotions and their sensations. They conferred, as against the Government, the right to be let alone—the most comprehensive of rights and the right most valued by civilized men. To protect that right, every unjustifiable intrusion by the Government upon the privacy of the individual, whatever the means employed, must be deemed a violation of the fourth amendment".

Nonetheless, Taft's unimaginative pronouncement stood for 39 years, until the court decided in Katz versus New York that warrantless wiretapping had to be construed a violation of the fourth amendment. "The fourth amendment", the court ruled, "protects people, not places". One did not have to be at home to be intruded upon.

The Katz decision vindicated Brandeis' 1928 dissent. And I believe the fourth amendment bears no other interpretation. What did the Founding Fathers intend to confer, if not the right to be let alone—the right to speak in private, the right to think in private?

Jefferson once warned that "the natural process of things is for Liberty to yield and Government to gain ground." In our 200-year history, we have resisted that tendency. Armed with the Constitution, we have fought infringements of our liberties, and on balance have squeezed out enough victories to bring civil liberties alive and well to the present day. The courts have stood by our right to privacy in some areas, such as the right to read as one chooses in the privacy of one's home. But the courts have not guarded us as well against intrusion and surveillance—nor has the Congress or the legal profession. And where we have turned our backs, Government has exceeded its rightful powers, almost without fall. Liberty has yielded, and Government has gained ground.

This past year, when it began to emerge that executive power had been used over nearly four decades in routine, secret disregard of the fourth amendment, the Senate finally interceded with the creation of the Select Committee on Intelligence. I was a member of that committee. The revelations that came in more than a year of testimony astounded even the most seasoned members of the committee.

The FBI, as we learned, made hundreds of warrantless, surreptitious break-ins. Bugging devices were installed in offices and bedrooms. Private papers were photographed.

Phones were tapped.

FBI and CIA computers were fed a prodigious diet of names and organizations. Nearly a quarter of a million first-class letters were photographed to compile a CIA computerized index of one and a half million names. Some 300,000 persons were indexed in a CIA computer system; files were collected on about 7,200 Americans and more than a hundred domestic groups in the CIA's operation chaos. Army intelligence kept files on an estimated 100,000 persons. The Internal Revenue Service kept files on more than 11,000 persons and started investigations for reasons of politics, not taxes. More than 26,000 persons were catalogued by the FBI, whose intention was to imprison them all summarily in the event of a national emergency.

The revelations went on and on, with scarcely a dull moment. We learned that quarrels among black groups had been aggravated with forged letters, inciting vio-

lence, marriages were disrupted, again with forged letters.

As James Otis put it, "What a scene does this open." But in 1761, the violations were flagrant, and dressed in the formality of the writs of assistance. Today's intrusions on privacy dispense with all formality. They are soundless, and unseen. No doors are broken down, no papers carried away. Instead of seizure, there is photography and a computerized file. Instead of an ear to the door, there is a bugging device inside the room.

These intrusions were seldom detected and so seldom challenged. Unchallenged, they multiplied. The fourth amendment was being flouted by those whom it was meant to bind and by those who were meant to enforce it; the American people stood by, indifferent or unaware.

The blame belongs many places.

For 25 years, Congress has routinely appropriated funds for intelligence, knowing little about how the money would be used and not troubling to find out. From time to time, we attempted to set mild restrictions that were ignored, and then failed to insist on compliance.

The courts have hesitated to meet the intelligence community head-on. The Supreme Court conceded in 1972 that warrantless electronic surveillance had been permitted by Presidents without "guidance by the Congress or a definitive decision of the courts."

And the legal establishment, the American Bar Association and the State and city bar associations, might have guessed how deep the disease ran, and met every lawyer's obligation to protest. The secrecy spun by Presidents and Government agents was thick but not impenetrable. Now and then a voice was raised, in fear or indignation. These complaints might have been looked into. What the press finally did, we might have done ourselves.

The recommendations of the Select Committee were designed to establish supervision, to check and balance the intelligence agencies as required by the Constitution. We advised, simply, that intelligence-gathering be brought within the bounds of law.

We proposed that there be no electronic surveillance without judicial warrant.

We proposed that no homes be entered, no mail be opened, without a warrant.

The Permanent Oversight Committee, which the Select Committee created when it finished its business, will have sentinel duty. It will alert the Congress and the country, let us hope, the moment the law is violated. For the moment, order and the rule of law have been restored.

But something in America has been dimmed in these decades of official lawbreaking. James Otis understood what it was when he spoke of "the liberty of every man."

It is more than an abstraction. It is more than a syllogism stating that if the liberty of one is taken away, then the liberty of any other can be taken just as easily. The fact is, it can be taken from some much more easily than from others. But wherever one man's liberty is violated, the liberty of every man, the transcendent aim of our law, is diminished.

The Socialist Workers Party, an ardent, possibly naive, undoubtedly peaceful group of Americans, as the FBI has admitted, was spied on and its offices broken into for years. Forged letters were sent to spouses and employers in attempts to wreck marriages and ruin jobs. In those abuses, the liberty of every man was diminished.

The late Martin Luther King, Jr., an apostle of non-violence and integration, was hounded by FBI spies and technicians whose instructions were to "destroy" him. In that crude campaign, the liberty of every man was diminished.

When the FBI concocted letters designed to instigate murder between the Black Panthers and a Chicago street gang, the liberty of every man was diminished as surely as if those agents tampered in your lives, or mine.

And as long as the Government intrudes illegally in the private life of so much as a single ragtag student demonstrator, the liberty of every man will be diminished.

No conscientious lawyer can be indifferent to the scars of these past years, or to the neglect that made them possible.

Today, a new test of the fourth amendment appears to be pending, brought along in the stealthy evolution of the computer.

The computer has become indispensable in commerce, industry, and government. Increasingly, information is shared from computer to computer, covering vast distances in seconds. Law enforcement has become automated; the law enforcement assistance administration, created in 1968, recommended the development of computerized information system, and the FBI, a year earlier, unveiled its national crime information center, a monster computer in Washington, accessible on the instant to law enforcement agencies all over America.

Business and commerce now hum to computer rhythms. The bank, credit, medical, and business records of almost every one of us are stored away in some electronic memory. Computers do not discard information, unless ordered to. They do not forget it. They amass it, they retain it, they produce it indiscriminately at the touch of a button.

The capacity of men in power to wreck civil liberties and subvert laws was amply demonstrated in the Watergate affair, and by the intelligence community in every administration from Roosevelt to Nixon. Computers have only begun to demonstrate their potential. Men and computers, in collaboration, edge closer and closer to the innermost precincts of our private lives.

Two years ago I introduced the Bill of Rights Procedures Act, which was designed to reinforce the fourth amendment. The bill would require court approval, upon a show of probable cause, before the Government could wiretap, bug, open mail, or dig into telephone, credit, medical, or business records. Court approval would have to be put in writing. Any Federal agent who proceeded to these measures without a court order would be subject to criminal prosecution.

Congress was created for the most part to make law, not enforce it. But where the Constitution is made to seem ambiguous by modern technology, or where it is assailed by Federal agents and overreaching presidents, or where the courts are dilatory, then Congress does have the power to intercede. The Bill of Rights Procedures Act would reiterate the fourth amendment and insist by statute that it be enforced.

Over the years, the United States Supreme Court has been a primary guardian of our civil liberties. The court has traditionally exercised vigilance in its decisions defining the scope of the privacy protections afforded under the fourth amendment's prohibitions against unreasonable searches and seizures.

In recent months, however, the Supreme Court has signalled a retreat from its position as the protector against governmental intrusion. In a series of recent decisions—ranging from its ruling in United States against Miller that a citizen's banking records are not his private papers so as to come under the protections of the fourth amendment, to its holding in South Dakota against Opperman, approving sweeping inventory searches of automobiles in police custody, the court has taken a much narrower view of the fourth amendment. In dissent, Justices Marshall and Brennan have leveled unusually harsh criticisms of these recent decisions. As Justice Brennan, joined by Justice Marshall, wrote in dissent in United States against Martinez-Fuerte, that case was "the ninth this term marking the continuing evisceration of fourth amendment protections against unreasonable searches and seizures."

I join in the eloquent dissents of Justices Brennan and Marshall and hope that this trend will be reversed in the coming term of the Court.

Against this background, I believe it is essential that the Congress and State legislatures—who apparently have been lulled into passivity by the dominant role played by the Supreme Court—reevaluate their usual practice of stepping aside to allow the courts to determine the breadth of the privacy safeguards in the Constitution. Even when Congress has had the opportunity to delineate the scope of these protections, it has either failed to do so or specifically left such determinations to the courts. Typical of its abdication to the judiciary are the following:

In the 1968 Omnibus Crime Control and Safe Streets Act, Congress expressly disclaimed reaching a decision regarding the constitutional limitations on the President's power to order wiretaps without judicial warrants;

In the Bank Secrecy Act, Congress authorized surveillance into the bank records of millions of Americans without making clear whether these administrative powers were subject to the prohibitions in the fourth amendment;

In the border search statute, Congress permitted searches of individuals within 100 miles of the border without declaring whether the fourth amendment was applicable to governmental actions of this nature.

The time is at hand when the Congress and its State counterparts must enact legislation to protect the privacy which is essential to our democratic society.

In the advance of computer technology, the words of James Otis bristle once more. The writ of assistance, he said, "Is a power that places the liberty of every man in the hands of every petty officer." To prevent this, our fourth amendment was written. It was written to guarantee the privacy of the home and personal papers, and the right to be let alone. It was written to place the liberty of every man out of the reach of every petty officer, every Federal agent, every Attorney General, and every President, and to lock it securely within the rule of law.

By Mr. JOHNSTON:

S. 15. A bill to amend the Federal Election Campaign Act of 1971 to make certain limitations on contributions inapplicable in elections to Federal office (other than the office of President or Vice President) when any candidate for such office declares an intention to make more than $35,000 in personal expenditures with respect to his campaign for nomination for election, or election, to such office; to the Committee on Rules and Administration.

FEDERAL ELECTION CAMPAIGN ACT AMENDMENTS OF 1977

Mr. JOHNSTON. Mr. President, today I am introducing S. 15, which amends the Federal Election Campaign Act of 1971 with respect to personal expenditures by candidates for Federal office. The Supreme Court's recent decision in Buckley against Valeo left a hiatus in the election law—the amount of contributions to candidates were limited, but the amount of personal funds a candidate could expend in his own behalf were not so limited. As a result, the 1976 po-

litical campaign revealed record amounts of personal funds being spent by wealthy, and often successful, candidates for the Senate and House. Such an anomaly, and the resulting specter of a millionaire's club in the House and Senate was not intended by Congress. My bill proposes a solution to this problem.

This bill does not limit the amount of personal funds a candidate may expend on his own campaign. Rather, the bill directs that any candidate who intends to spend more than $35,000 in personal or borrowed funds on his election campaign must, at least 60 days prior to the election: First, file a sworn declaration of the maximum amount he intends to spend; the source of the funds to be spent; his willingness and present ability to expend the funds; and that the purpose of his declaration is not to make inapplicable any contribution limits provided by law; and second, deposit the said declared personal funds in a single checking account on the date the declaration is filed. The Federal Election Commission is directed to notify immediately each candidate of the maximum personal funds any candidate shall have declared an intention to spend in the campaign. Those candidates declaring an intention to spend more than $35,000 in personal funds may then deposit in their accounts the difference between their previously declared limits and the maximum personal expenditure limits declared by any candidate.

All remaining candidates are then entitled to receive contributions free of any individual contribution limits until they have received contributions equaling the maximum declared personal expenditure less $35,000. All such contributions shall remain subject to the disclosure and reporting requirements of the present Federal election law.

Candidates who declare an intention to spend personal and borrowed funds exceeding $35,000 may continue to receive campaign contributions subject to the present contribution limits, but such contributions cannot be used until all the declared personal or borrowed funds in the special account have been spent. Further, no candidate may solicit or retain contributed funds including proceeds from fundraisers, to reimburse them for personal or borrowed funds used during the campaign.

To insure that the declaration and deposit of personal funds is not used to enable another candidate to evade the limits on individual contributions, both civil and criminal sanctions are provided. The civil sanction provides that unexpended personal funds remain in escrow for 60 days following the general election for the office in question. During that period, the Federal Election Commission or any candidate for such office may institute a civil action for forfeiture of the remaining funds to the U.S. Treasury on the ground that the candidate who deposited the funds knowingly made a false statement in his declaration. The candidate shall have the burden of proving either that the statement was true or that he did not know the statement was false at the time it was made.

Mr. President, this may seem like a harsh measure and I realize the measure will change drastically campaign financing, but I believe it is necessary to insure equal standing among candidates for Federal office. Further, the measure will prohibit the desperate, last minute incurrence of personal debt by candidates—debts which hound unsuccessful candidates and cause undue pressure on successful candidates.

Mr. President, I urge my colleagues to address this serious problem by considering my proposal early during the 95th Congress.

By Mr. WEICKER:

S. 16. A bill to provide for a nationwide Presidential primary for the nomination of candidates for election to the Office of President, and to limit Federal campaign contributions and expenditures of the year in which a Federal election is held; to the Committee on Rules and Administration.

S. 39. A bill to terminate public financing of Presidential elections; to the Committee on Finance.

THE PRESIDENTIAL PRIMARY ACT AND LEGISLATION TO TERMINATE PUBLIC FINANCING OF PRESIDENTIAL CAMPAIGNS

Mr. WEICKER. Mr. President, I am introducing today legislation to end the hodge-podge of the Presidential nominating process. This legislation, S. 16, entitled the "Presidential Primary Act," would establish a nationwide Presidential primary to be held in August of each Presidential election year, and restrict contributions to campaigns for Federal office to the year in which the election is held. To complete this reform package, I am introducing a separate piece of legislation to terminate public financing of Presidential campaigns.

By adopting S. 16 we will achieve two essential reforms in our election process. First, we will drastically reduce the length of Presidential campaigns and thereby reduce their cost. Second, we will increase voter participation in the selection of Presidential candiates.

Mr. President, the basic problem of Presidential campaigns has always been this: Presidential campaigns are too long. A campaign of inordinate length requires money in inordinate amounts. Long campaigns translate into big money.

The Presidential Primary Act would attack the problem at its source—time. In order to be placed on the national primary ballot, Presidential candidates would be required to file, by June 30, a petition signed by qualified voters of their party plus unaffiliated voters, totaling 1 percent of the total vote in the last Presidential election. The national Presidential primary for each party would be held on the first Tuesday in August. If no candidate received 50 percent of the vote, a runoff election between the top two finishers of each party would be held on the third Tuesday in August. Vice Presidential candidate selection would continue in the manner each party desired. Thus, within a 2-month period, the Presidential ticket for major political parties would be established.

By reducing campaign time it would reduce the role of money in political campaigns—and thus eliminate the need to finance politicians' campaigns and vanity with tax dollars. In 1974, the Congress responded to the fundraising practices of the 1972 election by passing the Campaign Reform Act, which provided for public financing of Presidential campaigns via a tax checkoff system. It sought to close the door to unscrupulous pressure groups, yet opened another to self-interested politicians. After the experiences of 1976, America is ready to close both doors.

A major aspect of S. 16 is the end of the partial disenfranchisement of unaffiliated voters. Under this proposal they will be allowed to vote in the party primary of their choice. State laws governing elections limit the participation of unaffiliated voters to an "end of the road" choice between two alternatives presented by the major parties. Preferential treatment is given the party affiliated at the expense of unaffiliates, who comprise more than a third of all registered voters. Under color of State law a major segment of our citizenry has been effectively disenfranchised from a vital and integral part of their right to participate in the political process. The time has come to bring democracy to Presidential primaries by giving everyone—independents as well as Republicans and Democrats—the chance to participate from the beginning.

Mr. President, America has always been a nation of dreamers and doers. Not content with "what might have been," we have attempted throughout our history to wed promise to practice, to forge from our ideals the courage to try. What I have proposed today is beyond the pale of politics as usual. What it will cost in stability in the short term, I believe it will repay in the long term by greater enfranchisement, participation, and electoral sanity.

By Mr. McINTYRE (for himself and Mr. BROOKE):

S. 17. A bill to amend the Internal Revenue Code of 1954 to provide income tax incentives for the conservation of energy used to heat or cool residences and commercial buildings and for the utilization of renewable fuel energy sources; to the Committee on Finance.

RENEWABLE ENERGY AND ENERGY CONSERVATION TAX ACT OF 1977

Mr. McINTYRE. Mr. President, to depend on oil as the major source of our energy is to depend on a cartel abroad and on dwindling supplies at ever-increasing extraction costs at home. The reality of our energy situation is that we must have alternatives to oil—safe, clean alternatives that cannot be monopolized by any cartel. Although in the past 3 years we have made some progress toward a national energy policy that meets our needs, we must redouble our efforts in this Congress.

In a December newsletter to constituents who are very interested in energy affairs, I described the progress that Congress has made so far and outlined steps that still must be taken to beat

the energy crisis. I ask unanimous consent to insert in the RECORD at this point excerpts from that newsletter.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

NO NATIONAL ENERGY POLICY YET—BUT SOME PROGRESS HAS BEEN MADE

It has been three years since petroleum-exporting nations tripled the world price of oil, and three years since the paralyzing Arab embargo that created the stage for those price increases. In that time, this Congress has done far too little, I am sorry to say, to solve the problems that crisis has caused.

We are not much nearer a national energy policy than we were when the embargo and the spiral of price increases began. But progress has been made in some areas of energy development and conservation.

MAJOR LEGISLATION

Last December, the Congress enacted the Energy Policy and Conservation Act, a major piece of legislation with positive as well as negative features.

On the positive side, the Act did the following:

Required auto manufacturers to improve the efficiency of their product;

Authorized the creation of a strategic petroleum reserve intended to help the nation weather any future oil cut-off from abroad;

Required appliance manufacturers to label appliances for energy efficiency;

Provided Federal funding and coordination for state energy conservation plans;

Set up a central energy data bank in the Federal government.

MODIFIED BUILDING CODES

And, as part of another energy-related bill, Congress enacted a measure that will require towns, cities and states to modify building codes over the next several years to meet a national standard of energy conservation to be developed by the Department of Housing and Urban Development.

FUNDING RENEWABLE RESOURCES

In addition, this Congress has committed the Federal government to a substantially higher level of funding for solar energy and other renewable, non-polluting energy resources. The solar, wind, ocean currents, biomass conversion and related energy research budgets of the Energy Research and Development Administration have been increased to a combined total of $290 million for fiscal 1977, more than three times the level of funding in 1976.

NEGATIVE ASPECTS

Chief among the negative features in the Energy Policy and Conservation Act is the provision that will end price controls over domestic oil in the next three years.

The argument is made that unless prices are allowed to rise, Big Oil will not be inspired to find and develop new sources of domestic oil.

But to the poor and to those on fixed incomes with no way of meeting higher costs for utilities and transportation, the energy problem is a problem of prices—not supply. A "solution" that does little but raise prices and the tax burden on consumers represents no solution at all to a substantial part of our society.

Moreover, we have already seen that the price rises allowed under loose controls have not increased our domestic oil supplies. Indeed, we are importing more oil from abroad than ever before.

OTHER NEGATIVES

I also have some objections to how the Administration proposes to set up a strategic petroleum reserve—putting all the storage sites in "oil country"—the Gulf Coast and the Midwest—while making no provision for oil storage on the East Coast, the region most dependent upon foreign oil.

As to the separate but related measure establishing a national standard for energy conservation that building codes will have to meet, I am troubled by some of the enforcement sanctions. The potential home-buyer, for instance, would be the one to suffer if a town, city or state failed to comply with the standard.

Nevertheless, the overall objectives of this bill have my strong support. And if state and local governments back this push for energy conservation, those sanctions may never have to be used.

POLICYMAKING POWER IS SPREAD TOO THIN

Despite passage of some constructive legislation, attempts to create a consistent national energy policy remain stymied. Deep philosophical differences between the two major political parties—and the even more divisive regional differences between energy-producing and energy-consuming states—continue to block agreement on policy.

The power to make hard energy policy decisions—and the authority to carry out those decisions—have been diluted. Policy-making has been spread among too many administrative agencies.

In this atmosphere of unresolved policy questions and divided authority, Congress frequently has been caught up in lengthy debate over small questions, while larger questions go unanswered and constructive legislation is frustrated.

A painful example comes quickly to mind.

Earlier this year, the Senate considered two proposals that would have provided incentives for citizens to invest in renewable energy and energy conservation in existing homes and businesses.

I introduced a bill, and others sponsored similar legislation, that would have paid 25 percent of the cost of such energy investments through tax refunds. The other approach—which I co-sponsored—would have provided the same amount of money through government-subsidized loans.

But when it came time to act, the Senate was caught in a paralyzing debate over which was the better approach—a debate that was complicated by the difficulties in communicating among several committees at once. As a result, both sides lost the argument: the tax credit was abandoned, and the loan program proposal was stripped down to a mere demonstration program in the Department of Housing and Urban Development.

We shouldn't have deadlocked over approach. If we already needed to know which was the better, we could have tried both, compared them, and chosen the most effective. But we didn't, so once again a promising program was killed by differences over lesser issues.

ENERGY, ECONOMY, ENVIRONMENT CLOSELY LINKED

The question is: How can we find our way out of this thicket in the next Congress?

The first step is to recognize that our failures in the past have been caused in part by our inability to understand the relationship between energy policy, our economy, and our environment. A national energy policy must be based upon an understanding of these relationships.

Here are some of the underlying considerations:

1. Development of future energy resources must not lay waste to our environment. By any standard, even the coldest dollars-and-cents measurement, it is unsound policy to despoil the environment in order to provide heat and electricity. Why? Because the bills to pay for correcting the damage inevitably come due . . . and must be paid.

2. Energy policy must be compatible with an economic policy that in the long run provides secure and permanent gains in employment. Many of us are only beginning to realize that large-scale, capital-intensive energy investments provide only short-term increases in employment. At the same time, they drain the economy of investment money that could provide more lasting employment if put to other uses.

3. Government policy must become increasingly skeptical about proposals for loan guarantees, tax loopholes or other preferential access to investment capital to giant energy companies. For the past eight years, we have witnessed a growing trend toward merging the functions of giant companies and the government—at taxpayers' expense. This trend must be discouraged.

4. The most optimistic estimates say that our domestic supply of oil will last another 50 years. And unless we can solve the problems of safe disposal of nuclear waste and of developing the fast breeder nuclear reactor, we cannot depend upon nuclear power as a long-term source of energy. So our energy policy should be based on the understanding that conventional fuels will grow increasingly scarce—and more and more costly—in the decades ahead. Alternative sources of energy, especially renewable sources, will be an undeniable necessity.

5. And, finally, energy policy must recognize that our economy is still basically a free-market economy. Not only must we grow more suspicious of proposals to subsidize large energy industries, we must also address the question of domination of all energy markets by a few huge conglomerates.

STEPS THE NEXT CONGRESS COULD TAKE

The second step is to bend every effort to reorganize and streamline energy policy-making and administrative authority.

We should start by restructuring the major energy regulatory and policy-making agencies into one Cabinet-level organization—a Department of Energy.

And in the Congress, I, for one, intend to take a hard look at the need for the same kind of streamlining and reorganization of authority for energy policy-making.

Here are some specific steps the next Congress could take to facilitate the establishment of a comprehensive national energy policy.

1. Reorganize the many Federal energy agencies, taking energy functions away from some existing agencies that have other functions, and creating a Department of Energy as a first priority. Also, review the energy functions of Congressional committees with an eye to streamlining the decision-making process . . . and give serious consideration to creating a Committee on Energy.

2. Develop renewable sources of energy as quickly as possible. The fiscal 1977 appropriation of $290 million for renewable energy resource should be considered a rock-bottom minimum. At the same time, step up research in energy conservation.

3. Enact a tax credit, loan or other program to encourage the public to make investments in energy conservation and renewable energy in the home and places of work.

4. Expand government support for education programs in renewable energy at the vocational-technical level as well as in engineering, architecture and design.

* * * * *

PRICE HIKES ALONE ARE NO SOLUTION

Why the urgency for developing a truly comprehensive—and fair—national energy policy?

Because we have seen what has happened in the absence of such a policy.

Relying solely on price increases to solve the energy crunch hasn't worked.

Domestic crude oil cost less than $4 a barrel before the oil embargo was declared. Today—under loosely applied price controls—

the average price of oil is approaching $9 a barrel—with provisions already written into law that would allow domestic oil prices to rise eventually to the price set by the cartel.

And to what end? Domestic oil supplies have continued to dwindle the past three years, despite the rise in price. And imports have increased sharply.

* * * * *

ENERGY INDEPENDENCE

We are wooed by the seductive appeal of "energy independence"—a cruel catchphrase that serves the purpose of none but the giant energy companies.

We in New England know that "energy independence" is a hollow phrase. We now have to import 80 percent of the oil we use. And we have no illusions that we can reduce that dependence below 50 percent for another 20 years or more. There is just not enough oil to be found within our nation's borders, government geologists tell us. Oil from off the eastern coast will probably contribute to our supplies, but we must look forward to alternatives to cut down our reliance on the oil-producing nations—coal, to the extent that it can be burned cleanly; solar energy and other renewable energy resources; and energy conservation.

It is only by changing our emphasis from the unrealistic goal of complete "independdence"—which is just another form of economic slavery to the giant energy companies—to a policy that decreases Americans' energy costs as much as possible—while maximizing jobs and protecting the environment—that we can ever hope to agree on a national energy policy.

Mr. McINTYRE. Mr. President, today, with the distinguished Senator from Massachusetts (Mr. BROOKE) as cosponsor, I have introduced the Renewable Energy and Energy Conservation Tax Act of 1977. This bill provides a tax credit for residential and business investments in renewable energy and energy-conserving measures, including solar energy, wind energy, geothermal energy, and a variety of insulation and energy-conserving devices.

In content, this bill is almost identical to the energy conservation and renewable energy provisions of the Tax Reform Act of 1976, which were stripped from the act in conference.

However, this bill is significantly different from last year's proposed tax credit in one respect. The tax credit came under fire from some tax reform advocates last year on the grounds that lower income persons would not be able to take full advantage of the credit because, first, they cannot afford to purchase energy conservation and renewable energy equipment in the first place, and second, because the tax liability of a person of modest income might not be large enough to take full advantage of the tax credit. The credit was thus seen by many advocates of reform as chiefly benefiting those in higher income groups.

I agree with this view, and I propose two steps to help those of lower income to save on the high cost of energy. The first is a provision in this bill to allow the individual taxpayer to "carry forward" any unused balance of the credit after the taxable year in which the investment is made, and apply the balance of the credit in succeeding years.

Still, many individuals do not have the means to make investments in energy conservation and renewable energy in their homes. Therefore, I plan to introduce soon a companion measure that will provide loans to individuals, with the Government paying a percentage of the principal, for energy conservation and renewable energy. This measure will be similar to a loan program which was proposed by my distinguished colleagues from Massachusetts (Mr. KENNEDY) and South Carolina (Mr. HOLLINGS) last year, which I cosponsored.

It is my intention that both the tax measure and the proposed loan program be put into effect for a limited number of years, as incentives to consumers of energy and a stimulus to our economy. It is worth noting also that these two programs of incentives are to be mutually exclusive to the consumer; no one will be permitted both for the same investment.

I urge the Committee on Finance to give its support to the Renewable Energy and Energy Conservation Tax Act of 1977 or to similar legislation, and I urge all my colleagues to quickly adopt incentives for these alternatives to imported oil.

By Mr. McINTYRE (for himself and Mr. HATHAWAY):

S. 18. A bill to require that certain information about gasoline be disclosed to consumers; to the Committee on Commerce.

OCTANE DISCLOSURE ACT OF 1977

Mr. McINTYRE. Mr. President, our Nation is paying dearly today for its history of wasting energy when energy was cheap. And our careless use of energy is one of the major causes of environmental pollution.

Along with my esteemed colleague from Maine (Senator HATHAWAY), I have introduced today a bill which will, if passed, contribute to a cleaner environment and will conserve energy. This bill, the Octane Disclosure Act of 1977, will save many consumers money as well by helping motorists choose the gasolines best suited for their cars. The bill is identical to a bill which passed the Senate unanimously in 1976, but which did not pass in the House.

Owners of gasoline filling stations across the Nation would be required, under this bill, to post octanes on gasoline pumps according to a uniform set of numbers of symbols to be determined by the Federal Trade Commission. And new car manufacturers would be required to disclose the octane needs of their cars to each motorist. This disclosure of octane information would be supervised by the Federal Trade Commission and would be enforced at the gas pumps by the Environmental Protection Agency, which has an active inspection program in operation today to insure that filling stations supply nonleaded gasoline to the public. The authority to require posting of octanes rests with the Federal Energy Administration at present, but the FEA does not have the field personnel to enforce its program; as a result, many filling stations today do not have octane information for the public.

In closing, I ask the leadership of the Senate and the Committee on Commerce to hold hearings and to report and pass this legislation as soon as possible.

Mr. HATHAWAY. Mr. President, today I am pleased to cosponsor with my colleague Mr. McINTYRE, the Octane Disclosure Act of 1977.

This proposed legislation will require the posting of a uniform octane rating system for all gasoline outlets, as well as establishing responsible enforcement for such regulations.

At the present time, there is no one agency that is clearly responsible for enforcing existing regulations that require the posting of octane levels of gasoline. Nor, is there one uniform octane rating system used by those retail outlets that do, in fact, post the octane level of their product.

The lack of compliance with existing regulations and the plethora of varied octane rating systems has resulted in considerable overbuying and confusion for the consumer.

Until about 1972, the research—R—method of determining the octane level of gasoline was universally accepted. In March of 1972, however, the Federal Trade Commission, FTC, promulgated a rule that octane would be measured according to a new system, the average of the sum of research and motor—R+M/2.

On December 20, 1972, 34 oil companies asked for injunctive relief from the FTC regulation. The courts stayed the FTC rule, and in April of 1973, ruled that the FTC had exceeded its authority.

The D.C. Court of Appeals subsequently reversed this decision, and on appeal, the Supreme Court refused to hear the case.

The status of octane posting at this time is unclear. It is essential that Congress pass legislation to indicate clearly who has the authority to enforce octane posting rules.

As a result of this lack of clear authority, various octane rating systems have been used over the years. Consequently, for the most part, the numbers displayed on the gasoline pumps reflected the calculations according to the new system, R+M/2, while the recommended levels printed in the automobile manuals used the old system, R. There is an average of four points difference between the numbers of the two rating systems. The disparity in the figures has resulted in considerable overbuying of premium gasoline by confused consumers.

According to research documented by the Public Interest Campaign, the confusion resulting in overbuying has needlessly required an additional 63,500 barrels of oil every day for the production of higher octane gasoline. Accordingly, we are wasting enough oil to produce 1.24 million gallons of gasoline every day.

Under this proposed legislation, that confusion will be eliminated. The FTC will be required to determine a uniform system that will be used universally for display on the gasoline pumps, on the automobile, and in the manuals for all vehicles.

In addition, the proposed legislation stipulates that those involved in the resale or distribution of gasoline will also be required to certify in writing the oc-

tane level according to the system devised by the FTC.

Enforcement at the gasoline pump will be carried out through an agreement between the FTC and the Environmental Protection Agency, which already sends inspectors into gasoline stations to enforce regulations requiring stations to sell unleaded gasoline. Failure to disclose proper octane information will result in a civil penalty of $100 per day.

Mr. President, the substance of this proposed legislation withstood considerable scrutiny by the Senate Commerce Committee in the 94th Congress, in the form of S. 1508. The Senate passed S. 1508 unanimously toward the latter part of the second session. There was insufficient time for that legislation to be considered by the House of Representatives.

We must proceed with the utmost speed to clearly delineate specific authority in this field, to eliminate existing confusion, and to halt the waste of our precious resources.

By Mr. McINTYRE:

S. 19. A bill to regulate commerce and to protect petroleum product dealers from unfair practices, and for other purposes; to the Committee on Commerce.

FAIR MARKETING OF PETROLEUM PRODUCTS ACT

Mr. McINTYRE. Mr. President, today I am introducing a bill, the Fair Marketing of Petroleum Products Act, which is intended to give small, independent operators of service stations a fair chance at staying in business and competing with the giant oil companies which dominate all phases of the petroleum industry.

The Senate has passed service station franchise legislation three times in the past three sessions; and the bill that I introduced today is identical to a bill sponsored by former Senator Moss of Utah and passed by the Senate in June of 1975. Companion legislation has been introduced in the House of Representatives.

The need for legislation of this kind is illustrated by a startling statistic: since the fall of 1973, when widespread gasoline shortages caused a crunch at the gas pumps, nearly 50,000 gasoline stations across the country have closed permanently. Most of these were operated by independent service station operators who bought their gasoline from oil companies, and who provided a range of services, as well as gasoline, to the public. Today, caught in an economic squeeze, many other independent service station operators face the same fate. At the same time, oil companies reap high profits by selling gasoline at high wholesale prices to the independent operators, and by operating their own high-volume company outlets which typically sell only gasoline and do not provide a variety of road services and repairs to the motorist.

Ultimately it is the public which suffers when the neighborhood garage or the service station on the corner is squeezed or put out of business. The person who needs a tow truck, tuneup, or tire change finds these services less accessible, and the gasoline buyer finds that the loss of competition has resulted in higher prices.

This bill does not give lifetime tenure to each and every service station dealer; it provides no guarantees to those who are poor competitors, no guaranteed profit to those whose indifference drives customers away. It does allow an independent service station operator to take an oil company to court for unjustly terminating a lease or cutting off the supply of gasoline. The operator would be allowed to retain the station or to receive just compensation for his or her part in building that business up.

In addition, this bill contains a clause which limits the number of stations that major oil companies would be allowed to own and directly operate. At present, this limitation as provided in the bill is fairly loose; rather than arbitrarily set a tighter limit, I ask the Senate to carefully consider whether tighter restrictions on major oil company outlets are necessary before passing this bill.

This "day in court" measure is not intended to provide full equality to the service station operator in his dealings with, and competition against, major oil companies, nor does it solve all the problems of being the smallest-sized business in gasoline retailing. But in providing legal recourse to the service station operator, it can be a bargaining tool for all independent service station operators.

In closing, I wish to congratulate the Committee on Commerce for its past attention to this issue, and urge quick adoption of this or a similar measure.

By Mr. CRANSTON (for himself and Mr. KENNEDY):

S. 20. A bill to provide employment opportunities for youth in the public and private sectors of the economy, and for other purposes; to the Committee on Labor and Public Welfare.

YOUTH INITIATIVES ACT OF 1977

Mr. CRANSTON. Mr. President, I am introducing today, for appropriate reference, S. 20, the Youth Initiatives Act of 1977. This legislation is designed to stimulate the creation of employment opportunities for youth in the public and private sectors of the national economy. Joining me in introducing this measure, which is a companion bill to H.R. 20, introduced by Representative ANDREW YOUNG of Georgia on January 4, 1977, is the distinguished Senator from Massachusetts (Mr. KENNEDY).

Mr. President, this bill would establish two youth initiatives programs—a national youth service program and an opportunities in private enterprise program—in order to assure that youth participating in such programs receive meaningful work experience, while at the same time earning an appropriate income and having an opportunity to develop a better knowledge of their career interests and aptitudes, further their education and training, and develop their employment skills for entrance into the labor market. Additionally, we have designed the bill in such a way so as to encourage cooperation between Federal, State, and local governments and the private sector in order to provide youth with an opportunity to serve meaningful and self-supporting roles in our society.

THE PROBLEM OF YOUTH UNEMPLOYMENT

In harsh reality, Mr. President, while youths comprise only about a quarter of the total labor force, those under 25 account for nearly half the unemployment problem. During November 1976, 19 percent of all 16- to 19-year-olds in the labor force were unemployed—more than 1.7 million youth—and 13 percent of those aged 20 to 24 were out of work—another nearly 1.7 million individuals. On the other hand, the rate for those 25 years old and older was only 5.8 percent.

The impact of unemployment, however, has been most severe on black and minority group youths, where inner-city joblessness regularly reaches devastating rates as high as 40 percent. During November, the rate for black youth unemployment was 35.5 percent on a nationwide average.

Mr. President, the phenomenon of this high youth unemployment rate, currently more than two times the rate of national unemployment, is not confined to periods of economic hardships, but is a chronic problem, plaguing our Nation even during more prosperous times. Even in the relatively lively labor markets of 1965 and 1973—when adult unemployment was dipping below 4 percent—youth unemployment still averaged around 15 percent.

Mr. President, between 1960 and 1970, young entrants to the labor force—ages 16 to 24—increased by 7.2 million, or by 56.6 percent. This compares to an increase of 13.8 million, or 19.1 percent, for the work force as a whole. In essence, this means that better than one out of every two new entrants to the labor market during this period was a young jobseeker.

Such young jobseekers are not readily absorbed by our economy, especially when their marketable skills are just beginning to be developed, their career goals being established and modified, and their basic education and training being newly acquired or, in the case of those who have dropped out of school, not complete.

Mr. President, I think it is also important to note that these absolutely appalling figures, which we are attempting to confront positively with this bill, represent only those youth who are actively seeking employment in the labor market. These figures do not include those who have stopped trying to find jobs because they are discouraged in their attempts, those who may lack the desire, initiative, or motivation to go out and find work, those who are in school but are seeking work in order to continue their education, or those who, tragically, have become involved in our criminal justice system. They simply are not counted in these statistics, although these groups of youth alone represent a significant problem.

Mr. President, another difficulty we have encountered in attempting to deal with these statistics is the age categories provided by the Bureau of Labor Statistics. Our bill is designed to focus on

youth who have attained the age at which compulsory education is no longer necessary—generally 16—through age 21. However, relevant statistics from BLS are available only for categories of individuals 16 to 19, and 20 to 24.

As a point of interest, Mr. President, legislation which I authored in the 94th Congress, and which was enacted as part of the Emergency Jobs Program Extension Act of 1976 (Public Law 94-444), provides for the establishment of an 11-member National Commission on Employment and Unemployment Statistics. This Commission is charged with reviewing and suggesting means of revising our current methods of computing and reporting employment and unemployment statistics. Such a review would include a long, hard look at youth employment and unemployment figures, and ways in which more accurate and meaningful statistics can be obtained on which to base our public policy decisions. Additionally, the Commission is to look at ways in which we can use employment and unemployment statistics as tools to improve labor market operations, such as long-term labor market projections for the purposes of establishing realistic career goals. Such projections could be of great value to youth, as well as to adults.

Mr. President, I intend to urge the new administration to move promptly to take the necessary steps—including a fiscal year 1977 supplemental appropriations request—to get the Commission underway, so that when we discuss and attempt to deal with problems of this nature, we will have a more firm and accurate estimate of the true scope of the problem.

Mr. President, another group of individuals who would be eligible for job opportunities under this program would be young veterans. Historically, this group suffers disproportionately high rates of joblessness, much of which has been theoretically accounted for by the fact that these individuals enter the labor force at an older age than high school graduates, and very often, while having obtained considerable skills training in the service, find such skills inapplicable to civilian jobs. The rate of unemployment for young male veterans ages 20 to 24 in November was 16.4 percent, while the rate for male nonveterans of the same age group was 12.1 percent.

Undoubtedly, Mr. President, the kind of skills training and labor market development envisioned under this bill would be invaluable to these veterans, as well as those individuals who have not spent time in the service.

Mr. President, at this time I would like to describe briefly the major elements of our proposal.

YOUTH INITIATIVE PROGRAMS

First, Mr. President, as previously mentioned, the bill would establish two youth initiatives programs—the national youth service program and the opportunities in private enterprise program—to provide employment opportunities for youth.

The national youth service program is designed to provide assistance to State and local governments and public and private nonprofit organizations for the employment of youth. The bill specifies that this program have the goal of providing at least 250,000 jobs for youth each year.

The opportunities in private enterprise program is designed to provide assistance to for-profit business concerns for the provision of youth employment opportunities. This program would have the goal of creating at least 35,000 jobs for youth annually.

In addition, Mr. President, the bill would establish an Office of Youth Initiatives within the Executive Office of the President. The functions of this Office would be to conduct monitoring of the two youth initiative programs, to carry out research and development activities in the area of youth employment programs, and make recommendations to the Congress and the President with respect to policies and programs affecting youth, including employment issues.

By directing the Office to undertake research and demonstration programs, the bill includes such efforts as those to determine the possibility of a large-scale youth employment project administered by the Federal Government, comprehensive work-study programs to assist employed youth to continue their education, and model youth initiative programs.

Mr. President, I believe it is important to note that we have not provided for a single specific administering agency at the Federal level. Nor does the bill require conduct of programs through any ongoing delivery mechanisms, such as CETA, since such ongoing efforts might fail to give the necessary emphasis to youth.

Mr. President, in this regard, I would like to make note of the remarks by Peter Edelman, director of the New York State Division for Youth, in an interview with Youth Alternatives, appearing in the January 1977 issue. When questioned about youth employment legislation, Mr. Edelman replied:

> I have very real reservations about the utilization of the CETA prime sponsor approach to it. I believe strongly that at the local level that will not result in funds reaching the kinds of groups that can do the best job for young people—groups composed of young people coming from inner city communities and nontraditional voluntary agencies that almost by definition don't have political clout at city hall. Even with strong guidelines, they're all going to have a tough time muscling their way into participation if the CETA prime sponsor mechanism is used.

Instead, the President is empowered to designate, within 90 days of enactment, one or more Federal agencies to conduct the program. If he makes no such designation, the program would be carried out through the Office of Youth Initiatives. It is, of course, feasible that the Department of Labor, the Department of Health, Education, and Welfare, the ACTION Agency, and the Community Services Administration would all have some interest in conducting such efforts and could, singly or as a group, carry out such programs. This flexibility as to the administering entity, just as the decentralization in the bill, is key to the concept of our measure.

COMMISSIONS

Mr. President, this theme of flexibility and decentralization is reflected in the bill's provisions for the establishment of commissions, at local and State levels, to participate in the activities of the national youth service and opportunities in private enterprise programs.

Local jurisdictions of government with populations of at least 250,000 which choose to participate directly in the program, or any State, may establish a commission of between 15 and 30 selected members to be responsible for the distribution of funds allocated under the bill, the review and approval of applications for employment projects in their respective areas, and information and outreach activities designed to acquaint youth and applicants for projects with the programs conducted through the youth initiative programs.

Mr. President, the members of the commission are to be appointed by the chief executive officer of the State in the case of a State commission, or, in the case of a commission established by a local jurisdiction, one half of each category, by the chief executive officer of such jurisdiction and the chief executive officer of the State. The members are to be selected from four areas, as follows:

One-fourth would be representative of eligible applicants for employment projects;

One-fourth would be individuals involved in education and training endeavors;

One-fourth would be representative of groups serving the special needs of youth; and

One-fourth would be interested members of the general public.

In addition, the bill requires that one-fourth of the overall membership of each commission consist of individuals who are younger than 25 years of age.

ALLOCATION OF APPROPRIATIONS

Mr. President, under the provisions of the Youth Initiatives Act, the Federal Government would make allocations to the State; subsequently, the State would make distribution to local jurisdictions which have established commissions and, for the balance of the State, to any commission which the State may have established or, if such a State commission has not been established, then to the State agency designated by the Governor. Local jurisdictions of 250,000 or more would automatically be eligible for a formula distribution of funds if they establish commissions meeting the statutory requirements. The Governor could reduce the 250,000 figure to as low as 50,000 in a State.

Mr. President, once again, flexibility is stressed.

This is also the case with the funding allocation formulas. We have not established a fixed ratio of factors. Instead, we have required that the following be taken into account in making distribution of funds:

First. The number of youths residing in the area;

Second. The number of individuals in the area who are members of households with income below the low-income level; and

Third. The rate of unemployment in the area.

Thus, the appropriate Federal administering agency—or Congress after the hearing process—could establish appropriate weighting of these factors in order to best serve the purposes of the program and meet the employment needs of youth.

In distributing the funds to programs established under this legislation, the bill requires that 75 percent of the youth participating in such programs meet the following criteria:

First. Be a member of a household with income less than the low-income level; and

Second. Be unemployed for 15 or more weeks; or for not less than half the weeks of the calendar year during which the application for employment is made; or be unemployed and out of school for a complete term.

Mr. President, we have provided these criteria in order to safeguard against youths dropping out of the education system in order to get work under this program. However, I think it is important to note that the research and demonstration projects conducted by the Office of Youth Initiatives, which I previously mentioned, could waive these unemployment criteria on an experimental basis in order to determine if some other criteria could be more effective.

In addition, Mr. President, under the bill, preference would be given to youths who have deficient educational backgrounds and basic skills, who are veterans with readjustment problems, who are handicapped, who have been involved in the criminal justice system, or who otherwise have demonstrated a special need.

Mr. President, I understand that these criteria and preferences necessarily limit participation in the program. But I believe there is sufficient leeway in the bill to permit at least some youth from all circumstances to enjoy the employment opportunities. Because we are limited in terms of the budgetary resources and effective administrative capacities that can be provided for these programs—at least at the outset—we must set priorities. I believe that the requirements set forth in this bill are realistic and will serve the purposes of this legislation—to provide employment opportunities to the greatest possible number of youth and to those most in need of those opportunities.

EMPLOYMENT PROJECTS

Mr. President, as I noted before, the commissions and/or the States would be responsible for approving applications of eligible applicants. Such applicants can include States, political subdivisions of States, and private and public nonprofit and profitmaking business concerns.

Projects would be required to result in the production of goods and services which would be valuable to the community, such as, under the national youth service program, public service employment involved with and emphasizing housing rehabilitation, environmental conservation, mass transportation, recreation facilities, and services to children, elderly persons, and those with needs for special assistance. Under the opportunities in private enterprise program, for-profit business concerns could establish projects providing jobs for youth as apprentices and interns in the private sector. Youths employed in these programs would receive compensation for hours worked at least at the Federal minimum wage together with appropriate fringe benefits but no more than 125 percent of the minimum wage. This wage requirement could be met in residential projects by including the value of room and board provided.

Additionally, the bill would require a strong component of continuing education and training, counseling and placement services, opportunities for skill development, and appropriate services to facilitate transition from jobs provided under this bill, to regular, permanent jobs in the labor market. In this way, not only would youths participating in employment programs be provided with an adequate wage and a meaningful job, but also with a certain amount of preparation for their future and assistance in making the difficult transition from youth to adulthood.

Of course, Mr. President, included in the bill are appropriate safeguards to insure that these jobs for youth do not impair jobs for adults, that plans for programs and approvals of projects are fully coordinated with ongoing efforts under the Comprehensive Employment and Training Act, CETA, and that these jobs will not be substitutes for jobs which would have been created otherwise. There is also the stipulation that Federal funds may not be used to defray more than 80 percent of the cost of any youth employment project, with non-Federal funds contributed in cash or in kind. Although Federal funds are prohibited to be used for the acquisition of equipment and supplies, projects could obtain equipment and supplies through the 20-percent non-Federal match for each project which may be in cash or in kind.

Not less than 70 percent of each project's funding would be used to pay compensation and to provide fringe benefits; not more than 25 percent would be used to provide education, training, supervisory, and support services; and the remaining 5 percent could be used for administration of the project. Applications for employment projects would be subjected to a public hearing process prior to approval. Employment projects would generally be limited to less than 100 jobs; however, the bill does make provision for a very limited number of larger projects.

Mr. President, in this regard, I would like to make special note of a program that California, under Governor Jerry Brown, has developed. The effort represents a modern version of the Civilian Conservation Corps of the 1930's. This promising initiative, called the California Conservation Corps, works in this manner: After an orientation period, corps members are assigned to one of several base centers where they live and work on jobs such as building trails, cleaning debris from streams, wildlife and watershed protection, developing public parks, and assisting in fighting forest fires and in water and energy conservation projects. In addition, plans are now being implemented to expand the program into urban areas, where corps members will work on jobs such as cleaning parks and streets and rehabilitating deteriorated housing. Corps members must commit at least a year of their time, and are provided room and board and paid on a graduated scale from $260 to $355 a month.

Because of the funding discretion which would be given to States and local jurisdictions under S. 20, California could vastly expand its program through Federal funds provided under this bill. In addition, other States and their localities would be able to use the California Conservation Corps as a model for similar programs. I am especially pleased about this aspect of the Youth Initiatives Act.

AUTHORIZATION OF APPROPRIATIONS

Mr. President, the bill contains a "such sums as may be necessary" authorization for each of fiscal years 1978, 1979, and 1980 for the carrying out of the national youth service program and a $250 million authorization for each of fiscal years 1978, 1979, and 1980 for carrying out the activities under the opportunities in private enterprise program. As I noted previously, these two efforts would have annual goals of providing 250,000 and 35,000 jobs for youth, annually.

There is an additional authorization of $100 million for the Office of Youth Initiatives which would have the responsibility for research and demonstration activities, as well as the responsibility for monitoring and evaluating youth employment programs conducted under the act.

CONCLUSION

Mr. President, the consistently high rates of youth unemployment are symptomatic of this Nation's failure to respond adequately to their special needs for suitable employment and training, career and other counseling, basic skills development, and labor market placement services. By providing for, first of all, jobs and an appropriate income, coupled with counseling and placement services, our bill attempts to confront the immediate problem. By directing the undertaking of intensive research and demonstration programs to put forth suggestions for more comprehensive youth programs, we are attempting to deal with the problem in the structural sense, such as attacking deficiencies in current labor market operations or in the educational systems.

Currently, Mr. President, the Nation does not have a specific policy or program designed to turn around the trend of high and dismal rates of youth unemployment. It is imperative that we act promptly and carefully to set in place an effective and meaningful initiative to create meaningful job opportunities and related training for youth. While projections are that we can expect a modest economic recovery over the rest of this decade, and that the youth population will decrease gradually, the present level of projects for youth unemployment remains discouraging.

Mr. President, we need a major effort to deal with the problems of youth in the labor market, and I believe the measure we are introducing today provides both a realistic and effective approach.

Mr. President, I ask unanimous consent that a summary of the bill and its full text be printed at this point in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 20

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Youth Initiatives Act of 1977".

STATEMENT OF PURPOSE

SEC. 2. It is the purpose of this Act—

(1) to stimulate the creation of employment opportunities for youth in the public and private sectors of the national economy;

(2) to provide goods and services which otherwise would not be available to States and localities and to the Nation;

(3) to assure that youths participating in programs under this Act will receive meaningful work experience during which such youths will (A) receive an appropriate income; and (B) have an opportunity to develop a better knowledge of their career interests and aptitudes and further their education and training;

(4) to assist youths in the development of employment skills;

(5) to improve the effectiveness of labor market operations in providing jobs and training to youths; and

(6) to encourage cooperation between Federal, State, and local governments and the private sector in order to provide youths with opportunities to serve in meaningful and self-supporting roles in society.

TITLE I—YOUTH INITIATIVES PROGRAMS

ESTABLISHING OF PROGRAMS AND OFFICE

SEC. 101. (a)(1) There is established a national youth service program which shall be carried out in accordance with the provisions of this title, and which shall be designed to provide assistance to States, local governments, and public or private nonprofit organizations for the employment of youths. Such program shall have the goal of providing employment opportunities for at least 250,000 youths each year.

(2) There is established an Opportunities in Private Enterprise program which shall be carried out in accordance with the provisions of this title, and which shall be designed to provide assistance to business concerns for the employment of youths. Such program shall have the goal of providing employment opportunities for at least 35,000 youths each year.

(b)(1) There is established, in the Executive Office of the President, an office to be known as the Office of Youth Initiatives.

(2) The Office shall—

(A) carry out the functions established in section 202; and

(B) unless the President makes any designation under subsection (c), carry out the provisions of this title.

(c) The President may, no later than 90 days after the date of the enactment of this Act, designate any Federal agency or agencies which the President considers to be appropriate to carry out the provisions of this title.

ESTABLISHMENT OF COMMISSIONS

SEC. 102. (a) Any local jurisdiction which desires to participate in any program established in section 101(a) shall establish a commission in accordance with the provisions of this section.

(b)(1) Any State which desires to participate in any program established in section 101(a), with respect to any area in such State which is not served by a local jurisdiction, may establish a commission in accordance with the provisions of this section.

(2) Any State which desires to establish a commission for the purposes of participating in any program established in section 101(a) may transmit to the Federal administering agency a proposal for the establishment of such a commission in accordance with the provisions of this section. The Federal administering agency shall review and approve any such proposal which meets the requirements set forth in this section.

(c) Any commission established under this section may use, for its administrative functions, not more than one-half of 1 percent of the amount allocated to it under section 103 for any fiscal year, except that any such amount shall be matched from non-Federal funds.

(d)(1) Each commission shall have not less than 15, nor more than 30, members. In the case of a commission established by a local jurisdiction (A) one-half of the members of such commission shall be appointed by the chief executive officer of the local jurisdiction and the remainder shall be appointed by the chief executive officer of the State; and (B) to the extent practicable, one-half of the members appointed under subparagraphs (A) and (B) of paragraph (2) shall be appointed by the chief executive officer of the local jurisdiction and the remainder shall be appointed by the chief executive officer of the State. In the case of a commission established by a State, the members of such commission shall be appointed by the chief executive officer of the State after soliciting and receiving recommendations from local jurisdictions and organizations representing and serving youth throughout the State involved.

(2) The members of each commission shall be selected as follows—

(A)(i) one-fourth shall be selected from among officers and employees of entities which may be eligible applicants;

(ii) one-fourth shall be selected from among individuals active in the field of education and training;

(iii) one-fourth shall be selected from among individuals representative of groups and organizations involved in meeting the special needs of youth; and

(iv) one-fourth shall be selected from among interested members of the general public; and

(B) one-fourth of the total membership of the commission shall be comprised of individuals who are less than 25 years of age.

(d) Each commission shall—

(1) be responsible for the distribution of funds received by a State or local jurisdiction;

(2) review and approve applications of eligible applicants in accordance with section 105;

(3) prepare annual program evaluations and reviews for submission to the chief executive officer of the State involved and to the Federal administering agency; and

(4) disseminate information to eligible applicants and to youth who may be eligible to participate in such programs, and provide for outreach and recruiting activities designed to encourage participation by youths described in subparagraphs (A) through (E) of section 105(c)(1).

(e) No member of a commission who, or whose family member, has any interest in the activities of any eligible applicant may participate in any way in the consideration of the application of such eligible applicant under subsection (d)(2).

ALLOCATION OF FUNDS

SEC. 103. (a)(1) The Federal administering agency shall allocate not less than 90 percent of the funds appropriated under section 203 in any fiscal year to States in accordance with the following factors—

(A) the number of youths residing in each State;

(B) the number of individuals residing in each State who are members of households with incomes below the low-income level; and

(C) the rate of unemployment in each State.

(2) The Federal administering agency shall allocate not more than 10 percent of the funds appropriated under section 203 in any fiscal year to States in such manner as the head of such agency considers appropriate to carry out the purposes of programs established in section 101(a).

(b)(1) Each State shall allocate not less than 90 percent of the funds received by such State under subsection (a) to (A) commissions established by local jurisdictions under section 102(a), and (B) with respect to any area of the State which is not served by a local jurisdiction, to any commission established by such State under section 102(b) or, if no such commission is established by such State, to the designated State agency, in accordance with the following factors:

(i) the number of youths residing in the area involved;

(ii) the number of individuals residing in the area involved who are members of households with incomes below the low-income level; and

(iii) the rate of unemployment in the area involved.

(2) Each State shall allocate not more than 10 percent of the funds received by such State under subsection (a) to (A) commissions established by local jurisdictions under section 102(a), and (B) with respect to any area of the State which is not served by a local jurisdiction, to any commission established by such State under section 102(b) or, if no such commission is established by such State, to the designated State agency, in such manner as the chief executive officer of such State considers appropriate to carry out the purposes of programs established in section 101(a). Allocations under this paragraph may include incentive payments to local jurisdictions which submit a joint application under subsection (c) as a result of overlapping populations as described in section 201(5).

(c) Any local jurisdiction which desires to receive an allocation under subsection (b) shall transmit an application for such allocation to the State involved. Such application shall include a plan which describes the manner in which the local jurisdiction will carry out the requirements of sections 104 and 105. Such application shall be approved no later than 60 days after its receipt, unless the State determines, after conducting a public hearing, that such application is not consistent with this Act, any applicable State law, or any regulations prescribed thereunder.

DISTRIBUTION OF FUNDS BY COMMISSIONS AND STATES

SEC. 104. (a) Any commission or State, in approving applications under section 105, shall assure that not less than 75 percent of the youths participating under programs established in section 101(a) in the local jurisdiction or State involved—

(1) are members of households with incomes below the low-income level; and

(2)(A) are and have been unemployed (i) for 15 consecutive weeks immediately before their selection for participation in such programs; or (ii) for not less than one-half of the weeks of the calendar year during which such application is made; or (B) are unemployed and have been out of school for one

complete term immediately before their application to participate in such programs.

(b) Any commission or State, in approving applications under section 105, shall fully consult with prime sponsor planning councils (established under section 104 of the Comprehensive Employment and Training Act of 1973) and State manpower services councils (established under section 107 of such Act) in order to achieve maximum coordination of plans, programs, and projects.

(c) Any State which receives an allocation under section 103 may retain not more than one-half of 1 percent of such allocation in any fiscal year for use, by any commission established by it or the designated State agency, in administering programs under this title. Any funds retained under this subsection shall be matched in cash by the State with non-Federal funds.

APPLICATIONS

SEC. 105. (a) Any eligible applicant which desires to carry out a project under this title may transmit an application to the appropriate commission or State, as the case may be. Any such application shall also comply with regulations of the Federal administering agency to assure that each application shall be in such form, and shall be transmitted in accordance with such procedures, as the commission or State may require, and shall—

(1) contain a detailed description of (A) the type of work to be carried out in the project; (B) the type of employment positions which will be filled; and (C) the period during which youths will be employed in jobs under the project;

(2) contain a detailed description of the opportunities for skill development and job training which will be made available to youths participating in the project, including (A) an analysis of the manner in which the project will meet the needs of participating youths and provide needed goods and services to the community involved; (B) an analysis of opportunities in the labor market for youths who obtain skills and training in the project; (C) a description of the manner in which participating youths will be provided ongoing basic education and training services through arrangements with secondary schools, community colleges, and trade and technical schools, and the manner in which such education and training services will be coordinated with similar activities conducted by Federal, State, and local programs; and (D) a description of the counseling and placement services (including an individualized future training, education, and employment plan) to be provided to each participating youth;

(3) contain a detailed description of the manner in which youths have been involved in the development of the application for the project;

(4) describe the manner in which the non-Federal share will be provided, including the type and value of any in-kind services; and

(5) contain such additional information as the commission or State may require.

(b) A commission or State may not approve any application for a project transmitted by an eligible applicant under this section unless the commission or State determines that the project—

(1) will result in the production of goods and services which are valuable to the community and to the Nation, including, in the case of the National Youth Service program, public service employment (as defined in section 701(7) of the Comprehensive Employment and Training Act of 1973), and will seek to emphasize the rehabilitation of housing and expansion of housing supply, the improvement of environmental conservation, the development of mass transportation, the improvement and expansion of recreational facilities for youth described in subparagraphs (A) through (E) of section 105(c)(1), and the provision of services to children from families below the low-income level, elderly and handicapped persons, and others in need of special assistance.

(2) will provide appropriate counseling and placement services (as specified in subsection (a)(2)(D)) designed to facilitate the transition of youths from participation in the project to (A) permanent jobs in the public or private sector; or (B) education or training programs;

(3) will be initiated as soon as practicable;

(4) will be completed no later than 3 years after the date upon which the application is approved;

(5) will provide effective means through which youths participating in the project may acquire knowledge and skills and receive basic education and training as described in subsection (a)(2)(C), and will establish procedures designed to certify the extent to which each such youth has acquired such knowledge and skills;

(6) is designed to result in the hiring of youths participating in the project by the eligible applicant carrying out the project after completion of the project, and in the placement of other youths participating in the project in appropriate jobs in the community;

(7) will provide an inventory of job tasks which can be performed by handicapped individuals;

(8) except as provided in subsection (g), will provide not more than 100 jobs for youths who desire to participate in the project; and

(9) will not (A) impair any existing contract for the provision of goods or services; (B) result in the substitution of Federal funds for the performance of work which would be performed in the absence of the availability of such funds; or (C) result in the substitution of jobs receiving assistance under this title for jobs receiving assistance under any other Federal program.

(c) Any eligible applicant which desires to carry out a project under this title shall provide assurances that—

(1) in any case in which the number of youths applying for participation in the project exceeds the number of jobs available in the project, preference will be given to youths who (A) have deficient educational backgrounds and basic skills; (B) are veterans of military service having difficulty in readjusting to civilian life; (C) are handicapped individuals; (D) have a history of involvement in the criminal justice system, or have participated in programs designed to divert youths from the criminal justice system; or (E) have otherwise demonstrated special need, as determined by the commission or State;

(2) not more than 5 percent of funds made available to the eligible applicant will be used for administering the project, not more than 25 percent of such total funds will be used for the provision of education, training, supervisory, and other supportive services and not less than 70 percent of such total funds will be used for the payment of compensation and the provision of benefits to youths employed in the project;

(3) youths participating in the project will receive total compensation (including the value of room and board in the case of a residential project) for work (A) equal to or greater than the Federal minimum wage, together with appropriate fringe benefits, as determined by the commission or State; but (B) at rates which do not exceed 125 percent of the Federal minimum wage, if the project includes a graduated payment schedule;

(4) youths participating in the project (except in the case of a residential project) will receive compensation for work no later than 30 days after such work is performed;

(5) no job positions will be filled before the close of the period during which applications for such positions may be submitted; and

(6) appropriate arrangements have been made to comply with section 104(b).

(d)(1) A commission or State shall conduct public hearings, not less often than annually, with respect to applications for projects by eligible applicants under subsection (a).

(2) A commission or State shall determine whether to approve any such application no later than 30 days after the conclusion of the public hearing held with respect to such applications.

(e) Federal funds may not be used to defray more than 80 percent of the cost of any project approved under this section. The non-Federal share may be in cash or in kind.

(f) In the case of public or private nonprofit organizations which are carrying out any project under this title, payments of funds allocated to such organizations may be made in advance.

(g) The Federal administering agency shall establish guidelines which permit the approval by the commission or State involved of projects under this section which would provide more than 100 jobs for youths who desire to participate in the project. Not more than 5 percent of the funds allocated to any State under section 103 in any fiscal year may be used to carry out such projects.

(h) Any project which is not completed by the end of the one-year period immediately following the date upon which such project begins (1) shall be reviewed annually by the commission or State, and (2) may be renewed by such commission or State upon completion of such review, except that no such project may be terminated unless pursuant to a public hearing and no project may exceed 3 years in duration.

(i) In any case in which the number of youths who apply for participation in a project, and who qualify under criteria established in subparagraph (A), (B), (C), (D), or (E) of subsection (c)(1), exceeds the number of jobs available in the project, the eligible applicant involved may establish and carry out a random selection process in order to fill the job positions available.

SPECIAL REQUIREMENTS AND CONDITIONS

SEC. 106. (a) No Federal funds received by any eligible applicant under this title may be used by such eligible applicant (1) to compensate any youth who is hired to fill a position created by the suspension or termination of the employment of any regular employee of such eligible applicant; or (2) to purchase any equipment or supplies in connection with carrying out the project involved.

(b) No person in the United States shall on the ground of race, creed, color, national origin, sex, or political affiliation or beliefs, or on the ground of any other factor specified in any Federal law prohibiting discrimination, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under, any program or activity funded in whole or in part with funds made available under this Act.

(c) Any job position created by any project carried out under this title shall be in addition to any job position which would be created by the eligible applicant if such applicant did not participate in any program established in section 101(a).

TITLE II—GENERAL PROVISIONS

DEFINITIONS

SEC. 201. For purposes of this Act—

(1) the term "commission" means any commission established under section 102;

(2) the term "eligible applicant" means—

(A) with respect to the National Youth Service program established in section 101(a)(1), any State or political subdivision thereof and any public or private nonprofit organization; and

(B) with respect to the Opportunities in Private Enterprise program established in section 101(a)(2), any for-profit concern;

(3) the term "Federal administering agency" means the Office or, if the President exercises the authority established in section 101(d), the Federal agency or agencies designated by the President under section 101(d);

(4) the term "handicapped individual" has the meaning given it by section 7(6) of the Rehabilitation Act of 1973 (29 U.S.C. 706(6);

(5) the term "local jurisdiction" means any city or county which has a population of 250,000 or more, except that (A) in any case in which a county which has a population of 250,000 or more includes a city which has a population of 250,000 or more, the chief executive officer of the State involved shall determine, based upon published regulations which specify objective criteria, whether the city or county involved shall be considered the local jurisdiction for such overlapping population for purposes of this Act; and (B) the chief executive officer of the State may reduce the population level of 250,000 established in this paragraph to any population level which exceeds 50,000;

(6) the term "low-income level" has the meaning given it by section 701(a)(4) of the Comprehensive Employment and Training Act of 1973 (29 U.S.C. 981(a)(4));

(7) the term "Office" means the Office of Youth Initiatives established in section 101(b);

(8) the term "State" means the several States, the District of Columbia, Guam, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands, except that, for purposes of section 103(a), such term does not include Puerto Rico; and

(9) the term "youth" means any individual who (A) has attained the age with respect to which the requirement of compulsory public education ceases to apply under the laws of the State in which such individual resides; and (B) has not attained 22 years of age.

PROGRAM DEVELOPMENT AND EVALUATION

SEC. 202. (a) The Office shall monitor programs and projects carried out under title I and shall transmit a report to the Congress and to the President no later than 18 months after the date of the enactment of this Act. Such report shall include—

(1) an analysis of the effectiveness of such programs and projects, and a comparison of such effectiveness with the effectiveness of other similar Federal programs and projects;

(2) a discussion of the appropriate future scope and structure of programs and projects carried out under title I and other similar Federal programs and projects; and

(3) such recommendations for legislative or other action as the Office considers necessary or appropriate.

(b) The office shall carry out research and development activities with respect to youth employment programs. Such activities shall include—

(1) the establishment of demonstration projects to determine the feasibility of improving and expanding the programs established in section 101(a) to include—

(A) a national priorities program designed to fund large-scale youth employment projects administered by Federal agencies;

(B) a comprehensive work-study program designed to carry out projects to assist employed persons in continuing their education; and

(C) model projects for carrying out the programs established in section 101(a); and

(2) the development and transmittal of recommendations to the Congress, the President, the heads of Federal agencies, and other governmental officers with respect to policies and programs relating to unemployment among youths and other youth problems.

AUTHORIZATION OF APPROPRIATIONS

SEC. 203. (a) There are authorized to be appropriated for each of the fiscal years 1978, 1979, and 1980, such sums as may be necessary to carry out the National Youth Service program established in section 101(a)(1).

(b) There is authorized to be appropriated $250,000,000 for each of the fiscal years 1978, 1979, and 1980, to carry out the Opportunities in Private Enterprise program established in section 101(a)(2).

(c) The Commonwealth of Puerto Rico shall be entitled to an allocation for any fiscal year in an amount which does not exceed 2 percent of the total amount of funds appropriated for such fiscal year under this section. The Federal administering agency, in determining the amount of funds which shall be allocated to the Commonwealth of Puerto Rico under this subsection in any fiscal year, shall take into account the factors established in section 103(a).

(d) There is authorized to be appropriated to the Office $100,000,000 for each of the fiscal years 1978, 1979, and 1980, to carry out the functions of the Office under this Act. Not less than 90 percent of amounts appropriated under this subsection for any fiscal year shall be used to carry out the provisions of section 202(b)(1).

SUMMARY OF CRANSTON-YOUNG YOUTH EMPLOYMENT LEGISLATION H.R. 20/S. 20, THE PROPOSED YOUTH INITIATIVES ACT OF 1977

The Youth Initiatives Act of 1977 would establish two youth employment programs (beginning in FY 1978) designed to provide assistance through States, local governments, and nonprofit organizations for the employment of youths: (1) a National Youth Service program with the goal of providing jobs for at least 250,000 youths per year with public and private nonprofit projects—at an estimated cost of $1.75 billion for each of the three years (there is a such sums authorization for this program); and (2) an Opportunities in Private Enterprise program designed to provide assistance to business concerns with the goal of providing jobs for at least 35,000 youths per year—with an authorization of appropriations of $250 million for each of the three years.

FEDERAL ADMINISTRATION

The Act would also establish an administrative entity, the Office of Youth Initiatives, in the Executive Office of the President, to conduct program development and evaluation, to carry out research and demonstration activities, and, unless the President designates a Federal agency (or agencies) to administer this Act, to administer the program at the Federal level. $100 million is authorized to be appropriated to carry out the functions of the office for each of the three years.

FUNDING ALLOCATION

Funds would be allocated to each State on the basis of three factors: (1) the number of youths residing in the State, (2) the number of low-income persons in the State, and (3) the State-wide rate of unemployment. The State in turn would allocate appropriate funds to commissions (established by cities or counties with populations of 250,000 or more) based on the same three factors as applicable in those areas. (The Governor could lower the 250,000 population requirement to 50,000 for a State.) The commissions would make grants to local governmental agencies and for-profit or non-profit organizations to run projects. Project applicants not in jurisdictions of 250,000 or more would apply directly to the Governor or to the State commission (if the Governor elects to set one up). Federal funds would be distributed to eligible applicants on the basis of an 80 to 20 percent matching ratio. Ten percent of the total State allocation could be retained by the Governor (or the State commission) for discretionary purposes.

COMMISSIONS/APPLICATION APPROVAL

The commissions to be established by the local jurisdictions (or a State) would be responsible for distributing the funds received, reviewing and approving applications from eligible applicants, disseminating information to eligible applicants and youths who may be interested in participating, and encouraging participation by youths in low-income communities. The commissions (appointed half each by the mayor, or county board, and the Governor) would be equally comprised of officers of potential project applicants, persons active in the field of education and training, representatives from groups and organizations involved in meeting the special needs of youths, and members of the general public; one-fourth would be under 25 years old.

GENERAL PROVISIONS

Those eligible for jobs in both Youth Initiatives programs would be youths from the age at which schooling is no longer compulsory (which varies among States, generally 16, as in California) through 21 years of age. At least 75 percent of the jobs created would be targeted on youth from low-income families who are unemployed and out of school for at least one term. Participants would receive the minimum wage, or its equivalent in the case of a residential program, for work performed.

As a fundamental part of every project, basic education, skill development, and job training services must be provided to all participants.

Each participant would be provided with counseling and placement services including a plan for future training, education, and employment. The projects would be designed so that permanent jobs with the sponsoring organization or elsewhere would be available.

Linkages with community colleges, high schools, vocational education, and trade and technical schools would be required as well as coordination with similar government-sponsored programs. Full consultation in approving applications would be required, as to both State and locally approved projects, with the State and local manpower planning councils.

On each project no less than 70% of the funds would be used to provide wages and fringe benefits to youths; not more than 20% on the provision of education, training, supervisory, and other supportive services; and not more than 5% on administration. No funds are provided for equipment and supplies; however, the 20% non-Federal share contributed by the projects may be used for this purpose.

THE NATIONAL YOUTH SERVICE PROGRAM

The National Youth Service program jobs would provide human and environmental services or public works of value to the community, especially to rehabilitate housing, improve the environment, develop mass transportation services, expand recreational facilities for low-income youth, and to serve needy children, elderly, and handicapped persons.

State and local governments, their agencies, or public and private nonprofit groups would be eligible for grants to set up National Youth Service projects. Thus, for example, the State Department of Education, the State Resources Agency, a State conservation corps, a county hospital, a local church group, the YMCA, or the Office of the

Mayor of any locality could apply for financial assistance to operate a project.

THE OPPORTUNITIES IN PRIVATE ENTERPRISE PROGRAM

The Opportunities in Private Enterprise program would subsidize employment of youth as apprentices and interns in the private sector, with the same minimum wage requirements applicable. Through this program, both small businesses and large corporations could design appropriate employment programs and apply for Federal support. Auto mechanics, computer and other electronics systems, environmental control and protection, and equipment repair are some of the fields in which subsidized apprentices could be trained by skilled managers and craftspersons.

By Mr. DOMENICI (for himself, Mr. ABOUREZK, Mr. BUMPERS, Mr. STEVENS, Mr. DOLE, Mr. EASTLAND, Mr. YOUNG, Mr. LEAHY, Mr. PERCY, Mr. ALLEN, Mr. CANNON, Mr. GRIFFIN, Mr. GRAVEL, Mr. GARN, Mr. JOHNSTON, and Mr. NUNN):

S. 21. A bill to amend the Occupational Safety and Health Act of 1970 to provide additional consultation and education to employers, and for other purposes; to the Committee on Labor and Public Welfare.

Mr. DOMENICI. Mr. President, today, this first day of the 95th Congress, I have introduced a measure which had its roots in the last Congress. Part of this bill was passed by the House last year, but action was not taken in the Senate, due in part to the volume of other legislative measures requiring our attention prior to the year's end.

The bill I have introduced today would amend the Occupational Safety and Health Act of 1970 to provide consultation services to employers. Furthermore, the law would require that the consultation visits not be transmitted to representatives of the Secretary engaged in enforcement activities except where necessary to eliminate an imminent danger disclosed during the consultation visit.

The purpose of this measure is to provide a needed program of Federal on-site consultation and education to encourage employers to comply with safety and health standards promulgated under the Occupational Safety and Health Act of 1970 and to furnish their employees a place of employment which is safe and healthful.

I would like to point out that although 34 States and territories provide consultation services to employers under two different laws, such services are unavailable in 22 States and territories. Obviously the present law is inequitable in providing consultation services to some employers but not to others. Furthermore, I believe it is important that the consultation services be separate from the enforcement officers. Businessmen and women might hesitate to call upon the consultative services unless there is a distinction between these two functions. Addition funds will be allotted to the OSHA program for the training of consulting officers so as to not weaken present compliance efforts.

Oversight hearings were held last year before the Manpower, Compensation, and Health and Safety Subcommittee chaired by Congressman DOMINICK DANIELS. Four of the 31 hearing days were devoted principally to the consideration of onsite consultation services. Testimony endorsing the concept was presented by OSHA officials, congressional members and public witnesses. On the basis of this testimony, the subcommittee reported out the measure by a vote of 10 to 2, the full Committee on Education and Labor by a 23-to-10 vote. The House eventually passed the bill on November 17, 1975, without amendments.

Some have argued that consultation services would diminish enforcement efforts. I want to stress the point that certainly that is not my intention. In fact, I believe this bill will enable employers to comply to the regulations by seeking the needed information. I believe this measure can only benefit the employees, the primary concern in this matter, but also can assist the employers who, until now, have felt the law was discriminatory, vague, confusing, contradictory, or highly technical. Furthermore, the bill is clear in allowing appropriate action should the consulting officer find an imminent danger to the employees. In other words, if a consulting officer observes an immediate danger to the employees, something is done. Otherwise the employer is simply informed of the rules and regulations. We should not assume that employers do not want to provide the best environment to their employees which is the attitude all too often now projected by the Government representatives. Nor should we assume that employers know all the regulations which affect that particular business.

The small business men and women in New Mexico with whom I have talked, are more than willing to provide the safest possible working conditions for their employees, but they do feel overwhelmed with the present rules and regulations. Nor can they afford a safety official or some other safety counselor as the big businesses can.

Mr. President, no law is perfect. There does come a time to amend a law in order to improve it. The time has come for us to amend and improve the original Occupational Safety and Health Act. The onsite consultation services, which I have introduced today, will be voluntary, based solely upon an employer's request for consultation to assist him in interpreting standards as they apply to his workplace.

In summary, this amendment would direct the Labor Department to give priority in filling requests to small businesses and hazardous workplaces. Consultation services would be separate from enforcement proceedings, and consultation and compliance staffs would be separate. This bill will allow OSHA to gain greater acceptance in all 56 jurisdictions covered by the act and thereby increase worker safety.

This legislation will provide the needed incentive toward voluntary compliance by management—whether the business is large or small. This is not a bill to further erode the faith of labor toward management, but rather it is meant to breach that gap.

I hope my colleagues will see fit to support this effort. I trust their mail and conversations with their constituents have been similar to mine. Businesses, and particularly small business estblishments are trying to subscribe to the law. With the enactment of this legislation, I believe they can do it. As a result, the purpose of the entire act will be enhanced—that of providing the safest possible workplace for all employees.

Mr. ABOUREZK. Mr. President, I am pleased to join with Senator DOMENICI in offering this OSHA onsite consultation bill. As my colleagues know, I was a cosponsor of identical legislation last year. I am hopeful that the Senate will act on this important bill this year.

Last October, I chaired a field hearing of the Select Small Business Committee in Sioux Falls, S. Dak., on the question of OSHA's impact on family farmers and small businessmen. One of the questions we inquired into at that time was the potential benefit of an onsite consultation program. Almost unanimously, the small businessmen who testified at that hearing told us that onsite consultation by OSHA would better enable them to meet safety and health standards in their places of business.

I know many of the small businessmen in South Dakota personally. I know that they would not consciously subject their employees to dangerous or unhealthy conditions. But I also know that many of them find OSHA's regulations to be extremely detailed and complex and difficult to comply with absent the opportunity to discuss specific problems and questions with OSHA personnel.

Yet, the Occupational Safety and Health Act makes no provision for onsite consultation. OSHA inspectors, who arrive unannounced, conduct their inspections and then are required by law to levy penalties for violations discovered, subject to the 10 or fewer amendments that was enacted last year. Thus, any effort by a small businessman to seek guidance on possible violations would subject the employer to sanctions if such violations were found.

OSHA does provide matching funds if States wish to establish onsite consultative services through State agencies. Yet many States, my own included, have found it fiscally impossible to provide such services. Businesses in those States who desire to bring their workplaces into compliance with OSHA standards have absolutely no place to go for the guidance they seek, other than to risk the penalties of an OSHA inspection.

This legislation we are introducing would alleviate this problem by providing for Federal onsite consultation through the Occupational Safety and Health Administration. Funds would be appropriated for this purpose, separate and apart from funds provided for inspection and enforcement purposes.

Let me make the purpose of this legislation clear: It is not designed to take away from the enforcement efforts of OSHA nor is it intended to give recalcitrant employers a further shield to hide behind in failing to clean up unsafe or unhealthy workplaces.

This bill, and my purpose in cosponsoring it, is intended to provide these

much needed consultative services to employers, primarily small businessmen, who sincerely desire to comply with OSHA, but need this additional help to do so.

I hope that my colleagues will join with us in acting to get this important legislation enacted as quickly as possible.

Mr. DOMENICI. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 21

A bill to amend the occupational Safety and Health Act of 1970 to provide additional consultation and education to employers, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 21 of the Occupational Safety and Health Act of 1970 is amended by adding at the end thereof the following new subsection:

"(d)(1) In order to further carry out his responsibilities under this section, the Secretary may visit the work place of any employer for the purpose of affording consultation and advice to the employer. Such consultation visits may be conducted only upon a valid request by the employer for consultation and advice at the work place concerning the obligations of the employer under section 5. In making consultation visits under this subsection, the Secretary shall give priority to small businesses and to hazardous work places. The Secretary shall make and transmit to the employer a written report, containing recommendations regarding the elimination of any hazards disclosed during any such consultation visit.

"(2) No consultation visit authorized by this subsection shall be regarded as an inspection or investigation under section 8 of the Act and not citations shall be issued nor shall any civil penalty be imposed by the Secretary upon such visit except that:

"(A) where an employer fails to eliminate an eminent danger disclosed during the consultation visit the Secretary shall take any appropriate action under section 13 to eliminate such condition; and

"(B) if there is substantial probability that death or serious physical harm to employees could result from the conditions disclosed during a consultation visit the Secretary shall immediately notify the employer of such conditions and afford the employer a reasonable time to eliminate such conditions. Where the Secretary is not satisfied through a further consultation visit, documentary evidence, or otherwise that such elimination has taken place, the Secretary may take appropriate action under this Act.

"(3) Information regarding consultation visits shall not be transmitted to representatives of the Secretary engaged in enforcement activities except where necessary in order to carry out the provisions of paragraph (2).

"(4) Except as otherwise provided, nothing herein shall affect the duties and responsibilities of the Secretary under sections 8, 9, 10, and 13. Advice given during a consultation visit shall not be binding on the Secretary in the event of any inspection of the work place. In the event of such inspection, a written report of the consultation visit may, with the consent of the employer, be considered by the Secretary for the purpose of determining the employer's good faith in proposing penalties.

"(5) In prescribing rules and regulations pursuant to this subsection, the Secretary shall provide for the separation of functions between officers, employees, or agents who conduct consultation visits pursuant to this subsection and officers, employees, or agents who conduct inspections or investigations under section 8.

"(6) In order to further carry out his responsibilities under this section, the Secretary shall establish programs for the education and training of employers and employees which, to the extent practicable, shall be conducted in local communities and shall deal with the hazards in particular industries.".

SEC. 2. For the purpose of carrying out the amendment made by the first section of this Act there is authorized to be appropriated $7,000,000 for the fiscal year ending September 30, 1977 and $8,000,000 for the fiscal year ending September 30, 1978.

By Mr. PROXMIRE (for himself, Mr. MATSUNAGA, and Mr. METCALF):

S. 22. A bill to amend the Communications Act of 1934 in order to recognize and confirm the applicability of and to strengthen and further the objectives of the first amendment to radio and television broadcasting stations; to the Committee on Commerce.

FIRST AMENDMENT CLARIFICATION ACT OF 1977

Mr. PROXMIRE. Mr. President, today I am introducing the First Amendment Clarification Act of 1977. This bill is almost identical to a measure I first introduced in January 1975. Its purpose is to give the people of the United States the full benefit of a free press, electronic as well as printed.

MAKE BROADCASTERS EQUAL

We need diversity of ideas, especially in these times when newspapers are finding it difficult to stay in business against tough economic competition.

Now is the time to make broadcasters fully equal to publishers so that the people of this country can have diversity in the news media.

Freedom of the press was designed for the benefit of all American citizens, not just for the benefit of the disseminators of news and opinion.

And if the most popular of the disseminators, television and radio, continue to be tied down by governmental controls, the people of this Nation will continue to be the losers.

Mr. President, my bill is designed to change this situation.

PURPOSE DEFINED

The first section of my bill defines its purpose: to recognize and confirm the applicability of the first amendment to broadcasting and to strengthen and further the objectives of the first amendment. That can be accomplished by removing the statutory and regulatory restrictions placed on broadcasters who operate under the Communications Act of 1934.

Section 2 of my bill deals with the definition of "public interest, convenience, and necessity" under which broadcasters operate. Right now, that phrase in the Communications Act is used to make broadcasters accountable to the Federal Communications Commission after the fact for everything they put on the air.

STOP "RAISED EYEBROWS"

My bill makes it clear that the term "public interest, convenience, and necessity" cannot be construed to give the FCC jurisdiction to require that any person be provided broadcast time, or to require that any viewpoint be given broadcast time. It further makes clear that the FCC cannot exercise any power, supervision, or control over the content or scheduling of any program or other material broadcast, and the FCC cannot comment on or review any of those items. This latter provision is designed to stop what has been called the raised-eyebrow effect used by the FCC to control and regulate broadcasters indirectly.

SECTION 315 REPEALED

Section 3 of my bill repeals that part of the Communications Act that permits the FCC to revoke the license of any station that willfully refuses or fails to allow a candidate for Federal office to buy reasonable amounts of broadcast time.

Section 4 repeals section 315 of the Communications Act of 1934. Section 315 contains both the equal time rule and the authorization for the FCC's Fairness Doctrine.

The equal time rule requires that when a candidate for a public office is given or sold time, any other candidate for that same office must be given an equal opportunity. That sounds great. But the equal time rule is an abridgment of the first amendment. It is governmental control over a part of the free press.

The Fairness Doctrine of the FCC requires that broadcasters afford reasonable opportunities for the presentation of contrasting viewpoints on controversial issues of public importance. And that is incorporated into law through section 315.

Unlike the equal time requirement, the fairness doctrine does not call for each viewpoint to receive the same amount of air time; neither does it require that the other viewpoints be given in the same program. That sounds fine. But the trouble is, even if it were constitutional, the fairness doctrine is applied case by case with only the particulars of past cases to use in judging its application.

SECTION 326 AMENDED

Section 5 of my bill amends section 326 of the Communications Act of 1934, which states that there shall be no censorship by the FCC and that the FCC shall not interfere with the right of free speech. That is fine as far as it goes. I add the right of free press. That is the key to putting broadcasters and publishers on an equal footing regarding first amendment rights.

Further new language in section 326 will make it clear that broadcasters will have the right to determine the scheduling and the content of their programs and who shall appear on them so that the chilling effect of the existence of the FCC will not be a factor.

PUBLIC BROADCASTING

Section 6 deals with a first amendment problem contained in section 396(g)(1)(A) of the Communications Act of 1934, which authorizes the Corporation for Public Broadcasting to facilitate the full development of educational broadcasting in which programs of high quality, obtained from diverse sources, are to be made available to noncommercial educational television or radio stations. But this must be done with "strict adherence to objectivity and balance in all programs or series of programs of a controversial nature."

Such a Government-imposed standard is inappropriate and undesirable. Trying to enforce it can result in a chilling effect on the free play of ideas which public broadcasting should help promote.

By simply deleting this standard, section 6 of my bill is designed to solve the first amendment problem it poses.

POLITICAL EDITORIALIZING

Finally, section 7 of my bill repeals the prohibition of political editorializing by noncommercial educational broadcasting stations. This section of the current law, aimed at licensees, is clearly unconstitutional, although it has not been tested.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 22

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE AND STATEMENT OF PURPOSE

SECTION 1. (a) This Act may be cited as the "First Amendment Clarification Act of 1977".

(b) It is the purpose of this Act to recognize and confirm the applicability of and to strengthen and further the objectives of the first amendment of the Constitution of the United States by removing statutory and regulatory restrictions on broadcasters operating under the Communications Act of 1934.

DEFINITION OF PUBLIC INTEREST, CONVENIENCE, AND NECESSITY

SEC. 2. Section 309 of the Communications Act of 1934 is amended by inserting at the end thereof the following:

"(i) Notwithstanding any other provision of this part, effective on and after the date of the enactment of this subsection for the purposes of this part, the term 'public interest, convenience, and necessity' shall not be construed to give the commission jurisdiction to require the provision of broadcast time to any person or persons or for the expression of any viewpoint or viewpoints or otherwise to exercise any power, supervision, control, influence, comment, or review, either directly or indirectly, over the content or schedule of any program or any other material broadcast by licensees, except where the broadcast of such material is otherwise prohibited by law.".

REPEAL OF LICENSE OR CONSTRUCTION PERMIT REVOCATION POWER RELATING TO FACILITIES FOR CANDIDATES FOR FEDERAL PUBLIC OFFICE

SEC. 3. Section 312(a) of the Communications Act of 1934 is amended by inserting "or" at the end of clause (5), striking out the semicolon and "or" at the end of clause (6) and inserting in lieu thereof a period, and striking out clause (7).

REPEAL OF SECTION 315 RELATING TO FACILITIES FOR CANDIDATES FOR PUBLIC OFFICE

SEC. 4. Section 315 of the Communications Act of 1934 is repealed.

RECOGNITION OF APPLICATION OF RIGHT OF FREE PRESS

SEC. 5. Section 326 of the Communications Act of 1934 is amended by inserting after "speech" the following: "or the right of free press" and by striking the period after "communication" and inserting in lieu thereof a comma and "including the right of a radio station to determine the schedule of its programs and the content of its programs. Nothing in this Act shall be construed to require the provision of broadcasting time to any person or persons.".

REPEAL OF CERTAIN LIMITATION ON CORPORATION FOR PUBLIC BROADCASTING

SEC. 6. Section 396(g)(1)(A) of the Communications Act of 1934 is amended by striking out all beginning with the comma following "broadcast stations" to the semicolon at the end thereof.

REPEAL OF PROHIBITION OF POLITICAL EDITORIALS

SEC. 7. Section 399 of the Communications Act of 1934 is repealed.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 23. A bill to provide for the normal flow of maritime interstate commerce between Hawaii, Guam, American Samoa, or the Trust Territory of the Pacific Islands and the west coast, and to prevent certain interruptions thereof; to the Committee on Labor and Public Welfare.

HAWAII AND UNITED STATES PACIFIC ISLANDS SURFACE COMMERCE ACT OF 1975

Mr. INOUYE. Mr. President, the 93d Congress in the U.S. Senate passed by a vote of 58 to 39 the Hawaiian and United States Pacific Islands Surface Commerce Act. Unfortunately, this measure failed to come to a vote on the floor of the House, although a similar proposal considered by a subcommittee was reported favorably. In the 94th Congress, I introduced this bill in its present modified form.

While no action was taken in the 94th Congress on identical measures, the need is still great. The current peace between labor and management in the west coast longshore and maritime trades cannot be taken for granted. Our vulnerability to forces beyond our control continues unabated.

Today, I reintroduce this bill with great hope that the 95th will be the Congress which will act favorably on the most important single piece of legislation affecting all the people of my State which is likely to come before us.

That hope is based on more than the margin by which this measure was approved by the Senate in the 93d Congress. For, the version which I introduce today deletes or revises certain provisions from the earlier bill which had troubled some of my colleagues and particularly members of the Senate Labor and Public Welfare Committee.

These provisions include: Limiting sharply the parties who can seek an injunction, providing for concurrent application of any injunction issued under this act and any injunction which may be granted under section 208 of the Labor-Management Relations Act, and a reduction of the maximum length of an injunction under this bill from 160 days to 120 days.

These are important changes and it is my hope that some who found it difficult to support the measure which was passed in the 93d Congress may as a result of such changes find it possible to give it their support.

Passage of this measure has long been awaited by the people of my State and of the other U.S. Pacific islands. I first introduced a measure to reasonably secure our only means of surface commerce back in 1971. In January of 1972, 3 days of hearings were held on that measure in Honolulu. As a result of those hearings legislative changes were made and in the 1st session of the 93d Congress all four members of the Hawaii congressional delegation jointly introduced the legislation which was the forerunner of the measure I introduce here today.

The hearings which have been held, the reports which have been filed, and the debate on the floor of the Senate have all amply demonstrated the severity and uniqueness of the problem which this measure seeks to resolve. We, in Hawaii, are uniquely dependent upon one mode of surface commerce and upon that commerce flowing between the west coast ports and our ports in Hawaii. Such dependence is shared only by the other U.S. Pacific islands. Yet that trade has almost no influence on the collective bargaining process because it constitutes such a small percentage of total west coast maritime trade. The west coast-Hawaii trade constitutes only some 3 percent of the total longshore hours worked on the west coast and some 7 percent of the shipboard labor. On the management side the carrier involved in that trade has less than 13 percent of the voting strength in the Pacific Maritime Association, the management interest responsible for negotiating settlement of maritime disputes affecting the west coast trade.

The Hawaii and United States Pacific Islands Surface Commerce Act recognizes the principle that we should interfere as little as possible, consistent with our objective, with the normal economic forces which are operative in labor-management negotiations.

My bill recognizes further that any measure of interference in labor-management disputes must be an even-handed one. Any interference must be to the advantage of neither labor nor management.

It recognizes that the mere and recurring threat of stoppage itself causes great economic damage as merchants and other economic interests in Hawaii seek to gird against any stoppage by expensive stockpiling of merchandise. Warehousing costs in Hawaii are 250 percent of mainland costs according to a recent study.

This measure recognizes that any proposed solution must not only be fair and reliant on normal labor-management economic forces but it must also be one which can be readily implemented. The proposed solution is one which has been regularly utilized on a voluntary basis to transport military cargo including post exchange and commissary supplies during previous shipping stoppages.

This measure meets the necessary criteria of having broad support. In addition to the unanimous support of the Hawaii congressional delegation, last year's measure had the support of the Governor and the mayors of our counties. The Hawaii State Senate endorsed the proposal as did the representatives of Guam and American Samoa. The Honolulu Chamber of Commerce and other Hawaii economic interests supported the measure. The county councils have indicated their support.

Despite differences of party and political philosophy we achieved a remarkable degree of unity in support of such action. While some seek greater relief than that provided here, it is one around which an extraordinary array of political and economic leaders have rallied. I am confident this revised version will receive

even broader support. The reasons are clear and persuasive.

On each occasion when there is a shipping stoppage in the west coast trade, or even the threat of such a stoppage, the shippers and consumers of Hawaii are held hostage in a dispute not of their making and one over which they have little, if any, influence.

During the hearings of the Merchant Marine Subcommittee of the Senate Commerce Committee, we received extensive documentation detailing the severity of the economic damage to the people of our State during the 1972 shipping strike. Nothing has happened since those hearings to lessen our concern. The strike then current continued for another 34 days after the expiration of the Taft-Hartley injunction. In fact, a later strike, involving a very small number of workers, closed down our shipping for 41 days.

With 99 percent of our trade by weight arriving by ship or barge and with some 90 percent of our imported food products dependent on west coast-Hawaii shipping, the need for relief can be clearly seen. In conjunction with Guam, American Samoa, and the Trust Territory of the Pacific Islands we are in a uniquely dependent and vulnerable condition.

Some have suggested that we seek a solution to our problem through general legislation which would apply to all transportation stoppages. I have opposed this course of action for our problem is unique and there is no justification in my mind for placing restrictions on the right to strike or to settle disputes through free collective bargaining where no clear and overriding threat to the economic health and survival of a people exists.

We may not be able to measure the costs in precise dollar amounts which have been added to the cost of living and doing business in Hawaii because of the recurring stoppages. Yet we know they were substantial. We know the Federal Government has found it necessary to continue the cost-of-living allowance for Federal employees in Hawaii.

We know it is time to take effective action to bring an end to this added burden. We are confident this can be done without giving up the important rights of any group. I believe the measure introduced here today is the legislative vehicle through which our goal can finally be achieved.

By Mr. LEAHY (for himself, Mr. PELL, Mr. STAFFORD, Mr. HUDDLESTON, and Mr. ANDERSON):

S. 25. A bill to amend the Emergency Petroleum Allocation Act of 1973, and for other purposes; to the Committee on Interior and Insular Affairs.

Mr. LEAHY. Mr. President, rumors persist as to whether President Ford will act to suspend mandatory allocation regulations for motor gasoline before the new administration takes office.

These regulations, promulgated pursuant to the Emergency Petroleum Allocation Act of 1973, give wholesalers and retailers the right to insist on deliveries from their 1972 suppliers. Abandoning them would have serious implications for millions of Americans, particularly those living in sparsely populated rural areas.

Even if gasoline is not decontrolled this month, or even this year, we must be prepared for this eventuality. Legislation is needed to make sure that every State has an early warning of a pullout by a major gasoline supplier. With that information the State energy office would at least have some time to minimize the impact.

Therefore, I am today introducing legislation which would require that a company distributing or marketing 2 percent or more of the gasoline consumption of a State in calendar year 1975 must give 6 months' notice to the Governor of any intent to discontinue its operations in the State. Furthermore, such company would be prohibited from withdrawing more than 25 percent of its supply operations, based on calendar year 1975, in any ensuing 6-month period.

In short, in addition, to 6 months' advance notice, a State would be assured that a major gasoline supplier would not complete a total withdrawal for an additional 2-year period.

My bill would give Governors and their energy advisers time to seek replacements for withdrawing gasoline suppliers in order to cushion the economic impact on affected areas. It would give service station owners time to seek alternate suppliers.

Mr. President, it is barely 3 years since American motorists were forced to queue up in gasoline stations across the land hoping that the pumps would not run dry before they reached the head of the line. The long lines of the winter of 1973–74 have receded from memory and Americans continue to consume gasoline as if the embargo had never taken place. Even the recent price increase by the OPEC nations, which will add at least a penny a gallon to the price of gasoline, is not likely to have any effect on our present level of consumption.

Gasoline is abundant partly because of the relatively mild winters of the past 2 years which reduced the need for distillate oil. Whether the unusually severe winter we have experienced thus far will continue, and ultimately affect our petroleum supply, remains to be seen. Among the less pleasant reasons for the abundance are the serious decline in new housing starts, and most important, unemployment and the recession. As a result, with plant capacity near alltime lows and unemployment levels near alltime highs, consumptions of residual fuel oil declined last year.

Hopefully, the recovery will continue, but we cannot be lulled into complacency. The fact is that the forecasts for domestic petroleum production over the next 15 years are stark. The Federal Energy Administration's National Energy Outlook: 1976 contends that:

The reserves from which most of today's oil is being produced—mainly on-shore in the lower 48 states—will decline by almost two-thirds by 1985 and about 80 percent by 1990.

Although there is no danger of a serious gasoline shortage in the near future, the energy crisis still exists and will for decades to come. No temporary abundance can obscure that reality. For people in small, predominantly rural States, usually at the end of the energy pipeline, that presents a haunting specter.

Mr. President, while State's attorney of Chittenden County, Vt., I served on a task force of the National District Attorneys Association assigned to gather data on how oil industry practices related to the energy crisis of 1973–74.

Since an analysis of the shortage in Vermont during the crisis indicated it was in part caused by some major oil companies pulling out of the market, I was particularly concerned with the factors that lead a company to make that decision.

A group of oil company representatives with whom we met answered that one factor is a company's market share of gasoline sales. If it controls less than 5 percent, then it is unlikely that the operation will be profitable. And the 5-percent figure is not gospel. Companies have abandoned areas where they controlled more than 7 percent of the market.

In Vermont, Phillips with 5.79 percent of the market in 1974, has already pulled out of the State. However, because of the Federal allocation program, it has been required to work out exchange agreements with other companies to supply its old customers. If the mandatory allocation regulations are discarded, these exchange agreements will no longer be enforceable. Service stations dependent on them will be left high and dry with no source of supply.

Today, more than 16 percent of Vermont's gasoline supply is furnished by five major oil companies, each with less than 5 percent of the market. In addition, Sunoco has slightly less than 6 percent, and has already decided to pull out of Maine where it has 5.95 percent of the market. As I already noted, Phillips has 5.79 percent. If all 7 of them left, who would supply the gasoline represented by their combined 28 percent of the market, representing more than 65 million gallons of gasoline a year to Vermonters?

Similar situations exist in many other States. Most recently, it was reported that Mobil is pulling back drastically in Texas, where it has 7.63 percent of the market; in Louisiana, with 4.19 percent; in Oklahoma, with 5 percent; in Arkansas, with 6.54 percent; and in New Mexico, with 2.72 percent. The company is reportedly telling its jobbers, lessee dealers, consignees, and commission agents to find new suppliers, as they will be cut off sometime after FEA regulations are eventually relaxed.

Gulf is considering similar action in California where it has 5.37 percent of the market; in Minnesota where it has 2.79 percent; in South Dakota where it has 2.47 percent; and in Nebraska, Iowa, and Missouri where it has between 1 and 2 percent of the market in each. In its latest action, Gulf withdrew from its gasoline retailing activities in Oregon, Washington, Nevada, and northern California.

Atlantic Richfield is considering total pullout in Kentucky and Texas, with slightly more than 2 percent of each market, and in Tennessee where it has 3.34 percent.

It is planning partial pullouts in six Midwest States in which it has between

2 and 5 percent of the market. Significantly, these would all be in rural areas of the States involved.

In addition to its desire to abandon its Vermont operations, if the regulations are allowed to lapse, Phillips will pull out of Maine where it has 2.51 percent of the market, New Hampshire where it has 4.76 percent, Delaware with a 3.81 percent, and New Jersey with 1.44 percent.

It is understandable that major oil companies want to withdraw from low-volume market areas, usually rural ones, and concentrate their efforts on more profitable high volume urban outlets. However, the problem is that when they leave there is no guarantee that other firms will supply the abandoned market areas.

Currently, only the enforcement of the supplier-purchaser section of the 1973 act is keeping supplies flowing to many low volume retail units.

If the present regulations are terminated, millions of motorists, most of whom need their cars to get back and forth to work, could well find themselves forced to travel many additional miles to buy their gasoline. This situation would not only cause great inconvenience, but would in and of itself create a huge waste of energy.

Mr. President, I do not like the idea of Government meddling in the internal affairs of business. However, a matter of such crucial importance to millions of American families—and to thousands of service station owners—should not be left to the whims of a few corporate officials in the board rooms in New York and Houston.

My bill would not divest them of their decisionmaking power. What it would do is delay the adverse impact that might result from certain of those decisions. In effect, it is a compromise recognizing the just prerogatives of business and the legitimate public interest.

Therefore, on behalf of Mr. PELL, Mr. STAFFORD, Mr. HUDDLESTON, and Mr. ANDERSON, and myself, I am today introducing legislation which would require that a company distributing or marketing 2 percent or more of the gasoline consumption of a State in calendar year 1975 must give 6 months' notice to the Governor of any intent to discontinue its operations in the State. Furthermore, such company would be prohibited from withdrawing more than 25 percent of its supply operations, based on calendar year 1975, in any ensuing 6-month period.

Mr. PRESIDENT, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 25

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4 of the Emergency Petroleum Allocation Act of 1973 is amended by adding at the end thereof the following new subsection:

"(e)(1) Not later than sixty days following the date of the enactment of this subsection, the President shall promulgate and put into effect a rule which shall be deemed a part of the regulation under subsection (a) of this section and which shall provide consistent with the objectives of subsection (b) of this section, that no integrated refiner, marketer or distributor who, on or after the effective date of such rule, is engaged in an operation involving the marketing or distribution of a refined petroleum product in any State shall, in any twelve-month period, reduce or otherwise curtail such operation within that State (except on the basis of a substantial decrease in the demand for such products so marketed or distributed) by an amount in excess of 10 per centum of the total amount of refined petroleum products so marketed or distributed by such marketer or distributor within that State during the base period as determined in accordance with paragraph (3) of this subsection, except that, if such marketer or distributor has notified the Governor of that State, in writing, of such marketer or distributor's intent to reduce or otherwise curtail such operation in excess of 10 per centum, such marketer or distributor shall, after the expiration of the one-hundred-and-eighty-day period following such notification, be authorized to reduce or otherwise curtail such operation within that State by an amount which does not exceed, within any six-month period, an amount equal to 25 per centum of the total amount of refined petroleum products so marketed or distributed by such marketer or distributor in that State during such base period.

"(2) Such rule shall not be applicable with respect to any such marketer or distributor engaged in any such operation, if the total amount of refined petroleum products so marketed or distributed by such marketer or distributor in that State during the base period determined in accordance with paragraph (3) of this subsection did not exceed 2 per centum of the total amount of refined petroleum products so marketed or distributed by all marketers or distributors within that State during such base period, or to any marketer engaged solely in the selling of refined petroleum products on a retail level to end users.

"(3) As used in this section, the term "base period" means—

"(A) with respect to any such marketer or distributor who is engaged in any such operation within a State on or after the effective date of such rule and who, during the entire twelve-month period comprising calendar year 1975 was so engaged in such operation within that State, such twelve-month period; and

"(B) with respect to any such marketer or distributor who, although engaged in any such operation within a State on or after the effective date of such rule, was not so engaged in such operation within that State during the entire twelve-month period comprising calendar year 1975, the first full twelve-month period during which marketer or distributor was so engaged after January 1, 1975.".

By Mr. BUMPERS:

S. 26. A bill to provide for payment of losses by the Small Business Administration directly to the obligee of a bid bond, performance bond, or payment bond in the event of insolvency or bankruptcy of the surety company; to the Committee on Small Business.

COMPENSATION FOR LOSSES SUSTAINED ON ACCOUNT OF INSOLVENCY OR BANKRUPTCY OF SURETY COMPANIES

Mr. BUMPERS. Mr. President, the situation that gives rise to my bill can briefly be described as follows. Under existing law, the Small Business Administration is authorized to guarantee surety companies against up to 90 percent of their losses as a result of the breach of the terms of a bond in certain circumstances. In general, SBA will guarantee the terms of a bond if the contractor who is the principal of the bond is a small business concern and is unable to obtain the bond on reasonable terms and conditions without a guarantee from SBA. There must also be a reasonable expectation that the contractor will perform the contract with respect to which the bond is required. Under this program, a number of small-business contractors have been able to secure contracts that they would otherwise have been unable to handle. Surety companies, relying on SBA's guarantee, have been willing to issue performance bonds that would not otherwise have been issued.

From time to time, however, it unfortunately happens that contractors and surety companies become bankrupt or insolvent. In this event, the obligee of the bond, the person for whom a building is being constructed, not only sustains the loss occasioned by default of the contractor, but also is without a solvent surety company with the ability to make him whole, as contemplated by the bond to begin with. In this situation, present law forbids SBA to make a payment directly to the obligee of the bond. The law requires SBA to make payments in the event of loss only to the surety companies themselves. If a surety company is insolvent or bankrupt, SBA still makes payment to the surety, or to its trustee in bankruptcy, or receiver. Consequently, the benefit of the payment may actually never reach the owner of the project on which the contractor has defaulted. Other creditors of the insolvent or bankrupt surety may share, in whole or in part, in the payment made by SBA to the estate.

The situation does not arise very frequently, but it has happened quite recently, and a statutory correction would be relatively simple. Last session I therefore proposed, and the Senate agreed to, legislation to correct it. My proposal would have required SBA, in the event of dual default by contractor and surety company, to make payment directly to the owner of the project for whose benefit the bond was originally issued, instead of to the surety company or its receiver. In this way, the person who actually sustains a loss is made whole, or nearly so, and the purpose of the guarantee program is better satisfied.

When my proposal went to conference last session, however, it met with some resistance. It was feared that it would operate not only in cases of insolvency, but also in cases of default by surety companies on account of some "other cause." Probably the phrase "or other cause" should not have been in the proposal in the first place. It was never my intention to convert the surety bond guarantee program into a direct relationship between SBA and obligees in all instances of failure of payment by sureties. A surety, for example, might be perfectly solvent and able to pay, but yet decline to make payment because of some substantial defense, either under the terms of the bond or otherwise. In such cases, it was not my intention, and it would be unwise, to require SBA to make payment

directly to the obligee of the bond. My intention in offering the legislation was to meet the narrow problem created when surety companies become insolvent or bankrupt.

Mr. President, the bill I offer today omits the offending phrase "or other cause." It would create a direct obligation by SBA to make payment to obligees only in the case of insolvency or bankruptcy of a surety company. As already indicated, this was my original intention, and the new wording will make clear that the legislation would be limited to this narrow but meritorious class of cases.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 26

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Section 411 of Title IV of Public Law 85–699, as amended, is hereby amended by inserting at the end thereof the following new subsection (e):

"(e) If there is a breach by the principal of the terms of a bid bond, performance bond, or payment bond, resulting in loss to the obligee, and if the surety by reason of insolvency or bankruptcy defaults and does not discharge its obligation to the obligee, the administration shall, notwithstanding any other provision of law, pay the obligee whatever sum would otherwise have been payable to the surety under Subsection (b) of this Section 411."

By Mr. INOUYE:

S. 27. A bill to amend title 38, United States Code, to provide that the Administrator of Veterans' Affairs may furnish outpatient dental services and treatment for a non-service-connected disability to any war veteran who has a service-connected disability of 80 percent or more; to the Committee on Veterans' Affairs.

Mr. INOUYE. Mr. President, I am introducing legislation today to provide free outpatient dental care to any war veteran who is 80 percent or more disabled as a result of his military service. Veterans will be eligible for this care even if their dental problems are unrelated to their service injuries.

Legislation passed by the 91st Congress provides free medical and outpatient care for veterans of all wars who were totally and permanently disabled by service-related injuries. This law, Public Law 91–102, was designed to care for the medical needs that would arise during their lives, but would be unrelated to their military wounds. In passing this legislation, we realized this Nation owes a special debt of gratitude to the men who lost their limbs or their sight to defend America's freedom and who, as result of their disabilities, might have difficulty earning a living in civilian life.

This law, however, specifically forbids payment for outpatient dental care. My bill seeks to fill this gap.

According to one estimate 175,000 veterans would be eligible for dental care if this bill is passed. Currently these men get free care only if their problems are directly related to their service disability. But as the Disabled American Veterans noted when they urged me to introduce this measure, many veterans live on limited, fixed incomes. Dental costs are rising along with everything else in these inflationary times, and an increasing number of veterans are being forced to go without proper dental care because they cannot afford it.

Until 1973, blind, paraplegic veterans were eligible for free outpatient dental services. But the regulation permitting that was rescinded in 1973, much to the dismay of the severely disabled veterans who were its beneficiaries. Even now, veterans who attend school or on-the-job training and spend time at a VA hospital are eligible for dental treatment without regard to their degree of disability. But many veterans do not want to or cannot, be admitted to our overcrowded and understaffed veterans hospitals.

This neglect of men who served their nation with honor strikes me as nearly criminal. How can we ask young Americans to serve this country when they see how it has ignored the needs of those who fought in past years to keep America free?

By Mr. MATHIAS:

S. 28. A bill to provide for financial assistance to improve the capabilities of units of local government to deal with career criminals, to establish the Office of Repeat Offenders Prosecution Projects within the Law Enforcement Assistance Administration, and for other purposes; to the Committee on the Judiciary.

REPEAT OFFENDERS PROSECUTION AND PRISON IMPROVEMENT ACT

Mr. MATHIAS. Mr. President, I send to the desk "The Repeat Offender Prosecution and Prison Improvement Act of 1977," an innovative approach to combat the high incidence of violent crime against our citizens, particularly in urban areas.

The Preamble to the Constitution clearly establishes that one of the main purposes of government is to "maintain domestic tranquility." Yet when I look at the record of violent crime in this country, I can only conclude that we have failed to fulfill this noble purpose.

In the past decade the crime rate has more than doubled. Violent crime has increased eight times faster than the rate of population growth. This is the national average; in some areas it is even worse. Crime haunts the poor and the elderly in our cities. It threatens the shopkeeper who struggles to make a small business go, and the citizen who seeks to walk the streets in safety. Above all, it strikes against those minorities who live in our urban areas. These Americans, the National Urban League says, are more than four times as likely to be victimized by crime than whites.

SUMMARY OF MAIN FEATURES

Experience and studies show that a reatively small number of persons are responsible for a large proportion of violent crime. A recent study of 10,000 persons by University of Pennsylvania researcher Marvin Wolfgang, for example, reveals that about 650 chronic offenders were responsible for one-third of the arrests and two-thirds of the crime committed by the group over a 5-year period. Successful pilot programs testing the repeat offender concept in Baltimore, Washington, D.C., New Orleans, and other cities have demonstrated that the crime rate can be cut through a program of speedy trial and certain—not necessarily long—punishment for repeat offenders. Drawing on the lessons of these pilot programs, S. 28 would provide Federal grants to eligible units of local government to aid in the prosecution of those charged with the commission of violent, profit-motivated crime on more than one occasion.

S. 28 would also establish a new relationship between the Federal Government and the States to modernize and upgrade our prison system. The Federal Government would build five regional prisons on Federal land, such as underused military bases. States would be able to lease bedspace in these Federal prisons on a per-diem basis. With Federal standards and increased space, the often inhumane conditions in overcrowed State prisons would be alleviated. In my State of Maryland, for example, 6,700 prisoners occupy a prison system built to house 4,886—a capacity of 40 percent less than the present number of prisoners.

BACKGROUND TO DEVELOPMENT OF REPEAT OFFENDER PROSECUTION PROGRAMS

The failure of government to adequately protect its citizens has not been for want of effort. We have appropriated millions of dollars, spent thousands of man-hours, and committed our law enforcement officers to laying their lives on the line in our attempts to control crime. These sacrifices will continue to be demanded of us. Our present high crime rates, however, seem to indicate that we have been making these precious sacrifices in the service of the wrong cause. Let us examine the record of our efforts to control crime to see where we have gone wrong, and how we can learn from hard experience.

During the 1960's, much of our effort to control crime was directed toward eliminating or reducing the oppressive social and economic conditions which many believed to be the root causes of crime—ignorance, poverty, discrimination, the "breakdown" of the family. In large measure, we shifted the responsibility for criminal behavior from individuals to the society as a whole.

By the early 1970's, however, skyrocketing crime rates had cast serious doubt on this theory. More violent criminals were on the streets than ever before. While crime rates, particularly for violent crime, soared, the number of prisoners in State and Federal prisons actually declined—from 213,000 in 1960 to 196,000 in 1970.

In reaction, a seemingly new consensus developed around the need to "get tough" with criminals. But whereas the old "permissive" approach to criminal behavior perhaps was flawed by an overly optimistic view of society's and capacity to change, the new "get tough" approach suffered from an exaggerated desire for vengeance against the criminal. Like their idealistic predecessors, the new "hardliners" attempted too much. The

result was to only increase despair about controlling the crime rate.

Today violent crimes remains a serious threat to the domestic tranquility of the Nation. While we must heed the lessons of our past failures to discourage us from seeking more realistic means to achieve the same end, I believe that we can do this by focusing our efforts on improving the functioning of specific components of the existing criminal justice system—particularly the process by which repeat offenders are prosecuted and our prison system.

Studies across the country indicate that a relatively small group of repeat criminals is responsible for a large proportion of serious crime—perhaps a third of all robberies and half the felonies and misdemeanors committed every year. Between 1971 and 1975, only 7 percent of those arrested for serious crimes in Washington, D.C. accounted for 24 percent of all such arrests. Some individual criminals were arrested up to 10 times during that period. In other cities, the situation is much the same. The all-too-common pattern of repeated arrest and speedy release by the courts, popularly known as "revolving door justice," is largely responsible for these astonishing figures. As Prof. James Q. Wilson of Harvard, author of "Thinking About Crime," notes:

> Because most serious crime is committed by repeaters, most criminals eventually get arrested: Yet a large proportion of repeat offenders . . . suffer little or no loss of freedom.

One reason for this perplexing state of affairs was noted as early as 1921 by the distinguished legal educator and advocate of court reform, Roscoe Pound. In a study of the Cleveland criminal courts, Pound discovered that "the professional criminal and his advisers have learned rapidly to use this machinery and make devices intended to temper the application of criminal law to the occasional offender a means of escape for the habitual offender." Today repeat offenders continue to take advantage of their knowledge of pretrial release, bail and continuance procedures, and overcrowded court calendars to delay sentencing or force dismissal of the charges against them. As the director of a New Orleans repeat offender demonstration program, basis put it—

> All the delays and continuances work to the advantage of the defendant. Memories get hazy, witnesses forget. Criminal cases are not like wine—they don't get better with age.

A recent study by the Institute for Law and Social Research of recidivism in the District of Columbia graphically illustrates this problem. The study found that in 1974 prosecutors refused to prosecute in 24 to 100 cases for lack of evidence and that in an additional 40 cases charges were dropped by the prosecutor or dismissed by the judge, presumably for the same reason. In 26 cases suspects pleaded guilty to a lesser charge. Only 10 cases went to trial and of these only 7 ended in conviction. Three of those convicted were fined or given suspended sentences and only four were sent to prisen to serve what the study predicted would be the minimum sentence.

Because arrests are actually made in only an estimated 12 percent of the crimes committed every year, the 7 percent conviction rate in these cases represents an almost infinitesimal conviction rate for serious crimes of 1 percent. One authority estimates that this low conviction rate permits repeat offenders to commit an average of six crimes before being arrested again. Clearly, this situation must be remedied, both to deter the repeat offender from committing further crimes and to insure that the most dangerous criminals are taken off our streets.

THE NEED FOR PRISON IMPROVEMENT

Adding to the inability of the criminal justice system to effectively prosecute the repeat offender is the lack of prison capacity and the substandard conditions in our State prisons. The severity of prison overcrowding and the desperate need for additional prison space are dramatically illustrated by the following situations across the Nation:

In Florida, where the prison population has almost doubled in the past 10 years, State corrections officials have resorted to housing, inmates in tents located on the grounds of the State's maximum security prison;

In Missouri, corrections officials recently abandoned efforts to buy a seminary and transform it into a prison, because of insufficient funds;

In Louisiana, where corrections officials are trying to comply with a court order requiring a 1,000-inmate reduction at the State penitentiary, a request has reportedly been made for permission to use a mothballed World War II troopship as a floating prison;

In Illinois, where the prison population is already 1,330 above capacity, it is estimated that at the present rate, the State's institutions will exceed capacity by 3,000 by the end of 1977;

And, in my State of Maryland, where the state prison population is approximately 6,700 inmates, the State-wide prisoner capacity is 4,866—40 percent less capacity than the present inmate population;

Prison overcrowding has a dramatic effect in obstructing the processes of justice in the courts, and in encouraging early parole or premature release of dangerous criminals from our prisons. Overcrowding in the Georgia State prisons recently led prison authorities to discharge 300 prisoners up to a year ahead of schedule, while in Alabama inhumane conditions in the prisons led to court freezes on prison admissions.

Crime expert James Q. Wilson, supporting his contention that prison overcrowding constrains sentencing policy, cites a recent study of Massachusetts prisons by Prof. William Shaffer of MIT. Shaffer concluded that prison capacity is the critical variable affecting the ability of the criminal justice system to lower crime rates. We must face the regrettable truth that expansion of our State prison capacity is a prerequisite for more effective efforts to control crime.

I have recently assisted Maryland State prison officials to their efforts to obtain and dock a prison ship in Baltimore harbor. I have also aided their efforts to use the Army's stockade at Fort Meade as temporary prison space. Our difficulty in obtaining even these temporary devices for alleviating prison overcrowding, and the understandable opposition of local communities to the construction of prisons in their back yard, points dramatically to the need for Federal action. My bill would provide the vehicle for the effort we must make to improve our prison system. As crime expert James Wilson of the Harvard Law School recently wrote:

> The next national administration . . . has an obligation to examine the federal relationship to the state prison system and to think seriously about the desirability of supplying both more funds for expansion of that system and higher standards for its operation.

The failure of our previous efforts to control crime in the 1960's demonstrated the lamentable truth that at this time society really does not know how to do much besides confine and deter the dangerous adult repeat offender. This does not mean, however, that we should adopt a get tough attitude toward all criminals or drastically increase the penalties for criminal behavior of all kinds. It does mean that we should insure that our criminal justice system functions as intended to mete out swift and certain punishment under our existing laws to those who repeatedly and cynically jeopardize the lives and property of law-abiding citizens.

I believe that the Repeat Offender Control and Prison Improvement Act of 1977 which I introduce today embodies the best approach presently available to insuring that justice is done and crime rates reduced.

SUMMARY OF PROVISIONS

TITLE I

Title I of the act would establish on a permanent basis a system of grants to qualifying local government units to enable them to identify and prosecute, on a rapid and limited nonplea bargain basis, the criminal repeater who accounts for such a large proportion of serious crime. The act would create an Office of Repeat Offender Prosecution Projects in the Law Enforcement Assistance Administration to administer the grants and provide technical assistance to qualifying units of local government with populations of 250,000 or more. In addition, the Office would coordinate research aimed at providing more information on criminal recidivism and award grants to promote such research.

A typical qualifying career criminal program would use these Federal funds and Federal assistance to:

Promptly identify dangerous, repeat offenders through the use of computers and other means;

Expedite prosecution of career criminals with emphasis on reduction of pretrial, trial, and sentencing delays;

Establish special teams of prosecutors and investigators to follow career criminals through the entire criminal justice system;

Severely restrict plea bargaining by career criminals; and

Increase utilization of appropriate habitual offender statutes.

These programs would be modeled on highly successful LEAA-funded pilot projects in 18 American cities, and on the examples of several other cities which have set up their own programs without the benefit of Federal funds, notably Washington, D.C., and Baltimore, Md. Washington has recently reported significant decreases in crime rates for such serious crimes as armed robbery since its repeat offender program has been introduced.

As a long-standing advocate of civil liberties I have taken steps to insure that this bill adequately protects the rights of the accused. First, the plans which are submitted by eligible units of Government must protect against the unlawful dissemination of the material contained in the computerized data banks containing information on previous criminal records. For several years I have advocated the need for stringent safeguards against the improper dissemination of personal data including criminal records. Plans and operating programs will be under constant scrutiny. Those which do not guarantee such protections will not be funded by the office. Second, proposals would not be approved which do not adhere to stringent requirements regarding the selection of individuals to be treated as "repeat offenders." Particular concern will be given to insuring that repeat offenders not involved in serious, violent crimes do not become the focus of these programs.

In addition, the act contains comprehensive guidelines requiring expansion of other parts of the criminal justice system which may be necessary to accommodate the increased burden of repeat offender cases. Funds would be available to assist local jurisdictions in meeting these costs. Federal funds could readily be made available for example, to public defenders seeking to match the additional resources received by the local prosecutor to prosecute repeat offenders. It should be noted that Federal moneys have already been made available for such purposes. In Boston's LEAA-funded career criminal program, Federal moneys are used to provide both prosecutors and defense counsels for defendants processed under the program. In addition in Kalamazoo, Mich., Federal funds were used to help construct a new circuit court to help process career criminals under an LEAA grant. Similarly, in Columbus, Ohio, the public defender obtained a Federal grant to match the additional resources received by the local prosecutor under an LEAA-funded career criminal program.

TITLE II

Title II of the act would provide for the Federal Government to construct and administer regional prisons on Federal land—that is surplus military land. States and localities would then contract with the Bureau of Prisons for bed space in these facilities on a per diem basis. Federal prisoners would be limited to a maximum of 25 percent of prison capacity.

While prison space in these facilities would not be limited to repeat offenders, it is the bill's intent that a significant proportion of those referred to the regional prisons by the States would have been convicted under repeat offender programs. Since the prisons would be on Federal land and run by the Bureau of Prisons, this approach would provide for a rapid expansion of needed prison space, the upgrading and standardization of prison conditions, and the use of State and local funds to pay for Federal land and administrative resources.

CONCLUSION

George Washington wrote:

Impressed with the conviction that the true administration of justice is the finest pillar of good government, I have considered the first arrangements of the judicial departments as essential to the happiness of our country and the stablity of its political system.

The Repeat Offender Control and Prison Improvement Act of 1977 holds out the hope of insuring that our criminal justice system functions as the Founding Fathers intended it to function. The bill I introduce today is soundly based on the latest evidence and expert opinion in the criminal justice field. Its measures rest on a solid foundation of proven experience. I urge the Congress to remember that delay in taking the kind of realistic, responsible action I have outlined means continued victimization of innocent citizens, particularly the elderly, the poor and the minority residents of our cities, by a violent criminal minority whose actions threaten the Constitutional goal of domestic tranquility.

Mr. President, I ask unanimous consent that the text of the Repeat Offender Prosecution and Prison Improvement Act, a section-by-section analysis of the bill, and various articles discussing the underlying principles of the bill, be inserted at this point in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 28

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be called the "Repeat Offenders Prosecution and Prison Improvement Act".

TITLE I—FINANCIAL ASSISTANCE FOR CAREER CRIMINAL PROSECUTION PROGRAMS

PART A—FINDINGS; PURPOSE AND DEFINITIONS

STATEMENT OF FINDINGS AND DECLARATION OF PURPOSE

SEC. 101. (a) The Congress finds that—

(1) criminal recidivists account for a significant proportion of the individuals arrested for serious crime in the United States;

(2) large numbers of criminal recidivists escape identification as criminal repeaters and use their familiarity with the criminal justice system to avoid prosecution and punishment;

(3) increasing the number and speed of convictions of career criminals would have a significant impact on the level and frequency of serious crime in the United States; and

(4) increasing the research efforts relating to the amount of crime committed by criminal recidivists is of prime importance to adequate planning for the criminal justice system.

(b) The Congress declares that it is the policy of the United States to assist units of general local government having populations of at least 250,000 individuals by way of grants and technical assistance to improve the capacity of such units of general local government to deal with career criminal offenders.

DEFINITIONS

SEC. 102. As used in this title—

(1) "Administrator" means the Administrator of the Law Enforcement Assistance Administration;

(2) "Director" means the Director of the Office of Repeat Offenders Prosecution Projects;

(3) "Office" means the Office of Repeat Offenders Prosecution Projects established within the Law Enforcement Assistance Administration; and

(4) "eligible units of general local government" means any such units of general local government defined in section 601 of the Omnibus Crime Control and Safe Streets Act of 1968 having a population of 250,000 or more individuals on the basis of the most satisfactory current data available to the Administrator.

PART B—REPEAT OFFENDERS PROSECUTION GRANTS

FINANCIAL ASSISTANCE AUTHORIZED

SEC. 111. The Administrator is authorized to make grants to eligible units of general local government and to provide technical assistance to such units of general local government to assist such units in establishing and operating programs designed to identify and expedite the prosecution and conviction of career criminal offenders.

APPLICATION

SEC. 112. (a) A grant may be made under this title only pursuant to an application submitted to the Administrator at such time, in such manner, and containing or accompanied by such information as the Administrator deems reasonably necessary. Each such application shall—

(1) designate or establish a local agency or office to implement and administer the repeat offender prosecution program for which assistance is sought;

(2) set forth the rate of crime in the area served by the eligible unit of local government including the number of repeat offenders and a detailed description of the existing components of the criminal justice system of the eligible unit of general local government, including but not limited to, police agencies, prosecutors, courts, correctional agencies and public defenders, and how each of the components so described will be utilized, altered, or reformed to implement the repeat offender prosecution program for which assistance is sought under this title;

(3) contain satisfactory assurances of the actual and continuing cooperation of all the components of the criminal justice system of the eligible unit of general local government in such a repeat offender prosecution program.

(4) set forth criteria to be used in the selection of career criminal offenders to be prosecuted under such repeat offender prosecution programs;

(5) provide for the collection of information necessary to identify career recidivists to classify such career recidivists, as career criminal offenders, and to follow the cases of such criminal offenders through the criminal justice system of such eligible unit of general local government subject to the provisions of section 524(b) of the Omnibus Crime Control and Safe Streets Act of 1968;

(6) provide for the collection and submission of such information as the Director may reasonably require;

(7) provide for procedures to protect the rights and privacy of accused individuals

and to assure that the information collected regarding such individuals will be used only for law enforcement and criminal justice purposes in accordance with the provisions of section 524(b) of the Omnibus Crime Control and Safe Streets Act of 1968;

(8) set forth a description of the anticipated impact of the repeat offender prosecution program assisted under this title on detention facilities and a description of actions to be taken by the eligible unit of general local government to address the problems raised by such anticipated impact;

(9) provide an itemized estimated cost for the implementation and operation of the repeat offender prosecution program for which assistance is sought under this title;

(10) provide for continuing coordination between the repeat offender prosecution program assisted under this title and related law enforcement activities assisted under title I of the Omnibus Crime Control and Safe Streets Act of 1968;

(11) set forth policies and procedures which assure that Federal funds made available under this title for any fiscal year will be so used to supplement and, to the extent practical, increase the level of funds that would, in the absence of such Federal funds, be made available by the eligible unit of general local government for the purposes described in the application, and in no case supplant such funds; and

(12) provide for such fiscal control and fund accounting procedures as may be necessary to assure the proper disbursement of and accounting for Federal funds paid to the eligible unit of general local government under this title.

(b) An application by an eligible unit of general local government for financial assistance under this title may be approved by the Administrator only if it meets the requirements set forth in subsection (a) of this section.

(c) Amendments of applications shall, except as the Administrator may otherwise provide, be subject to the approval in the same manner as original applications.

TECHNICAL ASSISTANCE

SEC. 113. The Administrator is authorized to undertake such activities as he determines are necessary to provide either directly or by way of grants, contracts, or other arrangement, technical assistance to eligible units of general local government in planning, developing, and administering repeat offender prosecution programs for which assistance is provided under this title.

LIMITATIONS ON PAYMENTS

SEC. 114. (a) No payment may be made under this title to any single eligible unit of general local government in any fiscal year in an amount less than $100,000.

(b) No payment for any fiscal year under this title to the eligible units of general local government in a single State shall exceed 12½ per centum of the aggregate payments to all eligible units of general local government in that year under this title.

PAYMENTS

SEC. 115. (a) The Administrator shall pay in any fiscal year to each eligible unit of general local government which has an application approved pursuant to this title for that fiscal year the amount necessary to carry out such application as determined by him.

(b) Payments under this section may be made in installments, in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments.

(c) The Administrator shall give due consideration to providing financial assistance for the continued funding of programs of demonstrated effectiveness which otherwise meet the requirements of this title.

CONSULTATION

SEC. 116. In carrying out the provisions of this title, the Administrator shall consult with the Attorney General and the heads of such other Federal agencies as he determines will assist in carrying out the provisions of this title.

PART C—THE OFFICE OF REPEAT OFFENDERS PROSECUTION PROJECTS

OFFICE OF REPEAT OFFENDERS PROSECUTION PROJECTS ESTABLISHED

SEC. 121. (a) There is established within the Law Enforcement Administration of the Department of Justice, the Office of Repeat Offenders Prosecution Projects.

(b) The programs authorized by this Act, unless otherwise specifically provided in this Act, shall be administered by the Office established under this section.

(c)(1) The Office shall be headed by a Director, who shall be appointed by the President, by and with the advice and consent of the Senate. Under the general supervision and direction of the Administrator, the Director shall exercise all of the functions of the Office under this Act.

(2) There shall be in the Office a Deputy Director who shall be appointed by the Administrator. The Deputy Director shall perform such functions as the Director may prescribe and shall be Acting Director during the absence or disability of the Director or in the event of a vacancy in the office of the Director.

FUNCTIONS OF THE OFFICE

SEC. 122. In order to carry out the purposes of this Act, the Administrator shall—

(1) make grants to eligible units of general local government for special prosecution programs for career criminal offenders in accordance with part B of this title;

(2) provide technical assistance to eligible units of general local government in the planning, establishment and operation of such programs;

(3) provide for the widest practicable and appropriate dissemination of information including an analysis and evaluation of the performance and results obtained from the operation of repeat offender prosecution programs for career criminal offenders assisted under this title; and

(4) prepare and submit a report to the President for transmittal to the Congress at least once each year on the activities of the Office and programs assisted by the office, together with such recommendations, including recommendations for legislation, as the Administrator deems appropriate.

ADMINISTRATIVE PROVISIONS

SEC. 123. (a) The Administrator is authorized, in carrying out his functions under this title, to—

(1) appoint and fix the compensation of such personnel as he deems necessary;

(2) employ experts and consultants in accordance with section 3109 of title 5, United States Code;

(3) appoint one or more advisory committees composed of such privade citizens and officials of Federal, State, and local governments as he deems desirable to advise him with respect to his functions under this title;

(4) promulgate such rules, regulations, and procedures as may be necessary to carry out his functions, including the establishment of priorities to be applied in the approval of applications under this title;

(5) utilize, with their consent, the services, equipment, personnel, information, and facilities of other Federal, State, local, and private agencies and instrumentalities, with or without reimbursement therefor;

(6) without regard to section 529 of title 31, United States Code, to enter into and perform such contracts, leases, cooperative agreements, and other transactions as may be necessary to carry out his functions under this title with any public agency, with any person, firm, association, corporation, or educational institution, and make grants to any public agency or private nonprofit organization;

(7) accept voluntary and uncompensated services, notwithstanding the provisions of section 665 (b) of title 31, United States Code;

(8) request such information, data, and reports from any Federal agency as the Administrator may from time to time require and as may be produced consistent with other provisions of law; and

(9) arrange with the heads of other Federal agencies for the performance of any of his functions under this title with or without reimbursement, and with the approval of the Attorney General, delegate and authorize the redelegation of any of his functions under this title.

(b) Upon request made by the Administrator each Federal agency is authorized and directed to make its services, equipment, personnel, facilities, and information (including suggestions, estimates and statistics) available to the greatest practical extent to the office in the performance of its functions.

(c) Each member of the committee appointed pursuant to paragraph (3) of subsection (a) of this section shall receive $120 a day including traveltime, for each day he is engaged in the actual performance of his duties as a member of the committee. Each such member shall also be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of his duties.

COMPENSATION OF THE DIRECTOR

SEC. 124. Section 5316 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"(137) Director, Office of Repeat Offenders Prosecution Projects, Law Enforcement Assistance Administration.".

PART D—GENERAL PROVISIONS

WITHHOLDING OF GRANTS

SEC. 131. Whenever the Administrator, after reasonable notice and opportunity for a hearing to any "eligible unit of general local government", finds—

(1) that there has been a failure to comply substantially with any requirement set forth in the application of an eligible unit of general local government approved under section 112; or

(2) that in the operation of any program or project assisted under this title there is a failure to comply substantially with any applicable provision of this title;

the Administrator shall notify such eligible unit of general local government of his findings and that no further payments may be made to such local government under this title until he is satisfied that there is no longer any such failure to comply, or the noncompliance will be promptly corrected. The Administrator may authorize the continuance of payments with respect to any program or project assisted under this title which is being carried out pursuant to such application and which is not involved in the noncompliance.

REVIEW AND AUDIT

SEC. 132. The Administrator and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination, to any books, documents, papers, and records of a grant made under this title that are pertinent to the grant received.

SAVINGS PROVISION

SEC. 133. Nothing contained in this title shall be construed to prevent or impair the enforcement of any other provision of Federal law.

AUTHORIZATION OF APPROPRIATIONS

SEC. 134. There are authorized to be appropriated $——— for the fiscal year 1978,

$——— for the fiscal year 1979, and $——— for the fiscal year 1980.

TITLE II—FEDERAL REGIONAL PRISON SYSTEM

FINDINGS AND PURPOSES

SEC. 201. (a) The Congress finds that—

(1) there is a critical shortage of prison facilities at the State and Federal levels;

(2) that such shortage has a significant effect on judicial sentencing policy; and

(3) the Federal Government is obligated to alleviate the overcrowding of such facilities and to improve living conditions therein.

(b) The purpose of this title is to meet the obligation of the Federal Government by providing for the construction and operation of five regional prison facilities for State and Federal prisoners.

DEFINITIONS

SEC. 202. As used in this title—

(1) "Attorney General" means the Attorney General of the United States or his delegate; and

(2) "Director" means the Director of the Bureau of Prisons.

ESTABLISHMENT OF REGIONAL PRISONS

SEC. 203. (a)(1) The Attorney General is authorized and directed to construct five Federal regional prisons for the purpose of providing suitable quarters for the imprisonment, care, and subsistence of any person held under authority of any Federal or State statute.

(2) The Attorney General is authorized—

(A) to select and, where Federal land is not available, to acquire appropriate sites for such Federal regional prisons to best alleviate the overcrowding in State and Federal correctional facilities; and

(B) to contract with the proper authorities of any State for the imprisonment, care, and subsistence of any persons convicted of an offense against such State in accordance with the provisions of section 204.

(b) The Bureau of Prisons, under the direction of the Attorney General, shall have charge of and management and regulation of all Federal regional prisons.

ASSIGNMENT OF PRISONERS

SEC. 204. (a) The Attorney General may designate as the place of confinement any available, suitable, and appropriate Federal regional prison, where the sentence of any person convicted of an offense against the United States shall be served except that such persons shall not constitute more than 25 percent of the total number of persons confined in any such prison.

(b)(1) The Attorney General may contract with the proper authorities of any State for the imprisonment, care, and subsistence of any person convicted of an offense against such State, who would otherwise qualify for imprisonment in a Federal medium or maximum security institution, in any available, suitable, or appropriate Federal regional prison. The Attorney General shall have final authority in any decision with respect to the selection and assignment of such persons to such prisons.

(2) Any contract entered into under this subsection shall require such State to pay the Federal Government for the care and custody of such persons on a per diem basis at a rate which reflects the cost of constructing and operating such prison, including the cost, if any, of acquiring the land on which such prison is situated.

TREATMENT OF STATE PRISONERS

SEC. 205. (a) Any person convicted of an offense against a State who is assigned to a Federal regional prison as provided in section 204 shall be subject to the same discipline and treatment as any person convicted of an offense against the United States and assigned by the Attorney General to such prison.

(b)(1) Notwithstanding the provisions of subsection (a), for purposes of awarding or forfeiting good time allowances, final discharge from prison, or release on parole, such persons shall be subject to the same treatment as any person convicted of an offense against the State who is serving a sentence in a State institution.

(2) The Director shall maintain and make available to the proper State authorities accurate records on each person confined in a Federal regional prison pursuant to a contract under section 204.

AUTHORIZATION OF APPROPRIATIONS

SEC. 206. There are authorized to be appropriated for the purpose of carrying out the provisions of this Act, $10,000,000 for the fiscal year ending September 30, 1978, $20,000,000 for the fiscal year ending September 30, 1979, and $50,000,000 for the fiscal year ending September 30, 1980.

SECTION-BY-SECTION ANALYSIS

REPEAT OFFENDERS PROSECUTION AND PRISON IMPROVEMENT ACT

Title I—Financial Assistance for Career Criminal Special Prosecution Programs.

Part A—Statement of findings and declaration of purpose

Finds that repeat criminal offenders account for a significant number of serious crimes and that increasing the likelihood that they will be identified and prosecuted would have an impact on the crime rate. The purpose of the legislation is to provide financial and technical assistance to local governments with populations of at least 250,000 to improve the capacity of these governments to deal with the career criminal.

Part B—Special prosecution project grants

Authorizes the Law Enforcement Assistance Administration to make grants and provide technical assistance to local governments for programs to identify and expedite the prosecution and conviction of career criminals.

Grants for career criminal projects are made on the basis of an application approved by LEAA which includes, among other things: a description of the current crime situation in the locality and the impact of the career criminal; a description of the current criminal justice system components in the locality and how these elements would change under the proposed program; criteria for the selection of offenders who would be prosecuted under the proposed program; provision for the protection of information concerning, and the rights and privacy of the accused in accordance with section 524(b) of the Omnibus Crime Control and Safe Streets Act of 1968, as amended; and provision for the annual collection of data and other information concerning the program as required by LEAA.

The minimum grant for a program's implementation is $100,000, the actual amount to be determined by LEAA. The total amount received by local governments within one State may not exceed one-eighth of the total amount available for the program nationally.

Part C—The Office of Repeat Offender Prosecution Projects

Establishes an Office of Repeat Offender Prosecution Projects within the Law Enforcement Assistance Administration to administer the career criminal grant program. The Office is headed by a Director who is a Presidential appointee. Besides administering the grants, the functions of the Office are to: provide technical assistance; disseminate information on the career criminal programs; and, to prepare an annual report to be submitted to the President and Congress on the activities of the Office and the programs it funds.

Part D—General provisions

Provides for withholding of grants for noncompliance, audit and review of the program and a three-year authorization for the program.

Title II—Federal Regional Prison System

Sec. 201. Findings and Purpose.

There is a critical problem of overcrowding in both Federal and State prison facilities which has a significant effect on judicial sentencing policy. To relieve this problem, Title II provides for the construction and operation of five regional prisons to house both Federal and State offenders.

Sec. 203. Establishment of Regional Prisons.

The Attorney General is authorized (1) to select and acquire sites for such Federal regional facilities, if no Federal land is available, and (2) to contract with State authorities for the imprisonment of individuals convicted of a crime against such State. The Bureau of Prisons shall manage and regulate all five Federal regional institutions.

Sec. 204. Assignment of Prisoners.

The Attorney General may designate any of these Federal regional prisons for confinement of any individual who has violated a Federal law but Federal offenders shall not exceed 25 percent of the population of any such prison. States may contract with the Attorney General for confinement of any State offender who would qualify for imprisonment in a Federal medium or maximum security institution. The Attorney General will have final authority in the selection and assignment of State offenders to any Federal regional prison. States shall be required by contract to repay the Federal government for the custody of their State prisoners on a per diem basis at a rate reflecting the cost of the construction and operation of such prison, including the cost of the land acquisition.

Sec. 205. Treatment of State Prisoners.

All State prisoners assigned to a Federal regional prison shall be subject to the same treatment and disciplinary procedures which apply to any Federal prisoner. However, with regard to good time allowances, final discharge procedures, and release on parole, State prisoners shall be treated as any other individual confined in a prison in his own State. The Director of the Bureau of Prisons shall maintain and make available to the State authorities accurate records on all State offenders confined in a Federal regional prison.

Sec. 206. Authorization of Appropriation.

The authorization for carrying out this Act is: $10 million for FY '78, $20 million for FY '79 and $50 million for FY '80.

[From the Washington Post, Oct. 13, 1976]

FIGHTING CRIME: NEW APPROACHES TO AN OLD PROBLEM

(By William Raspberry)

Ben Holman knows as well as anyone the truism that blacks are more likely than their numbers would indicate to be involved in crime—both as perpetrators and as victims.

He also knows the "history of racism, discrimination and repression" that has helped create the conditions which, disproportionately, foster crime in the black communities.

But, he told a recent Louisville meeting of the National Black Policemen's Association, blacks are also peculiarly well situated to do something about crime.

"Blacks should take the initiative and become the focal point for a strong fight against crime," said Holman, who is black and head of the Justice Department's Community Relations Service.

"To initiate our effort, we desperately need strong black organizations at the community level. The alarming black crime rate, being far out of proportion to our numbers in the population, seems a good rallying point to begin building them."

His remarks, predictably, were well received by an audience consisting of law enforcement officers. But they might have been equally well received by audiences, black or white, whose principal concern with

crime is to fear it. Holman understands that there is no longer much disposition in America's black communities to side with black criminals against policemen of any color. People are more afraid of their neighborhood criminals these days than they are of brutal cops.

It follows, then, that blacks may be ready to organize at the community level to do something about the crime they fear. Holman mentioned such groups as CASH (Citizens' Action for a Safer Harlem) and CLASP (Citizens Local Alliance for a Safer Philadelphia) that have been involved in such efforts as narcotics control and patrolling housing projects.

"It is now time for bolder action," he said. Unfortunately, the proposal that followed doesn't seem particularly bold. He called for the black policemen's group to take the lead in establishing "neighborhood crime commissions," funded initially from within the community but, upon establishment, eligible for federal funding through Holman's Community Relations Service.

As he described the commissions' role, it would concern itself primarily with police-community relations, recruitment of black police officers, public education on the problem of crime in an effort to dethrone the "Superfly" idol, and "court-watching"—the use of volunteers to attend trials to "let it be known that concerned residents are watching and expecting a fair punishment."

There's nothing wrong with any of these assignments, except that they seem to me to have relatively little to do with crime.

Even the use of high school athletes as escorts for senior citizens, or mothers as chaperons for recess, which obviously could help to provide some protection for people who are particularly vulnerable, doesn't really speak to what most of us perceive as the major crime problem.

Most of the proposals appear to be based on questionable assumptions—that there is an important connection between crime rates and teenage hostility toward the police, for instance, or that people commit crime primarily because they think it is "Superfly" cool.

Maybe so, if you're talking about vandalism or small acts of rebellion against authority.

But the crimes that people seem to fear most are such economic crimes as robbery and burglary, crimes committed not because they are cool but because they are profitable.

In the long term, it may be possible to reduce crime of this sort by reducing its economic necessity. There may not be much connection between crime and bad vibes between kids and cops, but there is a strong correlation between crime and joblessness.

But fear of crime is not going to turn the economy around, and in the short term there are only two things that are likely to reduce the rate of crime: the reduction of opportunity and the elimination of profit.

The reduction of opportunity for crime can mean anything from Holman's senior citizen escorts, which might discourage muggings, to heavier locks or more sophisticated alarm systems, which might discourage burglaries.

If these things don't reduce the amount of crime, they might at least encourage criminals to seek other victims.

Elimination of profit from crime is accomplished by anything that makes crime a bad gamble—the increased likelihood of getting caught, for instance, or the increased certainty of punishment.

The refusal of non-thieves to buy stolen merchandise would do more to prevent housebreakings than the most expensive alarm system on the market.

I wish Holman had dealt more with this sort of thing. It is a matter of some importance and significance when highly placed black officials summon up the courage to speak out against black crime, and when they do, it is important that they do so in terms that are likely to lead to concrete results.

Only recently has it been politic to speak out at all. Even Holman, in his Louisville speech, was at great pains to show that he understood the nature of racism and deprivation and to stress that white-collar crime, committed by white people, costs the nation far more than so-called street crime. But those obligatory preliminaries accomplished, Holman got to his real concern.

"Blacks must stop apologizing for crime in the community," he said. And we must stop shrugging it off as a problem "we must learn to live with. . . . Resignation to the problem will produce nothing but added room for it to grow."

[From the Washington Star, Dec. 12, 1976]

INCREASING CRIME IMPRISONS ELDERLY IN WORLD OF FEAR

(By Susan Axelrod)

The day after Christmas last year, 77-year-old Erma Petersen's purse was snatched. The man who robbed her pocketed only $23, but the money, apparently, wasn't enough. After grabbing the purse from her hands, the robber pushed Petersen to the sidewalk. The impact broke her left hip in three places.

Her recuperation has been painful and tedious. And it isn't over yet. Weeks in the hospital, months spent living with her son and daughter-in-law; the metal walker, a four-pronged cane. Erma Petersen finally has moved back to her own apartment in Rockville and she's getting along, albeit more slowly than before, with the help of a cane.

"I used to have a good walk," Petersen said recently. "It may be better in time, but how much time do I have left? I'm 77 years old."

But it's not Erma Petersen's slower gait that concerns her as much as her fear of walking the streets, the possibility that she will be mugged again. "I'm afraid, quite frankly. I'm scared to death," she said.

Though she may barricade herself in her apartment after dark, Petersen is not alone. For all over the Washington area, and for that matter, the United States, the elderly increasingly have become targets of robberies and burglaries. In many cases they have become homebound after dark—not by choice, but by fear.

Precise figures on crimes against senior citizens are difficult to obtain, because until recently none were compiled. As one police officer put it: "We keep loads of figures on criminals but we tend to forget the victims, especially if they're old."

Persons over 60 comprise 17.5 percent of Montgomery County's population. Last year, 57.1 percent of the robberies that did not involve knives or guns were targeted at these elderly.

In the District, 93 percent of the crimes against the elderly last year were robberies—mostly purse snatchings and stolen wallets. In street jargon, these crimes are called "crib jobs" because they are "like taking candy from a baby."

The vast majority of these robberies result only in money loss—enough of a burden for one living on a fixed income. But sometimes the street crimes become violent, and even result in death. Eighty-four-year-old socialite Gladys Werlich died of head injuries last January, six days after she was mugged by four youths near her 16th Street mansion.

"It's gotten so bad the old people are afraid to go outside and they're afraid to stay home," said Cpl. Cliff Melton, head of Montgomery County's Crime Prevention for Seniors program.

For the past year and a half Melton's federally-funded program has been keeping track of crimes against the elderly in the county. According to his figures, more than half those crimes have taken place in Silver Spring, where 17,000 of the county's 65,000 seniors live.

Melton recalled one woman who was robbed as she stood on the open porch of her Silver Spring home. "As he was reaching for my purse he said, 'Shut up or I'll kill you,' " the woman told Melton.

"I used to walk my dogs at 2 a.m. I used to leave the doors unlocked and I never worried about anything. Now I don't even answer the door in the daytime unless I know who is coming over," she said.

Unlike some of the 700 victims Melton has dealt with, the woman said she has not considered moving. "I've been here for so many years . . . I figure no matter where you move, you could get mugged. You're not safe anywhere. It's a heck of a way to live, but what can you do?" she asked.

Melton's program, and one similar to it in Prince Georges County, tries to deal with that question. Melton lectures to groups of senior citizens. He writes letters to elderly victims, offers counseling and refers them to county agencies for further help.

Often, a victim calls Melton in his tiny cubicle in the Silver Spring police station—just to talk. "They want reassurance," he said. "What do you do with a woman who won't leave her home after it's been burglarized? It's not the loss of her television set that bothers her.

"The impact of a burglary is psychological and emotional as well. It is just as great as if someone had hit them on the head. The home is probably the last place the elderly feel security and privacy," Melton said. More than 400 of the 700 crimes against the elderly last year involved burglaries, he said.

So he talks to them on the telephone. Visits them at home. Tells them how to be on the lookout for potential purse snatchers. Explains confidence schemes so they won't lose their savings. And he tries to do all this without making them more afraid.

"We've got to give these victims confidence to continue living another day without fear," Melton said.

The name of Prince Georges program even suggests that anxiety. Called "Seniors Against a Fearful Environment," the federally funded program has been in operation just six months.

Along with some counseling and referral services, SAFE employs four officers who patrol on foot or on scooters neighborhoods inhabited primarily by old people.

Cpl. Frederic Zimmer said that since the program got under way no elderly people have been injured during robberies and very few crimes have been committed against them. Zimmer said no statistics were kept on elderly crime victims before the program began.

Fairfax County Police Department community relations officers will lecture to groups of senior citizens if they are asked. "If we don't hear from them, we assume they're doing all right. We don't do as much as we'd like to do, but with lectures to schools and civic and business associations, there isn't much time left to solicit new requests," said one officer.

The Alexandria Police Department has one program developed specifically for senior citizens, a flim-flam warning called "On Guard Bunko." Community relations officers seek out the elderly to warn them of shams like the "Pidgeon Drop" and the "Bank Examiner" fraud.

Nationally, according to George Sunderland of the American Association of Retired Persons, fraud is the No. 1 crime problem facing the elderly. In Montgomery County last year, 16 of the 33 fraud schemes police investigated had elderly victims. And though figures were not available, District police spokesman William G. Jepsen said

senior citizens are "much more likely" to be taken in by a con game because they often are less suspicious.

The District is in the process of packaging crime prevention literature with a particular focus on reaching the elderly, "especially the less active senior citizens who don't get out as much to lectures," Jepsen said. "We don't want the criminal element here to take a cue from New York City."

No, not New York City, where, after two assaults in two months, a couple in their 70s committed suicide and left a note: "We don't want to live in fear any more." Or Detroit, where an 80-year-old woman refused to yield her purse to three youths, so they shot her in the face.

In Seattle, young policemen disgused with make-up to appear elderly patrol senior citizens' neighborhoods as decoys. Chicago, Los Angeles and New York have obtained federal funds for programs similar to those in Montgomery and Prince Georges Counties.

But even when the criminals are caught, Montgomery's Melton lamented, "there's not too much the courts can do." The vast majority of offenders who victimize the elderly are under 18—juveniles.

"What is a judge going to do with a 15-year-old boy who beats an old lady and snatches her purse? Slap him on the wrist and send him out," Melton said.

Like many of the purse snatchers and burglars, Erma Petersen's assailant has not been caught. "No," she said one day last week, her leg raised on a chair to help the swelling, "no, they never caught him. He's probably out getting somebody else right now."

[From the Washington Star, November 1976]

A Promising Crackdown on Career Criminals

(By James J. Kilpatrick)

The history of crime and criminal justice in our country is largely a history of failures. One approach after another has been tried; nothing much has succeeded. But in its attack on "career criminals," the Law Enforcement Assistance Administration may have hit upon something that works.

A career criminal is precisely that—a man who makes a career of burglary or armed robbery as other men make careers of journalism, medicine or law. This is the only profitable trade he knows. The career criminal is utterly without conscience; he is indifferent to every consideration of right conduct; his animal instincts lead him, without pity, to prey upon unoffending victims.

An FBI study indicates that at least a quarter of a million persons are actively pursuing careers in crime. These are the recidivists—the two-time, three-time, five-time losers. Put on probation for one offense, they soon commit another. Sent briefly to jail, they gain nothing from rehabilitation programs. Released on parole, they fall back into crime.

What can be done about it? In 18 cities and in the State of Rhode Island, the LEAA is experimenting with a hard-nosed approach that is about as far as one can get from the bleeding-heart compassion beloved of the school that says, "Society is to blame." The purpose is plain—to prosecute the career criminals to the very limit of the law, and to send them to prison for long, long terms.

In a word, incarceration. If the program has a deterrent effect on other criminals (and there is some evidence that it is having such an effect), so much the better. If the long-term prisoner benefits from rehabilitation, all well and good. But the primary goals are not to deter or to rehabilitate. The object is to get these particular criminals on ice, behind bars, where for a number of years they cannot terrorize the people.

The program got under way in Houston and New Orleans in the spring of 1975. Shortly thereafter, Dallas, Boston, Salt Lake City, San Diego and Detroit came aboard. Grants subsequently were approved for Columbus, Ohio; Kalamazoo, New York City, Indianapolis, St. Louis, Miami, Albuquerque, Memphis, Louisville and Las Vegas. Last month the LEAA funded a $295,000 program for Portland, Oreg. About $8.5 million, in all, has been committed.

The federal aid is intended to help the participating cities in putting together a team of prosecutors who work on career criminals only.

In a typical case, a suspect is arrested for armed robbery. A routine check discloses that he has a long record of prior offenses. The special team goes to work. Prosecutors argue for high bail; they press for prompt trial; they refuse to bargain for a plea of guilty to some lesser offense. They concentrate their skill and energy on getting convictions; and they ask the trial court for long prison terms.

This relentless approach seems to work. Over a 14-month period from May 1975 through July of 1976, prosecutors in 12 of the participating cities brought 2,015 career criminals to trial. The average adjudication time was 84 days. The prosecutors won 1,914 convictions. The average sentence was 19.8 years in prison.

As an article in the current U.S. News makes clear, not everyone is enthusiastic about the program. Defense lawyers are complaining of the unkind treatment accorded their best clients. Some criminologists doubt that a deterrent effect on crime in general can be shown. If the program catches on, the taxpayers ultimately will be hit for the higher costs implicit in the long-term incarceration of a large number of dangerous criminals.

My own guess, for what it may be worth, is that the taxpayers willingly will accept the burden. As public opinion surveys disclose, the people everywhere long for safe streets.

Law-abiding citizens grow increasingly impatient with what they perceive as soft-hearted judges and inefficient law enforcement machinery.

No one supposes that the career criminal program will stop crime. Of course not. But it will isolate some of the most vicious criminals until they get to be old men—and that strikes me as a net gain, fully worth the price.

CBS Evening News With Walter Cronkite

Cronkite. Criminal preying on the elderly is an aspect of Eric Sevareid's commentary tonight on law and order.

Eric Sevareid. The new President is expected to act as if the most immediate responsibility of government is to put people to work. That reflects the ethos of this last generation. But the most fundamental responsibility of government in any generation is the protection of citizens in their persons and property. The Nixon-Ford law and order administration took office eight years ago. It altered the supposedly permissive Supreme Court and spent six-billion extra Federal dollars on special help to state and local police forces.

In that time, felonies have increased by a monstrous 50 percent. Unemployment is one cause, but a marginal one. It does not explain why teenagers who were stealing hubcaps a few years ago are now shooting, knifing, and stomping old people to death. It does not explain the half-million career criminals who would not take any job offered, and who commit about 80 percent of burglaries today. It doesn't explain big, organized crime which grows steadily in recession or prosperity.

There is no one core to the crime problem, but an obvious one is the jammed-up condition of the criminal courts. There is no avoiding a big increase in prosecutors, defense lawyers, courts, and jail space. Without them, new laws for longer minimum sentencing just add to the log jam. And only six percent of all Federal aid has gone to help the courts. Presuming an enlarged, speeded-up court system, there are three avenues of action that promise progress. [One is the spread of special bureaus for catching and trying career criminals, with centralized, computerized police information about them.]

One is the process of separating the new, terrifying class of teenage felons from harmful juvenile offenders like truants and runaways, and treating them far more severely. A third, now possible under new laws but barely begun, is to go after organized crime, which is big business, not only by means of the criminal law, but by means of the laws of equity—common and statutory. As a corporation that violates anti-trust laws, for example, is gone after. The advantages seem promising. Compared with criminal defendants, civil defendants have fewer protective rights.

Jurors frequently intimidated by the mob can often be dispensed with. Mob property can be confiscated. Mob leaders can be enjoined from doing certain kinds of business, or doing business in certain regions. Theoretically at least, brief periods of emergency could be declared by statute. Another advantage, however temporary, is that most mob lawyers are untrained in equity law. In sum, the big leaders of organized crime, of whom there are probably no more than about a hundred, would get hit in their pocketbook, if not in their person.

[From The U.S. News And World Report, Nov. 22, 1976]

A War on Career Criminals Starts To Show Results

A federally financed crackdown on people who make careers out of crime is starting to show important results.

Already, nearly 2,500 career criminals have been sent to prison for long terms under the program, begun less than two years ago, and the number will climb sharply in months ahead.

The campaign against career criminals, which is the major anticrime initiative of the Ford Administration, is thus far operating in only 18 cities and one State. No one is yet sure whether it will achieve its main goal—a reduction in the nation's crime rate.

But President Ford is so pleased with the way it is working that he has ordered the federal program doubled in size.

Moreover, a number of prosecutors around the country have set up their own career-criminal programs, with only indirect federal aid. And two cities—Washington, D.C., and Ventura, Calif.—are so enthusiastic about the idea that they have gone off on their own, with only local financing.

MUCH BY FEW

The programs vary somewhat from city to city. But they are all based on this theory: Much of the nation's serious crime is committed by a relatively small number of people who make crime their business. So, one way to reduce crime is to identify such criminals and make sure that they are prosecuted swiftly and vigorously, convicted if guilty and locked up for the maximum sentence if they are convicted.

This is what has happened to career criminals in some recent cases:

A Miami man, convicted in a rape case, received consecutive sentences totaling 420 years—almost certainly assuring that he will stay in prison longer than he would under a life sentence, which often is shortened by parole.

In Detroit, a man who had pleaded guilty to breaking and entering a motor vehicle was sentenced to two to five years in prison. But prosecutors, noting he had five previous fel-

ony convictions, returned him to court, and he was sentenced to 10 to 20 years in prison as a habitual criminal.

In Massachusetts, a 23-year-old man had spent only two short terms in custody despite a record that began when he was 15. After conviction of rape, armed robbery and kidnaping under the career-criminal program, he was sentenced to 25 to 40 years in prison.

No one knows for sure how many people fall into the category of career criminals. But a study by the Federal Bureau of Investigation of 256,000 persons who were arrested between 1970 and 1975 showed that 64 per cent of them had been arrested two or more times. The study also showed that those 256,000 persons had been accused of a total of more than a million crimes.

HOW IT WORKS

The Federal Law Enforcement Assistance Administration (LEAA) has put 6.2 million dollars into the program to help State and local prosecutors. Just how does the program work?

A team of prosecutors is relieved of other duties so that the members can concentrate on the career criminals. The federal aid enables prosecutors to hire other assistants to handle routine cases.

The prosecutors work closely with the police—in some cases rushing to the scene of a serious crime so they will be fully familiar with the case from the beginning.

In most places, persons are targeted for special treatment if they have long criminal records and if their latest crime is a serious one.

A defendant tagged as a career criminal finds that ways he used in the past to slip through the courts are blocked. It is much harder for him to get a trial delayed or to escape a long sentence by pleading guilty to a minor offense instead of standing trial for his real crime.

The prosecutor assigned to the case sticks to the suspect like a shadow. When a bail hearing is held, the prosecutor is there to demand that the bail be high.

When the defendant goes to trial, the prosecutor enters the court fully familiar with the case and the defendant's record. He makes sure his witnesses are in court on time. These prosecutions are handled much more speedily than most criminal cases so the witnesses will still have clear recollections of what happened and will be prepared to give convincing testimony at the trials.

HIGHER CONVICTION RATE

So far, 95 per cent of the cases have resulted in convictions, compared with a national average conviction rate of 81 per cent. In career-criminal trials, the prosecutor makes certain that the criminal's full record is before the judge when a sentence is being considered.

Arvin L. Davis, who runs the career-criminal program in Kalamazoo, Mich., explains how he goes one step further to make sure the crime and the suffering of the victim are not forgotten: When it comes time for sentencing, we bring the victim to court and sit him in the first row with the prosecutor. That has a certain sales effect."

Almost all of those convicted under the program have been sentenced to prison, with an average term of nearly 20 years.

In addition to the one in Kalamazoo, there are now federally funded career-criminal programs operating in Houston, New Orleans, Salt Lake City, San Diego, Boston, Detroit, New York, Dallas, Indianapolis, St. Louis, Miami, Las Vegas, Memphis, Louisville, Albuquerque, Portland, Oreg., and Columbus, Ohio. One program covers the whole State of Rhode Island.

The first program began in New Orleans in May, 1975, and the newest, in Portland, is just getting under way.

Statistics on the performance of the career-criminal program are fed into a new National Legal Data Center in Thousand Oaks, Calif.

FORD'S VERDICT

On the basis of preliminary statistics, President Ford, in a speech on September 27, declared the program "a success" and said it has demonstrably reduced crime.

But James C. Swain, who heads the program for the LEAA, and Philip Cohen, executive director of the data center, are much more cautious.

"We don't want to say yet that there has been a reduction in crime," Mr. Swain says. And Mr. Cohen says: "We think there is a significant favorable trend, but I won't go beyond that."

Mr. Cohen's cautious optimism is based on a study he did of robbery rates in the first nine cities that set up career-criminal programs. He says the robbery rate is especially important because nearly half those prosecuted under the program are robbers and because robbers are more likely to be repeaters than other criminals.

This is what Mr. Cohen's figures show: In eight of the nine cities, the robbery rate was lower in the first half of 1976 than it was in the first half of 1975. And in seven of the nine cities, the drop was greater than the 9 per cent decrease in robbery nationwide.

But those figures may not be as significant as they appear. When the figures for all seven categories of serious crime tabulated by the FBI are examined, they show that the over-all crime rate rose in seven of the nine cities—and in four of them, the increase was substantially higher than the average increase in the crime rate for all cities with more than 25,000 population.

Two studies of the program are now under way, but it may be a year or more before a reliable picture emerges of the program's impact on the crime rate.

MOVING AHEAD

Prosecutors are not waiting for the statistics before setting up their own career-criminal programs—if they can find the money for the added manpower that is required for such programs.

The National District Attorneys Association has formed a committee to help spread the concept. George C. Smith, prosecuting attorney in Columbus, Ohio, and chairman of the committee, says he gets calls almost daily from prosecutors who want to know how to get a program started.

The career-criminal program's appeal to prosecutors is obvious: Overworked and frustrated by watching hardened criminals beat the system time after time, prosecutors see this program as a chance to focus on the worst offenders and make sure they end up in prison.

In Washington, D.C., prosecutors call the new program "Operation Doorstop" because it is designed to end what has been described as revolving-door justice in which criminals are often back on the street within hours after committing serious crimes.

The program has improved morale among prosecutors in many places. In Ventura, for example, two assistant district attorneys who were about to leave to enter private practice changed their minds and stayed on the job when a career-criminal program was started.

Public defenders are less enthusiastic about the program than the prosecutors. In Columbus, the public defender obtained a federal grant so he could expand his staff to match the effort put into the career-criminal program by Mr. Smith, the prosecutor.

Other defenders say that those accused under the program should be granted all the safeguards provided in federal courts, since federal money is being used to prosecute them. But so far there has been no court.

A "POLITICAL PLOY"?

In New York, Harold Jacobson, a top official of the Legal Aid Society, says the only thing good about the program—which he describes as a "political ploy"—is that it gets more money into the criminal-justice system. He sees little hope that it will result in a real decrease in crime.

Police make arrests in only a small percentage of crimes, he explains, and adds: "Even if the career-criminal program is terribly effective, you're dealing with only 1 out of 5 or 6 criminals. That hardly blunts crime."

Another question that has been raised about the program is the kind of people it tags as career criminals. Some are clearly vicious, convicted of multiple rapes, brutal murders and other violent crimes. The first 1,900 persons convicted under the program had an average of five prior convictions for serious crimes and, altogether, they had a total of 9,570 prior convictions.

But Peter Greenwood, who is conducting a federally financed study of career criminals for the Rand Corporation says there is the possibility that many of those prosecuted under the program may be just "born losers," who have failed at everything in life, including crime.

One question that the Greenwood study will try to answer, he said, is whether the true career criminals—the successful professionals—are still out free, going about their business.

PRESSURE ON COURTS

One result of the career-criminal program in some places has been to put more pressure on both the courts and the correctional institutions. In Kalamazoo, the inability of the courts to keep up with trials resulting from the program became such a problem that federal money was provided to finance a new circuit court to handle such cases.

Jeffrey Horton, a Kalamazoo defense lawyer, complained that because of the priority given to career-criminal cases "other guys have to sit in jail and wait to go to court."

Together with the increasing use of mandatory minimum sentences and a generally tougher attitude on the part of the courts almost everywhere, the career-criminal program is contributing to a growing problem of overcrowding in prison facilities.

Despite these difficulties, the programs seem almost certain to spread rapidly in coming months, making city after city dangerous places for professional criminals to be caught.

[From Police Department, Baltimore, Maryland]

GENERAL ORDER 12–76—CAREER CRIMINALS PROGRAM

BACKGROUND

The Office of the State's Attorney for Baltimore City and the Baltimore Police Department have initiated a joint program designed to remove from the streets of Baltimore the recidivistic Index Crime offender, with particular attention to those who repeatedly commit violent crimes. These repeaters are commonly called "Career Criminals".

POLICY

Repeat Index Crime offenders, in particular violent crime offenders, as defined by this order, shall be the focus of the Career Criminals Program.

All lawful means shall be taken, supported by thorough investigation and maximum police-prosecutor cooperation to keep these Career Criminals off our streets and bring them swiftly to trial. No plea bargaining will be permitted.

Those juveniles who, by virtue of offenses committed have been repeatedly waived by statute to the Criminal Court, shall also be considered for the Career Criminals Program.

PURPOSE

This order implements the Career Criminals Program, defines Career Criminals selection criteria and promulgates governing procedures to all members of the force.

SCOPE

I. *Selection Criteria—Career Criminals Program:* Designation of Career Criminals shall be in keeping with the criteria set forth in Annex A of this order—see Annex A.

B. Identification, Selection and Case Preparation Procedure—*Career Criminals Program:* The procedure for the identification, selection and case preparation of Career Criminals cases shall be in keeping with the guidelines set forth in Annex B of this order—see Annex B.

RESCISSIONS

None.

EFFECTIVE DATE

This Order is effective on the date of publication.

D. D. POMERLEAU,
Commissioner.

ANNEXES

A. Selection Criteria—Career Criminals Program.

B. Identification, Slection and Case Preparation Procedure—Career Criminals Program.

Distribution "A".

I certify that I have read and fully understand this Order. Signature.

ANNEX A—SELECTION CRITERIA—CAREER CRIMINALS PROGRAM

Persons previously charged with and/or convicted of a designated offense, who have been released by various pre-trial and post-trial options to include bail, personal recognizance, probation, parole, or other judicial release and are subsequently rearrested for one or more of these crimes or attempts thereof while in such release status, shall be eligible for the Career Criminals Program:

Career Criminal Offenses: Homicide, Rape, Assault and Robbery with Firearms, Mayhem, Burglary of a Dwelling During Nighttime Hours, Arson of a Dwelling with Personal Injury, Kidnapping, Child Molestation with Injury, Serious Child Abuse, Extortion, and Exceptional Cases.

Other cases as agreed upon by the Supervisor of the Career Criminals Program and Assistant State's Attorney, based upon information furnished by members of the Patrol or other Division of the department, may also be included in this program, i.e. a violent crime arrestee not meeting the above defined selection criteria whose criminal history reflects repeated contact with the courts.

In order to insure the effectiveness of the Career Criminals Program, exceptional cases must be thoroughly reviewed by the member's supervisor and/or Shift Commander prior to referral to the Career Criminal Program. The referral shall be made only by the Shift Commander of the referring section.

In considering exceptional cases members should be aware one of the statutory provisions to be used in the program by the State's Attorney shall be the Annotated Code of Maryland, Article 27, Section 643 B., "Mandatory Life Sentence".

(a) "Crime of violence".—As used in this section, the term "crime of violence" means abduction; arson; kidnapping; manslaughter, except involuntary manslaughter; mayhem; murder; rape, robbery, sexual offense in the first degree; and sexual offense in the second degree or an attempt to commit any of these offenses.

(b) Mandatory life sentence.—Any person who has served three separate terms of confinement in a correctional institution as a result of three separate convictions of any crime of violence shall be sentenced, on being convicted a fourth time of a crime of violence, to life imprisonment without the possibility of parole. Regardless of any other law to the contrary, the provisions of this section are mandatory. (1975, ch. 253; 1976, ch. 611, 1.)

The foregoing is commonly referred to as the State's "four-time loser" law.

D. D. POMERLEAU,
Commissioner.

ANNEX B—IDENTIFICATION, SELECTION AND CASE PREPARATION PROCEDURE—CAREER CRIMINALS PROGRAM

The Central Records Division, upon request for positive identification and criminal history information, based on the fingerprints of an arrestee charged with one or more of the offenses enumerated in Annex A, shall cause a complete and accurate record search to be made to establish the offender's potential for referral to the Career Criminals Program. When the offender's record indicates he is a possible Career Criminal the Shift Commander of the Central Records Division shall: insure the booking district is altered via Mufax of the potential Career Criminals selection; insure the Criminal Investigation Division Crimes Against Persons Career Criminals Program supervisor is immediately provided the available criminal history records.

Upon receipt of the Career Criminals alert the district Shift Commander shall insure the arrest and offense reports concerning the potential Career Criminal are reviewed by a district supervisory officer for completeness and accuracy.

The Career Criminals Program supervisor shall review the offender's record and tentatively designate, if applicable, the offender as a Career Criminal. If the offender does not meet the necessary criteria the Career Criminals Program supervisor shall notify the booking district and indicate on the record form the arrestee has not been selected. The offender will be processed in keeping with standard procedures. All records shall be returned to the Central Records Division, for transmission to the booking district.

Upon tentative selection of the offender for the Career Criminals Program the Career Criminals Program supervisor shall notify the booking district and request the prisoner be transported to the Crime Against Persons Section. The arresting officer and/or primary investigating officer and witnesses, if available, shall also respond to the offices of the Crimes Against Persons Section, Criminal Investigation Division.

The Career Criminals Program supervisor shall notify as appropriate a Criminal Investigation Division investigator to respond to the Crimes Against Persons Section to insure complete and thorough case preparation.

The Career Criminals Program investigator shall, in consultation with an Assistant State's Attorney of the Violent Crimes Liaison Unit as appropriate:

Review offense and arrest reports;

Interview the arresting/investigating officer (if available);

Interview witnesses (if available);

Interview the arrestee;

Review the statement of charges for accuracy and completeness;

Prepare affidavits as necessary immediately, if not immediately then schedule necessary contact; and,

Coordinate evidence collection with the assistance of laboratory personnel and lineups if required.

If the Career Criminals Program supervisor and investigator, upon review of the case, determine it does not merit inclusion in the Program, the investigator shall notify the district and insure the arrestee and his records are immediately returned for standard processing.

Should the investigator and Career Criminals Program supervisor select the arrestee for the Program, the supervisor shall insure contact with a designated Assistant State's Attorney prior to returning the arrestee to the district for processing as a Career Criminal.

The Career Criminals Program supervisor and investigator shall coordinate with the designated Assistant State's Attorney to insure police-prosecutor representation and input at the probable cause and bail determination hearing as appropriate.

District booking officers shall insure their District Commander is informed of the selection of the arrestee for the Career Criminals Program.

If the offender is released on bail or other court option, the State's Attorney's Violent Crimes Liaison Unit shall be promptly notified so that appropriate action may be taken. This notification will be made by the District Court Prosecutor.

Whether the offender is committed to jail or is released until final adjudication and sentencing by the court the Crimes Against Persons Section and the State's Attorney's Violent Crimes Liaison Unit shall, in keeping with their assigned responsibilities, jointly maintain investigative and prosecutorial overview of the case.

The State's Attorney's Violent Crimes Liaison Unit will, as agreed, promptly bring the case before the Grand Jury for an indictment followed by expeditious arraignment and trial.

The Violent Crimes Liaison Unit of the State's Attorney's Office will also, as agreed, maintain an interest in all bail hearings at the District Court and Supreme Bench levels, and, as appropriate, contact pre-trial release authorities, bondsman of record, and/or parole and probation officers. This specific interest throughout the criminal justice process shall include notifying the Parole Board of the offender's criminal career.

PRE-ARREST CASE PREPARATION—WARRANT ISSUED

When a warrant has been obtained for a person meeting the above selection criteria, the Central Records Division shall notify the Career Criminals Program supervisor in keeping with the procedure established by this order. A copy of the warrant card will be forwarded promptly to the Career Criminals Program supervisor. On receipt of the warrant card the supervisor will insure proper notification and thorough investigation and case preparation is accomplished in the same manner as cases where an arrest has been made. This pre-arrest activity will facilitate expeditious post-arrest processing of the case.

Career Criminals Program cases are considered major cases and shall be investigated, documented, and maintained in keeping with established major case procedures.

All members of the force shall cooperate fully with Career Criminals investigators and prosecutors.

D. D. POMERLEAU,
Commissioner.

By Mr. McINTYRE:

S. 29. A bill to amend the Federal Aviation Act of 1958 to authorize reduced fare transportation on a space-available basis for elderly persons and handicapped persons, and for other purposes; to the Committee on Commerce.

ELDERLY AND HANDICAPPED PERSONS TRANSPORTATION ACT OF 1977

Mr. McINTYRE. Mr. President, today I am introducing the Elderly and Handicapped Persons Transportation Act of 1977, legislation that would approve reduced air fares on a space-available basis for persons 60 years of age and older, and for the handicapped and attendants

of the handicapped. It would also require the CAB to study the economic feasibility of reduced fare for youth.

This bill would remove the statutory limitations on the CAB's ability to approve reduced fares for deserving groups, if the fares meet the economic test generally applied to discount fares.

The problems affecting the elderly are numerous and transportation has consistently been a major concern. Many of our elderly and handicapped are unable to drive and consequently rely primarily on public transportation. With many medical specialists located only in the metropolitan areas and friends and family spread throughout the country, I believe this legislation would provide many people with the opportunity to make use of the airways who otherwise would find it financially impossible. The mobility provided by air transportation is especially important to the elderly and the handicapped.

The handicapped and elderly are unquestionably deserving of this opportunity and past experimentation has proven that air travel by senior citizens is significantly increased when reduced fares have been provided. For example, when Hawaiian Air Forces offered reduced fares to senior citizens from 1967 to 1973, the carriers' senior citizens traffic increased by 340 percent.

I hope that my colleagues will join in quickly enacting this measure.

By Mr. CHURCH:

S. 30. A bill to amend the Internal Revenue Code of 1954 with respect to .22-caliber ammunition recordkeeping requirements; to the Committee on Finance.

REPEAL OF RECORDKEEPING REQUIREMENTS ON THE SALE OF .22-CALIBER AMMUNITION UNDER THE 1968 GUN CONTROL ACT

Mr. CHURCH. Mr. President, today I introduce legislation to repeal restrictions on the sale of .22-caliber ammunition which are part of the 1968 Gun Control Act.

In 1969, I supported an amendment to eliminate registration provisions of the 1968 Gun Control Act affecting sporting rifles and shotguns. The Congress enacted this amendment into law, thus repealing the recordkeeping requirements on shotgun ammunition, ammunition suitable for use only in sporting rifles generally available in commerce, and component parts for such ammunition. In adopting this amendment, Congress supported my belief that the reporting requirements for sporting firearms created a useless and unnecessary burden on the Treasury Department, on ammunition dealers, and on the Nation's sportsmen.

Unfortunately these requirements remain for .22-caliber ammunition as it may be used for sporting rifles. The legislation I introduce today adds .22-caliber rimfire ammunition to the existing repeal provision exempting other types of sporting ammunition.

I believe that it is important to eliminate useless provisions of the law, particularly when they are regarded as niggling Government harassment and petty paperwork, and significantly in this case when their enforcement actually hinders a legitimate Government purpose—crime fighting. Just as the ammunition restrictions repealed in 1969 were ill-conceived hindrances to the crime fighting effort, so are the restrictions on .22 ammunition which have remained in the law.

What exactly does this recordkeeping involve? Under the provisions of the 1968 Gun Control Act, it is unlawful for a federally licensed dealer to sell or deliver ammunition without making a record showing the name, age, and residence of the purchaser. In addition, all dealers are required to maintain such records of importation, production, shipment, receipt, sale, or other disposition of ammunition as may be provided by regulations. The resultant Treasury Department regulations require a license to record: The date of transaction; the name of the manufacturer; the caliber, gage, or type of component; the quality of ammunition transferred; the name, address, and date of birth of the purchaser; and finally, the method used by the licensee to establish the identity of the purchaser.

Concerning its own .22 requirements, the Treasury Department has stated:

> The record keeping requirements have become so burdensome that they tend to detract from the enforcement of the firearms laws.

It is clear that the time and bother to comply with these requirements cannot be justified.

This recordkeeping has also been found to be totally without value in efforts to fight crime. Treasury Department officials have testified that they know of no instance "where any of the recordkeeping provisions relating to sporting-type ammunition — including .22-caliber rimfire ammunition — has been helpful in law enforcement." And the Justice Department confirmed that—

> There is not a single known instance, as we have learned from our discussions with IRS, with the firearms people there, not a single known instance where any of this record keeping has led to a successful investigation and prosecution of a crime.

It is apparent that present restrictions on .22 ammunition are useless, and worse, a deterrent to the fight against crime by the waste of effort their enforcement entails. Furthermore, when there is already so much Government-inspired complication of our daily lives, repeal of these restrictions is a fine place to end a senseless harassment, involving the most popular type of sporting ammunition in the United States.

I hope that the Senate will act favorably on my proposal, and I ask my colleagues to join in its support.

By Mr. DOMENICI (for himself, Mr. CURTIS, Mr. STEVENS, and Mr. THURMOND):

S. 31. A bill to amend the Gun Control Act of 1968 to provide for separate offense and consecutive sentencing in felonies involving the use of a firearm; to the Committee on the Judiciary.

Mr. DOMENICI. Mr. President, in the first session of the 94th Congress, I introduced the same bill I am reintroducing today. When I introduced the bill then, I reported that a crime of violence occurred every 36 seconds. Now, just 2 years later, a crime of violence occurs every 31 seconds. While at first glance this may not appear to be a large increase, in fact it represents greater than a 16-percent increase in just 2 short years.

In 1975, we find that the number of violent crimes has reached the unprecedented level of over 1,026,000. This represents a 38.9-percent increase over the number in 1970 and a 16.6-percent increase in the number in 1973. These are shocking statistics. They translate into the fact that in 1975 there was almost a 40-percent greater probability than in 1970 that any of us would have been victimized by violent crime.

Nationally, in 1975, firearms were involved in 66 percent of all murders. In the Western States this figure was 59 percent, but in New Mexico it was over 63 percent. Nationally, firearms were involved in almost 25 percent of the aggravated assaults. In the Western States this was slighlty over 22 percent, but in New Mexico it was over 25 percent. Nationally, firearms were involved in almost 45 percent of the robberies. In the Western States it was 44 percent, but in New Mexico it was almost 49 percent. Thus, in two out of the three categories for which gun related crime statistics are kept, New Mexico exceeds the national average and in all three cases, New Mexico exceeds the other Western States. Over half of the murders and almost half of the robberies in my State involve the use of guns.

Yet I do not believe that the answer to this problem can be found in attempting to deprive our citizenry of their right to own guns. Legitimate, responsible homeowners and sportsmen should not be penalized for the misdeeds of others.

The penalties should be placed on the wrongdoers. They should be swift and they must be stern. Only by putting the criminal on notice that his misdeeds will cost him dearly can we hope to correct this critical problem.

Therefore, I, together with my colleagues, Senators CURTIS, STEVENS, and THURMOND introduce today an amendment to title 18, section 924(c) of the United States Code that would provide significantly stiffer sanctions for the illegal use of firearms. I ask unanimous consent that this amendment be inserted at this point in my remarks.

Mr. President, the bill clarifies the intent of Congress that carrying a gun be treated as a separate and distinct offense from the felony committed.

In addition, it provides that the present requirements of "unlawfulness" in the carrying of the gun be deleted. Therefore, the act of carrying a gun—despite the lawfulness of possession—will be treated as a criminal act if done in conjunction with the commission of a crime.

Finally, the bill dispels all doubt that carrying a firearm during the commission of a felony creates a separate and distinct felony sentencing for which must be imposed consecutively with that of the underlying charge. Sentencing for the gun charge would be subject to the sterner penalties this bill contains.

With our crime rate accelerating, and our innocent citizens needlessly dying, I commend this amendment to my distinguished colleagues as an urgent matter deserving our earnest attention.

By Mr. KENNEDY (for himself, Mr. WILLIAMS, Mr. BROOKE, Mr. JAVITS, Mr. PELL, Mr. RANDOLPH, and Mr. STAFFORD):

S. 32. A bill to authorize the National Science Foundation to conduct a continuing education program in science and engineering, and for other purposes; to the Committee on Labor and Public Welfare.

CONTINUING EDUCATION IN SCIENCE AND ENGINEERING ACT

Mr. KENNEDY. Mr. President, I am introducing today legislation entitled the "Continuing Education in Science and Engineering Act."

The need for continuing education in science and engineering has been of concern to the Congress and to the Committee on Labor and Public Welfare since 1971 when legislation providing retraining and reeducation opportunities for scientists was first introduced. Since that time, a limited effort to address this problem has been undertaken by the National Science Foundation. In addition, the National Science and Technology Policy, Organization, and Priorities Act, which was signed into law last year, stressed the importance of the full utilization of the Nation's scientists and engineers. The need for continuing education for scientists and engineers was also underscored recently by the AFL–CIO in a statement to the Subcommittee on the National Science Foundation:

It is an inherent characteristic of science and engineering that new knowledge is constantly being developed necessitating lifelong study on the part of their practitioners. . . . In many cases, the employment problems of scientists and engineers result directly from governmental decisions that are beyond their control . . . These may not match the background of available people. Retraining is required.

The legislation I am introducing today recognizes that the knowledge, skills, and ideas of the Nation's scientists and engineers must be applied to the pressing problems the Nation faces in areas of civilian science and technology in fields as diverse as energy, environment, productivity, health care, transportation and public safety. The continued economic health and security of the Nation depend strongly upon the maintenance of a pool of scientists and engineers whose skills and knowledge is up to date. The legislation recognizes that governmental decisions affect the demand for scientists and engineers with experience in particular fields, often necessitating job changes for numerous individuals who require additional training to operate successfully in new areas of importance to the Nation.

Mr. President, it is also important to point out that each working scientist or engineer generates six to 10 other jobs. Moreover, the significant Federal investment that has been made in the education of scientists and engineers through graduate and postgraduate fellowships, research grants and funding to maintain outstanding research facilities in academic institutions throughout the Nation, makes unemployment and underemployment of professionally qualified scientists and engineers an inexcusable waste of a limited human resource that is urgently required to meet present and future national needs.

"Science at the Bicentennial," a report from the research community published by the National Science Board last year, in a discussion of national policy questions regarding scientific and technical manpower, pointed out that there is frequently a mismatch in quantity between supply and demand for advanced degree graduates from universities. It emphasized that the dislocation of bright, young, creative technical people brought about by shifts in the economy and termination of job assignments is causing the Nation problems today, and will cause problems in the future. A "shock absorber" to mitigate this effect was called for.

The Engineering Manpower Commission of the Engineers Joint Council adopted the following statement on the need for Government efforts to deal with engineering unemployment:

In the Commission's judgment, the most effective way of stabilizing engineering employment in the long run is for the government to encourage the continued development of job opportunities in industry by adopting positive policies and programs aimed at alleviating our most pressing national problems, with budgetary and program support provided on a long-term basis. In the event of short-term dislocations, however, the Engineering Manpower Commission believes that a program of identifying specific areas of imbalance between manpower supply and demand, seeking or creating job opportunities, and assisting relocation and training on an individual basis as required, will achieve the fastest and most useful results.

The legislation I am introducing today to provide continuing education for scientists and engineers is directed at persons who have been engaged in their careers for at least 3 years. It is designed to enable persons with scientific and technical training to acquire new knowledge, techniques, and skills in other fields. The legislation provides fellowships for courses of study which provide continuing education in science and engineering, and for the development of special curriculums and education techniques, in cooperation with industry and academic institutions, for continuing education in science and engineering.

A special emphasis of this legislation is an effort to provide opportunities for women, whose careers in science and engineering have been interrupted, to reenter scientific and technical fields. At present, only 8 or 9 percent of persons holding Ph. D.'s in science are women. In some fields, their representation is even less—2 to 4 percent in physics, less than 1 percent in engineering.

To reach women holding undergraduate degrees in science and related fields whose careers or graduate education were interrupted, the National Science Foundation now has a small program to encourage the reentry of these women into careers in science or into graduate education in science. Limited funding is being made available to 11 institutions for the development of short courses, semester-long courses, year-long courses, independent study, research participation, and internships in industrial or governmental laboratories. Between 10 and 50 women are expected to be involved in each project.

The legislation I am introducing today will build on this pilot program and, together with programs to encourage women at the college and precollege level to pursue careers in science and technology, could contribute significantly to an eventual increase in the percentage of women with doctoral degrees in science and engineering—a percentage which was higher in 1920 than it has been in any decade since.

Mr. President, I ask unanimous consent that the text of the Continuing Education in Science and Engineering Act be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 32

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Continuing Education in Science and Engineering Act".

STATEMENT OF FINDINGS AND DECLARATION OF POLICY

SEC. 2. (a) The Congress finds that—

(1) it is the national interest to promote the full use of scientific and engineering human resources, and to ensure the full alleviation of national problems in such areas with scientific and engineering skills to the allevation of national problems in such areas as energy production, pollution abatement, transportation, food and industrial productivity;

(2) the nation's pre-eminent position in science and technology depends upon the development of the full potential of the talents of men and women with scientific and engineering skills whose employment produces job opportunities in technical and support occupations and exerts a strong multiplier effect on the gross national product;

(3) the ability of men and women with scientific and engineering skills to apply their talents fully is highly vulnerable to sudden shifts in demand to changes in the state of the national economy and shifts in federal research and development priorities;

(4) the full use of the nation's scientific, engineering and technical human resources is required to meet the strong demand for such skills over the long term; and

(5) there is a significant federal investment in the education and training of men and women in science and engineering and the effective use of this resource is required to ensure a full national return on that investment.

(b) The Congress declares that it is the continuing policy and responsibility of the Federal Government to take appropriate measures to achieve—

(1) the application of scientific and technical skills to the alleviation of civilian problems with significant scientific and technical components,

(2) a full return on Federal funds invested in the scientific and technical training and education of scientists and engineers, and

(3) opportunities for scientists and engineers to realize the full potential of their talents.

CONTINUING EDUCATION IN SCIENCE AND ENGINEERING PROGRAM AUTHORIZED

SEC. 3. (a) The National Science Foundation shall, as soon as possible after the enactment of this Act, initiate a program of continuing education in science and engineering in order to enable persons with scientific and engineering training who (1) have been engaged in their careers for at least three years at the time of selection under the program authorized by this act, or (11) have had their careers in science and technology interrupted for at least three years, to pursue courses of study designed to—

(1) provide such persons with new knowledge, techniques, and skills in their special fields; or

(2) enable such persons to render more valuable contributions to the nation through the acquisition of new knowledge, techniques, and skills in other fields.

(b) The program developed under this section shall include but not be limited to—

(1) the development of special curricula and education techniques in cooperation with industry and academic institutions for continuing education in science and engineering and

(2) the award of fellowships to enable persons with scientific and technical training to pursue courses of study which provide continuing education in science and engineering.

(c) From funds available under section 5 the Foundation is authorized to make grants to, and to enter into contracts with, institutions of higher education and other academic institutions, nonprofit institutes and organizations, and private business firms, for the purpose of developing courses and curricula specially designed for continuing education in science and engineering under this section.

(d) (1) From funds available under section 5 the Foundation is authorized to award continuing education fellowships to persons with scientific and engineering training to enable them to pursue appropriate courses of study.

(2) The Foundation shall allocate fellowships under this subsection in such manner, insofar as practicable, as will—

(A) attract highly qualified applicants;

(B) encourage the participation of women in careers in science and technology; and

(C) provide an equitable distribution of such fellowships throughout the United States.

(3) The Foundation shall pay to persons awarded fellowships under this section such stipends (including such allowances for subsistence, health insurance, relocation expenses, and other expenses for such persons and their dependents) as it may prescribe by regulation designed to accomplish the purposes of this Act.

(4) Fellowships shall be awarded under this section upon application made at such times and containing such information as the Foundation shall by regulation require.

AUTHORITY

SEC. 4. Except as otherwise provided in this Act, the Foundation shall, in carrying out its functions under this Act, have the same powers and authority the Foundation has under the National Science Foundation Act of 1950 to carry out its functions under that Act.

AUTHORIZATION OF APPROPRIATIONS

SEC. 5. There are authorized to be appropriated $2,500,000 for fiscal year 1978, $5,000,000 for fiscal year 1979 and such sums as may be necessary for each of the three succeeding fiscal years, to carry out the provisions of this Act.

By Mr. MATHIAS (for himself and Mr. BROOKE):

S. 35. A bill to amend section 1979 of the Revised Statutes to provide that States, municipalities, and agencies or units of government thereof, may be sued under the provisions of such section; to establish rules of liability with respect to such States, municipalities, and agencies or units of government thereof; and for other purposes; to the Committee on the Judiciary.

CIVIL RIGHTS IMPROVEMENTS ACT OF 1977

Mr. MATHIAS. Mr. President, I now send to the desk, for myself and Mr. BROOKE, S. 35 "The Civil Rights Improvements Act of 1977."

The primary purpose of S. 35 is to insure the continued vitality of "The Civil Rights Act of 1871," (42 U.S.C. 1983). which has been a principal tool in this Nation's efforts to fulfill its commitment to the protection of the civil rights and liberties of the American people.

In brief, S. 35 would:

First. Expand the definition of "person" under section 1983 to include States, municipalities, and all political units and governmental agencies and thus hold them liable for acts of their subordinates in violation of section 1983 under approriately limited circumstances.

Second. Provide that the right to enjoy one's reputation is protected by the due process clause of the 14th amendment;

Third. Provide a limited exception to the prosecutorial immunity provided under section 1983 by subjecting a prosecutor to liability only where he unconstitutionally withholds or supresses exculpatory evidence.

Fourth. Provide that the doctrines of abstention and exhaustion of State judicial remedies are inapplicable in section 1983 suits.

Fifth. Embody within section 1983, the limited circumstances when a Federal court can intervene in a pending State criminal proceeding;

Sixth. Prescribe the limited circumstances under which the doctrine of *res judicata* is applicable to section 1983 suits.

Before setting forth a more detailed analysis of S. 35's importance and its particular provisions, Mr. President, I believe it is essential to discuss briefly the historic development of section 1983.

During the 1950's and 1960's the Supreme Court opened up the Federal judicial system to those who had previously appealed for redress of grievances to the legislative and executive branches, often without results. To these individuals—the poor, racial minorities, the advocates of unpopular causes, and the victims of official misconduct—the Supreme Court became the focal point in their efforts to gain enforcement of their legal rights.

Perhaps the greatest impact of the Supreme Court's decision to open up the judicial system came in its historic rulings in civil rights litigation. Julian Bond, testifying last year before the Senate Judiciary Subcommittee on Constitutional Rights, poignantly expressed the hopes and aspirations generated by the Court's decisions:

During these times, beginning roughly with the 1954 school desegregation decision, the system of justice began to change. The Constitution was rediscovered, Congress began passing new laws to back up our efforts to gain equal rights, the Federal Courts began protecting our rights, the Justice Department began to answer our phone calls and slowly to put people to work on the side of what we thought was the right. The effect of all of this was enormous. We had not seen anything like it. What was just as important, the sheriffs, the mayors and the lunch counter owners of the South had not seen anything like it, either . . . It means that there was someone backing us up, to confirm the fact that we were right. There was a sympathetic referee . . . to whom we could turn for support . . . We began to get a dim feeling that we could really help bring about change, and this feeling extended not only to the civil rights movement but also to people who were pretty much alienated from government. The federal courts represented a constant reminder that someone was listening.

As it increased the accessibility of the Federal court system to civil rights litigants, the Court resuscitated long dormant reconstruction era civil rights acts, especially the "Klu Klux Klan Act of 1871" (42 U.S.C. 1983). Section 1983 was enacted in the wake of the Civil War. The acts engendered high hopes among the newly freed population that the Federal Government would intervene as guarantor against the violence that had plagued the early years of their freedom. These enactments also reflected the belief of the Congress that the Federal Government—not the individual States—was the primary protector of our basic constitutional freedoms.

However, weakened by a series of restrictive decisions, the civil rights statutes lay moribund until the Court breathed new life into them nearly a century after their enactment. In 1952, just prior to Earl Warren's appointment to the Supreme Court, Eugene Gressman lamented the impotency of the civil rights program of the post-Civil War Congress and declared that a revitalizing of these statutes, including section 1983 "would necessitate a judicial and constitutional upheaval of the first magnitude to undo what the Court had done."

This "judicial and constitutional upheaval" was soon on its way. The Court broke with a long line of decisions and formulated its own doctrine, consistent with congressional intent, of the appropriate balance between State and Federal courts in the litigation of Federal constitutional and statutory rights.

In *Monroe* v. *Pape*, 365 U.S. 167 (1961), the Court recognized the fundamental change in our Federal system effected by the civil rights program of the post-Civil War Congress, and declared that the authors of this legislative package intended to establish the Federal Government as the fundamental protector of our constitutional liberties.

As the Court made clear in Monroe and its progeny, this alteration of the Federal system was fully in accord with congressional intent:

This legislative history makes evident that Congress clearly conceived that it was altering the relationship between the States

and the Nation with respect to the protection of federally protected rights . . .

The very purpose of section 1983 was to interpose the Federal courts between the States and the people, as the guardians of the people's Federal rights—to protect the people from unconstitutional action under color of state law . . . *Mitchum* v. *Foster*, 407 U.S. 225 (1972). See also *Zwickler* v. *Koota*, 389 U.S. 241 (1967).

By the late 1960's, it appeared that the Supreme Court had implanted in American jurisprudence the precept that the Federal courthouse doors were to be generally left open to all individuals seeking constitutional relief—regardless of color, wealth, political beliefs, or personal tastes. During periods of racial strife and domestic discontent over a distant war, the Court offered Americans a forum to set forth constitutional grievances and seek relief. The Court heeded these cries, offering Americans an alternative to disruption in the streets. And the primary vehicle utilized by litigants in this era was the Civil Rights Act of 1871.

With the retirement of Earl Warren in 1969, the concepts of broad Federal jurisdiction in civil rights cases began to narrow. And in the years since the late Chief Justice's retirement, the Court has drastically altered its perception of the scope of section 1983.

Emphasizing such judicial doctrines as comity, standing, federalism, abstention, and the exhaustion of State judicial remedies, the Court has significantly curtailed the availability of the Federal courts as a forum, especially for those seeking to bring section 1983 suits; and in doing so, has begun a new formulation of the appropriate balance between State and Federal courts with regard to civil rights litigation. I have carefully reviewed this line of cases. While I am aware of the concerns of the Court's new majority—especially the growing problem of overburdened Federal courts—I am struck by the consistency and severity with which these decisions have hurt those most in need of judicial relief. Representative of these cases are:

Warth v. *Seldin*, 422 U.S. 490 (1975), where the Court denied standing to individuals and associations seeking to challenge exclusionary zoning practices of suburban jurisdiction;

Rizzo v. *Goode*, 423 U.S. 362 (1976), where the Court rejected the detailed findings and innovative remedy devised by a district court and thus refused to allow victims of outrageous and unconstitutional police conduct to obtain injunctive relief requiring police officals to take the necessary steps to insure that their officers do not repeat such conduct;

Paul v. *Davis*, 96 S. Ct. 1155 (1976), where the Court held that the victim of police action resulting in public defamation could not sue to enjoin such action and obtain compensation for his injury, and also held that mere injury to reputation is not protected under the due process clause of the 14th amendment;

Imbler v. *Pachtman*, 44 U.S.L.W. 4250 (1976), where the Court ruled that a prosecutor is absolutely immune from section 1938 suits, even where the prosecutor fails knowingly to disclose evidence favorable to the defendant;

Thus the main victims of this substantial cutback in section 1983 relief are the individuals who were the chief beneficiaries of the Court's earlier expansive interpretations of the Federal civil rights laws. Justice William Brennan has described the inequities flowing from the Court's decisions:

A series of decisions have shaped the doctrines of jurisdiction, justicability and remedy so as to increasingly bar the federal courthouse door in the absence of a showing probably impossible to make. It is true of course that there has been an increasing amount of litigation of all types filling the calendars of virtually every state and federal court. But a solution that shuts the courthouse door in the face of a litigant with a legitimate claim for relief, particularly a claim for the deprivation of a constitutional right, seems to be not only the wrong tool, but a dangerous tool for solving the problem. The victims of the use of that tool are most often the litigants most in need of judicial protection of their rights: the poor, the underprivileged, the deprived minorities. The very life blood of the courts is the popular confidence that they mete out evenhanded justice and discrimination that denies these groups access to the courts for resolution of their meritorious claims unnecessarily risks the loss of that confidence.

These concerns are strong and valid. Civil rights litigants are sometimes even shunning the Court—an astounding development—rather than run the risk that the Court will render a negative decision with nationwide effect.

Mr. President, most of the debilitating decisions of the Court which run counter to the intent of the reconstruction era Congress can be corrected by appropriate legislation.

When considering the recent trend in the Court's decisions, we must not forget that rights that cannot be enforced through the legal process are worthless. Such a situation breeds cynicism about the basic fairness of our judicial system.

We in Congress must do what we can to insure that our Federal courts remain open to those in greatest need of judicial protection. We must take great care that our legal rights—whether constitutionally or statutorily created—are not enervated. One way for Congress to effect such a guarantee is to exercise our constitutional duty by providing the means to enforce our civil rights statutes.

The Congress took a major step in this direction recently when it passed the "Civil Rights Attorneys Fees Awards Act of 1976" (P.L. 94-539). As I remarked during the floor debate on the attorneys fees bill, the enactment of that legislation was essential to make certain that the high cost of litigation does not bar the Federal courts to those seeking to enforce their rights under our civil rights laws.

Unfortunately, the "open access" issue is still with us. The enactment of the attorneys fees bill was an important response to a pressing issue. Additional legislation is needed.

Consequently, I now introduce S. 35, "The Civil Rights Improvements Act of 1977." This legislation amends section 1983 to achieve the following paramount goals:

To insure that the intent of the post Civil War Congress in enacting section 1983 is fulfilled;

To make certain that the hopes and aspirations prompted by the Court's earlier expansive interpretations of section 1983 are not quashed;

To insure that individuals whose rights are violated under section 1983 are not left without remedies, and,

To increase the deterrent effect of section 1983.

S. 35 is a rational and carefully drafted response to a worsening national problem. While this legislation deals directly with certain recent pronouncements by the Supreme Court, it does not attempt to respond to all of the Court's recent controversial decisions. Instead, the legislation seeks to address: First, the most serious impediments to open access created by recent Court rulings; and two, issues which the authors of section 1983 apparently chose not to address, but which are now vital to the enforcement of the rights protected under section 1983.

EXPANDING THE DEFINITION OF PERSON UNDER SECTION 1983

One of the major impediments facing litigants seeking effective relief under the "Civil Rights Act of 1871," has been the narrow interpretation of the term "persons," that is, those who are subject to injunctions or liable for damages. Relying on a reading of the legislative history of section 1983, the Supreme Court has held that municipalities are immune from liability under section 1983 for damage suits—Monroe against Pape, supra—and injunctive suits—city of *Kenosha* v. *Bruno*, 412 U.S. 507 (1973). The Court has found a similar immunity with respect to counties, *Moor* v. *County of Alameda*, 411 U.S. 693 (1973). In addition, the Supreme Court has not decided whether Government agencies, such as school boards, police departments, and municipally owned hospitals are persons for purposes of section 1983, and the lower courts have split on the issue. Furthermore, until recently, the 11th amendment was held to be a bar against the bringing of section 1983 suits against States and State officials. Yet, in *Fitzpatrick* v. *Bitzer*, 96 S. Ct. 2666 (1976) the Court paved the way for Congress to amend section 1983 to provide for suits against State and State officials. The Court held that the 11th amendment and the doctrine of State sovereignty were limited by the enforcement provision of section 5 of the 14th amendment, and thus justified congressional authorization of suits which would be constitutionally impermissible in other contexts.

The effect of these limited interpretations of person under section 1983 has often been to preclude recovery against "judgment proof" public employees and thus to leave many section 1983 litigants with a right but not a remedy. One of the best examples of this is found in *Burton* v. *Waller*, 502 F. 2d 1261 (5th Cir. 1974), "the Jackson State case." In Burton, the survivors of the students killed during the confrontation at Jackson State and several persons who were wounded brought a damage suit under section 1983. Despite a finding that the firing

into a crowd of students by State and local police was an excessive response, the plaintiffs were unable to recover against any of the defendants—the State of Mississippi, the city of Jackson, and the individual State and local police and their supervisors. Mississippi and the city of Jackson were held immune under the 11th amendment and the ruling in Monroe against Pape, supra, respectively. The verdict in favor of the individual policemen and their supervisors was upheld on the basis that their actions were privileged under State law. Finally, since the plaintiffs had failed to prove which of the individual police fired the fatal and wounding shots, the verdict in favor of policemen taken as a group was upheld. Consequently, the narrow interpretation of person under section 1983, resulted in the plaintiffs having a right but not a remedy under section 1983, despite the fatal and indefensible nature of the violation.

Burton is a good example of the importance of a "deeper pocket" for individuals seeking money damages under section 1983. The problem of the "judgment proof" defendant "places the burden of loss from the Government's error on the innocent victim and . . . removes the best source of compensation." Kates and Koota, "Liability of Public Entities Under Section 1983 of the Civil Rights Act," 45. S. Cal. L. Rev. 131 (1972). Furthermore, these restrictive interpretations of "person" have undercut the deterrent value of section 1983 by removing the need for public entities to insure against misconduct by their officers and employees.

S. 35 addresses the dual problem of judgment proof defendants and the limited deterrent value of section 1983. The bill does not merely extend the coverage of "persons" under section 1983 to States, municipalities, and governmental agencies for all purposes. It also carefully enumerates the circumstances under which these political units and Government agencies would be held liable for money damages and subject to injunctions for the acts of their agents in violation of section 1983. Section 2(c) provides that these governmental and political units will not be subject to section 1983 suits unless—

(1) the officer or employee of such State, municipality, agency or unit of government directly responsible for the conduct of the subordinate officer or employee who committed such violation—

(a) directed, authorized, approved, or encouraged, any action by such subordinate officer or employee which resulted in such violation, or

(b) failed to act in any manner to remedy a pervasive pattern of unconstitutional or unlawful conduct engaged in by such subordinate officer or employee which, in the absence of any remedial action was likely to recur or continue in the future; or

(2) the party seeking such damages or injunctions establishes that one or more officers or employees of such municipality, State, agency or unit of government engaged in grossly negligent conduct in violation of the provisions of this section, but cannot identify such officer or employee or prove causation with regard to any such officer or employee.

Subsection 1 (a) and (b) are taken from a long line of cases imposing section 1983 liability on a supervising officer who either supervised the offending action or failed by inaction to remedy pervasive unconstitutional behavior. See e.g. *Schnell* v. *City of Chicago*, 407 F. 2d 1084 (7th Cir. 1969).

The requirement that the misconduct constitute a pattern or practice—a series of many nearly identical acts of misconduct usually directed against particular groups—has served to assure that the level of violations were sufficiently pervasive to warrant attributing responsibility to the supervisors for low level employees. Comment, "The Supeme Court—1975 Term—90 Harv. L. Rev. 243 (1976).

These provisions make clear that the language in the majority opinion in Rizzo, supra, to the effect that liability must be predicated upon the supervisor's having directed the constitutional deprivation, is inconsistent with congressional intent. See also, Justice Blackmun's dissent in Rizzo, supporting supervisory liability for both action and inaction.

Subsection 2 would impose section 1983 liability in situations such as Burton, supra, where an individual suffered from a violation of the statute resulting from a grossly negligent act of a subordinate employee or officer and the plaintiff cannot individually identify such person(s) or prove causation with respect to such officer or employee.

DUE PROCESS AND THE RIGHT TO ENJOY ONE'S REPUTATION

Since the days of Blackstone, the right to enjoy one's reputation has been considered a fundamental personal liberty. Massachusetts sanctioned this principle in its Body of Liberties, as has the United Nations in its declaration of Human Rights. See generally, 90 Harv. L. Rev. 87, supra. Prior to the 1975 term the Supreme Court had recognized that reputation was protected by the due process clause of the 14th amendment. See for example, *Wisconsin* v. *Constantineau*, 400 U.S. 433 (1971). Despite this, as noted earlier, the Supreme Court in Paul against Davis, supra, held that the "mere injury to reputation was not an aspect of liberty of property protected by the due process clause of the 14th amendment."

The decision in Paul against Davis, is not surprising in light of several other recent pronouncements of the Court. The Court has shown a similar tendency in its decisions reducing privacy protections such as *United States* v. *Miller*, 425 U.S. 435 (1976), which held that an individual does not have a reasonable expectation of privacy in his bank records.

In recognition of the importance of reasserting the proposition that a person's interest in his good name is fundamental to the concept of ordered liberty, Section 2 (b) (3) provides that the right to enjoy one's reputations is protected by the 14th amendment. I am confident that my colleagues will restore this fundamental right to its historic status.

LIMITED PROSECUTORIAL LIABILITY UNDER SECTION 1983

Section 2(d) of S. 35 is in direct response to the absolute grant of immunity conferred upon prosecutors under section 1983 suits in Imbler against Pachtman, supra. I am aware of the concerns supporting the common law immunity granted prosecutors. And I agree with the majority opinion in Imbler that the adoption of section 1983 did not abrogate that immunity.

I do not believe, however, that absolute prosecutorial immunity under section 1983 honors congressional intent or promotes the ends of justice. By conferring absolute immunity, the Supreme Court has protected prosecutors even where they resort to indisputably unconstitutional conduct. I am in agreement with the reasoning of Justice White, concurring in Imbler:

It is apparent that the injury to the defendant which can be caused by an unconstitutional suppression of exculpatory evidence is substantial, particularly if the evidence is never recovered. It is virtually impossible to identify any injury to the judicial process resulting from a rule permitting suits for such unconstitutional conduct, and it is very easy to identify the injury to the process resulting from a rule which does not permit such suits.

Consequently, section 2(d) of S. 35 provides for section 1983 liability in those limited cases where a prosecutor fails to disclose to the defendant any material favorable to the defendant. I believe this is a workable rule. I know it is consistent with the spirit and intent of our judicial system.

ABSTENTION IN SECTION 1983 CASES

Section 2(e) (1) provides that the judicially created doctrine of abstention shall be inapplicable to damage suits or injunctive actions brought under section 1983. The abstention doctrine is based on the importance of avoiding Federal court proceedings when a decision on State law might make them unnecessary. Although section 1983 was designed to secure a Federal forum for the adjudication of Federal constitutional and statutory rights, the Supreme Court in 1959 held that abstention was appropriate in some section 1983 actions cases. *Harrison* v. *NAACP*. 360 U.S. 167 (1959). Later the Court again applied abstention to a section 1983 action. *Boehnig* v. *Indiana State Employees Ass'n*. 423 U.S. 6 (1976). As Justice Douglas indicated in his dissent in Boehnig, the abstention doctrine compels a section 1983 litigant to travel a more expensive and longer road than was intended by Congress when it enacted the statute.

Dissatisfaction with the broad application of the abstention in civil rights cases has prompted calls for legislative reform. Over 5 years ago, the American Law Institute made a proposal which would have precluded the application of abstention in certain civil rights cases. ALI: Study of The Division of Jurisdiction Between State and Federal Courts, 1371 (g). This proposal, which was somewhat different than that contained in S. 35, was not adopted by the Congress in 1972. I am convinced, however, that the damage to section 1983 in the interim justifies a rule that would preclude the application of abstention in all section 1983 suits.

EXHAUSTION OF STATE JUDICIAL REMEDIES IN SECTION 1983 CASES

Recognizing the intent of the drafters of section 1983 to provide a Federal forum Supreme Court in Monroe against Pape, supra, held that the doctrine of exhaustion of State judicial remedies was inapplicable in section 1983 cases. Despite the clarity of this ruling, the efforts of the present Court's majority to readjust the balance between State and Federal courts, bodes poorly for the exhaustion rule in Monroe against Pape. Therefore, to prevent a judicial reversal or a narrowing of the exhaustion ruling in Monroe, section 2(e)(2) codifies the Monroe holding.

COURT INTERVENTION IN ONGOING STATE COURT PROCEEDINGS

One of the most potent and controversial barriers erected by the Court against the availability of a Federal forum for the litigation of section 1983 suits has been the Court's expansion of the doctrine of *Younger* v. *Harris*, 401 U.S. 37 (1971) regarding Federal intervention in State court proceedings. In Younger, the Court set out the limited circumstances under which a Federal court could enjoin a pending State criminal proceeding—in effect, only where the State or local officials are prosecuting a defendant in bad faith. Although Younger dealt solely with a pending State criminal proceeding, the Court in subsequent cases greatly expanded its application. At the present time, Younger is applicable to certain civil matters, *Huffman* v. *Pursue, Ltd.*, 420 U.S. 593 (1975) and even to instances where a Federal court proceeding has actually commenced prior to the filing of a State action. *Hicks* v. *Miranda*, 422 U.S. 332 (1975). Finally, there is language in Rizzo against Goode, supra, to indicate not only that Younger may be extended to all civil proceedings, but also to attempts to obtain injunctions against State and local agency proceedings.

Section 2(e)(3)(A) seeks to implement statutory standards striking an appropriate balance between the traditional and legitimate interests of the States to conduct their criminal proceedings without Federal interference, and the well documented and longstanding concern that an individual be provided a Federal forum to litigate his section 1983 claim.

First, this section recognizes at least two exceptions to the prohibition against Federal intervention in ongoing State criminal proceedings: Bad faith harassment and a statute affecting first amendment freedoms which is unconstitutional on its face. Insofar as this provision allows for intervention based on a statute defective on its face, it would set aside the Court's interpretation of Younger in Huffman to the effect that "facial invalidity of a statute is not itself an exceptional circumstance justifying Federal interference with State criminal proceedings."

Second, this section provides that the prohibition on Federal injunctions against pending State proceedings is inapplicable to State civil proceedings, even where the civil proceeding is closely akin to criminal proceedings. Thus S. 35 rejects the expansion of the Younger to civil proceedings first clearly enunciated in Huffman.

Finally, this section overrules Hicks against Miranda, supra, insofar as that ruling requires that a Federal court abstain from hearing a section 1983 suit, even where the Federal suit was commenced prior to the filing of the State proceeding. This is a particularly troublesome rule—one that invites State prosecutors to file a State suit to preclude Federal jurisdiction.

RES JUDICATA IN SECTION 1983 SUITS

Despite several opportunities in recent years, the Supreme Court has not decided the applicability of res judicata principles to suits brought under section 1983. A reading of the legislative history of section 1983 indicates that its authors would not have endorsed a broad application of res judicata to such suits. Given the present Supreme Court majority's insistence on allowing both ongoing State criminal and civil actions to defeat Federal civil rights jurisdiction, it is clear that a strict rule prohibiting relitigation in Federal courts will render the promise of a Federal forum an empty one. See, Theis, "Res Judicata in Civil Rights Cases: An Introduction to the Problem," 70 N.W. L. Rev. 859 (1976). See also, Comment, "Collateral Estoppel Effect of State Criminal Actions in section 1983 Suits," 1975 Ill. L. Forum, 951.

S. 35 addresses this complex question by providing that Federal courts will generally not be barred from hearing section 1983 suits previously litigated in State courts; but, limits the type of relief that a Federal court can dispense in such situations. Specifically the Federal court will be able to:

Invalidate or set aside a criminal conviction in a State, local, or municipal court;

Modify or set aside an order by such courts with respect to damages;

Modify or set aside an order by such a court related to conduct determined not to be covered under S1983.

Mr. President, I urge my colleagues to give prompt and thorough consideration to S. 35, "The Civil Rights Improvement Act of 1977" and thus reaffirm Congress' commitment to the vigorous enforcement of our civil rights laws. At the same time, Congress cannot fail to heed the concern expressed by the Supreme Court regarding the need to ease the growing burden on the Federal court system. Congress must review this issue and provide legislation to help expedite justice in our Federal courts. Enactment of legislation providing for additional Federal appellate and district court judges should be a major priority of the 95th Congress. Unfortunately, the 94th Congress after long consideration of these proposals failed to enact them. The Federal district court in my own State of Maryland was not even given one additional judge under the formula applied by the past Congress, despite its presenting a solid case for such relief. Perhaps, Mr. President, the Congress should reevaluate the procedures used to allocate additional judgeships. Other proposals should be given similar detailed consideration, including the possibility of further expansion of the role played by Federal magistrates.

Mr. President, as an attorney and as a member of a coequal branch of government, I am naturally reluctant to support legislation which overrules certain decisions of the Supreme Court. Such action must be taken only after the most deliberate and careful consideration, and only in the most compelling cases. I am convinced, however, that the importance of insuring the vitality of our most important civil rights statute is such a case.

In conclusion, I reiterate my belief that while the apparent goal of the Court—to alleviate our overcrowded court dockets—is a legitimate one, the cutting back of section 1983 suits is not the way to go about it.

Mr. President, I ask unanimous consent that the text of S. 35, "The Civil Rights Improvement Act," be inserted at this point in the RECORD, along with various articles in the press commenting on the issues addressed by this bill.

There being no objection, the bill and material were ordered to be printed in the RECORD as follows:

S. 35

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress finds and declares that—

(1) the interest of any person in his good name is fundamental in the concept of ordered liberty; and

(2) Congress has the power under section 5 of the fourteenth amendment of the Constitution to enact all necessary and proper legislation to protect that interest.

SEC. 2. Section 1979 of the Revised Statutes (42 U.S.C. 1983) is amended—

(1) by inserting "(a)" immediately before "Every"; and

(2) by adding at the end thereof the following new subsections:

"(b) For the purpose of this section—

"(1) the term 'civil action' means any action at law, suit in equity, or other proper proceeding for redress;

"(2) the term 'person' means any individual, State, municipality, or any agency or unit of government of such State or municipality; and

"(3) the right to enjoy one's reputation is a right secured by the due process clause of section 1 of the fourteenth amendment of the Constitution.

"(c) Notwithstanding any other provision of this section, no State, municipality, or any agency or unit of government thereof shall be liable for damages or subject to an injunction under the provisions of this section for any violation of the provisions of this section by any officer or employee of such State, municipality, agency, or unit of government unless—

"(1) the officer or employee of such State, municipality, agency, or unit of government directly responsible for the conduct of the subordinate officer or employee who committed such violation—

"(A) directed, authorized, approved, or encouraged any action by such subordinate officer or employee which resulted in such violation, or

"(B) failed to act in any manner to rem-

edy a pervasive pattern of unconstitutional or unlawful conduct engaged in by such subordinate officer or employee which, in the absence of any remedial action, was likely to continue or recur in the future; or "(2) the party seeking such damages or injunction establishes that one or more officers or employees of such State, municipality, agency, or unit of government engaged in grossly negligent conduct in violation of the provisions of this section, but cannot identify such officer or employee or prove causation with regard to any such officer or employee.

"(d) A prosecuting officer of a State, municipality, or other unit of local government shall be liable for damages or subject to an injunction under the provisions of this section if such officer fails to disclose to the defendant in any criminal proceeding, upon the request of such defendant or his counsel, all material evidence which such officer knows or reasonably should know is exculpatory to the defendant.

"(e)(1) No court of the United States shall refuse temporarily to hear any civil action brought under the provisions of this section on the ground that such action raises, in addition to any question of Federal constitutional or statutory law, a question of State law which has not been previously decided by the highest court of such State or which, if decided by a State court, could render unnecessary a decision by such court of the United States on such question of Federal constitutional or statutory law.

"(2) No court of the United States shall dismiss any civil action brought under the provisions of this section on the ground that the party bringing such action failed to exhaust the remedies available in the courts of any State.

"(3)(A) No court of the United States shall proceed to hear any civil action brought under the provisions of this section if such court finds that there is a pending criminal proceeding by any State, municipality, or other unit of local government—

"(i) against the party bringing such action or against any person with whom such party's interests are closely intertwined.

"(ii) arising out of the same fact situation which is the subject of such action, and

"(iii) in which all claims presented and issues raised in such action may be presented, raised, and resolved,

except that if the party bringing such action or suit alleges, and such court finds, that extraordinary circumstances exist justifying such intervention including, that such criminal proceeding was brought in bad faith for the purpose of harassment, or that the criminal statute which is the basis of such criminal proceeding is unconstitutional on its face and that the enforcement of such statute is likely to deter the exercise of rights protected under the first amendment of the Constitution, such court may enjoin such criminal proceeding and proceed to hear such action or suit.

"(B) The prohibition contained in subparagraph (A) shall not apply where the pending proceeding is civil in nature, even if such proceeding is in aid of and closely related to the enforcement of a criminal statute.

"(C) No such court of the United States shall dismiss any such action on the ground that further proceedings in such action would be in violation of subparagraph (A), if such criminal proceeding was commenced after the date on which the complaint in such action was filed in such court of the United States. If such court is barred under this subparagraph from dismissing an action, such court may enjoin such criminal proceeding.

"(4) No court of the United States shall refuse to hear any civil action brought under the provisions of this section on the ground that such action only raises issues previously decided in a civil or criminal proceeding in the court of any State, municipality, or other unit of local government to which the party bringing such action was also a party except that such court of the United States shall not grant as relief in such action (A) the invalidation or setting aside of any criminal conviction by such State, municipal, or local court, (B) the modification or setting aside of any order by such State, municipal, or local court with respect to damages, or (C) the modification or setting aside of any order by such State, municipal, or local court with respect to an injunction related to conduct determined in such civil or criminal proceeding not to be protected under the provisions of this section.".

SEC. 4. Nothing contained in this statute shall be construed to prevent or impair the enforcement of any other provision of federal law and nothing herein shall be construed to impair the availability of the remedy of the suppression of illegally seized evidence in any criminal or civil proceeding.

SEC. 5. This Act may be called "The Civil Rights Improvements Act of 1977".

THE SUPREME COURT AND CIVIL RIGHTS

(By Carol H. Falk)

WASHINGTON.—It is commonly believed that the current Supreme Court, although conservative in many ways, has generally continued the trend of its liberal predecessor on civil rights.

No less an observer than President-elect Jimmy Carter repeated this impression in his final debate with President Ford, saying that the court headed by Chief Justice Warren Burger has "fairly well confirmed" the major civil rights decisions of the high court under the late Chief Justice Earl Warren.

It's true that the Burger court hasn't undone the major school desegregation decisions or other anti-discrimination orders of the Warren court. It has even broken some new ground, notably in cases involving sex discrimination and private school segregation.

But for some time the court has been handing down rulings that, some civil rights lawyers and lower court judges say, would have made it difficult, if not impossible, to win many of the crucial civil rights cases of the 1950s and 1960s.

These rulings, often technical or procedural, have generally been undramatic, and some of them have come in cases that haven't had anything to do with race or sex discrimination. Thus, they haven't been widely recognized as representing any reversal of the Warren court trend.

Civil rights lawyers, however, have been worried for some time about what one calls the "really disastrous" implications of these rulings. In the months ahead these implications may become more noticeable to the general public.

TWO RULINGS

The tendency to cut back on the civil-rights relief obtainable in federal court was apparent in two rulings last month. In one, the high court rejected a school desegregation order for Austin, Texas. In the other, it ruled that exclusion of pregnancy coverage from company disability income plans doesn't constitute sex discrimination.

The trend may be amplified in a number of other important civil rights cases the court is expected to decide before the current term ends next June. Pending issues include reverse discrimination in medical school admissions, retroactive seniority as a remedy for past hiring bias, sex-segregated schools, and height and weight minimums that eliminate most women from certain jobs.

What the Burger court seems to be doing is to force civil rights groups to seek remedies by way of the political process. Instead of relying heavily on the federal judicial system, as civil rights forces have for the past 20 years, they will have to appeal to the Carter administration, the Democratic Congress and state legislatures.

The resort to the political process is exactly what the Burger court wants to encourage, in the view of A. E. Dick Howard, a University of Virginia law professor who's writing a book on the Burger court. He says that the current Justices are, for the most part, willing to let Congress do what it wants, but are "more dubious of the power of the courts." He emphasizes that "this court doesn't see itself as an engine of reform," but rather prefers to leave social issues to legislative bodies and even school boards.

The hurdles being placed by the Burger court in the path of those who want to pursue civil rights in the courts are of three types.

First, the high court is making it much tougher for some of those with civil rights complaints to get their cases heard in federal court. This may partly result from Chief Justice Burger's frequently voiced concern about overcrowded federal court dockets.

For example, the court has limited the ability of federal courts to interfere with state criminal proceedings; such federal court action often is sought by civil rights lawyers who feel that their clients are suffering discriminatory treatment in state courts. The Supreme Court also has become more restrictive in deciding who is qualified to assert certain types of claims. It ruled, for instance, that inner-city residents of Rochester, N.Y., weren't in a position to challenge the zoning laws of a nearby town that they claimed excluded them and other low-income citizens. Further, the court has made it harder to bring suits on behalf of a class composed of all others in a similar situation—a technique frequently used in civil rights cases.

Second, those who get into court may find that under recent Supreme Court rulings they simply don't have a legitimate claim of discrimination. That's because the Burger court has generally given a narrow reading to the coverage of federal civil rights laws and the Constitution's guarantees of equal protection.

In a 1973 case in which a Kenosha, Wis., bar had been denied a renewal of its liquor license because of alleged nude dancing on the premises, the Justices held that a city couldn't be the target of a suit under a widely used reconstruction era civil rights law. That law, which guarantees a hearing in federal court whenever state or local officials interfere with federal constitutional or statutory rights, has been a cornerstone of much civil rights litigation over the years. If the Kenosha ruling—which now has been held to apply to city units, such as school boards—had been in force 20 years ago, "I don't know if we ever would have gotten school desegregation," says Chief Judge John R. Brown of the U.S. Court of Appeals in New Orleans.

In a case decided last March, the high court held that the Constitution's due-process guarantees, which generally bar the government from taking an individual's liberty or property without a fair hearing, don't necessarily protect a person's reputation from defamation by the government. The court said that a Louisville, Ky., man who was branded as a shoplifter in a police flier, although he hadn't been convicted of such an offense, should take his suit to a state court.

The pregnancy disability decision also reflects a narrow reading of what constitutes discrimination. Basically, the court majority said that pregnancy wasn't covered by the 1964 Civil Rights Act's prohibition against sex discrimination in employment. That interpretation disagreed with the view of six federal appeals courts, as well as with the Equal Employment Opportunity Commission, which administers the law.

MUST SHOW PURPOSE

Finally, the court is making the standards of proof more difficult for those who do get into court and establish a right to sue. Last spring, the Burger court held that to prove a constitutional violation, civil rights plaintiffs must show that a law or other official act has a "discriminatory purpose," as well as a discriminatory "impact." This ruling was in a case challenging examinations given police job applicants in Washington, D.C.

That decision "potentially overrules years of civil rights litigation," a civil rights attorney said following the ruling. Such fears were partially borne out in the Austin schools case, when the court served notice that it intended to apply the "discriminatory purpose" standard in a broad way. It sent the Austin case back to the lower court for "reconsideration in light of the police exam ruling.

Most of these problems for the civil rights cause are probably "curable if Congress sees fit to provide the cure," says Mr. Howard. But he adds that the legislative approach represents a "very arduous path" for the civil rights movement.

Legislation would have to be very specific in order to survive the high court's narrow interpretations. Thus, little room is left for legislative compromise or for the vague phrasings that can accomplish a lot without arousing too much opposition. Another drawback is that a great many separate pieces of legislation would have to be shepherded through the lawmaking process.

Congress recently passed a law permitting courts to award attorneys fees in civil rights cases. Pressure for that law followed a Supreme Court ruling, in a 1975 environmental case, that courts couldn't justify such awards on the ground that public interest lawyers were acting as "private attorneys general."

Similarly, women's groups are seeking passage of a measure that would specifically add to the 1964 Civil Rights Act certain sex-discrimination guidelines concerning pregnancy.

While some efforts such as this may succeed, the legislative strategy is bound to put an added strain on the never-abundant resources of the civil rights movement. And the strategy may also require different talents from those required in a courtroom. One discouraged civil rights lawyer, asserting that "a lot of institutional discrimination continues," predicts that "if they can't have their rights vindicated in federal courts, a lot of blacks are going to lose them."

[From the New York Times, Dec. 3, 1976]

CLOSING THE COURTS

(By Tom Wicker)

Amid all the speculation about President-elect Carter's forthcoming appointments, nothing is being said about his prospective nominees to the Supreme Court, since there aren't any openings. In the long run, however, the number and character of Mr. Carter's choices for the high court might form one of his most important Presidential actions.

It could well be argued that President Eisenhower did nothing of greater consequence than choosing Earl Warren to be Chief Justice, even if that was a choice General Eisenhower came to regret. Richard Nixon named four Justices, including a Chief Justice, in less than two terms; nothing he did in domestic affairs is likely to have more long-term impact. (In fact, only two of the nine Justices were appointed by Democratic Presidents: Byron White by John Kennedy and Thurgood Marshall by Lyndon Johnson.)

The Burger Court that has succeeded the Warren Court, largely as a result of Mr. Nixon's appointees, has been making it more difficult, for example, for persons who believe their Federal constitutional and legal rights have been infringed to gain redress in the Federal courts.

That, at least, is the view of the board of governors of the Society of American Law Teachers, which recently issued a lengthy analysis of the Burger Court's trend toward restricting access to the Federal courts. And a recent statement by the Council for Public Interest Law—which has such Establishment members as William D. Ruckelshaus, Whitney North Seymour Jr., and Chesterfield Smith—charged that as a consequence of this trend "many citizens, including minorities, the poor, and the victims of official abuses, have been left without the judicial remedies."

The Supreme Court has accomplished this, the council said, by turning "from the substance of justice to the niceties of pleading"—that is, by dismissing or ruling on important cases "on technical grounds under new, shifting and progressively more stringent procedural rulings."

The Law Teachers' study concluded, for example, that the Court had "effectively killed" the possibility of class action suits in cases where many people have been wronged, but none enough to justify any one person in a great expenditure to pursue the case. It did so in an antitrust suit brought against two brokerage firms by an odd-lot purchaser on behalf of a class of over two million persons. A lower court had devised an advertising procedure to notify them of the suit and levied most of the $21,000 cost against the defendants; but the Supreme Court ruled, instead, that the plaintiff would have to notify all two million directly at a cost of about $225,000.

That rule constitutes an almost insuperable barrier to such class actions. In another case, the Court made it extremely difficult for low-income persons to band together against the conditions of general disadvantage. Such a group of persons living in Rochester but working in the suburb of Penfield brought suit against that community's single-family zoning ordinance. The Supreme Court ruled the group had no "standing" to sue because it could not show that the ordinance actually had prevented construction of a low-cost housing project.

In effect, the Court told the plaintiffs that, in order to sue, they'd have to find a developer willing to invest the large amount necessary to plan a housing project, who would then apply for permission to build it, so that he could be turned down. The ruling effectively prevented the merits of such cases from being heard unless specific instance of "injury in fact" could be demonstrated.

Again, when a Californian was arrested under a state law for distributing leaflets advocating change in industrial ownership through political action, the Supreme Court refused to enjoin enforcement of the California act. It ruled, instead, that whatever the act's effect on the defendant's First Amendment rights, he would have to undergo state trial first, and rely on the slim possibility of Supreme Court review later. Several such rulings have severely restricted the ability to sue in Federal court against state invasions of constitutional rights.

The Court has ruled that Federal courts may not award attorneys' fees to the prevailing parties in public-interest litigation, which will effectively limit such litigation; and it has refused to review some possible abuses on grounds that everyone would be harmed equally by them.

By a variety of such procedural rulings, and often by narrow majorities, the Burger Court—as the Law Teachers' report put it—has been "forging a set of restrictive doctrines which will substantially reduce the availability of the Federal courts for public-interest litigation." Mr. Carter, who called so eloquently for "simple justice" in his acceptance speech at the Democratic convention, should bear that in mind when his turn comes to name someone to the Court.

By Mr. JACKSON:

S. 36. A bill to authorize appropriations to the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, as amended, section 305 of the Energy Reorganization Act of 1974, and section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974, and for other purposes; and

S. 37. A bill to amend the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5906), and for other purposes; to the Committee on Interior and Insular Affairs.

ERDA AUTHORIZATIONS, FISCAL YEAR 1977

Mr. JACKSON. Mr. President, I introduce for appropriate reference two bills which will provide the Energy Research and Development Administration with authority to spend appropriations for fiscal year 1977, to request and to issue certain loan guarantees, and for other purposes.

Under normal circumstances, ERDA's operations are governed by annual authorizing legislation pursuant to which appropriations are enacted. However, last year, enactment of ERDA's appropriations for fiscal year 1977 preceded final consideration of the authorizing legislation which was delayed in the House of Representatives for several months. During the last day of the 94th Congress, the Senate failed to accept the conference report to the authorization act for ERDA, H.R. 13350. Inaction on the conference report left ERDA without authority to utilize funds made available by congressionally enacted appropriation bills.

It became apparent in the closing days of the 94th Congress that the new fiscal year might start without enactment of the requisite authorizing legislation. To avoid such a situation, Congress added a provision to the joint resolution for continuing appropriations, House Joint Resolution 1105, Public Law 94-473, which provided that until March 31, 1977, fiscal year 1977 appropriations to ERDA would be made available without meeting the requirement for authorizing legislation.

By the end of March, Congress must either enact authorizing legislation or enact legislation nullifying the requirement for authorizations; otherwise, a significant portion of ERDA's operation will have to cease by virtue of the limitation requiring authorizations which have been placed upon the availability of fiscal year 1977 appropriations.

The language of the two measures which I introduce today, taken together, is identical to that language relating to nonnuclear matters which was approved by the Senate and House conference to H.R. 13350, and also by the full House of Representatives when that body accepted the conference report. However, I am introducing two bills instead of one, in the hope of avoiding any delay on those matters which absolutely require authorization prior to March 31, 1977.

Funding for specific nonnuclear pro-

grams is contained in one proposal, along with those matters which were not controversial when originally considered in the Senate during the last Congress.

The second measure provides ERDA with authority to utilize loan guarantees as a financial mechanism to stimulate the development of various energy technologies. In addition, this second measure would authorize a loan guarantee program for the conversion of municipal solid waste and other forms of biomass into useful fuels or energy.

The Senate of the 94th Congress supported a loan guarantee program on two different occasions and the bill which I introduced contains the language that previously received favorable consideration by the Senate. In approving the conference report to H.R. 13350 last year, the House of Representatives voiced approval for the language of this bill authorizing loan guarantees. The House on prior occasions had considered and defeated measures which would have authorized loan guarantee programs that contemplated a much larger Federal commitment than the program contemplated by this bill. Because there has been a controversy surrounding loan guarantees, and in light of the necessity to enact authorizations for ERDA programs by the end of March, the loan guarantee language has been placed in a separate bill. If the Senate so chooses, it can examine the loan guarantee provisions at greater length without jeopardizing the funding authority required by ERDA to continue its programs beyond March 31.

I also want to emphasize that neither of these measures contains authorization for exclusively nuclear programs within ERDA. The status of the Joint Committee on Atomic Energy is uncertain at this time. Historically, the JCAE has had legislative jurisdiction over the nuclear energy research and development program of ERDA. Should another committee gain legislative jurisdiction over the nuclear programs, the possibility exists that those portions of ERDA's program dealing with nuclear R. & D. could encounter delays while new committees become familiar with that portion of the ERDA budget.

This bill provides authorizations for the following programs: for fossil energy, $541,421,000; for solar energy, $319,700,000; for geothermal energy, $68,050,000; for energy conservation, $241,500,000; for environmental research and safety; $148,182,000; for basic energy sciences, $99,200,000; and, for program support, $216,360,000. In addition, this proposal calls for the establishment of an Energy Extension Service to be managed by ERDA. Under the National Energy Extension Service, a comprehensive program of energy outreach to individual consumers and small businesses would be developed and implemented. This program would provide an opportunity for each State to participate in the Energy Extension Service and to coordinate this program with other energy programs operated at the State level. The Service would be a direct conduit to consumers to provide information with respect to energy conservation opportunities and the use of renewable energy resources such as solar energy and, in addition, the Service could be a vehicle for onsite demonstration of new technologies developed by ERDA and in the private sector.

Mr. President, our energy conservation effort thus far has lacked the direct people-to-people component. The Extension Service will provide a vital new dimension for our national effort in energy conservation.

A second innovative program contained in the ERDA authorization bill directs the ERDA Administrator to provide, subject to firm and fair standards of excellence, grants to individual inventors and small businesses for the development of "appropriate technology." A majority of the programs ERDA has managed to date are aimed at large expensive development projects—nuclear reactors, synthetic fuels, fusion reactor equipment and hardware which cost many millions of dollars.

Yet, particularly in the area of energy conservation, many of our needs are for simple devices which are inexpensive, easy to maintain and operate, and tailored to local needs and opportunities. The small grants program for "appropriate technology" is targeted on precisely these sorts of needs and opportunities. Under this program, grants of not more than $50,000 over a period of 2 years would be available to develop the ideas of innovative individuals who are not reached by programs managed through national labs or other traditional channels of ERDA funding.

The second measure concerns loan guarantees. Section 101 of this bill would provide limited authorization for ERDA to utilize loan guarantees as one form of Federal assistance for the demonstration of new energy technologies.

In essence, this provision would invite ERDA to recommend to the Congress specific project proposals for Federal assistance by loan guarantees. The Congress would then consider authorizing such guarantees to be implemented on a case-by-case basis. This section also contains language which assures that all of the safeguards and criteria included in the Federal Non-nuclear R. & D. Act would be applicable to proposals for loan guarantees.

Section 102 of this bill would authorize ERDA to implement a program of assistance by loan guarantees solely for the demonstration of technologies to produce synthetic fuels of other forms of energy from biomass. The provision would limit the outstanding commitments under this authority to no more than $300 million at any time, and requires that any single proposal in excess of $50 million be subject to congressional review and veto.

I want to reemphasize the necessity for considering this legislation at the earliest date possible. If ERDA is to continue its programs under congressional direction, then it is essential that authorizing legislation be enacted. For the information of the Senate, I ask unanimous consent that the legislation I introduce be printed in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 36

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress finds that the traditional energy sources of this country are being depleted and we must convert to other forms of energy. In addition, it may be necessary to undertake aggressive conservation programs to cut back on energy consumption and eliminate waste and reduce energy use. In spite of these efforts, Congress finds that energy consumption in this country will approximately double in coming decades. Therefore, it is essential that the policy of the Congress be established that every form of energy be put into use at the earliest possible moment, consistent with existing environmental laws, that new elements of energy production be placed on line as quickly as possible.

AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1977

SEC. 2. In accordance with section 305 of the Energy Reorganization Act of 1974 (42 U.S.C. 5875), and section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5915), there is hereby authorized to be appropriated to the Energy Research and Development Administration for fiscal year 1977, subject to the provisions of this Act, the following:

(A) For nonnuclear energy research, development, and demonstration of fossil, solar, geothermal, and other forms of energy for energy conservation, and for scientific and technical education, $175,671,000.

(B) For environmental research and safety, basic energy sciences, program support, and related programs, not directly associated with nuclear programs, $463,742,000.

TITLE I—NONNUCLEAR PROGRAMS

OPERATING EXPENSES

SEC. 101. For "Operating expenses", for the following programs, a sum of dollars equal to the total of the following amounts:

Fossil Energy Development

(1) Coal:
(A) Coal liquefaction:
Costs, $81,130,000.
Changes in selected resources, —$4,300,000.
(B) High Btu gasification (coal):
Costs, $59,254,000.
Changes in selected resources, —$14,200,000.
(C) Low Btu gasification (coal):
Costs, $50,000,000.
Changes in selected reserves —$3,000,000.
(D) Advanced power systems:
Costs $12,800,000.
Changes in selected resources, $9,700,000.
(E) Direct combustion (coal):
Costs $55,116,000.
Changes in selected resources, $2,284,000.
(F) Advanced research and supporting technology:
Costs, $38,500,000.
Changes in selected resources $1,100,000.
Provided, that the following amounts thereof shall be for Systems Studies:
Costs, $9,350,000.
Changes in selected resources, $1,000,000.
(G) Demonstration plants (coal):
Costs, $50,600,000.
Changes in selected resources, $2,400,000.
(H) Magnetohydrodynamics:
Costs, $27,841,000.
Changes in selected resources, $10,145,000.
(2) Petroleum and natural gas:
(A) Natural gas and oil extraction:
Costs, $35,269,000.
Changes in selected resources, $7,900,000.
(B) Supporting research:
Costs, $1,831,000.
Changes in selected resources, $0.
(3) In-situ Technology:
(A) Oil shale:
Costs, $12,085,000.
Changes in selected resources, $9,000,000.

(B) Coal gasification:
Costs, $13,536,000.
Changes in selected resources, $1,500,000.
(C) Supporting research:
Costs, $1,310,000.
Changes in selected resources, $0.

Solar Energy Development

(4) Solar Heating and Cooling:
Costs, $88,000,000.
Changes in selected resources, $26,500,000.
(5) Other Solar Energy Programs:
Costs, $136,100,000.
Changes in selected resources $35,600,000; including costs of $3,000,000 and changes in selected resources of $1,000,000 for initiation of activities of the Solar Energy Research Institute and costs of $112,200,000 and changes in selected resources of $27,500,000 for solar electric applications.

Geothermal Energy Development

(6) Geothermal Energy:
(A) Hydrothermal Technology Applications:
Costs, $14,200,000.
Changes in selected resources, $1,800,000.
(B) Other Geothermal Energy Development:
Costs, $46,100,000.
Changes in selected resources, $3,600,000.

Conservation Research and Development

(7) Conservation Research and Development:
(A) Electric Energy Systems:
Costs, $22,000,000.
Changes in selected resources, $4,000,000.
(B) Energy Storage:
Costs, $32,000,000.
Changes in selected resources, $6,000,000.
(C) Building Conservation:
Costs, $27,600,000.
Changes in selected resources, $4,400,000.
(D) Industry Conservation:
Costs, $18,000,000.
Changes in selected resources, $4,000,000.
(E) Transportation Energy Conservation including $3,000,000 for methanol and other alternate fuels:
Costs, $31,400,000.
Changes in selected resources, $4,600,000.
(F) Improved Conversion Efficiency:
Costs, $15,300,000.
Changes in selected resources, $11,700,000.
(G) Energy Conservation Institutes and Extension Service:
Costs, $18,000,000.
Changes in selected resources, $7,000,000.
(H) Small Grant Program for Appropriate Technologies:
Costs, $7,500,000.
Changes in selected resources, $2,500,000.
(I) To carry out the municipal solid waste demonstration price guarantee program authorized by section 107 of this Act:
Costs, $200,000.
Changes in selected resources, $4,800,000.
Scientific and Technical Education.
(8) Scientific and Technical Education:
Costs, $3,750,000.
Changes in selected resources, $1,250,000.

PLANT AND CAPITAL EQUIPMENT

SEC. 102. (a) For "Plant and capital equipment", including construction acquisition, or modification of facilities, including land acquisition; and acquisition and fabrication of capital equipment not related to construction, a sum of dollars equal to the total of the following amounts.

(1) Fossil Energy Development Coal.

(A) Project 77–1–a, modifications and additions to Energy Research Centers, $6,900,000.

(B) Project 77–1–b for a high Btu pipeline gas demonstration plant (which is estimated to cost a total of $500,000,000, including the non-Federal share of such cost) is authorized. The amount authorized for such plant is $10,000,000.

(C) Project 77–1–c for fuel gas low Btu demonstration plant (which is estimated to cost a total of $380,000,000, including the non-Federal share of such cost) is authorized. The amount authorized for such plant is $5,000,000.

(D) Project 77–1–d, MHD component development and integration facility, $6,700,000.

(2) Conservation Research and Development.

(A) Project 77–17–a Combustion Research Center, $8,500,000.

(3) Capital Equipment, not related to construction.

(A) Fossil energy development, $1,020,000.

(B) Conservation research and development, $12,000,000.

(C) Solar energy development, $8,500,000, including $1,500,000 for initiation of activities at the Solar Energy Research Institute in the areas of modification of facilities, acquisition and fabrication of capital equipment, and design of the final installation.

(D) Geothermal energy development, $2,350,000.

(b) There is authorized an additional sum of $50,000,000 for the clean boiler fuel demonstration plan (project 76–1–a) authorized by section 101(b)(1) of the Act of December 31, 1975 (89 Stat. 1065).

(c) There is authorized an additional sum of $15,000,000 for the five megawatt solar thermal test facility (76–2–a) authorized by section 101(b)(2) of the Act of December 31, 1975 (89 Stat. 1065).

(d) Solar Energy Development:
Project 77–18–j, $10,000,000 for the following Solar Energy Development Projects:
(i) OTEC sea test facility, $1,000,000.
(ii) two 200 kW wind energy facilities, $1,000,000.
(iii) two 1.5 MW high velocity wind facilities, $1,500,000.
(iv) total solar energy plant, $1,500,000.
(v) 5 MM solar thermal demonstration for small community, $2,000,000.
(vi) biomass conversion facility, $3,000,000.

PROVISIONS RELATING ONLY TO FOSSIL ENERGY DEVELOPMENT PROGRAMS

SEC. 103. Funds appropriated pursuant to this Act for "Operating expenses" for fossil energy purposes may be used for (1) any facilities which may be required at locations, other than installations of the Administration, for the performance of research and development contracts, and (2) grants to any organization for purchase or construction of research facilities. No such funds shall be used for the acquisition of land. Fee title to all such facilities shall be vested in the United States, unless the Administrator determines in writing that the programs of research and development authorized by this Act shall best be implemented by vesting fee title in an entity other than the United States: *Provided*, That, before approving the vesting of title in such entity the Administrator shall (A) transmit such determination, together with all pertinent data, to the Committee on Science and Technology of the House of Representatives and the Committee on Interior and Insular Affairs of the Senate, and (B) wait a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain), unless prior to the expiration of such period each such committee has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action. Each grant shall be made under such conditions as the Administrator deems necessary to insure that the United States will receive therefrom benefits adequate to justify the making of the grant. No such funds shall be used under clause (1) of the first sentence of this section for the construction of any major facility the estimated cost of which, including collateral equipment, exceeds, $250,000 unless the Administrator shall (1) transmit a report on such major facility showing the nature, purpose, location, and estimated cost of such facility to the Committee on Science and Technology of the House of Representatives and the Committee on Interior and Insular Affairs of the Senate, and (ii) wait a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain), unless prior to the expiration of such period each such committee has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

SEC. 104. Not to exceed 3 per centum of all funds appropriated pursuant to this Act for "Operating expenses" for fossil energy purposes may be used by the Administrator to construct, expand, or modify laboratories and other facilities, including the acquisition of land, at any location under the control of the Administrator, if the Administrator determines that (1) such action would be necessary because of changes in the national programs authorized to be funded by this Act or because of new scientific or engineering developments, and (2) deferral of such action until the enactment of the next authorization Act would be inconsistent with the policies established by Congress for the Administration. No portion of such sums may be obligated for expenditure or expended for such activities, unless (A) a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) has passed after the Administrator has transmitted to the Committee on Science and Technology of the House of Representatives and the Committee on Interior and Insular Affairs of the Senate a written report containing a full and complete statement concerning (i) the nature of construction, expansion, or modification, (ii) the cost thereof, including the cost of any real estate action pertaining thereto, and (iii) the reason why such construction, expansion, or modification is necessary and in the national interest, or (B) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action: *Provided*, That this sentence shall not apply to projects to construct, expand, or modify such laboratories or facilities, the estimated total cost of which does not exceed $25,0000.

SEC. 105. Notwithstanding any other applicable provision of law, the initial authorization in this Act or any other Act heretofore or hereafter enacted to construct, pursuant to section 8 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5907), any fossil energy demonstration plant shall expire at the end of the three full fiscal years following the date of enactment of such authorization, unless (1) funds to construct each such plant are appropriated or otherwise provided pursuant to applicable law prior thereto, or (2) such authorization period is extended by specific Act of Congress hereafter enacted.

SEC. 106. All moneys received by the Administrator from any fossil energy activity shall be paid into the Treasury to the credit of miscellaneous receipts, except that on December 1 of each year the Administrator shall provide to the Committee on Science and Technology of the House of Representatives and the Committee on Interior and Insular Affairs of the Senate a report of all such receipts for the preceding fiscal year, including, but not limited to, the amount and source of such revenues and the program and subprogram activity generating such revenues.

GENERAL PROVISIONS RELATING TO NONNUCLEAR PROGRAMS OTHER THAN FOSSIL ENERGY DEVELOPMENT

SEC. 107. The Administrator is authorized, subject to the appropriation of funds pur-

suant to section 101(10) of this Act, to establish and implement, under section 7(a)(4) of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5906(a)(4)) and in accordance with section 7(c) of such Act (42 U.S.C. 5906(c)), a price-support program to demonstrate municipal solid waste reprocessing for the production of fuels and energy intensive products. Prior to entering into any contract for such demonstration, the Administrator shall submit to the Committee on Science and Technology of the House of Representatives and the Committee on Interior and Insular Affairs of the Senate a full and complete report on the proposed commercial demonstration facility and the necessary project demonstration guarantees. Such contract shall not be finalized under the authority granted by this section prior to the expiration of ninety calendar days (not including any day on which either House of Congress is not in session because of an adjournment of more than three calendar days to a day certain) from the date on which such report is received by such committees.

GENERAL PROVISIONS RELATING TO ALL NONNUCLEAR PROGRAMS

SEC. 108. Except as otherwise provided in this Act.—

(a) no amount appropriated pursuant to this Act may be used for any nonnuclear program in excess of the amount actually authorized for that particular program by this Act,

(b) no amount appropriated pursuant to this Act may be used for any nonnuclear program which has not been presented to, or requested of, the Congress,

unless (1) a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) has passed after the receipt by the Committee on Science and Technology of the House of Representatives and the Committee on Interior and Insular Affairs of the Senate of notice given by the Administrator containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon the support of such proposed action, or (2) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action: *Provided*, That the following categories may not, as a result of reprogramming, be decreased by more than 10 per centum of the sums appropriated pursuant to this Act for such categories: Coal, petroleum and natural gas, in situ technology, solar, geothermal and conservation.

SEC. 109. The Administrator shall submit to the Committee on Science and Technology of the House of Representatives and the Committee on Interior and Insular Affairs of the Senate a detailed explanation of the allocation of all of the funds appropriated pursuant to this Act for nonnuclear energy programs and subprograms, reflecting the relationships, consistencies, and dissimilarities between those allocations and (a) the comprehensive program definition transmitted pursuant to section 102 of the Geothermal Energy Research, Development, and Demonstration Act, (b) the comprehensive program definition transmitted pursuant to section 15 of the Solar Energy Research, Development, and Demonstration Act of 1974 (42 U.S.C. 5564), (c) the comprehensive plan for nonnuclear energy research, development, and demonstration transmitted pursuant to section 6 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5905).

SEC. 110. Section 13 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5912) is amended by—

(1) striking, in the first sentence of subsection (a), the words "At the reqeust of the Adminisrator, the" and inserting therein "The";

(2) striking, in the first sentence of subsection (b), the words "prepare or have prepared an assessment of the availability of adequate water resources." and inserting therein the following: "request the Water Resources Council to prepare an assessment of water requirements and availability for such project."; and

(3) adding at the end thereof a new subsection to read as follows:

"(f) The Administrator shall, upon enactment of this subsection, be a member of the Council.".

SEC. 111. (a) The Administrator shall classify each recipient of any award, contract, or other financial arrangement in any nonnuclear research, development, or demonstration category as—

(1) a Federal agency,

(2) a non-Federal governmental entity,

(3) a profitmaking enterprise (indicating whether or not it is a small business concern),

(4) a nonprofit enterprise other than an educational institution, or

(5) a nonprofit educational institution.

(b) The information required by subsection (a), along with the dollar amount of each award, contract, or other financial arrangement made, shall be included as an appendix to the annual report required by section 15(a) of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5914): *Provided*, That small purchases or contracts of less than $10,000, which are expected from the requirements of advertising by section 252(c)(3) of title 41, United States Code, shall be exempt from the reporting requirements of this section.

SEC. 112. (a) There shall be established within the Administration a program for appropriate technology under the direction of the Assistant Administrator for Conservation Research and Development. The Administrator shall develop and implement a program of small grants for the purpose of encouraging development and demonstration projects described in subsection (c) of this section.

(b) The aggregate amount of financial support made available to any participant in such program, including affiliates, under this section shall not exceed $50,000 during any two-year period.

(c) Funds made available under this section shall be used to provide for a coordinated and expanded effort for the development and demonstration of, and the dissemination of information with respect to, energy-related systems and supporting technologies appropriate to—

(1) the needs of local communities and the enhancement of community self-reliance through the use of available resources;

(2) the use of renewable resources and the conservation of nonrenewable resources;

(3) the use of existing technologies applied to novel situations and uses;

(4) applications which are energy-conserving, environmentally sound, small scale, durable and low cost; and

(5) application which demonstrate simplicity of installation, operation and maintenance.

(d)(1) Grants, agreements or contracts under this section may be made to individuals, local nonprofit organizations and institutions, State and local agencies, Indian tribes and small businesses. The Administration shall develop simplified procedures with respect to application for support under this section.

(2) Each grant, agreement or contract under this section shall be governed by the provisions of section 9 of the Federal Nonnuclear Energy Research and Development Act of 1974 and shall contain effective provisions under which the Administration shall receive a full written report of activities supported in whole or in part by funds made available by the Administration; and

(3) In determining the allocation of funds among applicants for support under this section the Administrator may take into consideration:

(A) the potential for energy savings or energy production;

(B) the type of fuel saved or produced;

(C) the potential impact on local or regional energy or environmental problems; and

(D) Such other criteria as the Administrator finds necessary to achieve the purposes of this Act or the purposes of the Federal Nonnuclear Energy Research and Development Act of 1974.

Guidelines implementing this section shall be promulgated with full opportunity for public comment.

(e) The Administrator shall—

(1) prepare and submit no later than March 10, 1977, a detailed report on plans for implementation, including the timing of implementation, of the provisions of this section to the Committee on Interior and Insular Affairs of the Senate and the Committee on Science and Technology of the House of Representatives and shall keep such committees fully and currently informed concerning the development of such plans; and

(2) include as a part of the annual report required by section 15(a)(1) of the Federal Nonnuclear Energy Research and Development Act of 1974 beginning in 1977, a full and complete report on the program under this section.

SEC. 113. The Administrator, in consultation with the Administrator of the Environmental Protection Agency, shall submit a report to the Congress, six months after enactment of this Act, on the environmental monitoring, assessment, and control efforts, relating to environment, safety, and health, which are required to successfully demonstrate any project, which is subject to sections 8 (e) and (j) of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5907 (e) and (f)), and is authorized by this Act or any prior Act. The report shall contain the extent to which monitoring and control is required, the estimated costs thereof.

TITLE II—FOR NONNUCLEAR ENVIRONMENTAL RESEARCH AND SAFETY, BASIC ENERGY SCIENCES, PROGRAM SUPPORT, AND RELATED PROGRAMS

OPERATING EXPENSES

SEC. 201. For "Operating expenses", for the following programs, a sum of dollars equal to the total of the following amounts:

(1) Biomedical and environmental research, $119,500,000, of which $1,000,000 shall be made available to the Water Resources Council to carry out the provisions of section 13 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5912).

(2) Operational safety, $4,500,000.

(3) Environmental control technology, $13,100,000.

(4) Basic energy sciences for the following:

(A) Material sciences, $45,600,000.

(B) Molecular, mathematical, and geosciences, $46,700,000.

(5) Program support, $205,635,000: Provided, That $1,250,000 is authorized to be appropriated pursuant to this subparagraph (5) to reimburse the National Bureau of Standards for costs incurred in carring out the provisions of section 14 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5913).

(6) To carry out the provisions of section 11 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42

U.S.C. 5910), $500,000 for the Council on Environmental Quality.

PLANT AND CAPITAL EQUIPMENT

SEC. 202. For "Plant and capital equipment", including construction, acquisition, or modification of facilities, including land acquisition; and acquisition and fabrication of capital equipment not related to construction, a sum of dollars equal to the total of the following amounts:

(1) Biomedical and Environmental Research:

Project 77-6-a, modifications and additions to biomedical and environmental research facilities, various locations, $4,200,000.

(2) Program Support:

Project 77-16-a, laboratory support complex, Los Alamos Scientific Laboratory, New Mexico, $6,000,000.

(3) Capital Equipment, not related to construction:

(A) Biomedical and environmental research, $6,600,000.

(B) Environmental control technology, $282,000.

(C) Basic energy sciences for the following:

(i) Material sciences, $3,900,000.

(ii) Molecular, mathematical, and geosciences, $3,000,000.

(D) Program Support, $4,725,000.

LIMITATIONS

SEC. 203. The Administration is authorized to start any project set forth in title III, subection 302 (1) and (2) only if the currently estimated cost of that project does not exceed by more than 25 per centum the estimated cost set forth for that project.

TITLE III—GENERAL PROVISIONS

SEC. 301. Subject to the applicable requirements and limitations of this Act, when so specified in appropriations Acts amounts appropriated for the Administration pursuant to this Act for "Operating expenses" or for "Plant and capital equipment" may be merged with any other amounts appropriated for like purposes pursuant to any other Act authorizing appropriations for the Administration.

SEC. 302. When so specified in appropriation Acts, amounts appropriated pursuant to this Act for "Operating expenses" or for "Plant and capital equipment" may remain available until expended.

SEC. 303. (a) Any Government-owned contractor operated laboratory energy, research center, or other laboratory performing functions under contract to the Administration may, with the approval of the Administrator, use a reasonable amount of its operating budget for the funding of employee-suggested research projects up to the pilot stage of development. It shall be a condition of any such approval that the director of the laboratory or center involved form an internal review mechanism for determining which employee-suggested projects merit funding in a given fiscal year; and any such project may be funded in one or more succeeding years if the review process indicates that it merits such funding.

(b) Each director of a laboratory or center specified in subsection (a) of this section shall submit an annual report to the Administrator on projects being funded under this section; and on completion of each such project shall submit a report to the Technical Information Center of the Administration for inclusion in its data base.

SEC. 304. The Administrator is authorized to perform construction design services for any Administration construction project whenever the Administrator determines that the project is of such urgency that construction of the project should be initiated promptly upon enactment of legislation appropriating funds for its construction in order to meet the needs of national defense or protection of life and property or health and safety.

SEC. 305. Any moneys received by the Administration may be retained and used, as provided in annual appropriations Acts enacted after the date of enactment of this Act, for operating expenses (except sums received from disposal of property under the Atomic Energy Community Act of 1955 and the Strategic and Critical Materials Stockpiling Act, as amended, and fees received for tests or investigations under the Act of May 16, 1910, as amended (42 U.S.C. 2301; 50 U.S.C. 98h; 30 U.S.C. 7)), notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484), and may remain available until expended. Funds may be obligated for purposes stated in this section only to the extent provided in appropriations Acts.

SEC. 306. Transfers of sums from the "Operating expenses" appropriation may be made to other agencies of the Government for the performance of the work for which the appropriation is made, and in such cases the sums so transferred, may be merged with the appropriation to which transferred.

SEC. 307. Notwithstanding any other provision of this Act, provisions of sections 304, 305, and 306 of this Act shall not be applicable to any fossil energy activity, program, or subprogram.

SEC. 308. (a) Each officer or employee of the Energy Research and Development Administration who—

(1) performs any function or duty under this Act or any other Act amended by this Act; and

(2) has any known financial interest—

(A) in any person engaged in the business, other than at the retail level, of developing, producing, refining, transporting by pipeline, or converting into synthetic fuel, minerals, wastes, or renewable resources, or in the generation of energy from such minerals, wastes, or renewable resources, or in conducting research, development, and demonstration with financial assistance under this Act or any other Act amended by this Act, or

(B) in property from which minerals are commercially produced,

shall, beginning on February 1, 1977, annually file with the Administrator a written statement concerning all such interests held by such officer or employee during the preceding calendar year. Such statements shall be available to the public.

(b) The Administrator shall—

(1) act within ninety days after the date of enactment of this section—

(A) act to define the term "known financial interest" for purposes of paragraph (2) of subsection (a) of this section; and

(B) to establish the methods by which the requirement to file written statements specified in subsection (a) of this section will be monitored and enforced, including appropriate provisions for the filing by such officers and employees of such statements and the review by the Administrator of such statements; and

(2) report to the Congress on June 1 of each calendar year with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

(c) In the rules prescribed in subsection (b) of this section, the Administrator may identify specific positions within the Administration which are of a nonpolicymaking nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

(d) Any officer or employee who is subject to, and knowingly violates, this section or any regulation issued thereunder, shall be fined not more than $2,500 or imprisoned not more than one year, or both.

SEC. 309. The Administrator shall not use any funds appropriated pursuant to this Act under any contract in effect on or after October 1, 1977, for research, services, or material conducted or supplied by the Lawrence Livermore Laboratory for the Energy Research and Development Administration unless that contract specifically provides that the employees of the Lawrence Livermore Laboratory will be guaranteed the establishment of an impartial grievance procedure and further guarantees employees shall have the right of self-organization, to form, join, or assist labor organizations, to bargain collectively through representatives of their own choosing, and to engage in other concerted activities for the purpose of collective bargaining or other mutual aid or protection, and shall also have the right to refrain from any or all of such activities: *Provided, however,* That no employee rights or activities shall be guaranteed in such contract which would be in violation of California State law.

TITLE IV.—ORGANIZATIONAL CONFLICTS

SEC. 401. The Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 4901) is amended by adding a new section to read as follows:

"SEC. 19. (a) The Administrator shall by regulation require any person proposing to enter into a contract, agreement, or other arrangement, whether by advertising or negotiation, for the conduct of research, development, evaluation activities, or for technical and management support services to provide the Administrator, prior to entering into any such contract, agreement, or arrangement, with all relevant information bearing on whether that person has a possible conflict of interest with respect to (1) being able to render impartial, technically sound, or objective assistance or advice in light of other activities or relationships with other persons or (2) being given an unfair competitive advantage. Such person shall insure, in accordance with regulations published by the Administrator, compliance with this section by any subcontractor of such person, except supply subcontractors: *Provided,* That this requirement shall not apply to subcontracts of $10,000 or less.

"(b) The Administrator shall not enter into any such contract, agreement, or arrangement unless he affirmatively finds, after evaluating all such information and any other relevant information otherwise available to him, either that (1) there is little or no likelihood that a conflict of interest would exist, or (2) that such conflict has been avoided after appropriate conditions have been included in such contract, agreement, or arrangement: Provided, That if he determines that such conflict of interest exists and that such conflict of interest cannot be avoided by including appropriate conditions therein, the Administrator may enter into such contract, agreement, or arrangement, if he determines that it is in the best interests of the United States to do so and includes appropriate conditions in such contract, agreement, or arrangement to mitigate such conflict.

"(c) The Administrator shall publish rules for the implementation of this section, in accordance with 5 U.S.C. 553, as soon as possible after the date of enactment of this section but in no event later than 180 days after such date."

TITLE V.—ENERGY EXTENSION SERVICE

SHORT TITLE

SEC. 501. This title may be cited as the "National Energy Extension Service Act".

FINDINGS AND PURPOSE

SEC. 502. (a) The Congress hereby declares—

(1) that the general welfare and the common defense and security require a greater public knowledge of energy conservation opportunities;

(2) that scientific identification and practical demonstration of specifically designed energy conservation opportunities, the dissemination of information relating thereto, and the prompt delivery and acceptance of specific energy conservation opportunities require a national effort;

(3) that the national effort required to develop, demonstrate, and encourage acceptance and adoption of energy conservation opportunities should be coordinated at the Federal level by the Energy Research and Development Administration;

(4) that a special effort must be made to develop and demonstrate practical alternative energy technologies such as solar heating and cooling;

(5) that successful implementation of energy conservation and new energy technologies will require both public awareness and individual capability to use the conservation opportunities and new technology;

(6) that this required awareness and capability can only be achieved on a national basis by an active outreach effort;

(7) that existing energy outreach programs are underfunded;

(8) that any Federal outreach program should be organized with the States as full participants, and each State should plan and coordinate the outreach activities within the State, optimizing the use of existing outreach capabilities;

(9) that Federal assistance should be provided for energy outreach activity, including coordinated energy outreach activities and technical support in each State for such efforts;

(10) that the Energy Research and Development Administration should provide overall national direction and review of federally assisted State energy outreach programs.

(b) The Congress declares that the purposes of this title are—

(1) to establish a positive energy outreach program directed toward small business and individual energy consumers and the organizations that influence energy consumption;

(2) to stimulate, provide for and supplement programs for the conduct of evaluation, planning and other technical support of energy conservation efforts, including energy outreach activities of States.

ESTABLISHMENT OF EXTENSION SERVICE

SEC. 503. (a) There is established in the Energy Research and Development Administration an office to be designated as the Energy Extension Service (hereinafter in this Act referred to as the "Service"). The Service shall be headed by a Director who shall be appointed by and directly responsible to the Administrator of the Energy Research and Development Administration (hereinafter referred to as the "Administrator"). The Director shall be a person who by reason of training, experience, and attainments is exceptionally qualified to implement the programs of the Service. There shall be in the Service a Deputy Director who shall be appointed by the Administrator, who shall have such functions, powers, and duties as may be prescribed from time to time by the Director, and who shall act for, and exercise the powers of, the Director during the absence or disability of, or in the event of a vacancy in the office of, the Director.

(b) The Director shall receive basic pay at the rate provided for level IV of the Executive Schedule in section 5315 of title 5, United States Code, and the Deputy Director shall receive basic pay at the rate provided for level V of such Schedule in section 5316 of such title.

(c) The Director shall have overall responsibility for the national direction of the comprehensive program developed under section 1004 and of all other activities conducted under this title and shall annually review the programs of the various States under sections 905 and 906 to insure that they are effectively promoting the realization of the objectives of this title.

DESCRIPTION OF EXTENSION SERVICE

SEC. 504. (a) The Service shall develop and implement a comprehensive program for the identification, development, and practical demonstration of energy conserving opportunities, techniques, materials and equipment, including opportunities, techniques, or methods responsive to local needs or resources, and alternative energy technologies such as solar heating and cooling, for—

(1) agricultural, commercial, and small business operations, and

(2) new and existing residential, commercial, and agricultural buildings or structures.

Such program shall provide for technical assistance, instruction, information dissemination, and practical demonstrations in energy conservation opportunities, and shall provide an active interface with end use energy consumers at the local level for the purpose of offering active outreach assistance and affording a communication channel for end user technology requirements Such outreach assistance shall be provided by means of such appropriate local offices, including metropolitan city offices, county agents, and technical staff assistants, and may be required to provide energy extension services.

(b) The program authorized under subsection (a) of this section shall permit each State to establish a technical support institute at one or more colleges or universities designated by the Governor of that State. Each such institute shall—

(1) arrange with other colleges and universities within the State to participate in the work of the institute;

(2) assist in the coordination, support, augmentation, and implementation of programs contributing to the understanding of local, State, and regional energy conservation problems and opportunities;

(3) provide a nucleus of administrative, professional, scientific, technical, or other personnel capable of planning, coordinating, and directing interdisciplinary programs related to energy conservation methods, technologies, and opportunities in support of the energy conservation and energy outreach efforts of such State.

(c) The comprehensive program developed under subsection (a) shall be implemented and carried out within each State pursuant to sections 905 and 906.

(d) The Director shall take such steps as may be necessary to insure that the comprehensive program is implemented in a manner which minimizes conflict with existing services in the private sector of the economy that are similar to those provided under such program.

INITIAL IMPLEMENTATION OF EXTENSION SERVICE

SEC. 505. (a) The Director shall within 45 days after the effective date of this title invite the Governor of each State through competitive procurement to submit a plan for the conduct of energy extension service activities as described in section 904 of this title throughout such State including provisions for appropriate technical support within such State of such activities, to disseminate information and provide advice and assistance to individuals, groups, and units of State and local government by means of—

(1) specific studies and recommendations applicable to individual residences, businesses, and agricultural or commercial establishments;

(2) demonstration projects;

(3) distribution of studies and instructional materials;

(4) seminars and other training sessions for State and local government officials and the public; and

(5) other public outreach programs.

(b) Each State shall be accorded not more than ninety days to submit a plan to the Director under subsection (a) of this section. The Director shall promptly review such proposals and shall, with the approval of the Administrator, and subject to the limitations of section 12(c) (1) and (2), provide funds adequate for the support of the proposed energy outreach plan of a State if the Director finds that, such plan—

(1) meets the objectives of this title;

(2) was prepared with opportunity for input from State, county, and local officials, State universities and community colleges, cooperative extension services, community service action agencies, and other public or private organizations involved in active energy outreach programs;

(3) consistent with the objectives and requirements of this title, makes optimum use of existing outreach or delivery mechanisms or programs, and includes to the optimum extent any existing State, local, university, or other organizations' programs for energy information, education, or technology transfer which have objectives similar to those of this title and activities similar or related to those specified in section 904 and subsection (a) of this section;

(4) provides that the State will maintain, or require other participating entities within the State to maintain, and make available upon request to the Director, such records with respect to the use and expenditure of any Federal funds paid to the State, or to entities within the State, under this title as the Director may require;

(5) provides for the establishment of effective procedures for responding to external inputs and inquiries;

(6) requires that, to the extent possible, within personnel and funding limitations on-site energy evaluations will be made available to all consumers and small business concerns, and to other business concerns within such limitations (as to size or otherwise) as the Director may specify;

(7) provides that the State will furnish and widely disseminate information on the types of assistance available under this title, and under other Federal and State laws, with respect to the planning, financing, installation, and effective monitoring of energy-related facilities and activities;

(8) provides that the allocation within the State of the funds made available to it under this title will be based on, or give due consideration to, such factors (specifically including potential energy savings and number of persons affected) as the Director determines will best carry out the purpose of this title; and

(9) requires the establishment and implementation of policies and procedures designed to assure that assistance provided under this title does not replace or supplant the expenditure of other Federal or State or local funds for the same purposes, but rather supplements such funds and increases the expenditure of such State or local funds to the maximum extent possible: *Provided,* That there shall be no requirement for matching State or local funds in the guidelines, unless such requirement is included in an annual authorization;

(10) requires effective coordination of the programs under such State plans with other Federal programs which provide funds for university extension programs, in order to avoid duplication;

(11) requires the establishment and implementation of effective procedures specifically designed for the dissemination of information to small business concerns;

(12) limits to a maximum of 20 per centum the portion of the funds made available under this title which may be used for the purchase of equipment, facilities, and library and related materials;

(13) prohibits the use of any such funds for the purchase of land or interests therein or the repair of buildings or structures; and

(14) satisfies such other criteria as the Director may establish to carry out the purpose of this title.

IMPLEMENTATION OF NATIONAL EXTENSION SERVICE

SEC. 506. (a) Notwithstanding the provisions of section 1004, the Director, on behalf of the Administrator, is authorized and directed to provide in each State of the United States not then participating in the program for the conduct at the earliest practicable date, but no later than one year after the effective date of enactment of this title, of energy extension service activities, including provisions for appropriate technical support in such State, to disseminate information and provide advice and assistance to individuals, groups, and units of State and local government by means of—

(1) specific studies and recommendations applicable to individual residences, businesses, and agricultural or commercial establishments;

(2) demonstration projects;

(3) distribution of studies and instructional materials;

(4) seminars and other training sessions for State and local government officials and the public; and

(5) other public outreach programs.

(b) Pursuant to authority described in subsection (a) of this section, the director, with the approval of the Administrator, shall issue guidelines for the preparation and submission of State plans under subsection (c). Such guidelines shall be designed to assure that the plans so submitted will be consistent with this title and will effectively contribute to the achievement of its objectives, and shall allow maximum flexibility and the exercise of maximum discretion by the States. In the preparation of such guidelines, the Administrator shall provide a reasonable opportunity for inputs by representatives of the several States and for a reasonable period for public review and comment. In any event, such guidelines—

(1) shall require the establishment and implementation of policies and procedures designed to assure that assistance provided under this title does not replace or supplant the expenditure of other Federal or State or local funds for the same purposes, but rather supplements such funds and increases the expenditure of such State or local funds to the maximum extent possible;

(2) shall require effective coordination of the programs under such State plans with other Federal programs which provide funds for university extension programs, in order to avoid duplication;

(3) shall require the establishment and implementation of effective procedures specifically designed for the dissemination of information to small business concerns;

(4) shall limit to a maximum of 20 per centum the portion of the funds made available under this title which may be used for the purchase of equipment, facilitiies, and library and related materials; and

(5) shall prohibit the use of any such funds for the purchase of land or interests therein or the repair of buildings or structures.

(c) On the effective date of the guidelines described in subsection (b) of this section, the Director shall invite the Governor of each State not then participating in the program to submit a plan for the conduct of energy extension service activities throughout such State.

(d) Each State plan submitted under subsection (c) shall be approved by the Director if the Director finds that such plan—

(1) meets the objectives of this title;

(2) was prepared with opportunity to input from State, county, and local officials, universities and community colleges, cooperative extension services, community service action agencies, and other public or private organizations involved in active energy outreach programs;

(3) consistent with the objectives and requirements of this title, makes optimum use of existing active outreach or delivery mechanisms or programs, and includes to the optimum extent any existing State, local, university, or other organizations' programs for energy information, education, or technology transfer which have objectives similar to those of this title and activities similar or related to those specified in section 904 and subsection (a) of this section;

(4) provides that the State will maintain, or require other participating entities within the State to maintain, and make available upon request to the Director, such records with respect to the use and expenditure of any Federal funds paid to the State, or to entities within the State, under this title as the Director may require;

(5) provides for the establishment of effective procedures for responding to external inputs and inquiries;

(6) requires that, to the extent possible, within personnel and funding limitations, on-site energy evaluations will be made available to all consumers and small business concerns, and to other business concerns within such limitations (as to size or otherwise) as the Director may specify;

(7) provides that the State will furnish and widely disseminate information on the types of assistance available under this title, and under other Federal and State laws, with respect to the planning, financing, installation, and effective monitoring of energy-related facilities and activities;

(8) provides that the allocation within the State of the funds made available to it under this title will be based on, or give due consideration to, such factors (specifically including potential energy savings and number of persons affected) as the Director determines will best carry out the purpose of this title; and

(9) satisfies such other criteria as the Director may establish to carry out the purpose of this title.

(e) If the Director finds that a State plan submitted under subsection (a) does not satisfy the requirements of subsection (d), he shall provide a reasonable opportunity for the State to present arguments in support of such plan and to revise the plan within a reasonable period of time to satisfy such requirements.

(f)(1) If a State does not submit a plan under subsection (a) or its plan as so submitted (with any revisions made under subsection (e)) is not acceptable, the Director (after giving notice and an opportunity for comment to the Governor of such State) shall develop consistent with other subsections of this section an energy extension service plan for the State involved, which conforms to the requirements of subsection (d). In conducting energy extension service activities under any plan developed under this subsection, the Director is authorized to enter into agreements for the utilization of existing Agriculture Extension Service offices and personnel, or such other offices and personnel as may be appropriate, and to provide funds for such operations; and in carrying out the functions of such offices the Director shall make maximum use of any existing delivery mechanisms for the State or local region concerned which are appropriate for purposes of this section, while coordinating his activities in connection with the performance of such functions with all such mechanisms in the State or region which are related to, but not directly involved in, the program under this title.

(2) Each State shall have a period of one hundred and eighty days after the issuance of the indication referred to in subsection (b) (or a longer period if the Director finds, at the request of the Governor of such State, that an extension is justified) within which to submit its plan under subsection (a) and if necessary to revise such plan under subsection (e) before the Director may undertake the development of a plan for such State under paragraph (1) of this subsection.

(3) Any such plan developed by the Director shall be transmitted to the Governor of such State and shall not be implemented for ninety days after the date of transmittal: *Provided,* That notwithstanding the provisions of paragraphs (1) and (2) of this subsection, no such plan shall be implemented if the Governor within the ninety-day period notifies the Administration in writing of his objection to the implementation of said plan.

(g) The Director shall annually review the implementation of State plans approved under subsection (d) to insure continued conformance with the requirements of this title. If the Director determines that the implementation of any approved State plan does not satisfy any of such requirements, he shall notify the Governor of the State and any other designated officials of the deficiency, with specific details, and shall provide a reasonable time and opportunity for remedial action. If, after such reasonable time and opportunity, satisfactory remedial action has not been taken to place the implementation in conformance with such requirements, the Director shall so inform the Administrator, who shall give the Governor notice of intention to terminate Federal assistance, after the opportunity for the Governor's comment, if the implementation continues to not satisfy all such requirements. Federal assistance shall be terminated thereafter if satisfactory action is not taken. In the event Federal assistance is terminated under this subsection, the Director shall proceed in accordance with the procedures in subsection (f) to develop an energy extension service for the State. In so doing, the Director shall provide for continuation of all activities under the State plan which were in conformance with the requirements of this title and shall effect only such changes in the activities under such plan as are necessary to satisfy such requirements. The Director shall give the Governor notice of any such changes and shall provide a reasonable opportunity for the Governor to comment prior to proceeding with the changes.

(h) In any case where a State has submitted a State energy conservation plan under part C of title III of the Energy Policy and Conservation Act, as amended, the State's plan submitted under subsection (a) of this section shall specifically indicate how its proposed extension service program will complement or supplement any programs of public education under section 362(d)(4) of such Act which are included under such energy conservation plan. In any event, each State plan submitted under subsection (a) of this section shall indicate how its proposed extension service program will complement or supplement any other energy conservation programs being carried out within the State with assistance from Federal funds or under other Federal laws.

(i) The Director shall provide financial assistance to each State having a plan approved under subsection (d), from funds allocated to such State under section 912(c), and shall provide information and technical assistance to such State, for the development, implementation, or modification of the State's plan submitted under subsection (a) of this section.

(j) Nothing in this title, or in the comprehensive program developed under section 904 or any State plan approved under this section, shall have the effect of modifying or altering the relationships existing between educational institutions and the States in which they are located in connection with activities provided for under this title.

ADMINISTRATIVE PROVISIONS

SEC. 507. (a) Director shall promulgate such regulations and directives as may be necessary to carry out the functions and projects of the Service.

(b) The Director shall consult and cooperate with the Secretary of Housing and Urban Development, the Administrator of the Federal Energy Administration, the Secretary of Agriculture, the Administrator of the Environmental Protection Agency, the Secretary of Health, Education, and Welfare, the Community Services Administration (and its Institute for Appropriate Technology), the Secretary of Commerce (and the Regional Centers of the Economic Development Administration in the Department of Commerce), the Administrator of the Small Business Administration, and the heads of other Federal agencies administering energy-related programs, with a view toward achieving maximum coordination with such other programs, and for the purpose of insuring to the maximum extent possible that all energy conservation and new energy technology information disseminated by or through Federal programs in a given area are consistent and are fully coordinated in order to minimize duplication of effort and to maximize public confidence in the credibility of Federal or federally assisted programs. It shall be the responsibility of the Director to promote the coordination of programs under this title with other public or private programs or projects of a similar nature.

(c) Federal agencies described in subsection (b) shall cooperate with the Director in disseminating information with respect to the availability of assistance under this title, and in promoting the identification and interests of individuals, groups, or business and commercial establishments eligible for assistance through programs funded under this title.

(d) At such time as the Energy Resources Council is terminated, pursuant to section 108 of the Energy Reorganization Act of 1974 (42 U.S.C. 5818), there shall be established an Interagency Advisory Group, consisting of the Director (as Chairman) and the heads of the Federal agencies described in subsection (b) or their delegates, to assist the Director in carrying out his responsibilities under this section and to provide a mechanism for use by the Director and the heads of such agencies in the performance of their functions under subsections (b) and (c).

COMPREHENSIVE PLAN AND PROGRAM

SEC. 508. (a) The Administrator is authorized and directed to prepare a comprehensive program and plan for Federal energy education, extension, and information activities authorized by this title and any other law. In the preparation of the program and plan, the Administrator shall utilize and consult with the head of each agency referred to in this title and any other Federal agency with an energy education, extension, or information program. Preparation of such program and plan shall not delay in any way the procedures specified in sections 905 and 906 or the implementation otherwise of this title. Rather, the program and plan should reflect the activities mandated by this title and serve as a mechanism for Federal Government-wide coordination and management of those activities with the activities of other Federal agencies under other law.

(b) The comprehensive program and plan shall include, but not be limited to, the following elements:

(1) specific delineation of responsibility of each participating Federal agency in the conduct of this title;

(2) mechanisms established to coordinate the activities under this title, pursuant to section 907 (b), (c), and (d),

(3) a detailed summary of all related Federal programs under other law, including program descriptions, types of delivery mechanisms, budget, and objectives;

(4) procedures for defining and measuring the effectiveness, in terms of increased energy efficiency, fuel savings, adoption of new energy technologies, and other appropriate criteria, of the activities under this title and related activities under other law;

(5) an assessment of other existing Federal assistance and incentives, other than public education, extension, and outreach programs, and their relation to such programs in achieving the objectives of this title;

(6) procedures pursuant to section 904(d) to minimize conflict with existing services in the private sector of the economy which are similar to those under this title and other law; and

(7) a comprehensive and integrated plan for the resulting Federal program, taking into account paragraphs (1) through (6).

(c) The Administrator shall transmit the comprehensive program and plan to the President and to each House of Congress within one hundred and eighty days after the date of enactment of this Act. Thereafter, the Administrator shall revise the program and plan on an annual basis and submit the revision as part of the annual fiscal year budget submission and the report required by section 15 of the Federal Nonnuclear Energy Research and Development Act of 1974.

ADVISORY BOARD

SEC. 509. (a) There is hereby established a National Energy Extension Service Advisory Board (hereinafter in this section referred to as the "Board"), which shall consist of not less than fifteen nor more than twenty members appointed by the Administrator from among persons representative of State, county, and local governments, State universities, community colleges, community service action agencies, consumers, small business, and agriculture. The Administrator shall designate one of the members of the Board to serve as its chairman, and shall provide the Board with such services and facilities as may be necessary for the performance of its functions. The Administrator shall reimburse members of the Board for the full amount of any expenses (including travel expenses) necessarily incurred by them in the performance of their duties as such.

(b) The Board shall carry on a continuing review of the operation of the comprehensive program developed under section 904 and the various State plans approved under sections 905 and 906, for the purpose of evaluating their effectiveness in achieving the objectives of this title and determining how their operation might be improved in furtherance of such objectives.

(c) The Board shall report at least annually to the Administrator, the Director, and the Congress on the status of the program under this title, including any recommendations it may have for administrative or legislative changes to improve its operation.

CONFORMING AMENDMENTS

SEC. 510. (a) Section 103 of the Energy Reorganization Act of 1974 (42 U.S.C. 5801) is amended by redesignating paragraphs (7) through (11) as paragraphs (8) through (12), respectively, and inserting immediately after paragraph (6), the following new paragraph:

"(7) establishing, in accordance with the National Energy Extension Service Act, an Energy Extension Service to provide technical assistance, instruction, and practical demonstrations on energy conservation measures and alternative energy systems to individuals, businesses, and State and local government officials;".

(b) Section 108(b) of such Act (42 U.S.C. 5818(b)) is amended by striking out "and" at the end of paragraph (2), by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; and", and by adding after paragraph (3) the following new paragraph:

"(4) insure that Federal agencies fully discharge their responsibilities under sections 907 and 908 of the National Energy Extension Service Act for coordination and planning of their related activities under such Act and any other law, including but not limited to the Energy Policy and Conservation Act.".

(c) Section 108 of such Act is further amended by adding at the end thereof the following new subsection:

"(e) There is hereby established an Energy Conservation Subcommittee within the Council, which shall be chaired by the Administrator of the Energy Research and Development Administration, to discharge the responsibilities specified in subsection (b)(4) of this section and other related functions associated with the coordination and management of Federal efforts in the areas of energy conservation and energy conservation research, development and demonstration."

RECORDS

SEC. 511. Each State or other entity within a State receiving Federal funds under this title shall make and retain such records as the Administrator shall require, including records which fully disclose the amount and disposition of such funds; the total cost of the facilities and activities for which such funds were given or used; the source and amount of any funds not supplied by the Administrator; and any data and information which the Administrator determines are necessary to protect the interests of the United States and to facilitate an effective financial audit and performance evaluation. Such recordkeeping shall be in accordance with Federal Management Circular 74-7 (34 C.F.R. part 256) and any modification thereto. The Administrator, or any of his duly authorized representatives, shall have access until the expiration of three years after the completion of the facilities or activities involved, to any books, documents, papers, and records or receipts which the Administrator deems to be related or pertinent, directly or indirectly, to any such Federal funds.

APPROPRIATION AUTHORIZATION

SEC. 512. (a) There are authorized to be appropriated to the Director to carry out this title such sums as may be included in the annual authorization, for the fiscal year 1977 (as provided in section 101(7)(G) of title I of this Act), for the nonnuclear programs of the Energy Research and Development Administration.

(b) To the extent provided in the Act making the appropriation involved, any portion of the amount appropriated pursuant to subsection (a) for any fiscal year may be transferred by the Director, with the approval of the Administrator, to the head of any other Federal agency for payment to or expenditure within one or more States under sections 905 and 906 upon a determination by the Director that the existence of regular payment channels or administrative relationships between that agency and the State involved (or entities within such State) makes such transfer and such payment or expenditure administratively more efficient or effective or otherwise promotes the achievement of the objectives of this title; but no transfer of funds under this subsection shall result in any loss by the Director of any authority over program direction or control which is vested in him by this title.

(c)(1) The total amount appropriated pursuant to subsection (a) for any fiscal year (other than the portion thereof needed for administrative expenses, which shall not exceed 5 per centum of such total amount) shall be allocated among the States in accordance with the following formula:

(i) one-half shall be divided equally among all the States; and

(ii) one-half shall be divided among the States in proportion to their respective populations, with each State being entitled to a sum that bears the same ratio to one-half of such total amount as such State's population (determined on the basis of the most recent decennial census) bears to the total population of all the States (as so determined).

Amounts allocated to any State for any fiscal year in accordance with paragraphs (1) and (2) shall be expended only within that State.

(2) During the fiscal year in which this title becomes effective, the Director shall provide funds in accordance with paragraph (1) of this subsection for the implementation of the energy extension service activities in the maximum number of States determined by the Director to be feasible with the total amount appropriated pursuant to subsection (a): *Provided*, That in no case shall such number be less than ten States.

DEFINITIONS

SEC. 513. As used in this title, the term—

(1) "energy conservation" means "energy conservation, efficient energy use and the utilization of renewable energy resources"; and

(2) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, or any territory or possession of the United States.

S. 37

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as "Amendments to the Federal Nonnuclear Energy Research and Development Act of 1974".

SEC. 101. Section 7(a) of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5906) is amended—

(1) by striking out "and" after the semicolon at the end of paragraph (5),

(2) by striking out the period at the end of paragraph (6) and inserting in lieu thereof "; and", and

(3) by adding at the end thereof the following new paragraph:

"(7) Federal loan guarantees: *Provided*, That all of the other provisions of this Act apply to such guarantees in the same manner and to the same extent as they apply to demonstrations under this Act."

SEC. 201. The Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5901, et seq.) is further amended by adding at the end thereof the following new section:

"LOAN GUARANTEES FOR COMMERCIAL BIOMASS DEMONSTRATION FACILITIES

"SEC. 20. (a) It is the purpose of this section—

"(1) to assure adequate Federal support to foster a commercial demonstration program to produce on a commercial scale synthetic fuels and other desirable forms of energy from biomass;

"(2) to authorize loan guarantees for the construction and startup and related costs of commercial demonstration facilities for the conversion of biomass into synthetic fuels and other forms of energy; and

"(3) to gather information about the technological, economic, environmental, and social costs, benefits, and impacts of such commercial demonstration facilities.

"(b)(1) The Administrator is authorized in accordance with such rules and regulations as he shall prescribe after consultation with the Secretary of the Treasury, to guarantee and to make commitments to guarantee, in such manner and subject to such conditions (not inconsistent with the provisions of this Act) as he deems appropriate, the payment of interest on, and the principal balance of, bonds, debentures, notes, and other obligations issued by or on behalf of any borrower for the purpose of (A) financing the construction and startup costs of commercial demonstration facilities for the conversion of biomass into synthetic fuels; and (B) financing the construction and startup costs of commercial demonstration facilities to generate desirable forms of energy (including synthetic fuels) in commercial quantities from bioconversion. The outstanding indebtedness guaranteed and committed to be guaranteed under clauses (A), and (B), of this paragraph shall at no time exceed $300,000,000.

"(2) An applicant for any guarantee under this section shall provide information to the Administrator in such form and with such content as the Administrator deems necessary.

"(3) Prior to issuing any guarantee under this section the Administrator shall obtain the concurrence of the Secretary of the Treasury with respect to the timing, interest rate, and substantial terms and conditions of such guarantee.

"(4) The full faith and credit of the United States is pledged to the payment of all guarantees issued under this section with respect to principal and interest.

"(5) With respect to any demonstration facility for the conversion of solid waste (as that term is defined in the Solid Waste Disposal Act, as amended), the Administrator, prior to issuing any guarantee under this section, must be in receipt of a certification from the Administrator of the Environmental Protection Agency and any appropriate State or areawide solid waste management planning agency that the proposed application for a guarantee is consistent with any applicable suggested guidelines published pursuant to section 209(a) of the Solid Waste Disposal Act, as amended, and any applicable State or regional solid waste management plan.

"(c) The Administrator, with due regard for the need for competition, shall guarantee or make a commitment to guarantee any obligation under subsection (b) only if—

"(1) the Administrator is satisfied that the financial assistance applied for is necessary to encourage financial participation;

"(2) the amount guaranteed does not exceed 75 per centum of the total cost of the commercial demonstration facility, as determined by the Administrator: *Provided*, That the amount guaranteed may not exceed 90 per centum of the total cost of the commercial demonstration facility during the period of construction and startup;

"(3) the Administrator has determined that there will be a continued reasonable assurance of full repayment:

"(5) the obligation is subject to the condition that it not be subordinated to any other financing;

"(5) the Administrator has determined, taking into consideration all available forms of assistance under this section and other Federal statutes, that the impacts directly resulting from the proposed commercial demonstration facility have been fully evaluated by the borrower, the Administrator, and others;

"(6) the maximum maturity of the obligation does not exceed thirty years, or 90 per centum of the projected useful economic life of the physical assets of the commercial demonstration facility covered by the guarantee, whichever is less, as determined by the Administrator.

"(d) At least sixty days prior to submitting a report to Congress pursuant to subsection (m) of this section on each guarantee the Administrator shall request from the Attorney General and the Chairman of the Federal Trade Commission written views, comments, and recommendations concerning the impact of such guarantee or commitment on competition and concerntration in the production of energy and give due consideration to views, comments, and recommendations received: *Provided*, That if either official recommends against making such guarantee or commitment, the Administrator shall not do so unless he determines in writing that such guarantee or commitment is in the national interest.

"(e)(1) As soon as the Administrator knows the geographic location of a proposed facility for which a guarantee or a commitment to guarantee is sought under this section, he shall inform the Governor of the State, and officials of each political subdivision and Indian tribe, as appropriate, in which the facility would be located or which would be impacted by such facility. The Administrator shall not guarantee or make a commitment to guarante under subsection (b) of this section if the Governor of the State in which the proposed facility would be located recommends that such action not be taken unless the Administrator finds that there is an overriding national interest in taking such action in order to achieve the purpose of this section. If the Administrator decides to guarantee or make a commitment to guarantee despite a Governor's recommendation not to take such action, the Administrator shall communicate, in writing, to the Governor reasons for not concurring with such recommendation. The Administrator's decision, pursuant to this subsection, shall be final unless determined upon judicial review to be arbitrary and capricious. Such review shall take place in the United States court of appeals for the circuit in which the State involved is located, upon application made within ninety days from the date of such decision. The Administrator shall, by regulation, establish procedures for review of, and comment on, the proposed facility by States, local political subdivision, and Indian tribes which may be impacted by such facility, and the general public.

"(2) The Administrator shall review and approve the plans of the applicant for the construction and operation of any commercial demonstration and related facilities constructed or to be constructed with assistance under this section. Such plans and the actual construction shall include such monitoring and other data-gathering costs associated with such facility as are required by the comprehensive plan and program under this section. The Administrator shall determine the estimated total cost of such demonstration facility, including, but not limited to, construction costs, and start-up costs.

"(f) Except in accordance with reasonable terms and conditions contained in the written contract of guarantee, no guarantee issued or commitment to guarantee made under this section shall be terminated, canceled, or otherwise revoked. Such a guarantee or commitment shall be conclusive evidence that the underlying obligation is in compliance with the provisions of this section and that such obligation has been approved and is legal as to principal, interest, and other terms. Subject to the conditions of the guarantee or commitment to guarantee, such a guarantee shall be incontestable in the hands of the holder of the guaranteed obligation, except as to fraud or material misrepresentation on the part of the holder.

"(g)(1) If there is a default by the borrower, as defined in regulations promulgated by the Administrator and in the guarantee contract, the holder of the obligation shall have the right to demand payment of the unpaid amount from the Administrator. Within such period as may be specified in the guarantee or related agreements, the Administrator shall pay to the holder of the obligation the unpaid interest on and unpaid principal of the guaranteed obligation as to

which the borrower has defaulted, unless the Administrator finds that there was no default by the borrower in the payment of interest or principal or that such default has been remedied. Nothing in this section shall be construed to preclude any forbearance by the holder of the obligation for the benefit of the borrower which may be agreed upon by the parties to the guaranteed obligation and approved by the Administrator.

"(2) If the Administrator makes a payment under paragraph (1) of this subsection the Administrator shall be subrogated to the rights of the recipient of such payment as specified in the guarantee or related agreements including, where appropriate, the authority (notwithstanding any other provision of law) to complete, maintain, operate, lease, or otherwise dispose of any property acquired pursuant to such guarantee or related agreements or to permit the borrower, pursuant to an agreement with the Administrator, to continue to pursue the purposes of the commercial demonstration facility if the Administrator determines that this is in the public interest.

"(3) In the event of a default on any guarantee under this section, the Administrator shall notify the Attorney General, who shall take such action as may be appropriate to recover the amounts of any payments made under paragraph (1) (including any payment of principal and interest under subsection (h)) from such assets of the defaulting borrower as are associated with the commercial demonstration facility, or from any other security included in the terms of the guarantee.

"(4) For purposes of this section, patent and technology resulting from the commercial demonstration facility shall be treated as project assets of such facility in accordance with the terms and conditions of the guarantee agreement. Furthermore, the guarantee agreement shall contain a provision specifying that patents, technology, and other proprietary rights which are necessary for the completion or operation of the commercial demonstration facility shall be available to the Government and its designees on equitable terms, including due consideration to the amount of the Government's default payments.

"(h) With respect to any obligation guaranteed under this section, the Administrator is authorized to enter into a contract to pay, and to pay, the holders of the obligation, for and on behalf of the borrower, from the fund established by this section, as applicable, the principal and interest payments which become due and payable on the unpaid balance of such obligation if the Administrator finds that—

"(1) the borrower is unable to meet such payments and is not in default; it is in the public interest to permit the borrower to continue to pursue the purposes of such demonstration facility; and the probable net benefit to the Federal Government in paying such principal and interest will be greater than that which would result in the event of default.

"(2) the amount of such payment which the Administrator is authorized to pay shall be no greater than the amount of principal and interest which the borrower is obligated to pay under the loan agreement; and

"(3) the borrower agrees to reimburse the Administrator for such payments on terms and conditions, including interest, which are satisfactory to the Administrator.

"(i) Regulations required by this section shall be issued within one hundred and eighty days after enactment of this section, except as provided in subsection (s) of this section. All regulations under this section and any amendments thereto shall be issued in accordance with section 553 of title 5, United States Code.

"(j) The Administrator shall charge and collect fees for guarantees of obligations authorized by clauses (A) and (B), of subsection (b)(1), in amounts sufficient in the judgment of the Administrator to cover the applicable administrative costs and probable losses on guaranteed obligations, but in any event not to exceed 1 per centum per annum of the outstanding indebtedness covered by the guarantee.

"(k)(1) The Administrator is directed to submit a report to the Congress within one hundred and eighty days after the enactment of this section setting forth his recommendations on the best opportunities to implement a program of Federal financial assistance with the objective of demonstrating production and conservation of energy.

"(2) The report submitted under paragraph (1) of this subsection shall include a comprehensive plan and program to acquire information and evaluate the environmental, economic, social, and technological impacts of the demonstration program under this section. In preparing such a comprehensive plan and program, the Administrator shall consult with the Environmental Protection Agency, the Federal Energy Administration, the Department of Housing and Urban Development, the Department of the Interior, and the Department of Agriculture.

"(3) The comprehensive plan and program described in paragraph (2) shall include, but not be limited to—

"(A) information about potential commercial demonstration facilities proposed in the program under this section;

"(B) any significant adverse impacts which may result from any activity included in the program;

"(C) proposed regulations required to carry out the purposes of this section;

"(D) a list of Federal agencies, governmental entities, and other persons that will be consulted or utilized to implement the program; and

"(E) methods and procedures by which the information gathered under the program will be analyzed and disseminated.

"(4) The report required under paragraph (1) of this subsection shall be updated and submitted to the Congress at least annually for the duration of that program under this section.

"(l) Prior to issuing any guarantee or commitment to guarantee pursuant to subsection (b) of this section, the Administrator shall submit to the Committee on Science and Technoolgy of the House of Representatives and the Committee on Interior and Insular Affairs of the Senate a full and complete report on the proposed commercial demonstration facility and such guarantee. Such guarantee or commitment to guarantee shall not be finalized under the authority granted by this section prior to the expiration of ninety calendar days (not including any day on which either House of Congress is not in session because of an adjournment of more than three calendar days to a day certain) from the date on which such report is received by such committees: *Provided*, That, where the cost of such commercial demonstration facility exceeds $50,000,000, such guarantee or commitment to guarantee shall not be finalized if prior to the close of such ninety-day period either House passes a resolution stating in substance that such House does not favor the making of such guarantee or commitment.

"(m)(1) There is hereby created within the Treasury a separate fund (hereafter in this section called the 'fund') which shall be available to the Administrator without fiscal year limitation as a revolving fund for the purpose of carrying out the program authorized by clauses (A) and (B), of subsection (b)(1) and subsections (g) and (h) of this section.

"(2) There are authorized to be appropriated to the fund from time to time such amounts as may be necessary to carry out the purposes of the applicable provisions of this section, including, but not limited to, the payments of interest and principal and the payment of interest differentials and redemption of debt. All amounts received by the Administrator as interest payments or repayments of principal on loans which are guaranteed under this section, fees, and any other moneys, property, or assets derived by him from operations under this section shall be deposited in the fund.

"(3) All payments on obligations, appropriate expenses (including reimbursements to other government accounts), and repayments pursuant to operations of the Administrator under this section shall be paid from the fund subject to appropriations. If at any time the Administrator determines that moneys in the fund exceed the present and reasonably foreseeable future requirements of the fund, such excess shall be transferred to the general fund of the Treasury.

"(4) If at any time the moneys available in the fund are insufficient to enable the Administrator to discharge his responsibilities as authorized by subsections (b)(1), (g), and (h) of this section, the Administrator shall issue to the Secretary of the Treasury notes or other obligations in such forms and denominations, bearing such maturities, and subject to such terms and conditions as may be prescribed by the Secretary of the Treasury. Redemption of such notes or obligations shall be made by the Administrator from appropriations or other moneys available under paragraph (2) of this subsection for loan guarantees authorized by clauses (A) and (B) of section (b)(1) and subsections (g) and (h) of this section. Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, which shall be not less than a rate determined by taking into consideration the average market yield on outstanding marketable obligations of the United States or comparable maturities during the month preceding the issuance of the notes or other obligations. The Secretary of the Treasury shall purchase any notes or other obligations issued hereunder and for that purpose he is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act; and the purpose for which securities may be issued under that Act are extended to include any purchase of such notes or obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations acquired by him under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes or other obligations shall be treated as public debt transactions of the United States.

"(n) For the purposes of this section, the term—

"(1) 'State' means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, or any territory or possession of the United States,

"(2) 'United States' means the several States, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and American Samoa, and

"(3) 'borrower' or 'applicant' shall include any individual, firm, corporation, company, partnership, association, society, trust, joint venture, joint stock company, or other non-Federal entity.

"(o) An applicant seeking a guarantee under subsection (b) of this section must be a citizen or national of the United States. A corporation, partnership, firm, or association shall not be deemed to be a citizen or national of the United States unless the Administrator determines that it satisfactorily meets all the requirements of section 802 of title 46, United States Code, for determining

such citizenship, except that the provisions in subsection (a) of such section 802 concerning (1) the citizenship of officers or directors of a corporation, and (2) the interest required to be owned in the case of a corporation, association, or partnership operating a vessel in the coastwise trade, shall not be applicable.

"(p) No part of the program authorized by this section shall be transferred to any other agency or authority, except pursuant to Act of Congress enacted after the date of enactment of this section: *Provided*, That project agreements entered into pursuant to this section for any commercial demonstration facility for the conversion or bioconversion of solid waste (as that term is defined in the Solid Waste Disposal Act, as amended) shall be administered in accordance with the May 7, 1976, Interagency Agreement between the Environment Protection Agency and the Energy Research and Development Administration on the Development of Energy from Solid Wastes, and specifically, that in accordance with this agreement, (1) for those energy-related projects of mutual interest, planning will be conducted jointly by the Environment Protection Agency and the Energy Research and Development Administration, following which project responsibility will be assigned to one agency; (2) energy-related projects for recovery of synthetic fuels or other forms of energy from solid waste shall be the responsibility of the Energy Research and Development Administration; and (3) the Environmental Protection Agency shall retain responsibility for the environmental, economic, and institutional aspects of solid waste projects and for assurance that such projects are consistent with any applicable suggested guidelines published pursuant to section 209(a) of the Solid Waste Disposal Act, as amended, and any applicable State or regional solid waste management plan.

"(q) Inventions made or conceived in the course of or under a guarantee authorized by this section shall be subject to the title and waiver requirements and conditions of section 9 of this Act.

"(r) With respect to any obligation which is issued after the enactment of this section by, or in behalf of, any State, political subdivision, or Indian tribe and which is either guaranteed under, or supported by taxes levied by said issuer which are guaranteed under, this section, the interest paid on such obligation and received by the purchaser thereof (or the purchaser's successor in interest) shall be included in gross income for the purpose of chapter 1 of the Internal Revenue Code of 1954, as amended: *Provided*, That the Administrator shall pay to such issuer out of the fund established by this section such portion of the interest on such obligations, as determined by the Secretary of the Treasury to be appropriate after taking into account current market yields (1) on obligations of said issuer, if any, or (2) on other obligations with similar terms and conditions the interest on which is not so included in gross income for purposes of chapter 1 of said Code, and in accordance with such terms and conditions as the Secretary of the Treasury shall require.

"(s)(1) Each officer or employee of the Energy Research and Development Administration who—

"(A) performs any function or duty under this section; and

"(B)(i) has any known financial interest in any person who is applying for or receiving financial assistance for a commercial demonstration facility under this section; or

"(ii) has any known financial interest in property from which biomass or other energy resources are commercially produced in connection with any commercial demonstration facility receiving financial assistance under this section,

shall, beginning February 1, 1977, annually file with the Administrator a written statement concerning all such interests held by such officer or employee during the preceding calendar year. Such statement shall be available to the public.

"(2) The Administrator shall

"(A) act within ninety days after the date of enactment of this Act—

"(i) to define the term 'known financial interest' for purposes of paragraph (1) of this subsection; and

"(ii) to establish the methods by which the requirement to file written statements specified in paragraph (1) will be monitored and enforced, including appropriate provisions for the filing by such officers and employees of such statements and the review by the Administrator of such statements; and

"(B) report to the Congress on June 1 of each calendar year with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

"(3) In the rules prescribed in paragraph (2) of this subsection, the Administrator may identify specific positions within the Administration which are of a nonpolicy-making nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this subsection.

"(4) Any officer or employee who is subject to, and knowingly violates, this subsection or any regulation issued thereunder shall be fined not more than $2,500 or imprisoned not more than one year, or both.

"(t) Nothing in this section shall be construed as affecting obligations of any borrower receiving a guarantee pursuant to this section to comply with Federal and State environmental, land use, water, and health and safety laws and regulations or permits, licenses and certificates.

"(u) The information maintained by the Administrator under this section shall be made available to the public, subject to the provisions of section 552 of title 5, United States Code, and section 1905 of title 18, United States Code, and to other Government agencies in a manner that will facilitate its dissemination: *Provided*, That upon a showing satisfactory to the Administrator by any person that any information, or portion thereof, obtained under this section by the Administrator directly or indirectly from such person would, if made public, divulge (1) trade secrets or (2) other proprietary information of such person, the Administrator shall not disclose such information and disclosure thereof shall be punishable under section 1905 of title 18, United States Code: *Provided further*, That the Administrator shall, upon request provide such information (A) any delegate of the Administrator for the purpose of carrying out this Act, and (B) the Attorney General, the Secretary of Agriculture, the Secretary of the Interior, the Federal Trade Commission, the Federal Energy Administration, the Environmental Protection Agency, the Federal Power Commission, the General Accounting Office, other Federal agencies, or heads of other Federal agencies, when necessary to carry out their duties and responsibilities under this and other statutes, but such agencies and agency heads shall not release such information to the public. This section is not authority to withhold information from Congress, or from any committee of Congress upon request of the chairman. For the purposes of this subsection, the term 'person' shall include the borrower.

"(v) Notwithstanding any other provision of this section the authority to make guarantees or commitments to guarantee under subsection (b)(1), the authority to make contracts under subsection (h), the authority to charge and collect fees under subsection (j), and the authorities under subsection (m) of this section shall be effective only to the extent provided, without fiscal year limitation, in appropriation Acts enacted after the date of enactment of this section.

"(w) For purposes of this section 'biomass' shall include, but is not limited to, animal and timber waste, urban and industrial waste, sewerage sludge, and oceanic and terrestrial crops.".

By Mr. McCLURE (for himself and Mr. GOLDWATER):

S. 38. A bill to repeal the Gun Control Act of 1968; and

S. 45. A bill to amend chapter 44 of title 18 of the United States Code—respecting firearms—to penalize the use of firearms in the commission of any crime of violence and to increase the penalties in certain related existing provisions; to the Committee on the Judiciary.

Mr. McCLURE. Mr. President, I am today introducing two bills designed to bring about a fairer, more effective answer to the problem of criminal misuse of firearms. By any standard the Gun Control Act of 1968 has failed to halt the increase in violent crimes which plague our country. The reason for that failure, I suggest, is that the Gun Control Act of 1968 is fundamentally misdirected. It burdens the law-abiding citizen who obtains firearms through legal channels while affecting not at all the criminal who long before 1968 was barred from legally possessing guns.

It is easy to erect obstacles to those who want to buy a firearm for hunting or target practice or defense of their home and family. These people want to obey the law. But these people have nothing whatever to do with the crime problem. Yet they, not the professional criminal, are the victim of gun control laws. So I propose that we redirect Federal gun laws to deter or punish those who commit the robberies, assaults and killings, but to deter this criminal behavior without infringing on the traditional right of law-abiding Americans to keep and bear arms. To do this I offer two bills. The first simply repeals a law that has failed, the Gun Control Act of 1968. The second bill imposes a mandatory 5- to 10-year prison sentence on anyone who uses a gun to commit a crime of violence.

The bill is carefully drafted to avoid Federal intrusion into areas of criminal law best handled by the States. I would like to see similar mandatory sentence provisions enacted at the State level. It can be a first step toward the rebuilding of our criminal justice system into an effective deterrent to crime. I introduced similar bills during the 94th Congress and the response outside of Congress was overwhelming. Petitions endorsing the bills were circulated by the Citizens Committee for the Right to Keep and Bear Arms. Last August I was honored to receive petitions containing the signatures of over 1½ million Americans from all over the country. This was truly an unprecedented effort by a genuine citizen's lobby. Recently the National Rifle Association bolstered its effectiveness as the prime spokesman for gun owners with the creation of the NRA Institute for Legislative Action. And, as

I am sure every member of the House and Senate is aware, millions of Americans not affiliated with any national organizations have written us to plead that their second amendment rights not be curtailed.

I am aware of no issue which has motivated so large a number of people to try to influence the course of legislation by following the constitutional prescription of petitioning Congress—and these efforts are effective. Last year the voters of Massachusetts soundly defeated a gun control measure on the ballot in that very liberal State. Congress and the courts struck down an antigun bill in the District of Columbia and Congress outlawed an attempt at "back door" gun control by denying the Consumer Product Safety Commission any jurisdiction over guns or ammunition. While all this progun activity gained momentum, the National Gun Control Center, this country's major antigun group, quietly folded due to lack of public interest.

It is only through the vigilance of the millions of Americans who are determined to preserve the right to keep and bear arms that those of us in Congress who share these traditional American values have been able to prevail.

By Mr. HELMS:

S. 40. A bill to provide for high levels of employment, stable prices and economic growth by reform of Federal economic policy, revision of congressional spending practices, stabilization of the U.S. monetary system, the limitation of artificial barriers to employment, and for other purposes; to the Committee on the Budget, the Committee on Banking, Housing and Urban Affairs, and the Committee on Labor and Public Welfare jointly, by unanimous consent.

JOB OPPORTUNITIES AND ECONOMIC REFORM ACT OF 1977

Mr. HELMS. Mr. President, I introduced the Job Opportunities and Economic Reform Act of 1977 last August, and in the subsequent months, I have found that this bill is needed more than ever. Particularly, with the the advent of a new administration, we see tired old economic policies being dusted off and put before the press and the public as if they were the newest proclamations from on high. Well, most of the economic balloons being floated around are the same sort of tired remedies that got us where we are today: On the brink of economic stagnation.

The bill I am introducing today would provide for comprehensive reform of Government economic policy. It would affect Government's declared responsibilities, spending policies, our monetary system, and the problems the unemployed find in obtaining jobs. Because if enacted, the bill would allow increased economic output, and high levels of employment, it has been titled, the Job Opportunities and Economic Reform Act of 1977.

Since this is a major piece of legislation, I approached the problem deliberately. I have looked at where we are economically, and I have come to some inescapable conclusions.

First, the status of our economy is bad. We have not experienced "just another recession." We have had a recession with record inflation and we are entering a period of slow growth with record unemployment. What preceded the mid-recession high unemployment and the newly diagnosed recovery was a period of inflation of unparalleled depth and duration. Prior to that inflation, we witnessed Government intervention in the economy unprecedented in peacetime. And, we witnessed Government-spending practices which must be termed both reckless and irresponsible.

What does this add up to? It adds up to Government intervention in the economy with evidently little private regard, and almost no public regard to the consequences.

Recent economic history of the United States is exemplified by a series of Government interventions of great magnitude. The most obvious was the Great Society guns-and-butter budgets, when even the most orthodox Keynesian economists in the administration at that time warned of overstimulation via Government spending. This was followed by the problems of the Nixon administration during which we saw wage and price controls clamped onto the economy at the same time the Federal Reserve Board seemed to take off all controls on money supply expansion. The suppressed inflation of the intermediate phases I through III, soon pushed price increase rates into the teens during 1973. The concomitant recession that followed the required monetary contraction, then, resulted in record high unemployment levels; levels which have only declined a few points from their record highs.

The low point of this past recession included inflation at about 6 percent, or about twice the low point for the previous recession. The high point of price rise rates in the previous boom was about 13 percent, or about twice the previous boom's high. Unemployment was not quite double previous levels, but if present trends continue, it is likely to remain at double the low point in the previous boom.

It is not, therefore, unreasonable to suppose that if all things remain the same, inflation next time may get to the 20's. We may see that boom followed by double-digit unemployment, and a recession accompanied by inflation that could effectively thwart any significant recovery.

But, of course, conditions in the future will not be identical to those in the past. Government does not appear to be willing to start spending less to allow business to invest for the future. In fact, we are threatened with programs like $100 billion compulsory health insurance, a $40 billion make-work program under the Humphrey-Hawkins bill, and other big spending proposals.

Such a program for the future—more spending, more government, more controls, less growth, less economic freedom, and less investment means what might be called the Britainization of America. It is a sad prospect.

THE BRITAINIZATION OF AMERICA

How did the most prosperous nation in the world get into a position where it threatens to stagnate itself? It takes some going back. It has to do with the economics of Sir John Maynard Keynes, author of "The General Theory of Employment, Interest, and Money," perhaps the most important economic tract since Adam Smith's "Wealth of Nations." In it, Keynes points out that government can stimulate the economy from time to time by artificially creating demand. Such demand is created by issuing money, and the people with money will spend it.

Keynes also pointed out the pitfalls of continued stimulation of this nature: runaway inflation.

After the war, the Government of Great Britain adopted a law which provided that the Government had full responsibility to see that high rates of employment would be maintained. It was with similar motivation, that the Employment Act of 1946 was passed in the United States. This act provided that the Federal Government has the responsibility to "promote maximum employment, production, and purchasing power."

The act in effect gave the Federal Government a positive responsibility to take action when only refraining from action will accomplish the desired goals. It is as if we demand that a doctor treat a malady that can be best left alone to cure itself. It is saying that Government must act to get involved in employment programs when in fact those things that can really provide for employment are promoted when Government does not get involved. No doubt, the symptom of unemployment can be treated on occasion, but the more Government tries to treat symptoms, the less effective the treatment and the more costly it becomes. A point is reached when the treatment causes more harm than good.

And so what do we have with the Employment Act of 1946? It is a bill that most people have come to accept because it sounds good. We all want high levels of employment. But, do we all want inflation? Do we all want Government growth that stifles economic freedom, stifles economic growth, and do we all want Government controls that can threaten the roots of our free society?

Such side effects are the costs of full employment, and these costs should be discussed in greater detail.

INFLATIONARY MAKE-WORK

Every Member of the Senate has heard repeatedly the argument put forward that a given bill will help employment by providing for a specific project, or a specific allocation of resources, or a specific tax benefit. But let us look closely at that argument. Are we saying that by providing a certain number of jobs that there will be more jobs overall? That seems to be what the advocates say. In effect, are we saying that the income that certain people will receive on a Federal project would not have been received by anyone if that project was not done? That is the logical conclusion. And does this mean that somehow by Federal action, this productive effort was made with no cost to anyone else? If so, we have found Rumplestiltskin.

The opposite is true, of course. If taxes

were raised to pay for the Federal make-work jobs, then the money came out of someone's income. That someone was not able to spend his money as he saw fit. The Government usurped that person's economic freedom—the freedom to decide what to do with a segment of his or her income. Certainly the money was not spent or saved—two actions that create employment. If the Government spent money it did not have for the project, what happened? Well, it probably issued a Treasury bill.

In other words, savings went to buy the Treasury bill, savings that would have gone for another investment perhaps—in jobs-creating business investment, or in other securities. Finally, the end result is that in an effort to hold down the interest rates forced up by the competition of new Treasury bills being sold, the Federal Reserve Board increased the money supply. This would have brought about inflation, and that would have meant that everyone's dollar was worth less. It meant that a certain degree of economic freedom was taken away because the dollar would not purchase as many thing as it had previously. There is no economic difference, in the end, in a tax that takes 3 cents out of the dollar on payday, or inflation which takes 3 cents out in higher prices.

But, on the other hand, there is a political difference. An income tax must be legislated: Approved by both Houses of Congress and either signed by the President or enacted over his veto, inflation is a creature of stealth. Its victims are never mentioned in the inflationary spending bills passed by Congess. Its effects come at times removed from the commission of the acts that cause them. And, the effects of inflation are usually blamed on third parties: Business, labor, imports, oil, or farm prices.

Perhaps that is what makes inflation more of a problem to decry than to do something about.

But inflation is just one side effect of the masses of spending bills Congress approves. Surely, few bills are ever passed that have as their only justification an antirecessionary or anti-inflationary effect. Usually the bills have another salutary purpose. For example, tax bills will provide incentives or disincentives to people. Some of these tax incentives I personally support, but all tax incentives are allocations of resources—limited, finite resources—outside of the marketplace. As such the Government-allocated capital goes for things of questionable, politically determined economic worth. Yet, it is the marketplace, not Washington, that can decide such worth. The U.S. Congress cannot determine marginal economic worth. It can only determine marginal political worth. Politics can only foul the marketplace.

Most of the bills, as I said, are passed with altruistic purposes in mind. It comes from a politician's natural desire to do good or at least do something. It comes in large part, from an unfortunate belief that Government can make proper decisions about the use of the Nation's resources to achieve all sorts of desirable ends—that Government can indeed bring about heaven on Earth. In the process of achieving the desirable ends, we find that the means become burdensome. The allegedly necessary schemes become more and more expensive and more bureaucrats are required to write rules, administer them, and enforce them. If the Government goal is in fact impossible to achieve, then one could expend an infinite amount of resources and still not achieve it. That is what I am afraid is happening in many cases in our Federal Government today.

There are those who accept the argument that if the Government spends more than it takes in, then the economy will be stimulated and more people will be employed and more people will pay taxes and somehow Government deficits will go away. If that is the case, then it isn't so very bad to have bad programs as long as the motives are good. Money must be spent somewhere to stimulate the economy.

BUREAUCRATIC REFORM VIA BALANCED BUDGETS

But, what if things are different? What if priorities had to be set? What if leaders were to become serious about setting those priorities? What would happen to marginal programs? They would start to fall by the wayside. If Congress had to choose between taxing for programs and eliminating programs, not just a lot of fat would be trimmed. Tons of blubber would be hacked away.

The effects of such a happening would be entirely salutary. Resources would not be grabbed away by the Government, the Federal employment would tend to stabilize. One set of Government regulations would remain in effect long enough for people to understand them.

There would be some additional unemployment created by the elimination of Federal make-work jobs, and the Federal jobs administering the make-work jobs. But, if we are to make a serious attack on the unemployment situation, it will take a concerted look at what has caused unemployment: First, economic instability. There is a reduced incentive for investment, reduced predictability and as a result, fewer new jobs in industry. Second, there is Government intervention in creating barriers to employment. Barriers placed a legal impediment to people coming to mutually agreeable economic arguments. Third, there are incentives for not working: High levels of benefits for the unemployed, and penalties on social security recipients who seek employment are just two incentives that come to mind. What is clear is that we have unemployment caused by Government. It is foolish to talk about unemployment and how to cure it without discussing the causes of unemployment.

With these assumptions, how should one approach the problem of growth, government and unemployment? My bill, the Job Opportunities and Economic Reform Act, has four titles.

ECONOMIC POLICY REFORM

Title 1 establishes goals for the Federal Government to reduce intervention in the Nation's economy and avoid it whenever possible. This is a major shift in Federal policy. For years, it has been the accepted wisdom in Washington that it is the Federal Government that has the ability and the full responsibility to see to it that the economy grows or does not grow, inflates or does not inflate, according to the wishes of Washington economists and central bankers.

My critique of this position is two-pronged. First, it is not only highly unlikely, but impossible to suppose that a small number of men can know what the perfect economy is. It is not within finite abilities of men or machines to decide what will be the best set of circumstances for all. Any goal, set of goals, or parameters set by a group or groups of politicians is by definition, subjective and reflective only of those various individuals' personal viewpoints.

What economic fine tuners propose to do is change the tax system, change the monetary system, or change Federal spending policies to conform with their goals. It is just as though the rules of the game are changed so that the desired outcome would be achieved. However, changing the rules has an awesome effect on the players—the average American, the businessman, the person planning a career or retirement. Changing the rules of the game means that everyone loses.

My second criticism of such economic intervention is that the size and magnitude of the American economy is such that the only regulator can be the marketplace. The only participants should be individuals acting in their personal behalf. The only responsibility of Government must be to provide a stable framework and to prevent nonmarket forces from making market decisions. In other words, Government must not only keep its role to a minimum in the marketplace, but it must serve as policeman to see that other groups do not do the same sort of things that the Government now is doing. The chief difference in effect between Government economic manipulation and private manipulation of the marketplace, is that Government intervenes with altruistic motives while private individuals and groups engage in monopolies and restraints of trade which most often are not altruistic.

Government intervention in the economy for purposes of the manipulation of economic conditions assumes that all participants will act as predicted. The experts have to rely on computers and past history. They do not know what effect a new set of conditions or combination of conditions will have. For example when Congress enacted the income tax surcharge in 1972, the Federal Reserve Board expected the American people to cut back their spending dramatically. So, in order to counteract the effects of Congress action, the Federal Reserve Board took action to pump in money. Well, Americans did not cut back their spending when the surcharge came into effect, they cut their savings. This action, coupled with the inflationary stimulation provided by the Federal Reserve Board, meant that massive price increases were just down the road. We saw them: 14 to 15 percent per year increases in many cases.

My bill would amend the Employment Act of 1946 to state that the Federal Government should avoid and reduce whenever possible intervention in the

economy, "recognizing that fiscal and monetary policies, when used for purposes of regulating the economy, tend to be counterproductive, and that the absence of such intervention tends to foster and promote free competitive enterprise; the general welfare; conditions which promote balanced growth; and useful employment opportunities."

I believe that this change in policy means a gradual reduction in Federal Government intervention. I would oppose any radical change in Government programs. Because many Americans have grown dependent on certain programs and Federal actions, I advocate gradual implementation of this new policy.

FISCAL POLICY REFORM

The second title of the bill contains a statement of findings which indict Federal deficits and attribute many of our current economic ills to Federal deficits. The achievement of reform in this area would be via congressional acceptance of Congress role in causing recessions and inflations by deficit spending, and most importantly a congressional pledge that change will be effected by a gradual return to balanced budgets.

This provision of the bill was a particularly difficult one for me to develop. There is no practical way that Congress can be prevented from spending more than it takes in except perhaps by constitutional amendment. But such an amendment would presumably take a two-thirds vote of each House before the various States would have an opportunity to consider it.

If a good amendment to the Constitution which would require balanced budgets could be drafted, I would support it.

My bill, therefore, amends sections 202, 203, 204, 301, 304, and 310 of the Congressional Budget Act of 1974 to provide that Congress will gradually adopt over a period of years a budget which would balance Federal outlays with Federal income. This concept was originally introduced by my able colleague from Oklahoma, Senator BARTLETT. The only change I made was that my bill would provide a phased-in balanced budget. On advice of counsel I included this provision, as it is generally felt in economic circles that an abrupt reduction in the rate of Federal spending or an abrupt increase in Federal taxes would have massive destabilizing economic effects. I believe we should avoid such effects, and I believe we should allow people who have come to expect Federal largess in certain areas to make adjustments.

MONETARY REFORM

The third title of the bill would phase out the political power of the Federal Government to manipulate the value of money. This is a most significant relinquishment of power. It would provide for a limitation upon the Federal Government for inflating the currency by restoring the marketplace as the determining force of the value of the monetary system. It would do this by providing for a gradual adoption of the market price for the free sale and purchase of gold. It would, in effect, remove from the Federal Reserve Board the freedom to destroy the purchasing power of the dollar. It would provide for the gradual assumption of a standard gold price for the dollar over a period of years. It would be phased in by initially offering U.S. gold for sale at a price above the market, and offering to purchase gold at a price below the market. Over time, the purchase price offered and the selling price would be brought together and fixed. From that time, unless Congress acted, the dollar would have a fixed relationship with gold.

Why gold? The best reason is that it works. People throughout history have chosen gold as a monetary standard. Why not politicians, as the determiners of monetary values? The answer is that politicians have failed. The dollar has been inflated for a variety of reasons and as a result, our economy has been beaten and battered. We have exported inflation to our allies and their economies are in tragic conditions.

At worst, gold will do as well as the politicians in the Federal Reserve Board. At best, it will usher in a new era of economic growth and stability; an era of prolonged growth and minimum price level changes. From 1879 to 1914, the United States averaged 3.6 percent real levels that varied no more than 2 percent per year.

Americans have grown used to inflation and its unpredictability. They are able to grow used to price stability and an economic future they can rely upon. It will take adjustments of significant proportions in a number of areas and I do not wish to ignore them. Labor-management negotiations will have a new framework of reference, for inflation will not cover over excessive pay increases or provide, artifically, a sense of achievement in wage increases. But, I believe we have already passed the day when union officials and members will ignore inflation.

There will also be changes in areas of investment. Inflation has the effect of subsidizing debtors and penalizing creditors. It has the effect of discouraging savings and encouraging indebtedness. It promotes certain kinds of business and hinders others. These effects have cost our economy dearly in improperly allocating resources. Change would cause some difficulty but the difficulties will not compare with the great benefits the economy will reap.

In proposing that the Federal Government adopt a fixed price for gold, and a fixed measurement for the dollar in gold, I am proposing nothing less than the depoliticization of the monetary system. Such a proposal would mean that if the Federal Reserve Board chose to inflate the dollar for whatever reason, dollars would soon be turned in to the Treasury for gold. This would indicate that people did not trust the dollars, and that they sought refuge from inflation in gold. Depletion of our gold supplies would place pressure on the Government to reverse its policies. A refusal would eventually result in the voluntary or compulsory devaluation of the dollar. This would be an action to be avoided for it would destroy future credibility in our currency, and lead to greater speculation against the dollar. Eventually it would lead to the kind of international monetary chaos we have today. Prices change daily. Trade is a refined form of currency speculation. Capital flows are stagnated.

We cannot view money as an instrument of national policy. Such a view has led to the Keynesian excesses which we have witnessed. It can lead to the Britainization of America.

Economic reform must therefore be a recognition that money cannot be used to cover up foolish fiscal policies. It cannot be used to accomplish utopian social goals. Money is the means of economic activity and politicization of money can only lead to the disruption of economic activity.

I propose restoring freedom to individuals to engage in economic activity without having to guess how the political manipulation of the currency will affect their economic position. I propose shifting the burden from the individual to the Government by forcing Government to conform with monetary constraints and freeing individuals by removing capricious Government manipulation.

EMPLOYMENT BARRIERS

The fourth title of my bill would establish a Federal Commission on Barriers to Employment. The Commission would be devoted to the investigation and delineation of the costs and effects of impediments to employment. By this I do not mean the sociological and psychological theories dreamed up by highly paid professors at Harvard or bureaucrats in the Department of Health, Education, and Welfare. By impediments, I mean what keeps the jobs available and the unemployed apart.

The Commission would have among its responsibilities, a full assessment of the effects of Government incentives to individuals to stay out of the job market. It would provide an assessment of the Government-imposed costs to starting new business, expanding businesses, and of even maintaining present levels of business operations. The Commission would analyze the effects of the tax code on employment practices. And, it would analyze the powers Government has bestowed on certain groups to reduce or restrict employment opportunities. There are some economists who state that in a truly free market, there is no such thing as unemployment. They say that if individuals are free to bargain then all who seek jobs would find them. I do not think that we can or would want to eliminate all disincentives or barriers to employment, but we should recognize that Government restrictions and regulations are some of the greatest causes of unemployment. We should know just what the exact causes and effects are. Then we can propose remedies.

THE START OF A DIALOG OF MAJOR ECONOMIC REFORM

The bill I am proposing is a major one. I acknowledge that there are provisions which must be studied at great length before Congress adopts them. We must make sure that any hardships which may result from these changes are minimized. I am convinced, however, that on the whole, the reforms in this proposal are good ones. Indeed, they are necessary ones.

I submit the Job Opportunities and

Economic Reform Act of 1976 so that Congress can begin a serious debate on real economic reform. We have passed the time when we can throw money at the Nation's economic problems and expect more good results than bad. We have passed the time when we can afford something like the guaranteed jobs bill which attempts to treat symptoms and not causes.

In full recognition of the political tone of the day, I do not expect approval of this bill in the near future. The U.S. Congress is far more likely, unfortunately, to adopt bills which provide for more of the same. We will, unless the American people begin to demand meaningful reform, continue down the road to big government; to centralized decisionmaking; to economic intervention; to the Britainization of America.

I introduce the Job Opportunities and Economic Reform Act of 1976 simply to begin the debate. After 30 years of Keynesian economies we must assess the results and the Keynesians must defend them. The Job Opportunity and Economic Reform Act of 1976 is a comprehensive reply to the economic policies of the past. It is comprehensive because we cannot attack any single one of our economic difficulties separately. Money, unemployment, growth, and stability are integral and they must be looked at in the same context.

I look forward to reviews, comments, and criticism on this proposal. It has been so long since Keynesian economics has held sway that critics of it are looked upon as being either fools or knaves. But, I hope that the Keynesians will recognize this proposal as a serious and comprehensive critique of their policies. I hope those who are sincere in their regard for this Nation will look twice and consider these specific provisions. I hope that businessmen, economists, and political leaders from all sides will comment on this bill and contribute to the debate. It is a debate on the most important domestic issue our Nation has faced since the Civil War. It is a debate on whether we have an economy that can provide resources for our children, for their betterment and for the accomplishment of national goals or whether we will go the way of some nations and stagnate our productive enterprise in Government coersion, economic disruption, and the relinquishment of our freedoms.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a bill introduced by Mr. HELMS today, to provide for high levels of employment, stable prices and economic growth by reform of Federal economic policy, revision of congressional spending practices, stabilization of the U.S. monetary system, the limitation of artificial barriers to employment, and for other purposes, be referred jointly to the Committee on the Budget, the Committee on Banking, Housing and Urban Affairs, and the Committee on Labor and Public Welfare.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. HARRY F. BYRD, JR.:

S. 41. A bill to require specific congressional authorization of any expenditure for the purpose of providing direct or indirect assistance of any kind to or for the Socialist Republic of Vietnam; to the Committee on Foreign Relations.

USE OF TAX FUNDS TO AID VIETNAM

Mr. HARRY F. BYRD, JR. Mr. President, I am today introducing legislation which will prohibit, if enacted, the use of American tax funds to aid the Socialist Republic of Vietnam unless such aid is specifically authorized by the Congress.

Mr. President, there is a need for this legislation. A decision to provide direct aid to Vietnam is a very serious matter and such a decision should only be made after the fullest consideration by the Congress.

It is the Congress which has the constitutional authority to authorize the expenditure of our taxpayers' funds and it is essential that the Congress reserve its rights in this matter.

In 1973 I introduced similar legislation for at that time there was a very real chance that the Nixon administration would embark on a major aid program to North Vietnam. Dr. Kissinger had returned from discussions with Premier Pham Van Dong and other North Vietnamese officials in which both sides—and I quote from the joint communique—

exchanged views on the manner in which the United States will contribute to the healing of the wounds of war and to postwar reconstruction in North Vietnam.

Dr. Kissinger's negotiating style in the past has been to make promises for which the American taxpayer must pay. My legislation at that time was designed to insure that any aid program contemplated by the executive branch would receive the fullest consideration by the Members of Congress—the duly elected representatives of those who would have to pay for such an aid program.

Mr. President, the Senate overwhelmingly approved my legislative proposal in 1973 by a vote of 88 to 3 and that vote effectively ended any further likelihood that U.S. tax funds would be used to pay reparations to North Vietnam at whose the United States suffered 355,000 casualties, including 53,000 dead.

The need for the new legislation is this:

In recent weeks American representatives have been engaged in discussions with the Vietnamese concerning a normalization of relations and I therefore believe it is important that the Congress insure through this legislation that the Congress will have a voice in any decision on aid to Vietnam.

Mr. President, I personally do not believe that a direct U.S. aid program for Vietnam would be an appropriate use of the American taxpayer's dollars. I know that many other Americans agree with me on this matter. However, I also know that there are a number of Americans who believe that the United States should provide aid for the reconstruction of Vietnam.

This legislation would insure that there is full and free debate in the Congress over the matter of aid to Vietnam. Senators and Representatives would be given full opportunity to discuss the merits and the costs of such an endeavor and the views of our citizens would be amply considered before such a decision was taken.

Mr. President, this proposed legislation does not prohibit aid to Vietnam, but it does provide that any such decision will be made only after the fullest consideration of the Congress. I believe it deserves the strong support of the Congress and I am hopeful that it will receive early consideration.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point the legislative proposal I am presenting.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 41

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that no funds made available by the Congress to any department or agency of the Government may be obligated or expended for the purpose of providing assistance of any kind, directly or indirectly, to or on behalf of the Socialist Republic of Vietnam, unless specifically authorized hereafter by the Congress.

By Mr. INOUYE:

S. 42. A bill to amend section 214 of the Internal Revenue Code of 1954 to provide a deduction for household and dependent care services necessary for education; to the Committee on Finance.

Mr. INOUYE. Mr. President, the Internal Revenue Code provides a tax deduction for certain taxpayers to cover the expenses of household and dependent care services which are necessary to enable the taxpayer to be gainfully employed. This provision of the law applies to those married couples who file a joint return and who are both gainfully employed on a full-time basis, or where one spouse is physically or mentally unable to care for himself.

This provision of the law was primarily a relief provision for the benefit of those families where the income of both parents is essential for the maintenance of minimum living standards.

Many married students are presently struggling to maintain minimum standards of living for themselves and their families. In addition to the rising costs of living which are faced by all people, these students must meet the rising costs of tuition. Most of these students are able to work only on a part-time basis without their employment becoming a serious detriment to their education. As a result, their income is usually quite low, yet their expenses are considerably higher than those of an average citizen.

The Federal Government should assist these struggling students in their efforts to meet the financial demands of raising a family. It is time to extend the tax deduction for expenses relating to household and dependent care services which are necessary for gainful employment to include a deduction for those expenses which are necessary for the pursuit of learning. I am, therefore, reintroducing a bill to amend section 214 of the Internal Revenue Code to include this deduction.

Mr. President, I ask unanimous con-

sent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 42

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 214 of the Internal Revenue Code of 1954 (relating to expenses for household and dependent care services necessary for gainful employment) is amended—

(1) by striking out "employment-related" in subsection (a) and inserting in lieu thereof "employment or education related";

(2) by striking out the matter in subsection (b)(2) preceding subparagraph (A) and inserting in lieu thereof the following:

"(2) EMPLOYMENT OR EDUCATION RELATED EXPENSES.—The term 'employment or education related expenses' means amounts paid for the following expenses, but only if such expenses are incurred to enable the taxpayer to be gainfully employed or to be a student:";

(3) by adding at the end of subsection (b) the following new paragraph:

"(4) STUDENT.—The term 'student' has the same meaning as it has under section 151(e)(4).";

(4) by striking out "employment-related" each place it appears in subsections (c) and (d) and inserting in lieu thereof "employment or education related";

(5) by amending subsection (e)(2) to read as follows:

"(2) GAINFUL EMPLOYMENT OR STUDENT REQUIREMENT.—If the taxpayer is married for any period during the taxable year, there shall be taken into account employment or education related expenses incurred during any month of such period only if—

"(A) both spouses are gainfully employed on a substantially full-time basis, or are students,

"(B) one spouse is gainfully employed on a substantially full-time basis and one spouse is a student, or

"(C) the spouse is a qualifying individual described in subsection (b)(1)(C).";

and

(6) by striking out "employment-related" in subsection (e)(5) and inserting in lieu thereof "employment or education related".

(b) The caption of such section 214 is amended by striking out the period and inserting in lieu thereof "OR EDUCATION.".

(c) The table of sections for part VII of subchapter B of chapter 1 of such Code is amended by striking out the period at the end of the item relating to section 214 and inserting in lieu thereof "or education.".

(d) The amendments made by this Act apply with respect to taxable years beginning after December 31, 1974.

By Mr. STAFFORD (for himself and Mr. LEAHY):

S. 46. A bill to amend the Urban Mass Transportation Act of 1964 to provide operating assistance for projects located in areas other than urbanized areas; to the Committee on Banking, Housing and Urban Affairs.

OPERATING SUBSIDIES IN AREAS OTHER THAN URBANIZED AREAS

Mr. STAFFORD. Mr. President, on behalf of myself and Mr. LEAHY, my colleague from Vermont, I introduce today legislation that would authorize operating subsidies for public mass transportation agencies in rural and small urban areas.

The Urban Mass Transportation Act authorizes up to $500 million of Federal assistance under section 3 for areas of the country with populations of less than 50,000 persons. But, this Federal assistance is restricted solely to capital grants.

The section 5 program of the act authorizes formula grants to assist in meeting both the capital and operating assistance costs of public mass transportation service in urbanized areas. By definition, that assistance is limited to cities or areas of at least 50,000 persons.

Thus, existing law contains no provision for operating subsidies for transportation agencies that serve cities of less than 50,000 persons. This despite the fact that one of the landmark features of the law is that it is the first Federal mass transit act to provide a subsidy for public mass transportation operating expenses.

The effect of all this has been to prevent operating subsidies for small bus companies that serve rural areas and small cities—and also to provide no operating subsidies at all to the States of Vermont and Wyoming, simply because they are the only States in the Union without an urbanized area—a city of 50,000 persons.

Federal assistance is available for the purchase of buses and other capital equipment to serve rural areas and small cities, but no Federal aid is available to help to operate those buses.

We are all aware that public mass transportation systems cannot operate in the black on the fare box alone. The Urban Mass Transportation Act recognizes that economic fact of life. It is ironic that UMTA, which has helped to purchase buses for service in rural areas, is prohibited by law from providing the necessary operating subsidies to keep those buses running to serve the public.

It is apparent that the $500 million capital grant program for nonurbanized areas fails to meet the total needs of those areas.

The bill I introduce today would, therefore, authorize the use of the $500 million for operating as well as capital assistance, on such terms and conditions as the Secretary of Transportation may require. Under the proposal, the Secretary would be authorized to make operating subsidy grants under terms and conditions similar to those governing section 5 grants to urbanized areas. This bill would provide for alternative use of the $500 million in funds already authorized, and requires no additional new Federal funding.

This proposal was contained in a bill, S. 662, passed by the Senate last year, and this provision won approval in a House committee. Unfortunately, because of disagreement over other sections of S. 662, that bill was never enacted into law.

It is my hope that this Congress will deal with this urgent matter, which it has previously recognized, at the earliest possible moment of this session to provide equal treatment in the matter of operating subsidies not only to my own State of Vermont and to Wyoming, but also to rural areas of all parts of our country.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 46

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

OPERATING SUBSIDIES IN AREAS OTHER THAN URBANIZED AREAS

SECTION 1. The last sentence of section 4(c) of the Urban Mass Transportation Act of 1964 is amended by inserting before the period at the end thereof a comma and the following: "and such $500,000,000 may be used in such areas for the payment of the cost of construction projects or for the payment of subsidies for operating expenses. Grants for assistance in other than urbanized areas shall be subject to such terms, conditions, requirements, and provisions (similar as may be appropriate to those applicable to grants under section 5) as the Secretary may determine to be necessary or appropriate for nonurbanized areas.".

By Mr. STAFFORD (for himself and Mr. HEINZ):

S. 47. A bill to amend title XVIII and title XIX of the Social Security Act to include community mental health centers among the entities which may be qualified providers of services for medicare purposes, to require each State having an approved medicaid plan to provide community mental health center services under such plan, and for other purposes; to the Committee on Finance.

SOCIAL SECURITY ACT AMENDMENTS

Mr. STAFFORD. Mr. President, Mr. HEINZ and I are introducing a bill to amend titles XVIII and XIX of the Social Security Act to provide for coverage of community mental health services under medicare and medicaid.

As I said when introducing this legislation in the last Congress, I think the time has come for Congress to consider the coverage of the services provided by community mental health centers under medicare and medicaid, especially if we desire to provide better health care for those individuals covered under titles XVIII and XIX of the Social Security Act.

Mr. President, the magnitude of the problem of mental health needs of our fellow Americans is keenly illustrated by these few facts developed by Morris Associates, Inc., for the National Council of Community Mental Health Centers:

It is estimated that 1 in 10 Americans is in need of mental health care.

There are approximately 9 million alcoholics in this country.

There are estimated to be 250,000 persons addicted to hard drugs and in need of care.

Fifteen percent of all Americans between the ages of 18 and 74 are estimated to suffer from depression during any one year.

About 10 million children in America are handicapped by mental or emotional problems.

The rate of mental illness and other major health and social problems rises and falls in relation to the economic cycle. During and after a period of depression or recession, the rate of mental illness, alcoholism, suicide, family disruption, and child abuse rises.

The cost of direct care for the mentally ill in 1971 was estimated at $10.1 billion.

The indirect cost of mental health care in terms of lost productivity alone is estimated to be $13.8 billion.

One-third of all suicides, one-half of all homicides are alcohol related, and 35,000 highway deaths a year are related to alcohol abuse.

Approximately half of the calls to police departments for assistance are related to marital disputes or other disturbances resulting from mental or emotional problems or distress.

Other hidden costs of a failure to treat the mentally ill and emotionally disturbed are: increases in welfare rolls; disruption of classes and violence in schools, as well as various other crimes and violence in society.

When compiled in short precise statements these facts have a dramatic impact. It was to meet this need for mental health services that the Congress first enacted the Community Mental Health Centers Act in 1963 and subsequently reenacted it over the years.

It is quite clear to one who has participated in the writing of the latest reauthorization of the Community Mental Health Centers Act that Federal funds are intended as short-term seed money to help meet the high costs of starting a new program, and to maintain that program during its early years when reimbursement for service is not readily available. Under this seed money concept, community mental health centers are expected to raise funds from all available sources to replace the declining Federal support, while local, State, and Federal funds are envisioned to contribute to the program only to the extent that other payments are not available.

The legislation, Public Law 94–63, the Community Mental Health Centers Amendment of 1975, requires mental health centers to participate to the maximum feasible extent in the medicare program. However, medicare emphasizes hospital-based inpatient care, and does not allow repayment of most community mental health centers' outpatient services to the elderly and disabled.

Public Law 94–63 also mandates the centers to make maximum efforts to obtain reimbursement through their State medicaid plan. Title XIX, however, has been written in a way which virtually excludes most centers from participation in the program.

The result of the language of titles XVIII and XIX has been that the community mental health centers have relied primarily upon State and Federal Government funding to operate their programs.

The amendments that we are introducing today are designed to rectify this situation in which Congress is encouraging third party reimbursement for community mental health services, but the existing law does not permit it.

The bill is an attempt to eliminate the barriers to third-party reimbursement for the services provided our elderly and disabled citizens through the community mental health center system.

Mr. President, I offer this bill to my colleagues for review and ask their support for it in this Congress.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 47

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a)(1) subsection 1861(c) of the Social Security Act is amended by inserting "or community mental health center" before the period at the end thereof.

(2) Section 1861(e) of such Act is amended—

(A) by inserting "Qualified Provider of Inpatient Services," before "Hospital" in the heading; and

(B) by inserting after "(e)" the following new sentence: "Except as provided in subsection (F)(1), the term 'qualified provider of inpatient service' means a hospital."

(3) Section 1861(f) of such Act is amended to read as follows:

"Mental Health Service Providers

"(f)(1) the term 'qualified providers of inpatient services' as it relates to mental health care means a psychiatric hospital or a community mental health center.

"(2) The term 'psychiatric hospital' means an institution which—

"(A) is primarily engaged in providing, by or under the supervision of physician, psychiatric services for the diagnosis and treatment of mentally ill persons;

"(B) satisfies the requirements of paragraphs (3) through (9) of subsection (e);

"(C) maintains clinical records on all patients and maintains such records as the Secretary finds to be necessary to determine the degree and intensity of the treatment provided to individuals entitled to inpatient insurance benefits under part A;

"(D) meets such staffing requirements as the Secretary finds necessary for the institution to carry out an active program of treatment for individuals who are furnished services in the institution; and

"(E) is accredited by the Joint Commission on Accreditation of Hospitals.

In the case of an institution which satisfies subparagraphs (A) and (B) of the preceding sentence and which contains a distinct part which also satisfies subparagraphs (C) and (D) of such sentence, such distinct part shall be considered to be a 'psychiatric hospital' if the institution is accredited by the Joint Commission on Accreditation of Hospitals or if such distinct part meets requirements equivalent to such accreditation requirements as determined by the Secretary.

"(3) The term 'community mental health center' means an entity which meets the definition of such term in the Community Mental Health Centers Act and the standards set for community mental health centers in regulations of the Secretary prescribed pursuant to that Act.".

(4) Section 1961(s)(2) of such Act is amended—

(A) by striking out "and" at the end of subparagraph (C);

(B) by adding "and" after the semicolon at the end of subparagraph (D); and

(C) by adding at the end thereof the following new subparagraph:

"(E) 'community mental health center services', which means active diagnostic, therapeutic, or rehabilitative services which are furnished on an outpatient, partial hospitalization, or similar basis (as described by the Secretary) by a community mental health center which meets the definition of such centers in the Community Mental Health Centers Act, whether such services are provided in the center facility or in dispersed service elements affiliated with the center; *Provided,* That such services are furnished by or under the direct supervision of a professional member of the center staff;".

(5) Section 1861(u) of such Act is amended by inserting "community mental health center" after "hospital,".

(6) Section 1861(z) of such Act is amended by inserting "community mental health center," after "hospital," in the matter preceding paragraph (1).

(b)(1) Section 1812(c) of such Act is amended—

(A) by inserting "or community mental health centers" after "inpatient of a psychiatric hospital", and

(B) by inserting "or center" after "such a hospital".

(2) Section 1816(a) of such Act is amended by inserting "community mental health centers," and "hospitals," in clause (1).

(3) Section 1835(a)(2)(B) of such Act is amended by striking out "(C), and (D)" and inserting in lieu thereof "(C), (D), and (E)".

(4) Section 1863 of such Act is amended by striking out "(f)(4)," and inserting in lieu thereof "(f)(2)(D),".

(5) Section 1864(a) of such Act is amended—

(A) by inserting "community mental health center," after "hospital" in the first sentence, and

(B) by inserting "community mental health center," after "hospital," in the second sentence.

(6) Section 1877(c) of such Act is amended by inserting "community mental health center," after "hospital,".

SEC. 2. (a) Section 1812 of the Social Security Act is amended by striking out "inpatient hospital services" where it first appears in subsection (a)(1), and inserting in lieu therof "inpatient service furnished by a qualified provider of inpatient services".

(b) The following provisions of title XVIII of such Act are amended by striking out "inpatient hospital services" wherever it appears and inserting in lieu thereof 'inpatient services":

(1) subsections (a)(1) (the second place it appears), (b)(1) (the second place it appears), (c), and (e) of section 1812;

(2) subsections (a)(1) and (b)(2) of section 1813;

(3) subsections (a)(2)(A), (C), (D), and (E), (a)(3), (a)(6), (a)(7), (d)(1), (e), (f)(1), (f)(2), (f)(3), and (f)(4) of section 1814;

(4) subsection (e) of section 1835;

(5) subsections (a)(1), (b), (c), (e), (k)(3), (v)(1)(D), (v)(2)(A), and (v)(3) of section 1861;

(6) subsections (a)(4) and (d)(2) of section 1862; and

(7) subsection (b)(3) of section 1866.

(c) The following provisions of title XVIII of such Act are amended by striking out "inpatient psychiatric hospital services" wherever it appears and inserting in lieu thereof "inpatient psychiatric services":

(1) subsections (c) and (e) of section 1812;

(2) subsections (a)(2)(A), (a)(3), and (a)(4) of section 1814;

(3) subsections (c), (v)(2)(A), and (v)(3) of section 1861; and

(4) subsection (b)(3) of section 1866.

(d)(1) The following provisions of title XVIII of such Act are amended by striking out "hospital" (when used as a noun referring to an institutional provider of services) wherever it appears and inserting in lieu thereof "qualified provider of inpatient services.":

(A) subsections (a)(4), (a)(6), (a)(7), (d)(1), (d)(2), (d)(3), (e), and (g) of section 1814;

(B) subsection (b) of section 1815;

(C) subsections (b)(1), (b)(2), (c), and (e) of section 1835;

(D) subsection (b)(5) of section 1842; and

(E) subsections (a)(2), (b)(2), and (b)(3) of section 1861.

(2) The last sentence of section 1813(b)(2) of such Act is amended by striking out "hospitals" and inserting in lieu thereof "qualified providers of inpatient services".

(3) Section 1814(d)(3) of such Act is amended by striking out "hospitals" each place it appears and inserting in lieu thereof "inpatient deductible":

(1) subsections (a)(1), (a)(3), (b)(1), and (b)(2) of section 1813; and

(2) subsection (d)(2) of section 1818.

(f) The following provisions of title XVIII of such Act are amended by striking out "hospital insurance benefits" wherever it appears and inserting in lieu thereof "inpatient insurance benefits";

(1) subsection (b)(2) of section 1813;

(2) subsections (d)(1), (d)(2), (f)(1), (f)(2), and (f)(4) of section 1814;

(3) subsection (b) of section 1816;

(4) subsections (c)(5) and (c)(6) of section 1818;

(5) paragraph (1) of section 1836;

(6) subsections (c), (f)(1), and (f)(3) of section 1837;

(7) subsection (c) of section 1838; and

(8) subsections (a)(1)(A), (c)(1), (c)(2), and (i)(1) of section 1876.

(g)(1) The heading for part A of title XVIII of such Act is amended by striking out "HOSPITAL" and inserting in lieu thereof "INPATIENT".

(2) Section 1811 of such Act is amended by striking out "Hospital and related post-hospital services" and inserting in lieu thereof "inpatient and related post-inpatient services".

(3) The heading of subsection (d) of section 1814 of such Act is amended by striking out "Hospital" and inserting in lieu thereof "Inpatient".

(4) The headings of subsections (e) and (f) of section 1814 of such Act are amended by striking out "HOSPITAL".

(5) The heading of section 1818 of such Act is amended by striking out "HOSPITAL" and inserting in lieu thereof "INPATIENT".

(6) Section 1818(c)(4) of such Act is amended by striking out "hospital insurance program" and inserting in lieu thereof "inpatient insurance program".

(7) Section 1818(c)(5) of such Act is amended by striking out "hospital insurance entitlement" and inserting in lieu thereof "inpatient insurance entitlement".

(8) Section 1861(b) of such Act is amended—

(A) by striking out "Hospital" in the heading;

(B) by inserting "or other qualified provider of inpatient services" after "inpatient of a hospital";

(C) by striking out "by the hospital" in the matter preceding paragraph (1) and inserting in lieu thereof "by the provider";

(D) by striking out "hospital facilities" in paragraph (2) and inserting in lieu thereof "facilities"; and

(E) by striking out "for use in the hospital" in paragraph (2) and inserting in lieu thereof "for use in the facility".

(9) The heading of section 1861(c) of such Act is amended by striking out "Hospital"

SEC. 3. (a)(1) Section 1812(b) of the Social Security Act is amended—

(A) by adding "or" after the semicolon at the end of paragraph (1);

(B) by striking out "; or" at the end of paragraph (2) and inserting in lieu thereof a period; and

(C) by striking out paragraph (3).

(2) Section 1812(c) of such Act is amended by striking out "or in determining the 190-day limit of subsection (b)(3)".

(b) Section 1833(c) of such Act is repealed.

(c) Section 1866(a)(2)(A) of such Act is amended by striking out the last sentence.

SEC. 4. (a) Section 1905(a) of the Social Security Act is amended—

(1) by striking out "and" at the end of paragraph (16);

(2) by redesignating paragraph (17) as paragraph (18); and

(3) by inserting after paragraph (16) the following new paragraph:

"(17) community mental health services, as defined in subsection (1); and".

(b) Section 1905 of such Act is further amended by adding at the end thereof the following new subsection:

"(l)(1) For purposes of paragraph (17) of subsection (a), the term 'community mental health center services' means active diagnostic, therapeutic, or rehabilitative services which are furnished (A) on an outpatient, partial hospitalization, or similar basis (as specified by the Secretary) by a community mental health center within the meaning of paragraph (2), whether such services are provided in the center facility or in dispersed service elements affiliated with the center, and (B) by or under the direct supervision of a professional member of the center staff.

"(2) The term 'community mental health center' means an entity which meets the definition of such term in the Community Mental Health Centers Act and the standards set for community mental health centers in regulations of the Secretary prescribed pursuant to that Act.".

SEC. 5. (a) Section 1902(a)(13) of the Social Security Act is amended—

(1) by inserting ", and clause (17)," after "clauses (1) through (5)" in subparagraph (B);

(2) by inserting ", and clause (17)," after "clauses (1) through (5)" in subparagraph (C)(i); and

(3) by striking out "(16)" in subparagraph (C)(ii) and inserting in lieu thereof "(17)".

(b) Section 1902(a)(14)(A)(i) of such Act is amended by striking out "and (7)" and inserting in lieu thereof ", and clauses (7) and (17),".

SEC. 6. The amendments made by this Act shall apply with respect to items and services furnished on and after the first day of the month following the month in which this Act is enacted.

By Mr. STAFFORD (for himself, Mr. KENNEDY, and Mr. JAVITS):

S. 48. A bill to provide for minimum standards for public health programs directed at identifiable populations; to the Committee on Labor and Public Welfare.

MINIMUM STANDARDS FOR PUBLIC HEALTH PROGRAMS

Mr. STAFFORD. Mr. President, I am introducing, along with Senator KENNEDY and Senator JAVITS, a bill to provide for minimum standards for preventive public health programs. It is the goal of this legislation to have the Secretary of Health, Education, and Welfare develop minimum public health standards to maintain the preventive health care programs for this Nation.

The future enactment of national health legislation will overshadow the need for continued preventive public health programs by the sheer magnitude of the program. The need for this legislation is based on concerns brought to my attention by the former commissioner of health in Vermont, Dr. Anthony Robbins, that public health service programs historically have been eliminated when other major industrialized nations have enacted national health insurance, only to be reinstituted at a later time when it is determined that the need still exists for preventive public health programs.

It is time that the Federal Government seriously organize itself to meet this future challenge. I ask unanimous consent that an article written by Dr. Robbins, which appeared in the New England Journal of Medicine, be printed in the RECORD at this point since it very concisely sets the stage for this legislation.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE THREAT OF NATIONAL HEALTH INSURANCE TO PREVENTIVE PROGRAMS

Nearly 60 years ago, the Medical and Chirurgical Faculty of Maryland was issued a warning strikingly relevant today:

"With the appropriations for health insurance running into millions of dollars annually it goes without saying that legislative bodies will not materially increase the appropriations for their health departments. Owing to this fact, there is a decided probability of sickness insurance acts endangering the very existence of State health departments by absorbing all of the funds available for health work. Our statesmen and lawmakers must, therefore, be careful that proper and ample provisions are made for health machinery in any sickness insurance act.[1]"

I hope the United States is closer to National Health Insurance now than it was in 1917, but I share the concern of Drs. Warren and Sydenstricker that, in providing for the cost of personal health services, we do not lose sight of the need to preserve and maintain population-directed and preventive health programs. Immunizations, tuberculosis control, venereal-disease programs and pediatric prevention programs have benefits that extend beyond individuals to whole populations. Protection must remain in place for populations at risk from hazards such as lead paint, malnutrition, rats, occupational exposures, unsafe drinking water and foodborne illness. Yet it seems to me that the benefits of preventive health measures for target populations may be imperiled by the politics of achieving, at long last, national insurance for personal health services.

The total cost of population-directed and preventive programs in the United States, both in and out of government health departments, is less than five billion dollars annually, or less than 4 per cent of the total cost of health services. National health insurance will not sustain these public-health programs; it will pay only for the personal-health-service components. Why should that concern us? Surely, the public-health programs are well established and will continue. Or will they?

Both the British and Canadian experiences with national health insurance suggest that the United States should take special care to protect public-health programs in an era dominated by personal health services. For example, many of us will believe, as physicians in Britain and Canada did, that since national health insurance pays for doctors' visits and pays for vaccines, adequate immunization levels will be maintained. Not so. In both Britain and Canada, after several years of national health services and provincial sickness insurance schemes, health programs directed at hazards to the population are now being redesigned, revived and rebuilt to recapture the target populations for effective preven-

tion.[2] In short, the notion that personal health services could substitute for public health programs was wrong.

Anyone who has followed Congressional activity around national health insurance is aware that each proposal has a price tag in "new dollars." (These are dollars not found in current government health programs, state or federal). The tags range from $73 billion, for the most expensive Kennedy bill, to $3.6 billion for the Long-Ribicoff program for catastrophic-illness coverage.[3] Each sponsor manipulates the numbers to make the price as low as possible. One way this has been done is to deduct expenditures for population-directed and preventive programs currently financed by the government from the new dollar cost of national health insurance. However, national health insurance will pay for only personal-health-services components of these programs, omitting outreach, monitoring, and environmental-control efforts in the process. In other words, Congress may gut productive public-health activities under the mistaken belief that they would be sustained by national health insurance.

How can we avert this setback? Could not national health insurance and better population-directed, preventive programs emerge together? Of course they could. Minimum standards for public-health programs directed at identifiable populations, can be specified both by content and outcome. Every state and locality could then be required to meet these standards before the federal government extended insurance coverage for personal health services. Surely, it is only reasonable to ask that people receive these highly cost-effective public-health benefits before tax dollars are spent on personal health services. This process need not delay the arrival of national health insurance, since federal cost sharing with states and localities should encourage quick achievement of the essential minimum standards.

As a first step, we should ask the Congress to fund a project by the Center for Disease Control or by the Institute of Medicine of the National Academy of Sciences to develop such standards. Unlike the ordeal of standard setting by PSRO's, I think this job could be done in a year. Professional agreement should be far easier to achieve in this limited area of medicine than in the expanse of personal health services. Once set, the standards may be incorporated into a special cost-sharing provision of all the national-health-insurance proposals in the next Congress. It would be unique perhaps, but extremely worthwhile, if we could avoid the mistakes of others, and maintain our most effective public-health programs while generating, at least, nationwide financial protection for personal health services.

Vermont State Health Department, Burlington, Vt.

ANTHONY ROBBINS, M.D.

Mr. STAFFORD. Mr. President, programs to protect against tuberculosis, venereal disease, and other communicable diseases are important to the public health of this Nation and should be maintained as preventive health measures for the protection of our children and, therefore, it is the purpose of this bill to require the Secretary of Health, Education, and Welfare to publish a plan and standards for preventive public health programs as soon as possible. We should not wait to see if history will teach us the same lesson that it taught Great Britain and Canada because polio, rubella, and scarlet fever attack our children first and they will pay the price for our inaction.

Mr. President, I ask that a text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 48

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title V of the Public Health Service Act (42 U.S.C. 201) is amended by adding at the end thereof the following new section:

"PUBLIC HEALTH PROGRAMS; STANDARDS

"SEC. 514. (a) The Secretary, in cooperation with appropriate professional entities and individuals, shall establish within one year after the date of enactment of this section standards with respect to preventive health care for indentifiable populations within public health programs funded under this Act. Such standards shall be developed to identify populations in need and to maintain population-directed preventive health programs.".

By Mr. MATHIAS:

S. 49. A bill to establish a Small Business Administrative Review Court; to the Committee on the Judiciary.

SMALL BUSINESS ADMINISTRATIVE REVIEW ACT

Mr. MATHIAS. Mr. President, I send to the desk the Small Business Administrative Review Act, a measure to enable small businessmen and women to obtain review of their rights at minimum expense to them and to the taxpayer. This bill has been developed with the cooperation and support of the National Federation of Independent Business, NFIB, which is properly concerned, as I am that their nearly a half million members, and all other small businesses throughout the country, have equitable access to a forum when confronted with a Federal order, citation, or fine. This bill is designed to promote due process and to rationalize the application of the many regulatory controls on small business.

Various agencies, departments, and commissions of the Federal Government are turning out regulations at a rate unheard of not many years ago. The small and independent business people in this country can hardly keep up with the mushrooming number of regulation-promulgating organizations, much less the regulations themselves. These regulations, though well intentioned, are for the most part written by lawyers in the language of lawyers. Sometimes little thought is given to the actual effect of their strict application.

In many cases which I am sure have been brought to the attention of my colleagues, the practical effect of an order, fine, or citation on a particular business is not only inequitable but frequently borders on the ludicrous. This is not to say that all regulations are inherently bad; many serve a necessary purpose. Unfortunately, no matter how carefully they are drafted, cases will arise in which the effect of their application does not fit the subject involved, or agents of the Federal Government will interpret them in inconsistent ways.

When confronted with a Federal order, citation, or fine considered unjustified, any business generally has two avenues of redress. It can appeal to the administering agency or it can take the matter to court. Regrettably, in many instances neither of these options can be effectively employed by small business.

If the small business decides to appeal to the administering agency, the odds are stacked against him. First, he cannot afford to send someone to Washington or to a regional office to verbally present the case, as is often done by large corporations. The small businessman must, therefore, rely on a written appeal in which he cannot answer questions or explain details which he may not recognize as pertinent.

Further, there is a natural problem when an employee of an agency reviews the decisions of another employee within the same agency. While it would be unfair to charge a conscious bias, the frame of reference and mutual experience of these employees are often similar. As a result, a truly independent review is difficult, if not impossible.

If the small businessman decides to appeal to a Federal court, the cost of such appeal will likely be greater than the amount involved. Additionally, the length of time between filing and decision is so great, the prolonged irritation, let alone the cost, probably is not worth it. Small business people therefore, often choose not to go to court thereby waiving their right to review.

As a result, for all practical purposes small business has no avenue of redress. The options provided are either too expensive or inherently biased. It is to this problem that the Small Business Administrative Review Act addresses itself.

The Small Business Administrative Review Act is directly based on the highly successful experience of the U.S. Tax Court in the conduct of "small tax cases." This bill establishes a court of limited jurisdiction which will only hear cases involving Federal orders, citations, and fines with a value of $2,500 or less. The court may rescind all or any part of a fine, citation, or order which it feels is inappropriate to the alleged offense, is inconsistent with prior interpretations of the regulation, or is simply inequitable.

The court is not one to decide whether or not the various regulations which the bureaucracy promulgates are good or bad. It merely will attempt to introduce a little common sense and equity into the application of those regulations. Criminal matters and those within the existing jurisdiction of the U.S. Tax Court, the Court of Claims, and the Customs Court do not lie within the jurisdiction of the Small Business Administrative Review Court. Any citizen, corporate or private, may petition the court for a hearing, but the jurisdiction is such that almost inevitably the preponderance of cases will focus on small business.

The rationale for the $2,500 limit is twofold. First, it is generally the small actions which are being foregone because

[3] Committee on Finance of the United States Senate: National health insurance: brief outline of pending bills. Washington, DC, Government Printing Office, 1974.

of cost. A very costly order is one which will be most likely handled by an attorney under the present system. Small fines, orders, or citations, however, are not being challenged because the dollar costs of challenging them exceed the dollar value of the order. Second, this court's mandate is to act with all due speed on petitions. Large and very high dollar value actions would tend to bog down a court, thus frustrating the small petitioners who now must wait through tremendous backlog.

To further insure that costs of litigation remain low and rapid review is achieved, the bill draws three key points directly from "small tax cases" of the U.S. Tax Court. First, decisions rendered by the court are not appealable. Both parties waive their right of appeal to any other jurisdiction once the case is before the Small Business Administrative Review Court. Quite obviously the purpose is to prevent the long and expensive appeals process when it can reasonably be presented. But because there is no appeal, decisions rendered by the court are not precedential. No decision made by the court can be used as precedent in any other court. Thus, the court cannot establish its own body of law outside the normal process of judicial review.

Finally, the court in practice should be very liberal in its conduct of procedure and evidence to encourage the individual to represent himself before the court. While the petitioner has an option to employ an attorney if so desired, he is not required to employ one in practice. Thus, the form used by the petitioner should be very simple as is the one page form now used by the U.S. Tax Court for its small tax cases. Additionally, the filing fee has been set at $10, an amount that can most likely be afforded by all.

To look for a moment at the experience of small tax cases before the U.S. Tax Court provides a good illustration of what I am attempting to do in a parallel area. There the time between the filing of a petition and a decision is 10 months and 3 months between trial and opinion; 90 to 95 percent of these cases find the individual acting as his own counsel. Finally, the Tax Court is neither a patsy for the individual nor the Government; small tax cases have been decided almost 50–50 between the two groups.

Mr. President, I am not here asking that a new bureaucracy be created to control already existing bureaucracies. Under a sunset provision I have drafted, this act would expire in 5 years unless Congress specifically acts to renew the court. The chief judge will be required to prepare a report to the Congress which will provide an assessment of the performance, the amount of use and other information which will enable Congress to determine whether or not to extend the life of the court. Thus, Congress will retain control over the size and duration of the court and will not be creating another expensive bureaucratic institution. In fact, Mr. President, this court is established on a trial basis because there is no way to determine demand on the court. But if it succeeds in alleviating many of inequities currently faced by small business, as I believe it will, then we will have taken a significant step forward in achieving due process for a group of citizens whose enterprises are vital to our society and economy, but who often find their concerns neglected.

Mr. President, I ask unanimous consent that the text of S. 49, the Small Business Administrative Review Act, be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 49

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Small Business Administrative Review Act".

SEC. 2. The Congress finds that the number and scope of administrative orders, citations, and fines has grown so substantially that the economic resources of the small business community are being consumed excessively by defending against contested orders. The ability to receive a fair hearing in a forum which had adequate jurisdiction is many times lost to the small businessman. The cost of such action is often greater than compliance with the contested decision. This barrier to adequate review of these administrative orders, citations, and fines amounts to a denial of due process. In order to correct this inequity the Congress has determined that an Administrative Review Court should be created which will allow good faith challenges without excessive cost to the public.

TITLE I

SEC. 101. There is established as an independent agency within the Executive Branch of the Government, a Small Business Administrative Review Court.

SEC. 102. (a) The Small Business Administrative Review Court hereinafter referred to as the "Court", shall be composed of a Chief Judge and such Judges as may be necessary to fulfill the functions of the Court.

(b) Judges of the Court shall be appointed by the President, by and with the advice and consent of the Senate, solely on the grounds of fitness to perform the duties of the office.

(c) Each Judge shall receive salary at the rate of $40,000 per annum, to be paid in monthly installments.

* * * * *

on duty and away from their designated stations, subject to the same limitations in amount as are now or may hereafter be applicable to U.S. Customs Court.

(e) The term of office of all Judges of the Court shall be 5 years and no individual shall be eligible to serve more than one term.

(f) Judges of the Court may be removed by the President before expiration of the 5-year term, after notice and opportunity for public hearing, for inefficiency, neglect of duty or malfeasance in office, but for no other cause.

(g) A Judge of the Court removed from office in accordance with subsection (e) shall not be permitted at any time to practice before the Court.

SEC. 103. The Court shall be organized as follows—

(a) SEAL—The Court shall have a seal which shall be judicially noticed.

(b) DIVISIONS—The Chief Judge may from time to time divide the Court into divisions of one or more Judges, assign Judges of the Court to divisions, and in the case of a division with more than one Judge, designate the Chief Judge of said division. If a division, as a result of a vacancy or the absence or inability of a Judge assigned thereto to serve, is composed of less than the number of Judges designated for the division, the Chief Judge may assign other Judges to the division or direct the division to proceed with the transaction of business without awaiting any additional assignment of Judges thereto.

(c) The principal office of the Court shall be in Washington, D.C., but the Court or any of its divisions may sit at any place within the Fourth Judicial Circuit.

(d) The times and places of the sessions of the Court and its divisions shall be prescribed by the Chief Judge with the intent to secure reasonable opportunity for affected parties to appear before the Court or any of its divisions, with as little inconvenience and expense to the affected parties as is practicable.

SEC. 104. (a) The Chief Judge is authorized to appoint and fix the compensation of such other personnel as the said Chief Judge deems advisable, in accordance with the provisions of Title 5 of the United States Code.

(b) The employees of the Court shall receive necessary travel expenses and expenses for subsistence while traveling on duty and away from their designated stations as provided in Title 5 of the United States Code.

SEC. 105. (a) The Court shall have jurisdiction over any fine, citation, or order issued by a Department or Agency of the Federal Government to any citizen or resident alien of the United States, the direct dollar value, or effect of such fine, citation, or order being $2,500 or less, except that no case within the jurisdiction of the United States Tax Court, the United States Customs Court, United States Court of Military Appeals, or the United States Court of Claims shall have concurrent jurisdiction in the Court.

(b) The Court shall be without jurisdiction until such time as the party affected by the fine, citation, or order files a petition with the Court, the filing of which shall in no instance be later than sixty days following receipt by petitioner of notice of the fine, citation, or order.

(c) The Court may rescind any fine, citation, or order, or part thereof, upon finding the fine, citation, or order is inappropriate to the alleged offense, inconsistent with previous interpretation of the pertinent regulations, or is not equitable, but in no instance shall the Court base its decision on the legality or constitutionality of an administrative rule or regulation.

(d) No decision rendered by a Court of concurrent jurisdiction is appealable to the Small Business Administrative Review Court, nor is any decision rendered by said Small Business Administrative Review Court appealable to any other Court.

SEC. 106. No fine, citation, or order as defined by Sec. 105(a) shall be enforced once petitioner, in good faith, has filed the appropriate petition with the Court, until a decision has been rendered or until jurisdiction is denied, except when in the judgement of the respondent, the failure to so enforce would result in imminent danger to the health or safety of any person.

SEC. 107. (a) A report upon any proceeding instituted before the Court and a decision thereon shall be made as quickly as practicable. The decision shall be made by a Judge in accordance with the report of the Court, and such decision so made shall, when entered, be the decision of the Court.

(b) It shall be the duty of the Court and of each division to include in its report upon any proceeding its findings of fact or opinion or memorandum opinion. The Court shall report in writing all of its findings of fact, opinions, and memorandum opinions.

(c) A decision of the Court (except a decision dismissing a proceeding for lack of jurisdiction) shall be held to be rendered upon the date that an order specifying the Court's decision is entered in the records of the Court. If the Court dismisses a proceeding for reasons other than lack of jurisdiction and is unable from the record to determine the fine, citation, or order of the respondent,

or if the Court dismisses a proceeding for lack of jurisdiction, an order to that effect shall be entered in the records of the Court, and the decision of that Court shall be held to be rendered upon the date of such entry.

(d) If a petition has been filed by an eligible petitioner, a decision of the Court dismissing the proceeding shall be considered as a decision that the respondent has acted properly. An order specifying action of the respondent shall be entered in the records of the Court unless the Court cannot determine the action of the respondent from the record in the proceeding, or unless the dismissal is for lack of jurisdiction.

SEC. 108. For the efficient administration of the functions vested in the Court or any division thereof, any Judge of the Court, the Clerk of the Court or his deputies, as such, or any other employee of the Court designated in writing for the purpose by the Chief Judge, may administer oaths, and any Judge of the Court may examine witnesses and require, by subpoena ordered by the Court or any division thereof and signed by the Judge (or by the Clerk of the Court or by any other employee of the Court when acting as deputy clerk);

(1) the attendance and testimony of witnesses, and the production of all necessary returns, books, papers, documents, correspondence, and other evidence, from any place in the United States at any designated place of hearing, or

(2) the taking of a deposition before any designated individual competent to administer oaths. In the case of a deposition, the testimony shall be reduced to writing by the individual taking the deposition or under his direction and shall then be subscribed by the deponent.

(a) Any witness summoned or whose deposition is taken under Sec. 108 shall receive the same fees and mileage as witnesses in Courts of the United States.

(b) Such fees and mileage and the expenses of taking any such deposition shall be paid as follows—

(i) In the case of witnesses for the United States Government, such payments shall be made by the Secretary of the Treasury or his delegate out of any moneys not otherwise appropriated, and may be made in advance.

(ii) In the case of any other witnesses, such payments shall be made, subject to rules prescribed by the Court, by the party at whose instance the witness appears or the deposition is taken.

(c) No decision rendered by a Court of concurrent jurisdiction is appealable to the Small Business Administrative Review Court, nor is any decision rendered by said Small Business Administrative Review Court appealable to any other Court.

TITLE II

SEC. 201. The Court is authorized to impose a fee in an amount not in excess of $10.00 to be fixed by the Court for the filing of any petition for the redetermination of a fine, citation, or order as defined by Sec. 105 of this Act.

SEC. 202. (a) The United States Government shall be represented by the Attorney General or his delegate or by the Chief Counsel of the affected Department or Agency or his delegate in proceedings before the Court.

(b) The petitioner shall be represented in accordance with the rules of practice prescribed by the Court, provided;

(1) any individual petitioner may appear for himself upon adequate identification to the Court; and

(2) a petitioner corporation may be represented by a bona fide officer of the corporation upon permission granted by the discretion of the Court.

SEC. 203. The proceedings of the Court and its divisions shall be conducted in accordance with such rules of practice and procedure (other than the rules of evidence) as the Court may prescribe and in accordance with the rules of evidence applicable in trials without a jury in the United States Court of the District of Columbia.

SEC. 204. The mailing by certified mail or registered mail of any pleading, decision, order, notice, or process in respect of proceedings before the Court shall be held sufficient service of such pleading, decision, order, notice, or process.

SEC. 205. All reports of the Court and all evidence received by the Court and its divisions, including a transcript of the stenographic report of the hearings, shall be public records open to inspection. Except that after the decision of the Court in any proceeding has become final, the Court may, upon motion of the taxpayer or the respondent, permit the withdrawal by the party entitled thereto of originals of books, documents, and records, and of models, diagrams, and other exhibits, introduced in evidence before the Court or any division; or the Court may, on its own motion, make such other disposition thereof as it deems advisable.

TITLE III

SEC. 301. A Department or Agency of the United States Government which imposes a fine, citation, or order which would qualify under Sec. 105(a) of Title I of this Act shall notify the affected party of the existence of this Act and procedures for petitioning the Court.

SEC. 302. The Chief Judge of the Court shall submit a report to the President and the Congress, not later than four years after enactment of the Act, which shall include, but not be limited to:

(a) an assessment of the success of the Court in fulfilling its functions,

(b) recommendations for the Courts continuation, modification, or termination,

(c) use of the Court,

(d) Departments or Agencies of the United States Government most frequently challenged in the Court, and,

(e) any other facts which may assist the Congress to determine the future of the Court.

SEC. 303. This Act shall expire five years from the date of enactment.

SEC. 304. There are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this Act.

SEC. 305. The Court is authorized to make such expenditures (including expenditures for personal services and rent at the seat of Government and elsewhere, and for law books, books of reference, and periodicals), as may be necessary efficiently to execute the functions vested in the Court. All expenditures of the Court shall be allowed and paid, out of any moneys appropriated for purposes of the Court, upon presentation of itemized vouchers therefor signed by the certifying officer designated by the Chief Judge.

SEC. 306. All fees received by the Court shall be recovered into the Treasury as miscellaneous receipts.

SEC. 307. This Act shall take effect on January 1st of the year following the date of its enactment.

By Mr. HUMPHREY (for himself, Mr. JACKSON, Mr. KENNEDY, Mr. MCGOVERN, Mr. WILLIAMS, Mr. ANDERSON, Mr. MATSUNAGA, Mr. SARBANES, and Mr. CASE):

S. 50. A bill to establish and translate into practical reality the right of all adult Americans able, willing, and seeking to work to full opportunity for useful paid employment at fair rates of compensation; to combine full employment, production, and purchasing power goals with proper attention to balanced growth and national priorities; to mandate such national economic policies and programs as are necessary to achieve full employment, production, and purchasing power; to restrain inflation; and to provide explicit machinery for the development and implementation of such economic policies and programs, and for other purposes; to the Committee on Labor and Public Welfare, by unanimous consent, and if and when reported from that committee to the Committee on Banking, Housing and Urban Affairs for not to exceed 60 days.

FULL EMPLOYMENT AND BALANCED GROWTH ACT OF 1977

Mr. HUMPHREY. Mr. President, today I am again introducing S. 50—the Full Employment and Balanced Growth Act of 1977. Congressman AUGUSTUS HAWKINS has introduced an identical bill in the House, and it has been designated H.R. 50.

The 1977 version of the Full Employment and Balanced Growth Act has been significantly revised since Congressman HAWKINS and I introduced it at the beginning of the 94th Congress. We have made many of the changes that were suggested during hearings on the bill last year, as well as changes suggested by a number of concerned citizens who took their valuable time to write us and talk with us about it. The changes which Congressman HAWKINS and I made in the Full Employment and Balanced Growth Act were agreed to by the House Committee on Education and Labor on September 16 of last year, and should answer the reservations expressed by constructive critics during the past year.

At the same time, I want to emphasize that nothing has altered the legislation's basic aim of reducing unemployment and inflation, and providing new ways of coordinating economic policy between the President and Congress in order to achieve our Nation's economic goals.

Enactment of the Full Employment and Balanced Growth Act of 1977 would establish as our Nation's basic economic policy that all Americans are willing, able, and seeking to work should have the opportunity for useful and productive employment at fair wages, and that the earnings of working Americans should be fully protected by restraining and reducing inflation.

To accomplish these goals, our legislation would:

First, require the development of long-term and short-term fiscal and monetary policies to reduce unemployment among adults 20 years of age and older to no more than 3 percent by 1980;

Second, reduce joblessness among teenagers, women and minority groups to that same level as soon as possible through special job training and anti-discrimination provisions;

Third, rely primarily on the private sector for achievement of these employment goals;

Fourth, temporarily utilize federally funded public works, job training, and public employment programs at levels necessary to close the gap between private sector performance and the employment goals of the bill;

Fifth, require, to the maximum extent feasible, that people given the opportunity to move off welfare and unemployment compensation insurance and into jobs; and

Sixth, reduce inflation as rapidly as possible. With the goal that inflation would not be allowed to exceed the rate existing at the time of the bill's enactment.

ACHIEVING FULL EMPLOYMENT AND CONTROLLING INFLATION

The time is ripe for passage of this legislation.

Our economy has weathered three terrible years of underproduction, unemployment, and inflation. The loss to the Nation has been staggering—

Almost $500 billion in lost production of goods and services;

An average of 7 to 8 million American workers jobless at any one time;

A 40 percent shortfall in achieving our national housing goals;

Inner city unemployment rates of 20 percent, 30 percent, even 40 percent and more;

Three million more Americans in poverty;

A financial crisis for many of our Nation's large cities, and increased rural poverty;

Increased crime, increased alcoholism and drug abuse; and

Reduced confidence in our Nation's government.

For a while, we witnessed a pretty good recovery, but it was too short-lived. For the last 7 months, the economy has been stalled, output has been growing very slowly and the unemployment rate has been going up again.

This stop and go pattern, which has been with us since the end of World War II, is the result of poor economic policymaking and poor planning on the part of the Federal Government.

But we are not locked into a future of underachievement. There is nothing that prevents us from looking beyond tomorrow or next year. There is nothing barring us from setting up the procedures and the framework this year that will enable the administration and Congress, in consultation with State and local governments and the private sector, to plan and manage the economy on both a long- and short-term basis to reach and sustain full employment, balanced growth, and stable prices. Instead of continuing to wring our hands in anticipation of future losses, we can set the wheels in motion now to reduce adult unemployment from its present official level of 8.1 to 3 percent by 1980. We can adopt the comprehensive fiscal and monetary policies and programs to create an economic climate that will mean the production of about $750 billion more in goods and services and employ millions of additional people during the next 4 years. And we can develop effective methods to control inflation.

I know there are critics who say this cannot be done. But we have done it in the past, and we can do it again. The Full Employment and Balanced Growth Act is the best mechanism we have for doing it.

There is no better time to get started than right now. We have a Democratic Congress and a Democratic President who are committed to jobs and full employment. President-elect Carter wants to get our economy moving again, and Congress should help in this by making all the employment and anti-inflation measures in the Full Employment and Balanced Growth Act available to the new President.

MAJOR PROVISIONS OF THE FULL EMPLOYMENT AND BALANCED GROWTH ACT

Mr. President, at this point I would like to discuss the major provisions of the Full Employment and Balanced Growth Act of 1977, particularly the improvements and revisions we have made since last year.

First, the bill requires that not later than January 20 of each year the President must submit a full employment and balanced growth proposal as part of his annual economic report to Congress. That report will set forth his findings on the state of the economy, and will present his proposed long- and short-range fiscal and monetary policies and programs, together with employment, production, and purchasing power goals. All of these elements will be designed to reduce the unemployment rate to 3 percent for workers 20 years of age and older within 4 years following enactment while maintaining adequate safeguards against inflation. This will be equivalent to an unemployment rate for adults, of approximately 4 percent. Youth unemployment requires special measures.

The bill requires that unemployment among teenagers 16 years and older be reduced to the same level as soon as possible, but does not set a time frame for this accomplishment. Many of my colleagues will recall that the 1976 version of the bill, as it was introduced, did not contain a definition of adult unemployment. This gave rise to widespread concern that the numerical adult unemployment goal applied to everyone 16 years and older and that its achievement within 4 years following enactment would create strong inflationary pressures. The problem has been answered by the language of the 1977 measure.

Furthermore, the bill which I have introduced today stresses that primary emphasis be given to expansion of the private sector to achieve the employment goals. To this end, it sets forth the objective of maintaining trends in the ratio of private and public employment similar to those that have existed from 1947 to date. In substance, this means that growth in private employment shall be maintained at least at a level several times higher than growth in public employment. Moreover—and I stress this so there will be no mistake about it—the legislation specifically forbids Government planning of private sector business activity.

My colleagues will also recall that last year's version of the bill, although it contained strong anti-inflation provisions, did not set forth an anti-inflation goal. This has been remedied in the legislation which I have introduced today. It requires that the annual full employment and balanced growth plan to be submitted to Congress by the President, contain proposals to hold all price increases to levels consistent with economic stability and in no case allow inflation to exceed the rate which exists on the day of enactment. As a result of this change we now have an inflation ceiling of not more than 5 percent built into the measure. This rate must be reduced as the economy grows and productivity improves.

EFFECTIVE ANTI-INFLATION SAFEGUARDS

Effective anti-inflation features that the bill requires be made a part of the full employment and balanced growth plan include: Establishment of an early warning information system in order to detect and analyze inflationary trends; proposals to increase the supply of goods, services, labor, and capital in tight markets, with particular emphasis on the supply of food and energy; stockpiling reserves of food and other critical materials to meet emergencies and maintain price stability and adequate farm income; encouragement of labor and management to voluntarily increase productivity; recommendations to strengthen and enforce antitrust laws and improve competition.

Another anti-inflation objective of the bill stresses economy in Government. The President is required to review all existing Government rules and regulations and make recommendations as to whether they serve the public interest. To check unnecessary Government growth, he is also required to annually evaluate 20 percent of the dollar volume of Federal programs to determine whether they adequately serve the purposes for which they were established and to indicate which programs should be eliminated, reduced, or otherwise modified. Thus, every Federal rule, regulation, and program will have been reviewed during the first 5 years following enactment.

COORDINATING FISCAL AND MONETARY POLICIES

To help coordinate monetary and fiscal policies and programs to achieve the purposes of the legislation, the Federal Reserve Board is required to set forth its planned monetary policies for the year ahead and indicate the extent to which these plans support the full employment and balanced growth goals. This in no way means that the Federal Reserve must conform its policies to those of the administration. If the President determines that the Federal Reserve Board's policies are not consistent with the full employment goals, he must make recommendations to the Board and Congress to achieve closer voluntary coordination.

In addition, the bill requires that the President's full employment and balanced growth plan identify and address areas of social and economic priority. These include assuring the availability of labor and capital, income parity for farmers and farm families, and meeting health, child care, and housing needs in both urban and rural America.

Copies of the proposed full employment and balanced growth plan will be presented to State Governors and other appropriate officials for their comments and recommendations to Congress. In this connection, the Governors are required to hold public hearings so that all

interested persons may have the opportunity to respond to the plan and make their views known.

To give broad-based advice and assistance to the President and the Council of Economic Advisers in drafting full employment and balanced growth plans, the bill would establish a 12-member advisory committee. Its members would represent industry, agriculture, labor, consumers, and the public at large.

REACHING THE EMPLOYMENT GOAL

Any gap between the performance of the private sector and the employment goal of the bill would be closed through countercyclical policies and temporary federally funded employment programs. Such policies and programs would be proposed by the President and submitted to Congress and would include: Public service employment, accelerated public works on both an immediate and standby basis, grants to State and local governments to alleviate funding pressures, job training, youth employment, and community development.

These emergency programs would be primarily confined to those regions, communities, and people most in need of assistance. As a result the greatest benefit and the least inflationary impact can be achieved through expenditure of Federal funds. For example, priority attention would be given to chronically depressed urban and rural areas, groups subject to discrimination such as women and minority workers, and unskilled youth. The bill requires that these programs not only provide useful and productive work but that their application be balanced between the private and public sectors of the economy. In this way much of the available funding will be channeled to public works and facilities constructed by private contractors and those who supply them with goods and services.

The bill also requires that every effort be made to eliminate unemployment caused by job discrimination directed at women and minority groups. The time is long past when prejudice can be allowed to rob these people of their right to jobs for which they fully qualify.

The bill would also require that to the maximum extent it is reasonably possible to do so, people be taken off welfare and unemployment compensation program lists and given employment opportunities. In this way those forced into the frustration and anxiety of idleness will be paid to perform useful, productive work rather than being paid to do nothing.

PRODUCTIVITY AND EMPLOYMENT COMBAT INFLATION

Now, Mr. President, there are some people who have been viewing this legislation with shock, dismay, alarm, and just about every other commonly recognized apprehension ever since the bill was introduced last year. Many of these people are not going to be persuaded by the revised bill introduced today. Unlike constructive critics of the measure, they blindly insist that the Nation cannot afford to set itself numerical employment, production and purchasing power goals and strive to achieve them within a prescribed and reasonable period of time without unleashing unacceptable inflation. They declare that the Nation cannot afford full employment for its people. They say that we are going to have to continue shortchanging millions of willing, productive workers by consigning them to the welfare and unemployment dole. How is that for a vision of America's future?

I do not know where these people learned their economics—probably at the same place they lost their faith in the people and Government of this Nation to give everybody a chance to earn a decent living.

Just look at the figures for a moment. Unemployment cost the Federal Government an extra $20 billion alone last year in welfare and jobless payments. Every 1-percent increase in the unemployment rate also means $14 billion in lost tax revenue. Compare that with the $187 billion a year in additional production of goods and services that a full employment economy would make possible during the next 4 years.

They say we cannot afford it. The truth of the matter is we cannot afford to fail to make this investment in ourselves and in our future.

CONGRESSIONAL BUDGET OFFICE ANALYSIS

Last year the Congressional Budget Office performed an analysis of the potential cost of the Full Employment and Balanced Growth Act. CBO found that after 24 months of operation, federally funded programs to reduce unemployment among those 18 years and older to 3.5 percent of the labor force could have a net cost of $8 to $16 billion after offsetting reductions in welfare and unemployment compensation payments and increased-tax revenues are taken into account. Moreover, the net cost estimate range was predicated on the assumption of broader public service employment than the 1977 bill would permit. It may well be that the CBO cost estimate range could be cut in half because of changes in the revised legislation.

As far as inflation is concerned, the CBO study estimated that achieving the 3.5 percent unemployment rate might increase the rate of inflation about 0.6 percentage points a year between 1977 and 1982. Again, it should be borne in the mind that the estimate was based on the assumption of much broader public service employment than the revised version of the bill makes possible.

I think those who condemn the Full Employment Balanced Growth Act out of hand on the inflation score have got their economics upside down. Despite the history of the past 25 years, they are still insisting that inflation will strangle us when we start approaching a full employment economy. What really happens—and all they have to do is look back over the last 3 or 4 years for convincing evidence of this—is that inflation goes up when employment and productivity go down.

The only way to beat inflation is to get the people of this country back to work and let the free competitive enterprise system go into high gear. There is no question we have got to keep a watchful eye on inflationary tendencies but not to the exclusion of effective action. We have been driving in first gear on a four-lane highway too long.

THE CHOICE IS CLEAR

Mr. President, the choice is clear before this Congress and the Nation is clear. We either take the economy of the Nation in hand and manage it to produce maximum benefits while controlling inflation or we continue along the same discouraging and tragic path that has wrung us out in the worst recession since the days of the Great Depression and promises to head us right back in the same direction in short order.

The only real choice we have is to adopt the Full Employment and Balanced Growth Act of 1977 printed in its entirety at this point in the RECORD, and a detailed summary of this legislation as well.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 50

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act and the following table of contents may be cited as the "Full Employment and Balanced Growth Act of 1977":

TABLE OF CONTENTS

Sec. 1. Title.
Sec. 2. General findings.

TITLE—ESTABLISHMENT OF GOALS, PLANNING, AND GENERAL ECONOMIC POLICIES

Sec. 101. Statement of purpose.
Sec. 102. Declaration of policy.
Sec. 103. Economic goals and the Economic Report of the President.
Sec. 104. Full Employment and Balanced Growth Plan.
Sec. 105. Economy in government.
Sec. 106. Fiscal and monetary policies.
Sec. 107. Anti-inflation policies.
Sec. 108. Council of Economic Advisers.
Sec. 109. Advisory Committee on Full Employment and Balanced Growth.

TITLE II—COUNTERCYCLICAL, REGIONAL STRUCTURAL, AND YOUTH EMPLOYMENT POLICIES

Sec. 201. Statement of purpose.
Sec. 202. Countercyclical employment policies.
Sec. 203. Coordination with State and local government and private sector economic activity.
Sec. 204. Regional and structural employment policies.
Sec. 205. Youth employment policies.
Sec. 206. Full Employment Office and reservoirs of employment projects.
Sec. 207. Income maintenance and full employment policies.

TITLE III—POLICIES AND PROCEDURES FOR CONGRESSIONAL REVIEW

Sec. 301. Statement of purpose.
Sec. 302. General Congressional review.
Sec. 303. Congressional review of economic goals in President's Economic Report.
Sec. 304. Congressional review of Full Employment and Balanced Growth Plan.
Sec. 305. Division of Full Employment and Balanced Growth.
Sec. 306. Exercise of rulemaking powers.

TITLE IV—GENERAL PROVISIONS

Sec. 401. Nondiscrimination.
Sec. 402. Labor standards.

Sec. 403. Authorizations.
Sec. 404. Definitions.

GENERAL FINDINGS

SEC. 2. (a) The Congress finds that the Nation has suffered substantial and increasing unemployment and underemployment, over prolonged periods of time, imposing numerous economic and social costs. Such costs include the following:

(1) The Nation is deprived of the full supply of goods and services, the full utilization of labor and capital resources, and the related increase in individual income and well-being that would exist under conditions of genuine full employment.

(2) Insufficient production is available to meet pressing national priorities.

(3) Workers are deprived of the job security, income, skill development, and productivity necessary to maintain and advance their standards of living.

(4) Business and industry are deprived of the production, sales, capital flow, and productivity necessary to maintain adequate profits, create jobs, and contribute to meeting society's economic needs.

(5) The Nation is exposed to social, psychological, and physiological costs and traumas, including disruption of family life, loss of individual dignity and self-respect, and the proliferation of physical and psychological illnesses, drug addiction, crime, and social conflict.

(6) Federal, State, and local government economic activity is undermined as government budget deficits occur because tax revenues fall and expenditures rise for unemployment compensation, public assistance, and other recession-related services in the areas of criminal justice, drug addiction, and physical and mental health.

(b) The Congress further finds:

(1) High unemployment often increases inflation by diminishing labor training and skills, underutilizing capital resources, reducing the rate of productivity advance, increasing unit labor costs, reducing the general supply of goods and services and thereby generating cost-push inflation. In addition, modern inflation has been due in large measure to errors in national economic policy, including erratic monetary policy, inadequate energy and food policies, and ineffective policies to maintain competition in the private sector.

(2) Although necessary for sound economic policy, aggregate monetary and fiscal policies are inadequate by themselves to achieve full employment production and to restrain inflation. Such policies must be supplemented by more direct private and public measures to create employment and reduce inflation.

(3) Genuine full employment has not been achieved, in part, because explicit short- and long-term national economic goals and priorities have not been established by the President, the Congress, and the Federal Reserve. Moreover, public and private economic policies have not been organized and coordinated to achieve national goals and priorities.

(4) Increasing job opportunities and full employment make a major contribution to the abolition of discrimination based upon sex, age, race, color, religion, national origin, and other improper factors.

(c) The Congress further finds that an effective full employment and balanced growth policy should (1) be based on the development of explicit economic goals and policies involving the President, the Congress, and the Federal Reserve, as well as State and local governments, with full use of the resources and ingenuity of the private sector of the economy, and (2) include programs specifically designed to reduce high unemployment due to recessions, and to reduce structural unemployment within regional areas and among particular labor force groups.

(d) The Congress further finds that full employment and balanced growth are important national requirements that will promote the economic security and well-being of all our citizens.

TITLE I—ESTABLISHMENT OF GOALS, PLANNING, AND GENERAL ECONOMIC POLICIES

STATEMENT OF PURPOSE

SEC. 101. It is the purpose of this title to declare the general policies of this Act, to provide an open process under which annual economic goals are proposed, reviewed, and established, to provide for the development of a long-range Full Employment and Balanced Growth Plan, to provide for economy in government measures, to ensure that monetary, fiscal, anti-inflation, and general economic policies are used to achieve the annual economic goals and support the goals and priorities of the Full Employment and Balanced Growth Plan, and generally to strengthen and supplement the purposes and policies of the Employment Act of 1946.

DECLARATION OF POLICY

SEC. 102. (a) Section 2 of the Employment Act of 1946 (15 U.S.C. 1021) is amended to read as follows:

"DECLARATION OF POLICY

"SEC. 2. (a) The Congress hereby declares that it is the continuing policy and responsibility of the Federal Government to use all practicable means, consistent with its needs and obligations and other essential national policies, with the assistance and cooperation of industry, agriculture, labor, and State and local governments, to coordinate and utilize all its plans, functions, and resources for the purpose of creating and maintaining, in a manner calculated to foster and promote free competitive enterprise and the general welfare, conditions which promote balanced growth and useful employment opportunities, including self-employment, for those able, willing, and seeking to work, and to promote full employment, production, and purchasing power.

"(b) The Congress declares and establishes the right of all adult Americans (sixteen years of age or older) able, willing, and seeking work to opportunities for useful paid employment at fair rates of compensation.

"(c) The Congress further declares that inflation is a major national problem requiring improved government policies relating to food, energy, improved fiscal and monetary management, economy in government, the reform of outmoded government rules and regulations, the correction of structural defects in the economy that prevent or seriously impede competition in private markets, and other measures.

"(d) The Congress further declares that it is the purpose of the Full Employment and Balanced Growth Act of 1976 to coordinate, integrate, and improve the policies and programs of the Federal Government, toward achievement of the objectives of such Act through better management, increased efficiency, and attention to long-range as well as short-range problems. Although it is the purpose under the Act to seek diligently and to encourage the voluntary cooperation of the private sector of the economy in helping to achieve the objectives of the Act, no provisions of the Act are intended nor shall be used, with respect to any portion of the private sector of the economy, to provide for Government control of production or employment or allocations of resources, except to the extent authorized under other legislation.

"(e) The Congress further declares that it is the purpose of the Full Employment and Balanced Growth Act of 1977 to maximize and place primary emphasis upon the expansion of private employment, and all programs and policies under the Act shall be in accord with this purpose. In moving toward the goals for reduction of unemployment, the objective shall be to maintain trends in the ratio of private employment to civilian public employment similar to those from 1947 to the time of enactment of the Full Employment and Balanced Growth Act of 1977, which would mean a numerical growth in private employment several times as large as the numerical growth in civilian public employment. Toward this end, the effort to expand jobs to the full employment level shall be in this order of priority: (a) expansion of conventional private jobs through improved use of fiscal and monetary policies and other policies made available under the Full Employment and Balanced Growth Act of 1977; (b) expansion of private employment requiring Federal assistance in connection with some of the priority programs specified in such Act; (c) expansion of public employment under other programs specified in such Act, not including the reservoir projects under section 206 of such Act; and (d) only as a last resort under section 206 of such Act and subject to the limitations therein, the creation of reservoirs of public and private nonprofit employment projects.".

ECONOMIC GOALS AND THE ECONOMIC REPORT OF THE PRESIDENT

SEC. 103. Section 3(a) of the Employment Act of 1946 is amended to read as follows:

"SEC. 3. (a) The President shall transmit to the Congress not later than January 20 of each year an economic report (hereinafter called the 'Economic Report') setting forth for each year—

"(1) current and foreseeable trends in the levels of employment, production, and purchasing power and a review and analysis of economic conditions affecting these economic trends in the United States;

"(2) annual numerical goals for employment, production, and purchasing power that are designed to achieve balanced growth and full employment of the Nation's human and capital resources as promptly as possible;

"(3) a numerical long-term full employment goal which is (A) consistent with the minimum level of frictional unemployment necessary for efficient job search and mobility in the labor force, and (B) consistent with the aggregate long-term economic goals and priorities set forth in the Full Employment and Balanced Growth Plan required under section 3A; and

"(4) the programs and policies for carrying out the policy declared in section 2 of this Act, as well as the numerical economic goals of paragraph (2) of this subsection, together with such recommendations for legislation as the President deems necessary or desirable in order to achieve full employment and balanced growth as promptly as possible.".

FULL EMPLOYMENT AND BALANCED GROWTH PLAN

SEC. 104. The Employment Act of 1946 is amended by adding after section 3 the following new section:

"FULL EMPLOYMENT AND BALANCED GROWTH PLAN

"SEC. 3A. (a) In conjunction with the first Economic Report after enactment of this section, or within ninety days after the enactment of this section, whichever may come earlier, and thereafter in conjunction with each annual Economic Report, the President shall transmit to the Congress a proposed Full Employment and Balanced Growth Plan, prepared with the assistance of the Council of Economic Advisers, and in consultation with the Office of Management and Budget. The Plan shall propose, in quantitative and qualitative terms, and for the number of years feasible, long-term national goals related to full employment, production, purchasing power, and other es-

sential priority purposes, and the major policies and programs, including recommendations for legislation, to achieve such goals and priorities. In developing the goals, the President shall take into account the level and composition of each factor needed to maintain economic balance and full resource use and to meet priority needs.

"(b) The Full Employment and Balanced Growth Plan shall set forth the foreseeable trends in economic and social conditions, provide estimates of the unmet economic and social needs of the Nation, and identify the human, capital, and national resources available and needed for the achievement of the economic and related social goals and priorities established in the Full Employment and Balanced Growth Plan.

"(c) The Full Employment and Balanced Growth Plan shall contain long-term economic goals as follows—

"(1) full employment goals set at the number of jobs to be provided for adult Americans in order to reduce unemployment to the minimum level of frictional unemployment consistent with efficient job search and labor mobility;

"(2) full production goals set at the levels of output estimated to be yielded by achievement of the full employment goals as defined above, with expected improvements in productivity; and

"(3) full purchasing power goals set at levels estimated to be necessary for attaining and maintaining full employment and production while contributing to an equitable distribution of purchasing power.

"(d)(1) In carrying out the provisions of paragraph (1) of subsection (c), the full employment goal shall be consistent with a rate of unemployment not in excess of 3 per centum of adult Americans twenty years of age or older in the civilian labor force, to be attained as promptly as possible, but within not more than four years after the enactment of the Full Employment and Balanced Growth Act of 1977. Concurrently with this, the objective shall be to reduce unemployment among those aged 16 through 19 as rapidly as feasible, including reduction of the ratio of the rate of unemployment among teenagers to the rate of unemployment among those twenty years of age and older as rapidly as feasible. Toward the reduction of unemployment among teenagers, there shall be full utilization of section 205 of the Full Employment and Balanced Growth Act of 1977, and utilization of other provisions of that Act to the extent relevant. In addition, the President shall from time to time make such other recommendations to the Congress as he or she deems desirable to facilitate the reduction of unemployment among teenagers.

"(2) In achieving the goals set forth in subsection (c), the President shall include the objective of holding the annual rate of consumer and other price increases to levels consistent with reasonable price stability. To accomplish this objective, the President shall take full advantage of the specific structural programs called for in title II of the Full Employment and Balanced Growth Act of 1976, which promote the achievement of the full employment goal established in paragraph 1 of subsection (c) without excessive price increases. In selecting appropriate policies and programs for achieving full employment, the President shall have the objective of preventing a rise in the annual rates on the date of enactment of this Act. Achievement of reasonable price stability shall be sought through the methods set forth in section 107 and elsewhere in the Full Employment and Balanced Growth Act of 1976, and shall not be sought through any weakening of the goals and timetable relating to reduction of unemployment.

"(3) Within one year of the date of enactment of the Full Employment and Balanced Growth Act of 1977, the President shall review the full employment goals and timetable required by this section and report to Congress on any obstacles to their achievement, and, if necessary, propose corrective economic measures to insure that the full employment goals are achieved.

"Priorities, Policies, and Programs

"(e) To contribute to the achievement of the general economic goals established in sections 3(a)(2) and 3A(c) of this Act, the Full Employment and Balanced Growth Plan shall propose priority policies and programs that comprise a full employment program that provides productive nonwasteful jobs and that reorder national priorities and employ the jobless in the production of goods and services which add to the strength of the economy, the wealth of the Nation, and the well-being of the people. Such policies and programs shall not be set forth in the programmatic detail developed by specialized Federal agencies, and by others in the public and private sectors, but only sufficiently to furnish an integrated perspective of our needs and capabilities and as a long-run guide to optimum private, Federal, State, and local government action. Priority policies and programs to support full employment and balanced growth shall initially include—

"(1) development of energy, transportation, small business, and environmental improvement policies and programs required for full employment and balanced economic growth, and required also to combat inflation by meeting full economic levels of demand;

"(2) development of policies and programs related to (a) food and fiber requirements for full employment and balanced growth and to help combat inflation, (b) the needed labor force and capital in agriculture to meet food and fiber requirements, (c) the income needs of farmers to encourage production of food and fiber in accord with the above requirements and moving farm families toward parity of income, this including recognizing the economically disadvantaged segments of the agricultural economy which suffer more from underemployment due to seasonal or disaster-related factors than unemployment, (d) measures to discourage the excessive migration of farm families to urban areas, including encouragement of supplementary nonfarm work and income for farm families, and (e) improved equalization of necessary public facilities and services for farm families with those provided for other families;

"(3) the quality and quantity of health care, education and training programs, child care and other human services, and housing, essential to a full economy and moving gradually toward adequacy for all at costs within their means;

"(4) Federal aid to State and local governments, especially for public investment and unemployment related costs;

"(5) national defense and other needed international programs; and

"(6) such other priority policies and programs as the President deems appropriate.

"(f) The President shall establish procedures to insure that members of the Cabinet, relevant regulatory agencies, other relevant officers of the executive branch, and the Chairman of the Advisory Committee on Full Employment and Balanced Growth have an opportunity to review and make recommendations to the President prior to his or her submission of the Full Employment and Balanced Growth Plan to the Congress. The annual reports of departments and agencies shall include reports on any actions and studies undertaken related to the implementation of the Full Employment and Balanced Growth Plan.

"(g) At the time of the submission of the proposed Full Employment and Balanced Growth Plan, the Governor of each State may shall transmit copies of the Plan to the Governor of each State and to other appropriate State and local officials. Within sixty days after the submission to Congress of the proposed Full Employment and Balanced Growth Plan to the Congress, the President submit to the Joint Economic Committee a report containing findings and recommendations with respect to the proposed Plan. Any such report submitted by a Governor shall include the views and comments of citizens within the State, after public hearings have been held within the State. A Governor may, if he or she so desires, submit at any time to the Joint Economic Committee such additional reports or information in respect to matters placed by this Act within the responsibility of the Joint Economic Committee as the Governor deems advisable."

ECONOMY IN GOVERNMENT

SEC. 105. (a) The Congress finds and declares that widespread duplication and contradiction among Federal departments and agencies, the failure to establish long-term priorities, lack of adequate information on the impact of Federal regulations and programs, and the lack of a process for developing more efficient alternatives for achieving the Nation's priorities are impeding the Federal Government in efficiently implementing full employment and balanced growth policies. The Congress further declares that genuine efficiency in Government requires time and planning. Accordingly, it is the purpose of this section to utilize the comprehensive planning framework established by section 104 to improve the efficiency and economy of the Federal Government.

(b) In carrying out this section, the President shall, in conjunction with the submission of each Full Employment and Balanced Growth Plan, submit proposals for improving the efficiency and economy of the Federal Government, including, but not necessarily limited to—

(1) a review of existing Government rules and regulations to determine if they still serve a public purpose and are properly designed; and

(2) an annual evaluation of 20 per centum of the dollar volume of existing Federal programs which are in effect each year, and the submission to Congress of a formal analysis of the economic and social impact and value of each program.

FISCAL AND MONETARY POLICIES

SEC. 106. (e) The Employment Act of 1946 is amended by inserting after section 3A, as added by this Act, the following new section:

"FISCAL AND MONETARY POLICIES

"SEC. 3B. (a) The President's Budget and Economic Report shall be consistent with the Full Employment and Balanced Growth Plan, and the Economic Report shall set forth for each year the following:

"(1) The level and composition of Federal expenditures, measured against estimated capabilities at full employment and production, necessary to support the annual economic goals proposed in section 3 and to support the Full Employment and Balanced Growth Plan, taking into account the role of the private sector and of State and local governments in supporting these purposes. The President shall also make a determination of the extent to which the use of aggregate fiscal and monetary policy, without the supplementary employment policies provided in the Full Employment and Balanced Growth Act of 1977, will achieve the production, employment, purchasing power, and priority goals required in sections 3 and 3A. Whenever the economy is operating at full production and employment, or subjected to excessive overall strain, the general principle to be followed is that priority expenditures established in section 3A(e) shall not

in general be reduced, allowing for some variations for countercyclical purposes, so long as it is feasible to reduce relatively less important expenditures, or to resort to means set forth in paragraph (2) below.

"(2) Federal tax policy consistent with expenditure levels in paragraph (1) of this subsection necessary to (A) balance the Federal budget under conditions of full production, employment, and purchasing power, (B) restrain excessive economic activity and inflation when total demand threatens to exceed the Nation's capabilities at full employment, (C) avoid fiscal drag upon the economy during any periods of substantial economic slack, and (D) contribute to the needed level and distribution of purchasing power.

"(3) A monetary policy designed to assure such rate of growth in the Nation's money supply, such interest rates, and such credit availability, including policies of credit reform, allocation, and international capital flows as are conducive to achieving and maintaining the full employment, production, purchasing power, and priority goals specified in sections 3 and 3A.

"(b) The Board of Governors of the Federal Reserve System shall transmit to the President and the Congress, within fifteen days after the transmission of the Economic Report or the Full Employment and Balanced Growth Plan, whichever may come earlier, an independent statement setting forth its intended policies for the year ahead with respect to its functions, the extent to which these policies will support the achievement of the goals in section 3 and section 3A, and a full justification for any substantial variations from the President's goals and recommendations. If the President determines that the Board's policies are inconsistent with the achievement of the goals and policies proposed under this Act, the President shall make recommendations to the Board and to the Congress to insure closer conformity to the purposes of this Act."

ANTI-INFLATION POLICIES

SEC. 107. (a) Section 3 of the Employment Act of 1946 is amended by adding at the end thereof the following:

"(d) The Economic Report shall each year contain a comprehensive set of anti-inflation policies, including, but not necessarily limited to—

"(1) a comprehensive information system to monitor and analyze inflationary trends in individual economic sectors, including information on the international sector, so that the President and Congress can be alerted to developing inflation problems and bottlenecks;

"(2) the use of monetary and fiscal policy geared to the capabilities of the economy operating at full employment as provided in section 3B;

"(3) programs and policies in the Full Employment and Balanced Growth Plan for increasing the supply of goods, services, labor, and capital in structurally tight markets, with particular emphasis on increasing the supply of food and energy;

"(4) the establishment of stockpile reserves of food and other critical materials in order to meet emergencies such as floods and famines and to maintain reasonable price stability and adequate farm income;

"(5) encouragement to labor and management to increase productivity within the national framework of full employment through voluntary arrangements in industries and economic sectors;

"(6) recommendations to strengthen and enforce the antitrust laws and such other recommendations as are necessary to increase competition in the private sector; and

"(7) recommendations for administrative and legislative actions to promote reasonable price stability if situations develop that seriously threaten national price stability.

COUNCIL OF ECONOMIC ADVISERS

SEC. 108. (a) The second sentence of section 4(a) of the Employment Act of 1946 is amended by inserting "full" immediately after "promote".

(b)(1) Section 4(c)(1) of such Act is amended by inserting immediately before the semicolon a comma and the following: "and the Full Employment and Balanced Growth Plan".

(2) Section 4(c)(4) of such Act is amended by inserting "full" immediately after "maintain".

(c)(1) Section 4(e)(1) of such Act is amended by inserting immediately before the semicolon a comma and the following: "and shall consult with the Advisory Committee established under section 6."

(2) Section 4(e) of such Act is amended by striking out the period at the end of paragraph (2) and inserting in lieu thereof a semicolon, and by adding after such paragraph (2) the following:

"(3) In this connection the Council is authorized and directed to seek and obtain the cooperation of the various executive and independent agencies in the development of specialized studies essential to its responsibilities."

ADVISORY COMMITTEE ON FULL EMPLOYMENT AND BALANCED GROWTH

SEC. 109. The Employment Act of 1946 is amended by adding at the end thereof the following new section:

"ADVISORY COMMITTEE ON FULL EMPLOYMENT AND BALANCED GROWTH

"SEC. 6. (a) To furnish advice and assistance to the Council of Economic Advisers in the preparation and review of the Economic Report and Full Employment and Balanced Growth Plan, there is established an Advisory Committee on Full Employment and Balanced Growth, which shall consist of—

"(1) four members appointed by the President;

"(2) four members appointed by the Speaker of the House of Representatives; and

"(3) four members appointed by the President pro tempore of the Senate.

"(b) The Committee shall elect a Chairman, and shall meet at the call of the Chairman, but not less than twice a year. The members of the Advisory Committee shall be appointed for terms of two years from among representatives of labor, industry, agriculture, consumers, and the public at large, who are especially competent by virtue of background and experience to furnish advice to the Council on the views and opinions of broad segments of the public on matters involved in the formulation and implementation of goals and policies for full employment and balanced growth.

"(c) Each member of the Advisory Committee shall be entitled to be compensated at a rate equal to the per diem equivalent of the rate for an individual occupying a position at level III of the Executive Schedule under section 5314 of title 5, United States Code, when engaged in the actual performance of his or her duties as such a member, and each member shall be entitled to reimbursement for travel, subsistence, and other necessary expenses incurred in the performance of his or her duties.

"(d) The Advisory Committee is authorized to establish regional, industry, and special advisory subcommittees to furnish advice and assistance to it. Each such subcommittee shall consist of at least one member of the Advisory Committee and shall be broadly representative of the particular region or industry, including business, labor, consumer interests, and other interested groups.

"(e) The Chairman of the Council of Economic Advisers shall furnish the Advisory Committee with such personnel, facilities, and services as he or she deems necessary to enable the Advisory Committee to perform its functions under this Act.".

TITLE II—COUNTERCYCLICAL, STRUCTURAL, AND YOUTH EMPLOYMENT POLICIES

STATEMENT OF PURPOSE

SEC. 201. It is the purpose of this title to establish supplementary employment policies to close the employment gap, if one should exist, between the levels of employment achieved through aggregate monetary and fiscal policy and the employment goals established in sections 3 and 3A of the Employment Act of 1946. Accordingly, this title establishes a system of comprehensive and flexible employment policies to create jobs in both the private and public sectors of the economy that encourages the optimum contribution of the private sector and State and local governments toward the achievement of the goals and purposes of this Act. These supplementary employment policies shall vary according to economic conditions and the other actions taken under this Act, but shall have the broad objective of reducing cyclical, structural, regional, and youth unemployment, and unemployment due to discrimination. It is also the purpose of this title to establish a Full Employment Office within the Department of Labor to use special means for training and providing employment for those people who are otherwise unable to find employment. It is the further purpose of this title to mandate improved integration of income maintenance programs and full employment policies.

COUNTERCYCLICAL EMPLOYMENT POLICIES

SEC. 202. (a)(1) The Congress finds and declares that—

(A) the Nation has been unprepared to promptly implement employment policies during periods of economic downturn and resultant high unemployment;

(B) existing policies are so diffused and fragmented at all levels of government that it has been impossible to implement a comprehensive countercyclical employment program in a coordinated manner; and

(C) the lack of a coherent, flexible, countercyclical employment policy reduces the prospects of the Nation solving economic and related social problems which threaten fundamental national interests and objectives, including those specified by this Act.

(2) It is the purpose of this section to require the development of a coherent and flexible countercyclical employment policy, creating jobs in both the private and public sectors that are valuable to States, local communities, and the Nation, and thereby reducing employment gaps that may remain despite the appropriate implementation of other provisions of this Act.

(b)(1) To carry out the provisions of this section, the President shall within ninety days after the date of enactment of this Act transmit to the Congress a comprehensive proposal, together with such legislation as is necessary, which shall establish on a permanent basis the range of supplementary employment policies and programs necessary to reduce high unemployment arising from cyclical movements in the economy. The countercyclical action provided for in this section relates to periods of high unemployment, regardless of the stage of the business cycle.

(2) In establishing the component parts of such a comprehensive proposal, and making a determination of the role of each, the President should consider the following programmatic entities—

(A) countercyclical public service employment;

(B) accelerated public works, including the development of standby public works projects;

(C) State and local countercyclical grant programs as specified in section 203;

(D) the levels and duration of unemployment insurance;

(E) skill training in both the private and public sectors, both as a general remedy, and as a supplement to unemployment insurance;

(F) youth employment programs as specified in sector 205;

(G) a community development program to provide employment in activities of value to the States, local communities (including rural areas), and the Nation; and

(H) augmentation of other employment and manpower programs that would prove helpful in meeting high levels of unemployment from cyclical causes.

(c) To insure that the component parts of the countercyclical proposal establishes an integrated and flexible program, the President shall—

(1) utilize existing employment and training mechanisms as appropriate;

(2) provide for advance planning for countercyclical employment programs among the Federal Departments and agencies;

(3) provide for an automatic trigger or set of coordinated triggers that would implement the program during a period of rising unemployment, and phase out the program when unemployment is appropriately reduced;

(4) insure that allocation of employment assistance takes into account the severity and geographic distribution of unemployment, and the special needs of the unemployment groups within the labor force;

(5) provide for a well balanced combination of job creation and related activities in both the private and public sectors of the economy; and

(6) incorporate effective transitional mechanisms to facilitate individuals assisted under programs developed pursuant to this section to return promptly to regular private and public employment as the economy recovers.

COORDINATION WITH STATE AND LOCAL GOVERNMENT AND PRIVATE SECTOR ECONOMIC ACTIVITY

SEC. 203. (a) As an integral part of the comprehensive countercyclical employment policies established under section 202, the President shall set forth programs and policies to facilitate harmonious economic action among the Federal Government, regions, States and localities and the private sector to promote the (1) achievement of the goals and priorities of this Act and the Employment Act of 1946, and (2) an economic environment in which State and local governments and private sector economic activity and employment will prosper and essential services will be maintained.

(b) As a primary effort to meet the requirements of this section, the President shall within ninety days after the date of enactment of this Act transmit to the Congress legislation creating a permanent grant program related to the stabilization and needed growth of State and local budgets. In formulating this proposal, the President shall endeavor to meet criteria that establish programs which are funded to take account of the fiscal needs and budget conditions of the respective States and localities and their own efforts, with accent upon the rates of unemployment in these respective States and localities.

REGIONAL AND STRUCTURAL EMPLOYMENT POLICIES

SEC. 204. (a) (1) The President shall within one hundred and eighty days after the date of enactment of this Act transmit to Congress a comprehensive regional and structural employment proposal, including such legislation as necessary, designed to reduce the chronic underutilization of human and capital resources in certain areas of the country and in groups within the labor force. In formulating the regional components of such a proposal, the President shall encourage private sector production and employment to locate within depressed regions, inner cities, and rural areas with substantial unemployment. The President's regional employment proposal shall also include an analysis of the extent to which Federal Government tax, expenditure, and employment policies have influenced the movement of people, jobs, and industry from chronic high unemployment regions and areas, and proposals designed to correct Federal policies that have an adverse economic impact upon such regions and areas.

(2) In formulating the structural components of such an employment program, the President shall utilize existing employment and training mechanisms and other existing programs, as appropriate, and such other measures as necessary.

(b) To further meet the requirements of this section, the President shall transmit to the Congress, within one hundred and eighty days after the date of enactment of this Act, legislation providing an institutional means designed to encourage (1) public and private investment in economically depressed regions, inner cities, economic sectors, and rural areas with substantial unemployment; and (2) provide an alternative source of capital funds for local and State governments to finance public facilities. In formulating the legislation required by this section, the President shall include provision for—

(1) long-term loans at rates of interest no higher than the average rate of long-term Treasury borrowings plus service costs;

(2) capitalization through public stock and bond subscriptions, stock purchases by the State governments, local governments, and businesses that benefit from the program, and financial assistance from the Federal Government; and

(3) criteria setting priorities for assistance to State and local government and businesses, with special attention to areas with unemployment rates consistently and significantly in excess of the national average or otherwise suffering severe economic dislocation, to achieve the objective of increasing employment in such areas, and increasing total employment.

YOUTH EMPLOYMENT POLICIES

SEC. 205. (a) The Congress finds and declares that—

(1) serious unemployment and economic disadvantage exist among youths, this group constitutes a substantial portion of the Nation's unemployment, and this significantly contributes to crime, drug addiction, and other social and economic problems;

(2) many youths have special employment needs and problems which, if not promptly addressed, will substantially contribute to more severe unemployment problems in the long run;

(3) a significant number of youths in certain areas even in the best of economic circumstances do not have adequate access to employment opportunities providing effective entry into the labor force; and

(4) existing employment programs for youth are fragmented and inadequate, and the special needs and problems of youth unemployment require the development of a permanent, comprehensive youth employment program which will meet the job needs of youth.

(b) To meet the requirements of subsection (a), the President shall transmit to Congress within ninety days after the date of enactment of this Act legislation creating a comprehensive youth employment program, which—

(1) utilizes the resources and facilities of existing youth employment and training programs that are designed to provide job opportunities for youths,

(2) provides for other policies and programs necessary to provide employment for youths, and

(3) contributes to carrying out the policies of this Act and the Employment Act of 1946.

(c) In formulating such a program, the President shall include provisions designed to—

(1) fully coordinate youth employment activities with other employment and manpower programs;

(2) develop a smoother transition from school to work by fostering a more effective partnership between educational and employment institutions, such as businesses, employer associations, and labor unions;

(3) prepare disadvantaged and other youths with employability handicaps for regular self-sustaining employment through education, training, medical services, counseling, and other support activities;

(4) develop realistic methods for combining training with work, including apprenticeship and on-the-job training in the private sector; and

(5) provide job opportunities for youths in a variety of tasks, including conservation, public service activities, inner city cleanup and rehabilitation, and other jobs of value to States, local communities, and the Nation.

FULL EMPLOYMENT OFFICE AND RESERVOIRS OF EMPLOYMENT PROJECTS

SEC. 206. (a) Further to promote achievement of full employment under this Act, the President, through the Secretary of Labor, shall develop policies, procedures, and programs to provide employment opportunities to adult Americans able, willing, and seeking to work but who, despite a serious effort to obtain employment, are unable to do so in the general economic environment, or through any of the other provisions of this Act.

(b) There is established within the Department of Labor a Full Employment Office to assist the Secretary of Labor in providing the employment opportunities required under subsection (a). Under the supervision of the Secretary of Labor, the Office shall be phased in consistent with subsection (d) of this section.

(c) In meeting the responsibilities to provide job opportunities under subsection (a) and after full utilization of the Comprehensive Employment and Training Act of 1973, the Secretary of Labor shall, as appropriate—

(1) assure that counseling, training, and other support activities necessary to prepare persons willing and seeking work for employment is provided under the Comprehensive Employment and Training Act of 1973, including the use of section 110 of such Act when necessary; and

(2) refer persons able, willing, and seeking to work to job opportunities in the private and public sectors through the existing public employment placement facilities and through the United States Employment Service, including job opportunities in positions drawn from sections 202, 204, and 205 of this Act.

(d) Only to the extent that adult Americans able, willing, and seeking work are not provided with the private job opportunities which are the first and major purpose of this Act, nor provided with job opportunities under section 206(c) or through other programs under this Act, such opportunities shall be provided by the President through reservoirs of federally operated public employment projects and private nonprofit employment projects approved by the Secretary of Labor. Such projects shall not be put into operation less than two years after the enactment of this Act, nor without a finding by the President, transmitted to the Congress, that other means of employment are not yielding enough jobs to be consistent with attainment of the goals and timetable

for the reduction of unemployment set forth in this Act. The Congress hereby establishes the policy that such projects shall be so designed as not to draw any workers from private employment to such reservoir projects. The jobs under such reservoir projects shall be useful and productive jobs. Nonetheless, such jobs shall be mainly in the lower ranges of skills and pay, and toward this end the number of reservoir jobs shall, to the extent practicable, be maximized in relationship to the appropriations provided for such jobs. The number and nature of such reservoirs of employment projects shall be determined in conjunction with the policies and programs of the Full Employment Office established under subsection (b) and the other job creation provisions of this Act. The provisions of this subsection shall be phased in by the President, in conjunction with the annual employment recommendations required under section 3 of the Employment Act of 1946, in order to achieve a rate of unemployment not in excess of 3 per centum as established by section 3A(d) of such Act, and to achieve the objective for the reduction of unemployment among teenagers as set forth in paragraph 1 subsection (d) of section 3A of the Employment Act of 1946.

(e) The Secretary, in carrying out the provisions of this section, shall establish such regulations as he or she deems necessary. Such regulations shall include provisions for—

(1) an initial determination by the Full Employment Office of the job seekers' ability to be employed at certain types and duration of work so that he or she may be appropriately referred to jobs, training, counseling, and other supportive service;

(2) compliance with the nondiscrimination provisions of this Act in accordance with section 401;

(3) such priority criteria as may be appropriate to establish the order in which persons able, willing, and seeking to work are provided jobs under this section, so that such persons who most need employment are given first consideration and, in determining the priority order, the Secretary shall consider such factors as duration of unemployment, number of people economically dependent upon any such person, expiration of unemployment insurance, household income, and any other factors essential to determining employment need;

(4) appropriate eligibility criteria to limit access to the program authorized under subsection (d), including but not limited to such criteria as household income, duration of unemployment (not less than eight weeks), and refusal to accept or hold a job other than a job under subsection (d) except for good cause as determined by the Secretary of Labor, including refusal to accept or hold a job subject to reference under subsection (c) paragraph (2), in order to seek a reservoir project job under subsection (d); and

(5) such administrative appeal procedures as may be appropriate to review the initial determination of the abilities of persons willing, able, and seeking to work under clause (1) of this subsection and the employment need and eligibility under clauses (3) and (4) of this subsection.

Compliance with the requirements of clause (4) of this subsection relating to a person's eligibility for assistance may be satisfied by an affidavit submitted by persons seeking assistance. If such person knowingly provides false information in any such affidavit, he or she shall be ineligible for any assistance under this section and shall, in addition, be subject to prosecution under section 1001 of title 18, United States Code.

INCOME MAINTENANCE AND FULL EMPLOYMENT POLICIES

SEC. 207. (a) Congress finds and declares that to achieve the goals of full employment and balanced growth it is essential that the employment policies prescribed by this Act and the Employment Act of 1946 give adequate attention to (1) providing quality jobs that improve the work environment, strengthen income and eliminate substandard earnings; (2) improving and integrating existing public and private income maintenance programs with the full employment policies of this Act and the Employment Act of 1946; and (3) substituting work for income maintenance to the maximum extent feasible, taking account of the need for adequate income maintenance among those who cannot be brought within the full employment policy.

(b) To meet the requirements of this section, the President shall within ninety days after the date of the enactment of this Act transmit to Congress a proposal, together with such legislation as is necessary, analyzing the relationship of income maintenance needs, existing income maintenance progarms, and the full employment policies required by this Act and the Employment Act of 1946, and make recommendations on how the income maintenance and employment policies can be integrated to insure that employment is substituted for income maintenance to the maximum extent feasible.

TITLE III—POLICIES AND PROCEDURES FOR CONGRESSIONAL REVIEW

STATEMENT OF PURPOSE

SEC. 301. The purposes of this title are—

(1) to establish procedures for Congressional action and review with respect to the Economic Report, the Full Employment and Balanced Growth Plan, the report of the Board of Governors of the Federal Reserve System, and the other policies and provisions of this Act and the Employment Act of 1946; and

(2) to establish a Division of Full Employment and Balanced Growth within the Congressional Budget Office.

GENERAL CONGRESSIONAL REVIEW

SEC. 302. (a) To provide for comprehensive economic and employment policies to meet the objectives of this Act and the Employment Act of 1946, and to provide Congress with guidance on these matters, the appropriate committees of the Congress shall review and revise, to the extent deemed desirable, the economic goals, priorities, policies, and programs proposed under such Acts by the President and the Board of Governors of the Federal Reserve System. The Congress shall initiate or develop such legislation as it deems necessary to implement these proposals and objectives, after such modification in such proposals as it deems desirable. Nothing in this Act shall be construed to prevent the Congress or any of its committees from considering or initiating at any time action to implement this Act.

(b) In addition to its responsibilities under the Employment Act of 1946 with respect to the Economic Report, the Joint Economic Committee shall carry out overall review of executive branch policies under this Act, with special attention to general economic conditions, the setting of national economic goals in the Economic Report, the Full Employment and Balanced Growth Plan, and the relationship of economic policy measures to the fulfillment of the goals and priorities established under this Act and under the Employment Act of 1946.

(c) In addition to their responsibilities under the Congressional Budget Act of 1974, the Committee of the Budget of the Senate and the Committee of the Budget of the House of Representatives shall review, in conjunction with reporting concurrent resolutions on the budget under the Congressional Budget Act of 1974, the fiscal policy, economy in government policies, and Federal budget priorities recommended by the President.

(d) The other appropriate committees of Congress shall review and report on those policies or programs implemented or submitted which relate to matters within the jurisdiction of each such committee.

CONGRESSIONAL REVIEW OF ECONOMIC GOALS IN ECONOMIC REPORT

SEC. 303. (a) In conjunction with its review of the Economic Report, and the holding of hearings on the report, as required under the Employment Act of 1946, the Joint Economic Committee shall review and analyze the annual numerical goals for employment, production, and purchasing power recommended by the President in fulfillment of section 3 of the Employment Act of 1946. Subsequent to such a review, the Joint Economic Committee shall make recommendations to the Congress on the appropriate annual numerical goals for employment, production, and purchasing power, subject to the requirements of section 3A(d) of the Employment Act of 1946 relating to those periods when unemployment is to be reduced to given levels.

(b) Section 301(a) of the Congressional Budget Act of 1974 is amended—

(1) by striking out "and" at the end of clause (5);

(2) by redesignating clause (6) as clause (7); and

(3) by inserting after clause (5) the following new clause:

"(6) numerical goals for employment, production, and purchasing power; and".

(c) The second sentence of section 301(c) of the Congressional Budget Act of 1974 is amended to read as follows: "The Joint Economic Committee shall also submit to the Committees on the Budget of both Houses its recommendations as to the fiscal and monetary policies appropriate to the goals of the Employment Act of 1946. The Joint Economic Committee shall further submit to the Committees on the Budget of both Houses, in accordance with section 3 of the Employment Act of 1946, recommendations on annual numerical goals for employment, production, and purchasing power designed to achieve full employment of the Nation's human and capital resources as promptly as possible. These recommendations shall be incorporated by the Committee on the Budget of each House in the first concurrent resolution on the budget referred to in subsection (a) reported by that committee, with modifications if necessary to fulfill the objectives of the Full Employment and Balanced Growth Act of 1976, and to meet the requirement of section 3A of the Employment Act to achieve full employment within not more than four years after the enactment of the Full Employment and Balanced Growth Act of 1977. In the event that the Committee on the Budget of either House modifies the annual numerical goals for employment, production, and purchasing power recommended by the Joint Economic Committee, that Budget Committee shall provide its reasons for such modification in the report accompanying the first concurrent resolution.

CONGRESSIONAL REVIEW OF FULL EMPLOYMENT AND BALANCED GROWTH PLAN

SEC. 304. (a) Each proposed Full Employment and Balanced Growth Plan transmitted to the Congress by the President under section 3A of the Employment Act of 1946 (hereafter in this section referred to as a "Proposed Plan") shall be referred to the Joint Economic Committee. Within sixty days after receipt by the Congress of a Proposed Plan, each standing committee of the Senate and the House of Representatives and each joint committee of the Congress shall submit to the Joint Economic Committee a report containing its views and recommendations with respect to aspects of the Proposed Plan which relate to matters within the jurisdiction of such committee or joint committee.

(b) The Joint Economic Committee shall hold hearings for the purpose of receiving

testimony from the Members of Congress, appropriate representatives of Federal departments and agencies and such representatives of the general public and interested groups as the joint committee deems advisable. The join committee shall also consider the comments and views on the Proposed Plan which are received from State and local officials.

(c) Not later than one hundred and five days after the submission of a Proposed Plan to the Congress, the members of the Joint Economic Committee who are Members of the House of Representatives shall report to the House, and the members of the joint committee who are Members of the Senate shall report to the Senate, a concurrent resolution which shall state in substance that the Congress approves or disapproves the Proposed Plan, in whole or in part, and which may contain such alternatives to, modifications of, or additions to the Proposed Plan as the joint committee deems appropriate and in accord with the purposes of this Act and the Employment Act of 1946. The report accompanying such concurrent resolution shall include findings and recommendations of the joint committee with respect to each of the main recommendations contained in the Proposed Plan.

(d)(1) When a concurrent resolution referred to in subsection (c) has been reported to the House of Representatives it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the concurrent resolution. The motion shall be highly privileged and not debatable. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(2) General debate on any such concurrent resolution in the House of Representatives shall be in the Committee of the Whole House on the State of the Union, and shall be limited to not more than ten hours, which shall be divided equally between those favoring and those opposing the concurrent resolution. A motion further to limit debate shall not be debatable.

(3) Except to the extent specifically provided in the preceding provisions of this subsection, consideration in the House of Representatives of any such concurrent resolution and amendments thereto (or any conference report thereon) shall be governed by the Rules of the House of Representatives applicable to other bills and resolutions, amendments, and conference reports in similar circumstance.

(e)(1) Debate in the Senate on a concurrent resolution referred to in subsection (c), and all amendments thereto and debatable motions and appeals in connection therewith, shall be limited to not more than ten hours. The time shall be equally divided between, and controlled by, the majority leader and the minority leader or their designees.

(2) Debate in the Senate on any amendment to any such concurrent resolution shall be limited to two hours, to be equally divided between and controlled by, the mover and the manager of the concurrent resolution. Debate on any amendment to an amendment, and debate on any debatable motion or appeal shall be limited to one hour, to be equally divided between, and controlled by, the mover and the manager of the concurrent resolution, except that in the event the manager of the concurrent resolution is in favor of any such amendment, motion, or appeal, the time in opposition thereto shall be controlled by the minority leader or his designee. No amendment that is not germane to the provisions of the concurrent resolution shall be received. Such leaders, or either of them, may, from the time under their control on the passage of the concurrent resolution, allot additional time to any Senator during the consideration of any amendment, debatable motion, or appeal.

(3) A motion in the Senate to further limit debate is not debatable. A motion to recommit (except a motion to recommit with instructions to report back within a specified number of days, not to exceed three, not counting any day on which the Senate is not in session) is not in order. Debate on any such motion to recommit shall be limited to one hour, to be equally divided between, and controlled by, the mover and the manager of the concurrent resolution.

(4) The conference report on any such concurrent resolution shall be in order in the Senate at any time after the third day (excluding Saturdays, Sundays, and legal holidays) following the day on which such a conference report is reported and is available to Members of the Senate. A motion to proceed to the consideration of the conference report may be made even though a previous motion to the same effect has been disagreed to.

(5) During the consideration in the Senate of the conference report on any such concurrent resolution, debate shall be limited to two hours, to be equally divided between, and controlled by, the majority leader and minority leader or their designees. Debate on any debatable motion or appeal related to the conference report shall be limited to thirty minutes, to be equally divided between, and controlled by, the mover and the manager of the conference report.

(6) Should the conference report be defeated in the Senate, debate on any request for a new conference and the appointment of conferees shall be limited to one hour to be equally divided between, and controlled by, the manager of the conference report and the minority leader or his designee, and should any motion be made to instruct the conferees before the conferees are named, debate on such motion shall be limited to thirty minutes, to be equally divided between, and controlled by, the mover and the manager of the conference report. Debate on any amendment to any such instructions shall be limited to twenty minutes, to be equally divided between, and controlled by, the mover and the manager of the conference report. In all cases when the manager of the conference report is in favor of any motion, appeal, or amendment, the time in opposition shall be under the control of the minority leader or his designee.

(7) In any case in which there are amendments in disagreement, time on each amendment in the Senate shall be limited to thirty minutes, to be equally divided between, and controlled by, the manager of the conference report and the minority leader or his designee. No amendment that is not germane to the provisions of such amendments shall be received.

(f) Upon adoption of a concurrent resolution under this section with respect to any Proposed Plan, the concurrent resolution shall serve as a long-term guide to the Congress with respect to legislation relevant to the goals, priorities, policies, and programs recommended in the Proposed Plan, as modified by the concurrent resolution. A copy of the concurrent resolution shall be transmitted to the President by the Clerk of the House of Representatives or the Secretary of the Senate, as appropriate, for such actions as the President deems appropriate.

DIVISION OF FULL EMPLOYMENT AND BALANCED GROWTH

SEC. 305. (a) There is established within the Congressional Budget Office a Division of Full Employment and Balanced Growth (hereafter in this section referred to as the "Division") to perform long-term economic analysis. The Division shall be headed by a Deputy Director who shall perform his or her duties under the supervision of the Director of the Congressional Budget Office and shall perform such other duties as may be assigned to him or her by the Director. Such Deputy Director shall be appointed in the same manner, serve for the same period, and receive the same compensation as the Deputy Director provided for in section 201 of the Congressional Budget Act of 1974.

(b) It shall be the first responsibility of the Division to assist the Joint Economic Committee in the discharge of its duties under this Act by providing, as the Joint Economic Committee may request—

(1) information with respect to long-term economic trends, national goals, resource availability, and the methods available to achieve full employment and balanced economic growth;

(2) information necessary for the preparation of the report and concurrent resolution referred to in section 304(c); and

(3) such related information as the committee may request.

(c) At the request of any committee of the House of Representatives or the Senate, or any other joint committee of the Congress, the Division shall provide to such committee or joint committee the information necessary to fulfill its responsibilities under this Act.

(d) At the request of any Member of the House or Senate, the Divisions shall provide to each Member any information necessary to fullfill his or her responsibilities under this Act.

EXERCISE OF RULEMAKING POWERS

SEC. 306. (a) The provisions of this title (other than section 305) are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House), at any time, in the same manner and to the same extent as in the case of any other rule of such House.

TITLE IV—GENERAL PROVISIONS

NONDISCRIMINATION

SEC. 401. (a) No person in the United States shall on the ground of sex, age, race, color, religion, or national origin be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity funded in whole or in part with funds made available under this Act, including membership in any structure created by this Act.

(b) Whenever the Secretary of Labor determines that a recipient of funds under this Act has failed to comply with subsection (a), or an applicable regulation, he or she shall notify the recipient of the noncompliance and shall request such recipient to secure compliance. If within a reasonable period of time, not to exceed sixty days, the recipient fails or refuses to secure compliance, the Secretary of Labor is authorized (1) to refer the matter to the Attorney General with a recommendation that an appropriate civil action be instituted, (2) to exercise the powers and functions provided by title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d), or (3) to take such other action as may be provided by law.

(c) When a matter is referred to the Attorney General pursuant to subsection (b), or whatever he or she has reason to believe that a recipient is engaged in a pattrn or practice in violation of the provisions of this section, the Attorney General may bring a civil action in the appropriate United States

district court for any and all appropriate relief.

(d) To assist and evaluate the enforcement of this section, and the broader equal employment opportunity policies of this Act, the Secretary of Labor shall include, in the annual Employment and Training Report of the President, a detailed analysis of the extent to which the enforcement of this section achieves affirmative action in both the quantity and quality of jobs, and for employment opportunities generally.

(e) In moving to reduce unemployment in accord with the goals and timetable set forth in this Act, every effort shall be made to reduce the differences between the rates of unemployment among women, minorities, and other labor force groups and the overall rate of unemployment, with the ultimate objective of removing them entirely. Insofar as these differences are due to discrimination, the nondiscrimination provisions of this section, as well as other provsions of the Act, shall be utilized. Insofar as these differences are due to lack of training and skills, occupational practices, and other relevant factors, the Secretary of Labor shall take such action as he or she can to achieve the objectives of this paragraph; shall make studies, develop information, and make recommendations toward remedying these differences and include these in the annual Employment and Training Report of the President; and, if deemed necessary, make recommendations to the Congress within ninety days relative to the objectives of this paragraph.

LABOR STANDARDS

SEC. 402. The policies and programs implemented and provided for by this Act, and funded in whole or in part through this Act, shall provide that persons employed pursuant to such policies and programs are paid equal wages for equal work, and that such policies and programs create a net increase in employment through work that would not otherwise be done. The President shall insure that any person employed in a reservoir project under section 206(d) or in any other job utilizing funds provided in whole or part under this Act shall be paid not less than the pay received by others performing similar work for the same employer, and in no case less than the minimum wage under the Fair Labor Standards Act of 1938 as amended. No person employed under section 206(d) shall perform work of the type to which the Bacon-Davis Act, as amended (40 U.S.C. 276a–276a–5) applies. Any recommendation by the President for legislation to implement any program under this Act, requiring the use of funds under this Act, and submitted pursuant to the requirements of this Act, shall contain appropriate wage provisions based upon existing wage standard legislation.

AUTHORIZATIONS

SEC. 403. There is authorized to be appropriated such sums as may be needed to carry out the provisions of this Act. Notwithstanding any other provisions of this Act, no provision shall be construed to require expenditures in excess of amounts appropriated pursuant to this Act.

DEFINITIONS

SEC. 404. (a) "Fiscal drag" as used in section 106 means tax and expenditure rates which, in combination, substantially impede attainment (or maintenance) of full employment, production, and purchasing power.

(b) "Balanced growth" in the Full Employment and Balanced Growth Plan means projecting and achieving (1) the relationship between production or supply capability and demand, and (2) the relationships among the growth rates of private investment, private consumer expenditures, and public outlays, and also (3) the purchasing power, including important components of each element mentioned in (1), (2), and (3) above, required to achieve and then maintain full employment and production and appropriate servicing of national priorities, these to be promoted by the programs and policies set forth in this Act and by encouragement of voluntary cooperation within the private sector (for example, between labor and management) and between the Government and the private sector.

(c) "Frictional unemployment" means the lowest level of unemployment, determined on the basis of evolving experience, consistent with labor mobility, changing job patterns, freedom of job choice, and sufficient job search on a voluntary basis.

OVERVIEW OF MAJOR PROVISIONS OF THE FULL EMPLOYMENT AND BALANCED GROWTH ACT OF 1977 (S. 50 AND H.R. 50)

FINDINGS

Intractible high unemployment is largely attributable to the lack of National goals and priorities enunciated by the President, Congress, and the Federal Reserve, and the lack of coordination between government and private institutions.

Full employment and balanced growth can be achieved through development of explicit economic goals including programs to reduce cyclical and structural unemployment.

TITLE I: ESTABLISHMENT OF GOALS, PLANNING AND GENERAL ECONOMIC POLICIES

Congress declares that it is "the continuing policy and responsibility of the Federal Government" to use reasonable measures to fulfill the right of all adult Americans, age 16 and over, able, willing, and seeking work, to opportunities for decent and useful employment.

Inflation is a major national problem requiring concerted government policies relating to a number of commodities, better fiscal and monetary management, economy in government, and reform of outmoded governmental rules, regulations and programs.

It is the purpose of the Act to coordinate, integrate and improve the fiscal and monetary policies and programs of the Federal Government to better achieve the Act's objectives.

Government planning of private sector activity and government control of production, employment or the allocation of resources, except to the extent authorized under other legislation, are prohibited.

"Primary emphasis" of the Act falls on expansion of employment through increased private sector activity. The historic ratio between private and public sector employment would not be exceeded.

After expansion of conventional, private sector employment through improved and coordinated fiscal and monetary policies and programs, efforts to attain full employment will focus on expansion of job opportunities created in the private sector through Federal assistance, regular avenues of public employment, and last-resort public employment job reservoir projects outlined in Title II.

PRESIDENT'S ECONOMIC REPORT TO CONGRESS

To be filed by January 20 of each year, the report shall analyze the state of economy and establish numerical goals for employment, production and purchasing power to achieve full employment and balanced growth within 4 years following enactment.

Anti-inflation policies proposed in the report shall include a comprehensive information system to monitor inflationary pressures and bottlenecks, and establishment of reserves of food and other critical commodities to meet emergencies. The report shall also include recommendations aimed at improving and strengthening antitrust enforcement and competition in the marketplace.

FULL EMPLOYMENT AND BALANCED GROWTH PLAN

This is to be filed in conjunction with the annual Economic Report. It should contain long-term objectives for full employment, production, and purchasing power, consistent with full employment.

Full employment is defined as not exceeding 3 percent of the adult labor force, age 20 and over. Teenage unemployment is to be reduced to the level of adult unemployment as rapidly as feasible.

In addition to discussing foreseeable trends in the economy, the Plan shall propose programs, policy and legislation needed to meet estimates of unmet priority needs. The resources available and needed to meet these needs will be reviewed.

The Plan shall seek reasonable price stability without sacrificing employment objectives. Under no circumstances shall the rate of price increases be allowed to exceed the rate existing at the time of enactment.

Within a year, the President shall review the full employment goals and recommend any corrective policy changes needed to achieve the purposes of the Act.

STATE PUBLIC HEARINGS

State governors may, within 60 days of transmittal of the plan to them, submit to the Joint Economic Committee findings and recommendations regarding the plan following public hearings.

EVALUATION OF EXISTING PROGRAMS

The President shall annually evaluate about one-fifth of the dollar value of Federal programs and make recommendations concerning the elimination or modification of Federal rules, regulations and programs to achieve economy in government and the goals of the Act.

FEDERAL RESERVE

The Federal Reserve shall prepare an independent statement setting forth its intended monetary policies for the year ahead. It shall indicate to what extent these proposed policies support the full employment and balanced growth plan and fully justify any substantial variation from the President's goals and recommendations. If the President determines the Federal Reserve's policies conflict with these goals he or she shall recommend appropriate changes.

TITLE II: COUNTERCYCLICAL, STRUCTURAL AND YOUTH EMPLOYMENT POLICIES

This Title establishes Full Employment Office in the Labor Department to administer supplemenatry training and employment programs for those otherwise unable to find work.

The President, within 90 days of the bill's enactment, must submit a legislative program and other proposals to establish "on a permanent basis the range of supplementary employment policies and programs necesssary to reduce high unemployment arising from cyclical movements in the economy" and other sources. The proposals will include a countercyclical public service program, accelerated public works, development of standby public works projects, State and local countercyclical grants, modifications in unemployment insurance, manpower training in pubic and private employment, and a community development program.

In designing these proposals, existing employment and training programs will be coordinated, and utilized as appropriate. The President's proposals shall provide for automatic triggers that phase programs in or out as unemployment rises or falls. Mechanisms to encourage quick return to private employment would be part of the package.

REGIONAL POLICY PACKAGE

The President shall submit a comprehensive set of regional and structural employment proposals within 180 days of the enactment of the bill, using existing programs to the greatest extent possible. Within the same period, the President shall make proposals to encourage investment in economically depressed areas, and provide an alternative source of capital funds for State and local

government to finance public facilities. Such long-term loans to localities from the Federal Government will be at interest rates no higher than the average rate of long-term Treasury borrowings plus service costs.

YOUTH EMPLOYMENT POLICIES

The Congress declares that serious youth unemployment exists, constitutes much of the overall unemployment rate, and contributes significantly to crime, drug addiction, and other social and economic problems. The Congress further declares that the current approach to youth unemployment is "fragmented and inadequate."

The President, within 90 days of enactment, shall submit legislation creating a comprehensive youth unemployment program. It shall utilize existing youth employment and training programs, and highlight the need for smoother transition from school to work. The special problems of disadvantaged and disabled youth employability are recognized. The bill calls for full coordination of youth employment strategies with the overall package of employment measures. Public employment opportunities for youth may be provided in conservation projects, public service activities, and inner city rehabilitation.

FULL EMPLOYMENT OFFICE AND PUBLIC SERVICE JOB RESERVOIR

The new Full Employment Office of the Labor Department shall supervise an effort to obtain employment for all Americans able, willing, and seeking work who, despite serious efforts, cannot find jobs.

Tools available to the office include the Comprehensive Employment and Training Act of 1973 (CETA), and counseling, and job placement in both the private and public sectors.

The reservoir of last-resort public service and approved private, non-profit jobs would not be instituted until two years after enactment and then only to accommodate those persons unable to find private sector jobs or work in existing Federally assisted programs. Implementation of last-resort job projects requires a Presidential finding that other means have failed to adequately approach the bill's full employment goal. Last-resort jobs are to be confined to the lower pay and skill levels and will not include employment in areas to which the Davis-Bacon Act applies. In this way competition with the private sector will be avoided.

The Secretary of Labor shall establish regulations for last-resort jobs to assure that they are allocated first to those who are most in need of work, such as persons who have been unemployed for relatively long periods and heads of households.

Under the legislation, the Secretary of Labor is required to assure that last-resort jobs and all other Federally assisted employment programs are nondiscriminatory.

INCOME MAINTENANCE

Congress requires that the policies prescribed under the Act "improve and integrate" existing public and private income maintenance programs with the full employment policies of the Act.

Policies under the Act are to encourage substitution of work for those on welfare and unemployment compensation insurance program lists to the "maximum feasible extent," without jeopardizing the well-being of those who are out of the labor force, or otherwise cannot benefit from the full employment effort. Proposals from the President in connection with these requirements are to be forthcoming within 90 days.

TITLE III: CONGRESSIONAL REVIEW

This title provides for general Congressional review procedures of policy development in the executive branch, and establishes a Division of Full Employment in the Congressional Budget Office.

The Joint Economic Committee has primary responsibility to carry out overall review of executive branch policies under the Act, in addition to its present review of the President's Economic Report.

Appropriate committees of Congress shall review and revise the economic goals, priorities, policies and programs proposed by the President and the Federal Reserve.

Senate and House budget committees shall review appropriate portions of the Plan and Report, in addition to their responsibilities under the Budget and Impoundment Act of 1974. A close and cooperative relationship between the JEC and the budget committees to develop appropriate fiscal and other macroeconomic policy is envisioned. Modifications by either budget committee of the numerical employment, production, and purchasing power goals recommended by the JEC are to be fully explained in the report on the first concurrent resolution.

Every standing or joint committee of Congress whose area of jurisdiction is touched by the Plan shall within 60 days of the Plan's submission, report its findings and recommendations to the JEC. Subsequently, the JEC shall hold hearings to receive testimony from Members of Congress and representatives of Federal Departments and agencies. JEC members shall report a concurrent resolution to the respective chambers approving or disapproving the Plan in whole or part, and suggesting where appropriate, alternatives or modifications.

The Full Employment Division of CBO shall perform long-term economic analysis, and shall assist the JEC in its duties under the Act. The Division shall also assist other Congressional committees and Members to fulfill their responsibilities under the Act.

TITLE IV. GENERAL PROVISIONS

This title provides nondiscrimination standards, labor standards (discussed previously), authorizations subject to appropriations, and a set of technical definitions.

Under the nondiscrimination provision, "no person in the United States shall on the ground of sex, age, race, color, religion, or national origin be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity funded in whole or in part under this Act . . ."

Enforcement procedures to assure nondiscrimination are provided in detail.

The 1977 version of the bill requires every effort be made to reduce and eliminate the differences between the rates of unemployment among women, minorities, and other labor force groups and the overall rate of unemployment. This title provides with a variety of mechanisms to fulfill this requirement.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that S. 50 be referred to the Senate Committee on Labor and Public Welfare; that, when it is reported by that committee, it be referred for not more than 60 days to the Committee on Banking, Housing and Urban Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WILLIAMS. Mr. President, I am pleased to join with my great and dear friend, the Senator from Minnesota (Mr. HUMPHREY), in introducing a revised Full Employment and Balanced Growth Act of 1977.

This bill represents a statement of my commitment to its underlying principles: First, that every American who is able, willing, and seeking work should have the opportunity for meaningful employment; second, that joblessness and price inflation must be among the foremost factors to be considered in the making of economic policy; third, that the President and the Congress should develop a stronger partnership for charting the path to greater economic growth, relying primarily on the private sector for basic economic vitality; and, fourth, that special steps must be taken to help disadvantaged workers and depressed regions develop their full potential.

These are principles to which, I believe, the incoming administration under President-elect Carter and the new Congress also subscribe.

They are principles whose significance have been heavily underscored by the economic tribulations and the resulting human suffering of the past 3 years.

At any one time during this dismal period, between 7 million and 8 million American workers have been counted as unemployed, with several million more just as jobless, but not counted under current statistical methods. The official national unemployment rate of 8.1 percent is a scandal that is magnified by pockets of even greater joblessness, for example, in my own State of New Jersey where 11.3 percent of the work force cannot find employment.

Poverty has engulfed over 2 million more American families in the past year, not only in our urban centers, where unemployment rates of 30 percent are all too common, but in the rural areas of our Nation as well.

Crime has increased dramatically in recent months, as have alcoholism, drug abuse, and other illnesses.

The economy has suffered a loss of nearly $500 billion in goods and services, and our national commitment to decent housing for every family has been crippled.

Clearly, it is time now to set a new and deliberate course toward economic recovery and improvement in the plight of working Americans.

Mr. President, the revisions that have been made in this proposed bill have been detailed by the Senator from Minnesota. In many respects, they are fundamental in nature and will require careful review.

Moreover, the progress of the bill will have to be carefully coordinated with the new administration of President-elect Carter. The harmony that now exists between the provisions of this legislation, on the one hand, and the economic recovery program that Governor Carter has charted, on the other, is essential to the success of both the short-term recovery and the long-term establishment of economic policies that will assist the American people in fulfilling our potential.

The introduction of this legislation at this time is important for still another reason, in my estimation. As a comprehensive proposal pending before the Congress, it provides us with a rational framework for coordinating the elements of the economic recovery program that must be implemented promptly. It will serve to keep the Congress attuned to the need for this coordination and to the goals that we seek to achieve.

Mr. President, the Treasury Secretary-designate for the new administration, W. Michael Blumenthal, appeared yesterday on the "Issues and Answers" program on the ABC television network.

In the course of the interview, Mr. Blumenthal made some comments that bear directly upon one of the major issues posed by the Full Employment and Balanced Growth Act of 1977, and that is how to define full employment.

As I understood his remarks, Mr. Blumenthal was saying that our national unemployment goal should be zero, or near zero, for those who are able, willing and seeking work, plus some amount that would account for "frictional unemployment," which includes people who are between jobs or temporarily unable to work.

While Mr. Blumenthal may want to expand further upon his concept of a full employment goal, I believe that the general thrust of his view is wholesome, and I ask unanimous consent to have printed in the RECORD at the end of my remarks the article in the Washington Post reporting on Mr. Blumenthal's remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Jan. 10, 1977]

BLUMENTHAL FAVORS GOAL OF ZERO UNEMPLOYMENT

(By Hobart Rowen)

Treasury Secretary-designate W. Michael Blumenthal said yesterday that jobless rates of either 4 or 5 per cent are "too high" as national goals for full employment and that the best goal is zero unemployment.

But he conceded that the need to be "careful and prudent" would prevent the incoming Carter administration from reducing the jobless rate below 6.5 per cent to 7 per cent by the end of this year, "perhaps closer to 6.5 per cent if we are lucky."

The current rate is 8.1 per cent.

Preventing a more dramatic program is not the danger of inflation, he said, but a limitation on how much stimulus the economy can absorb in short order. As the Carter program takes effect, he predicted, there will be further "steady reductions" in the jobless rate in 1978.

Interviewed on "Issues and Answers" (ABC, WMAL), Blumenthal also:

Said the stimulus package announced Friday in Plains, Ga., is only "the first step in a more fundamental set of proposals for tax reform."

Emphasized that the Carter administration would rely largely on the private sector for restoring health to the economy "because five out of six jobs are in the private sector."

The question about unemployment goals relates to an important and basic difference in the political approach to current economic problems. Early in the Kennedy years the Democrats adopted 4 per cent as an "interim" target for full employment.

In recent years, while many liberal Democrats have pressed to lower the target to 3 per cent, Republicans and other conservatives have argued that 5 per cent is more reasonable. They reason that with changes in the makeup of the labor force, to press for unemployment below that figure is likely to cause inflation.

Asked to name a realistic unemployment target in today's economy, Blumenthal responded:

"I am tempted to say the best goal is zero, or close to zero, and I feel strongly about that. In this great country of ours, richest in the world, there shouldn't be any people who want to work, and who are able to work, and who are looking for work, and are unable to find gainful employment. We can do so many things, we ought to be able to lick that problem as well."

He said that there is "no magic number," but that both 5 per cent and 4 per cent "I would consider too high."

Blumenthal, former chairman of the Bendix Corp., acknowledged that there will always be some "fractional" unemployment—people between jobs—but "it can be a lot lower than it is today."

Although the Carter package contains no specific new incentive for business to add to its investment plans, Blumenthal argued that the entire program is intended to encourage business expansion by creating additional consumer demands.

Other sources indicated that there may yet be some changes in the final proposals made to Congress. One possibility is the substitution of an investment tax credit for the $2 billion credit against Social Security payroll taxes originally announced.

In a telephone interview yesterday, economist Lawrence R. Klein, chairman of the economic advisory group during the Carter campaign, said he hopes the President-elect will go back to the investment credit idea "because we need more capital formation and the investment tax credit wouldn't hurt as a starter."

Another possible change in the Carter economic package may be in the amount of public works spending that will eventually be proposed. On "Face the Nation" (CBS, WTOP) yesterday, Senate Majority Leader Robert Byrd (D-W.Va.) made a flat prediction that Congress would add to the $2 billion that Carter proposed for public works.

He strongly implied that Carter had agreed with the Democratic leadership on this point during their discussions Friday at Plains.

Blumenthal predicted that the administration would send its tax reform proposals to Congress within calendar 1977 for action in 1978, and that the proposals would stress simplification of the tax code and procedures.

He also revealed that not all of the 700,000 to 800,000 public service jobs contemplated in the Carter program would be on the government payroll, since private oganizations in some cases would receive the funds to carry out the training programs.

By Mr. MATHIAS:

S. 56. A bill to protect the United States from dependence upon foreign petroleum refineries by amending the Tariff Schedules of the United States to impose higher rates of duty on products derived from petroleum, by distributing the revenue from such increased rates of duty to States which consume such products, and for other purposes; to the Committee on Finance.

PETROLEUM PRODUCTS INDEPENDENCE ACT

Mr. MATHIAS. Mr. President, I am today introducing a bill to enable the United States to become independent of petroleum products produced by refineries located in foreign countries. This independence would be achieved by providing the economic conditions necessary for American business to construct and expand domestic refineries to meet our needs.

This bill is endorsed by business groups, including independent petroleum companies, and by labor unions, including the Oil, Chemical and Atomic Workers Union and the building and Construction Trades Union.

The security and economic well-being of our Nation demand that this legislation be enacted this year. Today the United States is the only major industrial nation in the world with insufficient refinery capacity to meet its needs. The east coast of the United States is dangerously over-dependent on imported petroleum products, particularly residual fuel oil. This dependence entails unacceptable economic and political costs. It puts the U.S. economy at the mercy of foreign governments which may be unstable or unfriendly. It undermines our balance of payments and our environmental safeguards. And it siphons overseas thousands of jobs, and the economic stimulus related to these jobs, which are desperately needed by American workers, families, communities and States. This over-dependence will only increase unless we act now.

Before I expand on the economic and political costs of our over-dependence on petroleum products refined abroad, let me explain in some detail the provisions of S. 56.

PROVISIONS OF S. 56

S. 56 would phase-in a system of tariffs on imports of residual fuel oil, middle distillates, jet fuel and motor gasoline. The tariff on residual fuel would be $2 per barrel; on middle distillates and jet fuel, $3 per barrel and on motor gasoline, $4 per barrel.

These tariffs would be gradually applied to imports during a 5-year period. This phase-in period is designed to give American business time to construct and expand domestic refineries to meet our needs. This phase-in period is also designed to promote the economic security of industries and communities which have been encouraged by Federal policies to become dependent on product imports.

This phase in would be accomplished through a system of licenses for the tariff-free importation of residual fuels and middle distillates. Initially, licenses for the tariff-free importation of residual fuels and middle distillates would be issued by the President. For middle distillates, in 1978, licenses would be issued for up to 90 percent of the volume of middle distillates imported during the base year of 1976. In 1979, licenses would be issued for up to 80 percent of the volume of middle distillates imported during 1976. In succeeding years, the number of licenses would be gradually reduced so that by 1983, no licenses would be issued and the tariff would apply to all imports of middle distillates, except as provided under the hardship provisions described below.

For residual fuels, licenses would be issued in 1978 for the tariff-free importation of up to 80 percent of the volume of residual fuels imported in 1976. In succeeding years, the number of licenses would be gradually reduced so that by 1983, and for all years thereafter, licenses would be issued for up to 20 percent of 1976 volumes.

As to motor gasoline and jet fuel, no licenses for tariff-free importation would be issued since these products constitute only a very small amount of the total volume of products imported and can easily be replaced by substitutes available domestically.

AVOIDING HARDSHIP

By phasing in the tariffs by means of these licenses, S. 56 would avoid causing hardships to any persons. Should hardships develop, however, the bill provides a mechanism for relief. Any person who

endures severe hardship due to these tariffs would be entitled to relief in the form of additional licenses for the tariff-free importation of residual fuels or middle distillates. These additional licenses would be issued by the President after consulting with the Administrator of the Federal Energy Administration or its successor. Examples of persons who might be eligible for such licenses would be importers with unusually low volumes in 1976 or importers who have just started in the importing business. The total amount of tariff-free imports of residual fuels and middle distillates which could be authorized by all licenses issued under this hardship provision would equal 10 percent of the amount of such products imported during 1976. This 10-percent figure would not vary as the years passed.

The bill also avoids placing hardships on any region of the country. It does not make the mistake of some other tariff legislation, which would cause one region to pay a disproportionate share of the tariff into the national treasury even though only a small portion of the revenue generated by the tariff would be returned to the region from whence it was derived. S. 56 avoids this result in two ways.

First, it provides, by an administratively simple method, that tariffs on residual fuels and middle distillates which are collected under S. 56 be returned to the general treasury of the State in which the first sale of the product occurred. Thus, persons who pay a tariff under the bill would be assured that those funds would be available to their State government for use for whatever purposes deemed appropriate. The minimal amount of tariffs which might be collected on the small quantities of imported jet fuel and gasoline would be retained by the Federal Treasury and would offset the cost of administering this legislation.

Second, and perhaps more important, S. 56 avoids regional inequities in tariff collection by making it unlikely that a tariff would even need to be collected in the first place. The 5-year period provided by the bill for phasing-in its system of tariffs is designed to be sufficiently long to enable American business and labor to construct and expand domestic refineries to offset imports and fully meet our needs. Some of this expansion of domestically-refined product could occur quickly, during 1977 and 1978. Other expansion, such as the construction of a new refinery, could take 3 or 4 years. By phasing-in its system of tariffs over a 5-year period, the bill matches the imposition of its tariff on imported product to our capacity to refine additional product domestically.

DEPENDENCE OF EAST COAST ON IMPORTED PRODUCT

Enactment of S. 56 this year is vital because the dependence of the east coast on imported product is detrimental to the entire country and because this dependence will not be alleviated unless the bill is enacted. In explaining the reasons why this statement is true, I will focus on residual fuel oil, which is the product imported in the largest quantity.

Currently, over 75 percent of the residual fuel oil consumed in the PAD–1 region—the east coast—is imported, according to the U.S. Bureau of Mines. This figure is alarmingly high, but it would be even higher except that total demand in the PAD–1 region for residual fuels has decreased since the beginning of the economic recession in 1973. In 1973, when consumption of residual fuel oil reached 708 million barrels, over 90 percent was imported. In 1975, even though consumption had dropped to 532 million barrels, over 76 percent was imported. As our economy improves, we will find that the reliance of PAD–1 on imported residual fuel oil will again exceed 90 percent.

Moreover, as the world economic recovery progresses, the current "oversupply' of residual fuel oil will disappear. And as projected foreign vacuum and cracking units are completed, the "oversupply" could become a shortage. Current U.S. refinery capacity is not sufficient to avert the consequences of that shortage.

Accordingly, prices for residual fuels will naturally rise faster than prices of other products. And as relative excess turns to relative scarcity, refiner countries may well be tempted, as have producing countries, to use our dependence on their energy source to extract unnaturally high economic and political costs. This threat seems particularly likely to become reality if we review the announced intentions of leading OPEC countries to become leading refining countries as well.

The historical market advantage of foreign refineries is bolstered by artificial economic advantages resulting from the fact that these refineries are not subject to U.S. tax, maritime or environmental laws. For example, a study entitled "Determination of Refined Petroleum Import Fees" prepared for FEA by the Pace Co. concluded that foreign refiners selling residual fuel oil to the east coast market enjoy an advantage of up to $1.86 per barrel in shipping and refining costs alone. This difference in refinery costs is principally due to tax advantages enjoyed by foreign refiners. I would emphasize that this $1.86 difference is not an advantage derived from better technology, more skilled labor, access to better crude, or other "real" factors. The cost advantage of these foreign refiners is created solely by U.S. laws and regulations which, while useful in other contexts, now need to be offset by S. 56.

FEA'S POLICIES FOSTER FURTHER DEPENDENCE

That anything less than S. 56 would be inadequate to enable American business and labor to end the overdependence of the east coast on foreign refiners is clearly demonstrated by the history of FEA's "Reverse Entitlements" program instituted in March 1976. Under this program, in order to offset the lower cost of price-controlled domestic crude oil, FEA provided entitlements to east coast importers of residual fuel oil and took entitlements away from domestic refiners producing residual fuel oil for the east coast market. FEA has stated that:

> An underlying rationale [for this program] was *FEA's conclusion that it was in the national interest to structure its regulatory program so that,* although domestic refiners receive a competitive advantage, *the financial viability of Caribbean refineries historically serving the East Coast,* and that of the domestic marketers reliant on these refineries, *would not be imperiled.* (emphasis added).

In other words, FEA adjusted the entitlements program so as to benefit foreign refineries just when it appeared that domestic refiners marketing in the east coast region might have finally begun to gain a price advantage.

The importance of this experience far transcends its brief life to date or even its substantial cost to domestic refiners serving the east coast market. The reverse entitlements program is only the most recent of a series of actions by FEA based on the premise that the east coast must remain dependent on foreign refiners. The consequence of that official policy is that no significant expansion of domestic refinery capacity can be financially justified because any price advantage that domestic refiners gain may be taken away by FEA in order to preserve the "financial viability" of foreign refiners.

This is not abstract speculation. The only new refinery constructed in many years by an independent began operation last year. Built by the Energy Corp. of Louisiana—ECOL—this 200,000 barrel/day refinery was particularly significant not only because it was designed to supply the east coast residual fuel market but also because it was constructed by an independent refiner. Yet FEA's policies forced its sale to a major oil company before it began operation. The conclusion of ECOL officials from their experience with current U.S. energy policy was stated by Joe Wallace, who served with ECOL for the 4 years during which the refinery was constructed. Wallace told the Oil Daily recently that:

> FEA's policy operates to impose unacceptable penalties on domestic refiners [who] produce residual fuel oil and benefits foreign refineries in the East Coast market.

Wallace further concluded that:

> No independent will ever attempt to build or buy a domestic refinery as long as the reverse entitlements program is on the books.

Given the history of FEA's policies and the experience of ECOL, it is clear that domestic refiners, particularly independents, cannot build sufficient refinery capacity to meet our domestic needs unless Congress establishes a long-term policy of encouraging domestic refiners by enacting S. 56.

As I have spoken this morning, I have several times alluded to the economic and political costs associated with our overdependence on imported petroleum products. Let me now address these costs directly.

DANGER TO NATIONAL SECURITY

First, we pay in terms of our national security. Foreign refined products render us doubly vulnerable. Even a friendly producing nation, such as Canada, may cut our supply of crude oil because it needs the energy itself, or for other na-

tional interests. If foreign produced crude is then refined in another country, it is again subject to export restrictions if the refining country is hostile to our interests or is itself short of energy. The availability at a reasonable cost of foreign produced and foreign refined petroleum is thus doubly jeopardized. Moreover, the diversity of sources for refinery product is less than that for crude oil, so that as our reliance on foreign refinery product rises the minimum result we could reasonably expect would be a disproportionately high markup of the cost of imported refinery product over the cost of imported crude oil.

Moreover, there is a further security factor to consider. In the event of a serious shortage in this country, FEA is authorized to alter refinery runs so that production of refined products of critical importance to national security is given a priority over other products derived from a barrel of oil. This program was implemented during the days of the Arab embargo and may be needed in the future. It is complemented by the strategic petroleum reserve program—SPRP—under which several hundred million barrels of crude petroleum will be stored by FEA for use during a national emergency. Needless to say, FEA cannot alter runs of foreign refineries, nor can it direct foreign refineries to run crude oil stored under the SPRP. Accordingly, our dependence on foreign refineries substantially undermines the protection offered by each of these emergency programs.

BALANCE OF PAYMENTS

Our balance of payments is also of concern. Although the United States is a strong exporter, our balance of payments is not always positive. Our balance of payments, however, would be continually favorable were it not for the heavy debit caused by petroleum imports. It is one thing to be forced to purchase a raw material abroad because it is needed but unavailable domestically, but it is quite another to pay also for refining that product overseas because of an unwillingness to encourage refinery construction at home. Importing product means exporting dollars not only for the purchase of the raw material, but also for labor, petroleum additives and other supplies, depreciation, and capital costs associated with the foreign refinery. That is a steep and unnecessary price to pay for energy consumption in this country.

PRICE BENEFITS

A further benefit of S. 56 is that it will avoid exorbitant prices imposed in the future by refiner countries on their petroleum products. While the per barrel cost of new refinery capacity is currently higher at home than abroad, this additional cost, as I have explained above, is caused solely by U.S. laws which presumably provide social benefits equal to or greater than this cost. As I have also explained, however, there is a very grave danger that the world market on residual fuel oil may be very tight in just a few years. That tightness would enable refiner countries to raise prices exorbitantly on exports to the United States unless we begin to build refineries at home now. OPEC nations have taught the world that those who control energy in short supply can charge many times its cost. European countries have learned this lesson well, and even European nations which currently have excess refinery capacity are adding to that capacity in order to be self-sufficient in the future. This Congress should have learned by our own Nation's bitter experience that it is far better to invest in our own producing and refining capacity today than to subject ourselves to economic blackmail by other countries in the future.

EXPORTING JOBS

Of special importance also is the effect of current U.S. energy policies on jobs in American communities. Building refineries at home can help put America back to work.

It has been estimated that more than 2,000,000 barrels per day of refinery capacity has been "exported" to foreign countries during the past 12 years. According to officials of the Oil, Chemical and Atomic Workers Union, 12 refinery workers are required to process 1,000 barrels of crude oil. Consequently, 24,000 permanent jobs in refineries have been "exported" during the past 12 years. Moreover, each refinery job creates 3.5 jobs in closely allied service and manufacturing sectors, according to a study by Gulf Canada. Thus, the 24,000 refinery jobs lost means another 84,000 jobs lost in allied fields for a total of 108,000 jobs.

Assuming average family economic unit of 3.2 persons means that 346,000 Americans have been directly affected. And this does not count jobs in other industries which would serve these 346,000 persons, such as housing, food entertainment, education, transportation, or municipal services. Nor do these figures reveal the substantial amount of local, State and Federal taxes which would be paid by these industries and workers. Most important, these figures do not reveal the thousands of additional jobs that will be lost if this Congress does not act swiftly to change our energy policies.

In addition, a typical modern refinery with the capacity of refining 200,000 barrels per day requires 150,000 tons of steel, 65,000 yards of concrete, 20,000 gallons of paint, $15 million worth of electric cables and equipment, and 10 million man-hours of construction. Going beyond what is actually taking place on the refinery site to just the steel mill where the 150,000 tons of steel will be produced, we find that it takes 6 man-hours to produce a ton of steel and that each man works approximately 2,000 man-hours per year. This means that building a refinery employs at least 450 men in the steel mill alone for a year. Not counted are all the people who will be employed converting that raw steel to usable forms or the ripple effect on local economies of having this sort of construction take place, the permanent employment that will be provided in the refinery, and the increased tax base that will accrue to local communities.

ENVIRONMENTAL BENEFITS

Finally, there are environmental benefits associated with S. 56. The environmental aspects of new refineries are very important. The environmental safeguards which should be imposed on such refineries can, and I trust will, be imposed by U.S. laws and regulations. But no U.S. law or regulation applies to refineries in foreign countries. Accordingly, since new refineries are needed, and since the environmental aspects of such refineries are very important, it is vital that refineries which serve our needs be located within the United States in order that the environmental safeguards enacted by the Congress control.

Any refinery expansion or grassroots construction initiated today in the United States is subject to environmental constraints which result in the construction of environmentally acceptable refineries and which will ultimately effect a reduction in the total amount of pollutants emitted by domestic refineries as new plants replace outdated and environmentally unacceptable facilities. There are many places in the United States which are unsuitable for new refinery construction and a program to expand America's refinery capacity must be mindful of the valuable natural and social resources that could be endangered by putting a refinery in an inappropriate location. But just as there are inappropriate locations, there are appropriate ones where refineries are needed, enhance our national security, bolster our balance of payments, achieve our goals of protecting the environment, assure reasonable prices in the future for petroleum products, and promote jobs and economic well-being for hundreds of thousands of American workers and their families, communities, and States. The interests of all Americans will be promoted by this legislation. The only interest that will be adversely affected is that of those who control refineries in foreign countries, but that is hardly an interest that the Congress or the administration is charged with protecting.

I ask unanimous consent that there be printed in the RECORD at this point the text of S. 56, and a statement in support of this legislation issued by the Oil, Chemical, and Atomic Workers Union.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 56

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the headnotes for schedule 4, part 10, of the Tariff Schedules of the United States are amended by adding at the end thereof the following new headnote:

"4. (a) (1) The President shall establish a program to allocate among importers the amount of residual fuel oils and middle distillates classifiable under items 475.05 and 475.10 respectively which may be entered, or withdrawn from warehouse, for consumption free of duty during any calendar year.

"(2) To carry out the provisions of paragraph (1), the President shall issue a license to each eligible importer for each calendar year which will permit such importer to enter, or withdraw from warehouse, for consumption, free of duty, such amounts, by volume, of residual fuel oils and middle distillates classified under items 475.05 and 475.10 respectively as are determined by the table in subpart 4(b) (1) of the headnotes.

"(3) After consulting the Administrator of the Federal Energy Administration, the President shall issue licenses for the duty-free entry, or withdrawal from warehouse, for consumption of residual fuel oils and middle distillates, classified under items 475.05 and

475.10 respectively, during any calendar year to any person who, in the determination of such Administrator, is enduring severe hardship. The total amount, by volume, of such products entered, or withdrawn from warehouse, for consumption free of duty pursuant to licenses issued under this paragraph for any calendar year may not exceed 10 per cent of the amount, by volume, of such products which were entered, or withdrawn from warehouse, during calendar year 1976.

"(4) For purposes of this subsection, the term 'eligible importer' means a person who imported such products during calendar year 1976.

"(b) (1) The amount, by volume, of middle distillates and residual fuel oils which may be entered or withdrawn from warehouse, for consumption free of duty shall be a percentage of the total amount, by volume, of such products entered, or withdrawn from warehouse, for consumption during the calendar year 1976. The applicable percentage for any calendar year shall be determined in accordance with the following table:

"Year:	*Middle distillates (percent)*	*Residual fuel oils (percent)*
1978	90	80
1979	80	70
1980	60	60
1981	40	50
1982	20	35
1983 and thereafter	0	20

"(2) For purposes of paragraph (1)—

"(A) the term 'middle distillates' includes products classifiable under items 475.05 and 475.06, and

"(B) the term 'residual fuel oils' includes products classifiable under items 475.10 and 475.11.".

(b) Schedule 4, part 10, of such schedules is amended—

(1) by striking out all of that portion of the schedule on page 144 beginning with the words "Crude petroleum . . ." and ending with the words ". . . without additives";

(2) by adding new item 475.00 to read as follows:

" 475.00	Reconstituted crude petroleum and topped crude petroleum	4.77c per gal.	4.77c per gal.	";

(3) by striking all of item 475.05 and inserting in lieu thereof the following:

" 475.05	Middle distillate fuel oils (including kerosene) derived from petroleum, shale, or both, with or without additives, and certified by importer not to be further refined, in any calendar year prior to entry, or withdrawal from warehouse, for consumption of an amount equal to the applicable percentage for that year, as determined under headnote 4(b) to this subpart	Free	Free	
475.06	Other middle distillate fuel oils	7.14c per gal.	7.14c per gal.	

(4) by striking all of item 475.10 and inserting in lieu thereof the following:

" 475.10	Residual fuel oils derived from petroleum, shale, or both, with or without additives, and certified by importer not to be further refined, in any calendar year prior to entry, or withdrawal withdrawal from warehouse, for consumption of an amount equal to the applicable percentage for that year, as determined under headnote 4(b) to this subpart	Free	Free	
475.11	Other residual fuel oils	4.77c per gal	4.77c per gal	";

(5) by striking all of item 475.25 and inserting in lieu thereof the following:

" 475.25	Motor fuel: Jet fuel	7.14c per gal	7.14c per gal	
475.26	Other	9.52c per gal	9.52c per gal	";

(6) by striking all of item 475.30,

(7) by striking out "0.25¢ per gal." and "0.5c per gal." in rate columns numbered 1 and 2 of item 475.35 and inserting in lieu thereof "7.14¢ per gal.", respectively,

(8) by striking out "0.2¢ per gal." and "0.5¢ per gal." in rate columns numbered 1 and 2 of item 475.40 and inserting in lieu thereof "7.14¢ per gal.", respectively,

(9) by striking out "2¢ per gal." and "4¢ per gal." in rate columns numbered 1 and 2 of item 475.45 and inserting in lieu thereof "7.14¢ per gal.", respectively, and

(10) by striking out "0.25¢ per gal." and "0.5¢ per gal." in rate columns numbered 1 and 2 of item 457.65 and inserting in lieu thereof "7.14¢ per gal.", respectively.

SEC. 22. (a) The Secretary of the Treasury shall pay to the government of each State an amount equal to the total amount of duties collected on products classifiable under items 475.06 and 475.11 of the Tariff Schedules of the United States which are first sold in such State, as determined under subsection (b).

(b) For purposes of subsection (a), a product shall be considered to be first sold in a State if the domicile of the first person who purchases such product from the importer thereof is in such State or, in the case of an importer who is the final consumer of such product, the domicile of such importer. Each importer of such products shall report to the Administrator of the Federal Energy Administration, in such form, manner, and at such time as the Administrator prescribes by regulations, the identity of each person to whom such importer sells such products. The Administrator of the Federal Energy Administration shall report the amount of such products sold in each State to the Secretary of the Treasury from time to time.

(c) There are authorized to be appropriated to the Secretary of the Treasury an amount equal to the amount of duties collected on such products during each calendar year for the purpose of carrying out the provisions of this section.

(d) For purposes of this section, the term "State" includes each State of the United States, the District of Columbia, and the Commonwealth of Puerto Rico.

SEC. 3. (1) The amendments made by the first section of this Act shall apply with respect to articles entered, or withdrawn from warehouse, for consumption after December 31, 1977.

(2) The rates of duty prescribed in rate columns numbered 1 of the Tariff Schedules of the United States, as amended by this Act, shall be considered to have been proclaimed by the President as being required or appropriate to carry out trade agreements to which the United States is a party, not as statutory provisions enacted by Congress.

WHY OCAW SUPPORTS S. 56

(By A. F. Grospiron, President, Oil, Chemical and Atomic Workers International Union, AFL–CIO)

The Oil, Chemical and Atomic Workers International Union, AFL–CIO, represents approximately 200,000 workers in the United States and Canada. Its members employed by the oil industry work in refineries which produce more than two-thirds of the finished petroleum products sold in the U.S.

As the population of the U.S. has grown, the demand for more and more petroleum products has increased. Even today, despite the oil embargo of 1973 and a great public awareness of petroleum shortages, demand for oil products has lessened only slightly.

It has long been the contention of OCAW that the U.S. oil industry has failed to expand its refining capacity in this country to keep up with the demand of its growing population.

In 1975, domestic refineries were capable of meeting no more than 94 percent of the nation's demand for refined petroleum products. In actuality, the industry met 87 percent of that demand. The remainder had to be imported.

Three-quarters of those imports were supplied by refineries situated in the Bahamas and the Caribbean area. In recent years, many oil refineries have been constructed in that area for the sole purpose of selling residual fuel oil on the U.S. mainland. As a result, the U.S. now depends on those foreign refineries for 40 percent of its residual fuel oil requirement.

It is estimated that more than 2,000,000 barrels per day of refining capacity has been "exported" to foreign locations over the last twelve years. By way of comparison. Texaco's huge refinery at Port Arthur, Texas, one of the largest in the country, processes 400,000 barrels of crude oil per day, or about 20 percent of that 2,000,000 barrels of exported capacity. Or, put another way, U.S. oil companies have built refineries in other countries equivalent to five plants the size of Texaco's gigantic Port Arthur refinery.

This substantiates another position of OCAW, that the practice of building refineries overseas deprives American workers of oil industry jobs. On the average, it requires 12 refinery workers for each thousand barrels of crude processed daily. The exportation of 2,000,000 barrels per day of refinery capacity is therefore equivalent to the exportation (and elimination) of 24,000 jobs.

Additionally, according to a study by Gulf Canada, each refinery job creates 3.5 jobs in closely allied service and manufacturing sectors, and it is that company's opinion that the same holds true in the U.S. That alone is equal to 84,000 jobs, which added to the 24,000 refinery jobs, totals 108,000 jobs lost to overseas refining of petroleum products for the U.S. market.

To further illustrate the impact upon the U.S. economy of that trend, the study uses an average U.S. household of 3.2 persons and comes up with a total of some 346,000 persons affected. The figures do not take into account the employment in other service areas such as housing, food, entertainment, education, roads and municipal needs. Nor do the figures include the beneficial impact on other segments of the U.S. economy and the considerable amount of state, local and federal taxes to be paid by those workers.

To cite a specific example: Crown Central Petroleum Corporation, a small independent refiner, since 1971 has been actively planning for the construction of a 200,000-barrel-per-day refinery to be located at Baltimore, Maryland. Projected total cost of the refinery would be approximately $500,000,000.

The proposed refinery would emphasize the processing of synthetic natural gas and low sulfur fuel oils in order to help supply the energy needs of the area. Construction would last an estimated two to three years and would employ up to 2,000 building tradesmen at peak construction periods. When completed, the refinery would employ some 300 full-time employes.

The construction of the refinery would require steel for structures, tanks, valves and other equipment requiring 900,000 man-hours for production at the mill. An even greater number of man-hours would be required for the conversion of that raw steel into compressors, reactors, valves and other equipment. In addition, equally large quantities of concrete, paint, electric cable and equipment would be manufactured and delivered to the construction site.

Obviously, if even a few refinery projects of this size were begun, the immediate

and long-term economic benefits would be tremendous.

The importation of refined petroleum products means the exportation of American dollars, resulting in even greater adverse effects on the U.S. balance of payments.

Additionally, the United States faces a continued possibility of another oil embargo. One can but speculate on the pressures that might be applied by host foreign countries on refineries to cease or curtail shipment of refined petroleum products to the U.S. during any such political crisis.

Senate Bill 56 would do much to halt the flight of runaway refineries from the U.S. to foreign countries. The bill, introduced by Sen. Charles McC. Mathias, would amend the tariff schedules of the U.S. to impose gradually escalating rates of duty on petroleum products refined outside of the country.

Under the proposal, revenue from the increased duty would be distributed to the states which consume such products. In effect, it would cause price increases on refined petroleum products shipped into the U.S. from other nations, and oil companies would find it more profitable to build their refineries within the borders of the U.S.

As a general principle, OCAW is opposed to higher taxes which cause higher prices on consumer products. However, as the additional money to be spent on petroleum products would be returned to the states in which those products are consumed, and because it could lead to increased employment in the building trades and the U.S. oil industry, OCAW favors passage of the Mathias bill.

In addition, Senate Bill 56 would encourage the growth of the domestic refining industry, serving as a protective device against importation of refined petroleum products, and reducing our dependence on foreign energy supplies.

By Mr. MUSKIE:

S. 57. A bill to amend the Federal Water Pollution Control Act, as amended, and for other purposes; to the Committee on Public Works.

WATER POLLUTION FUNDING

Mr. MUSKIE. Mr. President, last year, with the end of the session, legislation to extend the funding provisions of the Federal Clean Water Act died in a conference committee. Today, several States are in the position of exhausting their remaining water pollution construction grant funds in the near future.

The water pollution control program must be continued. The pipeline of construction activities in this vital environmental program must remain filled. Neither our environment nor our economy can afford a disruption in this program. The wastes of our cities must be treated, and the jobs that are created by the construction activity associated with this program must be continued.

Today I am introducing a very simple bill which is identical to measures passed by the Senate last session. This authorizes 2 years of water pollution construction grant funds, provides a system for allotment of those funds among the States and extends other needed authorization. There are, of course, many other issues for which legislation has been suggested. None is as important as continuing the construction grant program.

I would hope my colleagues would refrain from offering amendments to this bill in order to avoid the kind of controversy that killed the legislation last year. I am committed to a thorough review of the Water Pollution Control Act; I am committed to reporting any needed amendments to that legislation as early as possible in this session of Congress; and I hope that this commitment will be adequate to satisfy the concerns of my colleagues. I would hope that we could get this legislation to the new President within days of his inauguration.

Mr. President, I ask unanimous consent to include a copy of the legislation in the RECORD, at the conclusion of my remarks. I ask further unanimous consent that two lists of the States, totalling 32 which may exhaust their funds, also be included in the RECORD.

Essentially, the first list is the best case and the second list is the worst. The reasons for the difference include the following:

Recognizing that their current allotments will not last, many States have slowed their programs to avoid completely running out of funds; and

Many States estimate an earlier run-out date than that estimated by EPA.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 57

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Section 517 of the Federal Water Pollution Control Act, as amended (Pub. L. 92–500), is amended by striking the word "and" before the words $350,000,000" and by striking the period at the end thereof and inserting the words "and $350,000,000 for each of the fiscal years ending June 30, 1976, September 30, 1977, and September 30, 1978."

SEC. 2.(a) Section 104 of the Federal Water Pollution Control Act, as amended (P.L. 92–500), is amended by adding the following new subsection:

"(v) There are authorized to be appropriated to the Environmental Protection Agency for the following categories of research, development, and demonstration under this Act not to exceed $148,800,000 for each of the fiscal years ending September 30, 1977, and September 30, 1978, of which each year —

"(1) $89,900,000 shall be for programs authorized by paragraph (1) of subsection (u) of this section,

"(2) $5,600,000 shall be for programs authorized by paragraph (4) of subsection (u) of this section,

"(3) $2,000,000 shall be for programs authorized by paragraph (5) of subsection (u) of this section,

"(4) $20,000,000 shall be for programs authorized by paragraph (6) of subsection (u) of this section,

"(5) $24,700,000 shall be for programs authorized by section 105(h) of this Act,

"(6) $4,600,000 shall be for programs authorized by section 107 of this Act, and

"(7) $2,000,000 shall be for programs authorized by section 113 of this Act.".

(b) Subsection (a) of section 106 of the Federal Water Pollution Control Act, as amended (P.L. 92–500), is amended by striking the word "and" after the words "1973," and by inserting after the words "1974;" the following: "and (3) $75,000,000 for each of the fiscal years ending June 30, 1975, June 30, 1976, September 30, 1977, and September 30, 1978;".

(c) Subsection (c) of section 112 of the Federal Water Pollution Control Act, as amended to read as follows:

"(c). There are authorized to be appropriated $25,000,000 per fiscal year for the fiscal years ending June 30, 1973, June 30, 1974, June 30, 1975, June 30, 1976, September 30, 1977, and September 30, 1978, to carry out sections 109 through 112 of this Act.".

SEC. 3. (a) Section 207 of the Federal Water Pollution Control Act, as amended (86 Stat. 839), is amended by striking the period at the end of the sentence and adding ", and for each of the fiscal years ending September 30, 1977, and September 30, 1978, subject to such amounts are are provided in appropriation Acts, not to exceed $5,000,000,000.".

(b) The first sentence of subsection (a) of section 205 of the Federal Water Pollution Control Act (86 Stat. 837) is amended by striking out "June 30, 1972," and inserting in lieu thereof "June 30, 1972, and before September 30, 1976,".

(c) Such section 205 is further amended by adding at the end thereof the following new subsections:

"(c) Sums authorized to be appropriated pursuant to section 207 for each fiscal year beginning after September 30, 1976, shall be allotted by the Administrator on October 1 of the fiscal year for which authorized. Sums authorized for the fiscal years ending September 30, 1977, and September 30, 1978, shall be allotted in accordance with the following table:

"State	*Proportional share*
Alabama	0.0110
Alaska	.0048
Arizona	.0064
Arkansas	.0109
California	.0831
Colorado	.0081
Connecticut	.0123

If the sums allotted to the States for a fiscal year are made subject to a limitation on obligation by an appropriation Act, such limita-

tion shall apply to each State in proportion to its allotment.".

SEC. 4. (a) Section 208(f)(2) of the Federal Water Pollution Control Act (33 U.S.C. 2188) is amended to read as follows:

"(2) For the two-year period beginning on the date the first grant is made under paragraph (1) of this subsection to an agency, if such first grant is made before October 1, 1977, the amount of each such grant to such agency shall be 100 per centum of the costs of developing and operating a continuing areawide waste treatment management planning process under subsection (b) of this section, and thereafter the amount granted to such agency shall not exceed 75 per centum of such costs in each succeeding one-year period. In the case of any other grant made to an agency under such paragraph (1) of this subsection, the amount of such grant shall not exceed 75 per centum of the costs of developing and operating a continuing areawide waste treatment management planning process in any year.".

(b) The second sentence of section 208(f)(3) of the Federal Water Pollution Control Act (33 U.S.C. 1288) is amended by striking out the period at the end thereof and inserting in lieu thereof a comma and the following: "subject to such amounts as are provided in appropriation Acts.".

(c) Section 208(f)(3) of the Federal Water Pollution Control Act (33 U.S.C. 1288) is amended by striking out "and not to exceed $150,000,000 for the fiscal year ending June 30, 1975." and inserting in lieu thereof "and not to exceed $150,000,000 per fiscal year for the fiscal years ending June 30, 1975, September 30, 1977, and September 30, 1978.".

SEC. 5. Paragraph (2) of subsection (c) of section 314 of the Federal Water Pollution Control Act, as amended, is amended to read as follows:

"(2) There is authorized to be appropriated $50,000,000 for the fiscal year ending June 30, 1973; $100,000,000 for the fiscal year ending June 30, 1974; and $150,000,000 for each of the fiscal years 1975, 1976, 1977, and 1978 for grants to States under this section which such sums shall remain available until expended. The Administrator shall provide for an equitable distribution of such sums to the States with approved methods and procedures under this section.".

*Based on a survey done by National Governor's Conference.

By Mr. HELMS (for himself and Mr. MCCLURE):

S. 59. A bill to amend the Internal Revenue Code of 1954 to permit employers to withhold payroll taxes from the wages of employees who are paid on a weekly, biweekly, or semimonthly basis from a single payment of wages each month; to the Committee on Finance.

WITHHOLDING TAX REVISIONS

Mr. HELMS. Mr. President, since the withholding tax was instituted in 1943, every time an employee receives a salary payment from his employer, a certain amount has been deducted for Federal income tax. Under the social security system and the railroad retirement program, an added amount has been deducted from the pay most people receive for these retirement taxes. The total of that tax burden on the average American is now approximately the same as a medieval serf had to pay to the owner of the land.

The enormity of the tax burden on working men and women in this Nation has, in effect, been hidden by the withholding provisions of our tax code. Many groups in our Nation have begun to voice objection to the high level of taxation—and this, I believe, is good.

I propose amending the tax code so that the withholding tax due in any 4-week period can be withheld in any one of the weekly or biweekly salary payments received in that period. It would dramatize the confiscatory levels of taxation with which Americans are now burdened and it would occasionally make clear the total paycheck that Americans would receive without the great chunks of income taxes and social security or railroad retirement taxes workers pay.

There may be good reasons to provide for regular tax payments on a month-to-month basis, in order to match Federal expenditures with Federal revenues, but there is no reason for not enacting the once-a-month deduction of taxes, other than covering up the tax burden.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 59

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. OPTIONAL METHOD OF WITHHOLDING.

(a) INCOME TAX.—Section 3402 of the Internal Revenue Code of 1954 (relating to income tax collected at source) is amended by adding at the end thereof the following new subsection:

"(r) OPTIONAL WITHHOLDING REQUIREMENT.—At the election of an employer, made at such time and in such manner as the Secretary may prescribe, the employer may deduct and withhold upon wages paid to any employee whose payroll period is weekly, biweekly, or semimonthly the full amount required to be withheld by subsection (a) for any four-week period from a single payment of wages during that period. If an employer elects to have the provisions of this subsection apply, he must apply the method of deduction and withholding permitted under this paragraph with respect to all such employees.".

(b) OLD AGE, SURVIVORS, AND DISABILITY INSURANCE, ETC., TAX.—Section 3102(a) of such Code (relating to requirement of deduction of tax from wages) is amended by adding at the end thereof the following new sentence: "If an employer elects to deduct and withhold the tax imposed by section 3402(a) under the method described in section 3402(r), deductions under this subsection shall be made at the same time and in the same manner with respect to his employees.".

(c) RAILROAD RETIREMENT TAX.—Section 3202(a) of such Code (relating to requirement of deduction of tax from compensation) is amended by adding at the end thereof the following new sentence: "If an employer elects to deduct and withhold the tax imposed by section 3402(a) under the method described in section 3402(r), deductions under this subsection shall be made at the same time and in the same manner with respect to his employees.".

SEC. 2. EFFECTIVE DATE.

The amendments made by this Act apply with respect to wages paid more than 90 days after the date of enactment of this Act.

By Mr. INOUYE:

S. 60. A bill to amend title II of the Social Security Act to eliminate the special dependency requirements for entitlement to husband's and widower's insurance benefits, to provide benefits for widowed fathers with minor children and to make certain other changes so that benefits for husbands, widowers, and fathers will be payable on the same basis as benefits for wives, widows, and mothers; to the Committee on Finance.

Mr. INOUYE. Mr. President, I rise today to propose certain changes in title II of the Social Security Act which I feel will bring our system of compensation into line with this Nation's changing social conditions.

The women's liberation movement has been a potent force for change during the past decade. The movement has awakened this Nation to how it wastes valuable resources by relegating women, through tradition and law, to inferior roles. It hopefully has taught us to evaluate human beings on an individual basis without regard to sex.

Thanks to the women's movement, we are moving to overturn legal barriers to equal opportunity for both sexes. I am proud to say that my State of Hawaii was the first to ratify the equal rights amendment which, when it becomes part of the Constitution, will eliminate what discriminatory laws have not been removed already by legislative and judicial action.

The equal rights movement has directed attention at legal discrimination against women, but it should also make us aware that some laws discriminate against men. There are several abuses of this nature in the Social Security Act, and I propose we do away with them.

We must realize special treatment for women, simply because they are women, is as wrong as discrimination against them, because of their race. Several sections of the present Social Security Act allot special benefits to women in certain situations, but refuse these benefits to men in the same situations. This is wrong and should be corrected.

For example, when a man covered by social security dies, his widow receives special benefits if she is 62 or has a minor child. But if a woman covered by social security dies, her widower in the same circumstances only receives a small, one-time death benefit unless he can prove his wife provided at least half his support.

This provision seems especially unfair

at a time when 30 million women are working and paying into the social security trust fund. Under these circumstances, we cannot assume a wife provides less than half her family's income. This provision is especially disturbing in Hawaii where we have a higher percentage of working wives than any other State.

To correct this abuse and several related ones. I am offering this bill today. In addition to allowing widowers to collect benefits without proving dependence, my bill would:

Permit a divorced man to draw a spouse's benefit at age 62 if the marriage lasted 20 years and he has not remarried. Divorced women now enjoy this benefit;

Pay a parent's benefit to a surviving father with a child in his care until the child reaches the age 22. Surviving mothers now receive such benefits;

Permit a man to draw a spouse's benefit equal to half the primary amount, if he is caring for a minor child or has reached age 62. Men now receive this benefit only if they are 62 or older. Women are eligible under either circumstance.

Mr. President, these are not major changes, nor do I believe they will be costly ones. But their enactment will be a reaffirmation of our opposition to sex discrimination in all forms.

Social security payments now account for about one-fifth of Federal expenditures. Approximately 33 million Americans benefit from this program. A system so big and so inclusive must be fair. I believe the amendments I am proposing will make it more fair.

Mr. President, I request unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 60

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

ELIMINATION OF SPECIAL DEPENDENCY REQUIREMENTS FOR HUSBAND'S AND WIDOWER'S BENEFITS

SECTION 1. (a)(1) Section 202(c)(1) of the Social Security Act is amended—

(A) by adding "and" at the end of subparagraph (B);

(B) by striking out subparagraph (C); and

(C) by redesignating subparagraph (D) as subparagraph (C).

(2) Section 202(c) of such Act is further amended by striking out paragraph (2), and by redesignating paragraph (3) as paragraph (2).

(b)(1) Section 202(f)(1) of such Act is amended—

(A) by adding "and" at the end of subparagraph (C);

(B) by striking out subparagraph (D); and

(C) by redesignating subparagraphs (E), (F), and (G) as subparagraphs (D), (E), and (F), respectively.

(2) Section 202(f) of such Act is further amended by striking out paragraph (2), and by redesignating paragraphs (3) through (8) as paragraphs (2) through (7), respectively.

(3)(A) Section 202(f)(1)(B) of such Act is amended by striking out "paragraph (6)" and inserting in lieu thereof "paragraph (5)".

(B) The subparagraph of section 202(f)(1) of such Act redesignated as subparagraph (F) by paragraph (1)(C) of this subsection is amended by striking out "paragraph (7)" and "paragraph (6)" and inserting in lieu thereof "paragraph (6)" and "paragraph (5)", respectively.

(C) Subparagraph (A) of the paragraph of section 202(f) of such Act redesignated as paragraph (2) by paragraph (2) of this subsection is amended by striking out "paragraph (5)" and inserting in lieu thereof "paragraph (4)".

(D) The paragraph of section 202(f) of such Act redesignated as paragraph (4) by paragraph (2) of this subsection is amended by striking out "paragraph (4)" and "paragraph (3)" and inserting in lieu thereof "paragraph (3)" and "paragraph (2)", respectively.

(E) The paragraph of section 202(f) of such Act redesignated as paragraph (6) by paragraph (2) of this subsection is amended by striking out "paragraph (1)(G)" and "paragraph (6)" and inserting in lieu thereof "paragraph (1)(F)" and "paragraph (5)", respectively.

ELIGIBILITY OF CERTAIN DIVORCED HUSBANDS AND FORMER HUSBANDS FOR HUSBAND'S AND WIDOWER'S BENEFITS

SEC. 2. (a)(1) Section 202(c)(1) of the Social Security Act is amended by inserting "and every divorced husband (as defined in section 216(d))" immediately after "husband (as defined in section 216(f))", and by inserting "or such divorced husband" immediately after "if such husband", in the matter preceding subparagraph (A).

(2) Section 202(c)(1) of such Act (as amended by the first section of this Act) is further amended by striking out "and" at the end of subparagraph (B), by redesignating subparagraph (C) as subparagraph (D), and by inserting immediately after subparagraph (B) the following new subparagraph:

"(C) in the case of a divorced husband, is not married, and".

(3) Section 202(c)(1) of such Act is further amended by striking out "shall be entitled" and inserting in lieu thereof "shall (subject to subsection (s)) be entitled".

(4) Section 202(c)(1) of such Act is further amended—

(A) by inserting immediately after "they are divorced" in the matter following the colon the following: "(in the case of a husband) and either he has not attained age 62 or he has attained such age but has not been married to such individual for a period of 20 years immediately before the date the divorce became effective"; and

(B) by adding at the end thereof the following new sentence: "In the case of a divorced husband, entitlement to such benefits shall also end with the month preceding the month in which he marries a person other than such individual.".

(5) Section 202(c)(2) of such Act (as redesignated by the first section of this Act) is amended by inserting after "his wife" the following: "(or, in the case of a divorced husband, his former wife)".

(6) Section 202(c) of such Act (as amended by the first section of this Act) is further amended by adding at the end thereof the following new paragraph:

"(3) In the case of any divorced husband who marries—

"(A) an individual entitled to benefits under subsection (e) or (h) of this section, or

"(B) an individual who has attained the age of 18 and is entitled to benefits under subsection (d),

such divorced husband's entitlement to benefits under this subsection shall, notwithstanding the provisions of paragraph (1) (but subject to subsection (s)), not be terminated by reason of such marriage.".

(b)(1) Section 202(f)(1) of such Act is amended by inserting "and every surviving divorced husband (as defined in section 216(d))" immediately after "widower (as defined in section 216(g))", and by inserting "or such surviving divorced husband" immediately after "if such widower", in the matter preceding subparagraph (A).

(2) Section 202(f)(1)(A) of such Act is amended by striking out "has not remarried" and inserting in lieu thereof "is not married".

(3) Section 202(f) of such Act is further amended by inserting "or surviving divorced husband" immediately after "widower" each place it appears in paragraphs (2)(B), (3), (5), and (6) as redesignated by the first section of this Act).

(4) Section 202(f)(3) of such Act (as so redesignated) is amended by inserting "or surviving divorced husband's" immediately after "widower's".

(c)(1) Section 216(d)(1) of such Act is amended by adding at the end thereof the following new sentence: "The term 'divorced husband' means a man divorced from an individual, but only if he had been married to such individual for a period of 20 years immediately before the date the divorce became effective.".

(2) Section 216(d)(2) of such Act is amended by adding at the end thereof the following new sentence: "The term 'surviving divorced husband' means a man divorced from an individual who has died, but only if he had been married to such individual for a period of 20 years immediately before the date the divorce became effective.".

(3) The heading of section 216(d) of such Act is amended by inserting "and Husbands" immediately after "Wives".

ELIGIBILITY FOR HUSBAND'S BENEFITS BASED ON HAVING CHILD IN CARE

SEC. 3. (a) Section 202(c)(1)(B) of the Social Security Act is amended to read as follows:

"(B) has attained age 62 or (in the case of a husband) has in his care (individually or jointly with such individual) at the time of filing such application a child entitled to a child's insurance benefit on the basis of the wages and self-employment income of such individual,".

(b) Section 202(c)(1) of such Act (as amended by section 2(a) of this Act) is further amended by inserting immediately after the first sentence the following new sentence: "In the case of a husband who has not attained age 62, entitlement to such benefits shall also end with the month preceding the first month in which no child of the insured individual is entitled to a child's insurance benefit.".

BENEFITS FOR WIDOWED FATHERS WITH MINOR CHILDREN

SEC. 4. Section 202(g) of the Social Security Act is amended to read as follows:

"Mother and Father's Insurance Benefits

"(g)(1) The widow, widower, and every surviving divorced mother or father (as defined in section 216(d)) of an individual who died a fully or currently insured individual, if such widow, widower, or surviving divorced mother or father—

"(A) is not married,

"(B) is not entitled to a widow's or widower's insurance benefit,

"(C) is not entitled to old-age insurance benefits, or is entitled to old-age insurance benefits each of which is less than three-fourths of the primary insurance amount of such individual,

"(D) has filed application for mother's or father's insurance benefits, or was entitled to wife's or husband's insurance benefits on the basis of the wages and self-employment income of such individual for the month preceding the month in which such individual died, and

"(E) at the time of filing such application has in her or his care a child of such individual entitled to a child's insurance benefit,

shall (subject to subsection (s)) be entitled to a mother's or father's insurance benefit for each month, beginning with the first month in which she or he becomes so entitled to such insurance benefits and ending with the month preceding the first month in which any of the following occurs: no child of such deceased individual is entitled to a child's insurance benefit, or such widow, widower, or surviving divorced mother or father becomes entitled to an old-age insurance benefit equal to or exceeding three-fourths of the primary insurance amount of such deceased individual, becomes entitled to a widow's or widower's insurance benefit, remarries, or dies. Entitlement to such benefits shall also end, in the case of a surviving divorced mother or father, with the month immediately preceding the first month in which no son, daughter, or legally adopted child of such surviving divorced mother or father is entitled to a child's insurance benefit on the basis of the wages and self-employment income of such deceased individual.

"(2) Such mother's or father's insurance benefit for each month shall be equal to three-fourths of the primary insurance amount of such deceased individual.

"(3) In the case of a widow, widower, or surviving divorced mother or father who marries—

"(A) an individual entitled to benefits under this subsection or subsection (a), (b), (e), (f), or (h), or under section 223(a), or

"(B) an individual who has attained the age of eighteen and is entitled to benefits under subsection (d),

the entitlement of such widow, widower, or surviving divorced mother or father to benefits under this subsection shall, notwithstanding the provisions of paragraph (1) but subject to subsection (s), not be terminated by reason of such marriage; except that, in the case of such a marriage to an individual entitled to benefits under section 223(a) or subsection (d) of this section, the preceding provisions of this paragraph shall not apply with respect to benefits for months after the last month for which such individual is entitled to such benefits under section 223(a) or subsection (d) of this section unless (i) he or she ceases to be so entitled by reason of his or her death, or (ii) in the case of an individual who was entitled to benefits under section 223(a), he or she is entitled, for the month following such last month, to benefits under subsection (a) of this section.".

MISCELLANEOUS CONFORMING AMENDMENTS

SEC. 5. (a)(1) Section 202(b)(3)(A) of the Social Security Act is amended by striking out "(f) or (h)" and inserting in lieu thereof "(f), (g), or (h)".

(2) Section 202(b)(3) of such Act is further amended by striking out the semicolon and all that follows and inserting in lieu thereof a period.

(b)(1) Section 202(e)(3)(A) of such Act is amended by striking out "(f) or (h)" and inserting in lieu thereof "(f), (g), or (h)".

(2) Section 202(e)(3) of such Act is further amended by striking out the semicolon and all that follows and inserting in lieu thereof a period.

(c) Section 202(f)(1)(C) of such Act is amended by inserting after the comma at the end thereof the following: "or was entitled, on the basis of such wages and self-employment income, to father's insurance benefits for the month preceding the month in which he attained age 62,".

(d) Section 202(k) of such Act is amended—

(1) by striking out "or (f)(5)" wherever it appears in paragraphs (2)(B) and (3)(B) and inserting in lieu thereof in each instance "or (f)(4)"; and

(2) by striking out "or (f)(3)" in paragraph (3)(A) and inserting in lieu thereof "or (f)(2)".

(e)(1) Section 202(p)(1) of such Act is amended by striking out "subparagraph (C) of subsection (c)(1),".

(2) Section 202(p)(1) of such Act is further amended by striking out "clause (i) or (ii) of subparagraph (D) of subsection (f)(1), or".

(f) Section 202(s) of such Act is amended—

(1) by inserting "(c)(1)," after "(b)(1),"in paragraph (1);

(2) by striking out "Subsection (f)(4), and so much of subsections (b)(3), (d)(5), (e)(3), (g)(3), and (h)(4), of this section as precedes the semicolon" in paragraph (2) and inserting in lieu thereof "Subsections (b)(3), (c)(4), (e)(3), and (f)(3), and so much of subsections (d)(5), (g)(3), and (h)(4) of this section as precedes the semicolon";

(3) by striking out "Subsections (c)(2)(B) and (f)(2)(B) of this section, so much of subsections (b)(3), (d)(5), (e)(3), (g)(3), and (h)(4)" in paragraph (3) and inserting in lieu thereof "So much of subsections (d)(5), (g)(3), and (h)(4)".

(g) Section 203(c)(2) of such Act is amended—

(1) by striking out "wife" and inserting in lieu thereof "wife or husband";

(2) by striking out "wife's" each place it appears and inserting in lieu thereof "wife's or husband's";

(3) by striking out "her care" and inserting in lieu thereof "her or his care"; and

(4) by striking out "her husband" each place it appears and inserting in lieu thereof "her or his spouse".

(h)(1) Section 203(c)(3) of such Act is amended to read as follows:

"(3) in which such individual, if a widow or widower entitled to a mother's or father's insurance benefit, did not have in her or his care a child of the deceased husband or wife entitled to a child's insurance benefit; or".

(2) Section 203(c)(4) of such Act is amended to read as follows:

"(4) in which such individual, if a surviving divorced mother or father entitled to a mother's or father's insurance benefit did not have in her or his care a child of her or his deceased former spouse who (A) is her or his son, daughter, or legally adopted child and (B) is entitled to a child's insurance benefit on the basis of the wages and self-employment income of her or his deceased former spouse.".

(i) The last sentence of section 203(c) of such Act is amended by inserting "or surviving divorced husband" after "the widower".

(j) The second sentence of section 205(b) of such Act is amended by inserting "surviving divorced father," after "surviving divorced mother,", by inserting "divorced husband," after "husband,", and by inserting "surviving divorced husband," after "widower,".

(k)(1) Section 216(d)(3) of such Act is amended to read as follows:

"(3) The term 'surviving divorced mother or father' means an individual divorced from a person who has died, but only if (A) such individual is the mother or father of such person's son or daughter, (B) such individual legally adopted such person's son or daughter while such individual and such person were married and while such son or daughter was under the age of 18, (C) such person legally adopted such individual's son or daughter while such individual and such person were married and while such son or daughter was under the age of 18, or (D) such individual was married to such person at the time both of them legally adopted a child under the age of 18."

(2) The heading of section 216(d) of such Act (as amended by section 2(c)(3) of this Act) is amended by inserting "Surviving Divorced Mothers and Fathers;" immediately after "Husbands;".

(l)(1) The first sentence of section 222(b)(1) of such act is amended by striking out "or surviving divorced wife" and inserting in lieu thereof ", surviving divorced wife, or surviving divorced husband".

(2) Section 222(b)(2) of such Act is amended by inserting "or father's" after "mother's" each place it appears.

(3) Section 222(b)(3) of such Act is amended by inserting "divorced husband," immediately after "husband,".

(m) Section 222(d)(1) of such Act is amended by inserting "and surviving divorced husbands" immediately after "for widowers".

(n) Section 223(d)(2) of such Act is amended by striking out "or widower" in subparagraphs (A) and (B) and inserting in lieu thereof "widower, or surviving divorced husband".

(o) The first sentence of section 225 of such Act is amended by inserting "or surviving divorced husband" immediately after "a widower".

EFFECTIVE DATE

SEC. 6. The amendments made by this Act shall apply with respect to monthly insurance benefits payable under title II of the Social Security Act for months after the month in which this Act is enacted, on the basis of application filed in or after the month in which this Act is enacted.

By Mr. HOLLINGS:

S. 61. A bill entitled the Energy Transportation Security Act of 1977; to the Committee on Commerce.

ENERGY TRANSPORTATION SECURITY ACT OF 1977

Mr. HOLLINGS. Mr. President, I am today introducing the Energy Transportation Security Act of 1977. When President Ford vetoed such legislation at the close of the 93d Congress, many of us warned of the injurious economic effects which were bound to follow such veto. These consequences became clear.

The respected journal, Business Week, contained a report on the declining status of our hard-hit shipbuilding yards. Specific reference was made in the article to the Seatrain Shipbuilding Corp. where two large U.S.-flag tankers had been under construction; one of these ships was 82-percent completed, and the other 30 percent. The Government's role in financing construction of these vessels has, of course, been considerable, through construction subsidies and loan guarantees. Now the future of the ships, and of the whole American tanker industry, is up in the air. The President's veto provided a serious body blow to America's chances of launching an adequate tanker fleet. Our yards are cutting back and workers are being laid off, thereby exacerbating the current economic recession. While the President talked about made-work jobs for the unemployed, he simultaneously delivered this devastating setback to an industry which is vital to the future well-being of the country. By failing to implement cargo preferences, the President makes us ever more dependent upon the ships of other nations for our energy imports—and we know now that the Arabs themselves are making an all-out effort to capture control of world oil shipping, thereby giving them even more control over the future of the United States and the other oil-consuming countries.

How such a piece of legislation can be vetoed is beyond me. For the sake of jobs—for the sake of encouraging a vital American industry—and for the sake of avoiding increased dependence upon the oil-exporting nations—the Congress should pass the Energy Transportation Act by a majority sufficient to insure its being written into the lawbooks.

Let me point out also, Mr. President, that the cargo preference provisions of this legislation would not only have facilitated jobs and enhanced our national security, but they would also have gone a long way toward encouraging safety in the transportation of imported energy. If we could move from the present 4 percent up to 30 percent of imported oil brought in in American bottoms, then that much more oil would be moved in ships built to the high standards of American safety. Recently the commandant of the Coast Guard testified before Congress that safety would be greatly improved if that higher percentage of imported energy was required to move in American bottoms.

Mr. President, it is up to the Congress to act on this, and if we move with dispatch and with the sufficient majority, we may perhaps reverse the stagnating situation in our shipbuilding yards—put people back to work on productive and important jobs—and protect the national interest by leading the way toward increased independence for the United States.

Mr. President, I ask unanimous consent that the article from Business Week which I mentioned earlier in my remarks be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE UNITED STATES MAY BAIL OUT SEATRAIN'S TANKERS

Until President Ford exercised a year-end pocket veto of a bill that would have required 30% of U.S. oil imports to be carried in U.S. flag tankers, prospects for Seatrain Shipbuilding Corp., a subsidiary of Seatrain Lines, Inc., were merely risky. Now they are desperate. This week a four-man team from the Federal Maritime Administration returned from a fact-finding trip to New York, where Seatrain builds tankers in the old Brooklyn Navy Yard. The yard is virtually shut down, following an announced four-week furlough last week of 1,800 workers that left only a few caretakers. The yard had already reduced its work force by more than 1,000 employees since December.

The Maritime Administration's fact finders, headed by Deputy Assistant Secretary Howard F. Casey, were looking after the government investment in two 225,000-dwt U.S. flag tankers under construction in the yard. One, about 82% complete, and the other, scheduled for December 1977 delivery, is about 30% finished. Two earlier tankers built by the yard were delivered in December 1973 and December 1974, respectively. At the moment, however, the yard has no firm buyer or lessee in sight for the two tankers under construction.

The government has two major interests in the ships: It has paid out $31.5-million so far in construction subsidy progress payments, and it also guaranteed 75% of the private funds borrowed to build the ships. (Under a term loan agreement with its banks, Seatrain Lines was supposed to make principal payments on about $45-million outstanding at the end of January. However, a spokesman for Chase Manhattan Bank said this week that talks were under way to extend this date to the end of February.)

THE OPTIONS

The question facing Robert J. Blackwell, Assistant Secretary of Commerce for maritime affairs, is how best to protect the government's investment. Basically, his options boil down to whether the government should pay an additional $18-million to $20-million to finish the first tanker, and $40-million or more for the second, or whether it should end support now.

One factor affecting the decision is whether the world market for tankers, currently very depressed, is likely to improve by the time the vessels are finished. Another factor is the impact of the yard layoffs on the Brooklyn economy. The yard has been a pilot project in rehabilitating a depressed region by on-the-job training of the local work force to perform skilled tasks. A delegation of New York interests, including Congressional representatives, met with Blackwell last week to plead for government intervention to save the shipyard and jobs. About 85% of the yard workers belong to minorities.

The Maritime Administration has reserve funds to bail the shipyard out, Blackwell says, but he wants private investors in the ships to put up cash, too. "I can make the decision," Blackwell says. But, he adds, "I would clear it with Secretary of Commerce Dent and he might want to discuss it with the White House."

However the decision goes, it will be made soon. If the government bails out the ships, they would be sold when completed, and both the government and private investors would get their money back—assuming buyers could be found and the price was right. Because of cost overruns, Seatrain lost an estimated $13-million on the first two ships delivered.

HEARINGS COMING UP

The situation for American flag tankers is drawing new attention in Congress. The Senate Commerce Committee will hold hearings beginning Feb. 7 on the "depressed condition of the U.S. tanker industry and the impact of President Ford's energy proposals on that industry." There are Congressional rumors about a move to exempt oil carried in U.S. flag ships from any tariff levied on imported oil. Also, Congress seems likely to send the cargo preference bill back to the White House.

Seatrain's Brooklyn operation is the yard hit hardest so far, but Newport News Shipbuilding & Dry Dock Co., a division of Tenneco, Inc., has laid off about 150 workers so far this year, and its president, John P. Diesel, expects the number to reach 2,000 by June. If massive shipyard layoffs spread, Congress will seek legislative relief. Says one congressman: "We will knock heads with the White House if necessary."

Mr. HOLLINGS. Now, Mr. President, we find ourselves confronted with several disastrous oil spills involving foreign-flag vessels. American companies register ships under foreign flags to avoid the more stringent safeguards required of American-flag vessels. Obviously these safeguards are required for very valid reasons and we now learn the hard way.

Therefore, I am again introducing the Energy Transportation Security Act of 1977 which will provide a cargo preference for our American-flag vessels. I urge the appropriate committee to conduct early hearings and to work closely with our new administration, so that we can shape this proposal into a final legislative form that will benefit and protect the American public.

By Mr. MATHIAS:

S. 62. A bill to amend the Tax Reform Act of 1976 to extend for 1 year the effective date of the provision relating to changes in exclusion for sick pay; to the Committee on Finance.

SICK PAY TAX EXCLUSION

Mr. MATHIAS. Mr. President, I send to the desk a bill which will provide relief to thousands of people who would otherwise be unfairly affected by revisions made in the Tax Reform Act of 1976 (Public Law 94-455). My bill would change the effective date of section 505 of the act from December 31, 1975, to December 31, 1976.

Section 505 of the tax bill has sharply curtailed the use of certain tax provisions by sick and disabled individuals. Formerly, any person who had retired on disability could exclude from taxable income up to $100 a week as sick pay. Similarly, if an individual was sick and received pay under a wage-continuation plan during his or her illness, the same $100 a week exclusion applied. Under the new law, only individuals retired on full disability can exclude sick pay from their income. They can exclude $100 a week or $5,200 a year maximum, if they are under age 65, have retired on disability and are permanently and totally disabled. To constitute total and permanent disability, they must be unable to perform any substantial gainful activity due to a mental or physical impairment, which is expected to last at least 12 months or result in death.

My primary objection to section 505 of the Tax Reform Act of 1976 is that the new law applies to taxable year 1976, even though the bill was not enacted until October 1976. As a result many disabled individuals may be liable for taxes they had not expected to pay for 1976. Many individuals—often retired and living on fixed incomes—had expected to use the sick pay exclusion when filing their tax return for 1976. Less than 3 months before the year ended, however, those people find that the tax provisions they had expected to use have been either eliminated or drastically curtailed. Is it any wonder that those affected individuals view their Government as unresponsive?

I would like to share with my colleagues the thoughts of some of my constituents regarding this provision. As Mr. George Drank, a disabled retiree of Leonardtown, Md., wrote:

When the "tax reform" bill became a reality, I accepted it, as we must, it was (an) act of our duly elected representatives after deliberation, and supposedly for the general welfare of the majority of our country's citizens.

I accepted the tax reform bill until I realized that the federal disabled retirees were victims of an unfair act. Making the sick pay eyclusion abolition retroactive to January 1, 1976 is a blow to those who subsist solely on their annuity and estimate their income tax. Depending on the size of their annuity, many retirees will have to come up with an additional tax of from several hundred dollars to a thousand dollars or better. A check with Internal Revenue has determined that people in this category will

also be penalized because they have underestimated their tax. I ask, "Is this fair?" Is there anything that can be done about changing the effective date of the "sick pay provision" to January 1, 1977? If that can be accomplished, people can properly declare the correct estimated income tax for the coming year without having to pay a penalty.

And Mr. Robert Handler of Rockville, Md., stated:

I have no quarrel with the premise promulgated by the tax bill writers who felt that the sick pay exclusion was neither feasible or sensible. My quarrel lies in the arbitrary and capricious manner by which the exclusion elimination was made effective the beginning of this year (1976) resulting in what can only be classified as retroactive taxation. To maintain some vestige of fairness, it appears that the elimination of this provision should have been made effective on either the date of passage of the bill or on the first day of calendar year 1977.

These two excerpts are indicative of the views held by many of the hundreds of people who have called or written me about this provision of the tax bill. They are not arguing the merits of the numerous changes made by Congress, but rather are outraged and bewildered that so little time has been given in which to comply with the new law.

We have been hearing so much lately about the transitional period for our new President. I think that the citizens of this country, who elected us and sent us to Washington to represent their views, are entitled to a transitional period as well. By extending the effective date of section 505 for 1 year, we would be proving that Congress can be responsive to the needs of citzens, admit it made a mistake through oversight, and is willing to correct it.

Let me repeat what I said during Senate consideration of section 505 this past summer:

Retired people today have enough financial problems. We, in Congress, should not impose added burdens on them.

We have a limited time-frame in which to take action on this bill. People will be preparing their tax returns within the next few weeks and many of them may have to literally scrape up enough money in order to pay their taxes. I urge my colleagues to act promptly on this bill.

Mr. President, I ask unanimous consent that the text of my bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 62

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 505 of the Tax Reform Act of 1976 is amended by adding at the end thereof the following new subsection:

(f) EFFECTIVE DATE FOR SUBSECTION (a).— The amendment made by subsection (a) of this section shall apply to taxable years beginning after December 31, 1976.

(b) Section 505(c) of the Tax Reform Act of 1976 is amended by striking out "January 1, 1976" each place it appears therein and inserting in lieu thereof "January 1, 1977".

SEC. 2. The amendments made by the first section of this Act shall take effect on the date of enactment of the Tax Reform Act of 1976.

By Mr. MATHIAS (for himself and Mr. PEARSON):

S. 63. A bill to provide for a program of nuclear waste management; to the Joint Committee on Atomic Energy.

NUCLEAR WASTE MANAGEMENT ACT OF 1977

Mr. MATHIAS. Mr. President, I send to the desk, for Mr. PEARSON and myself, the Nuclear Waste Management Act of 1977. Recent events have reminded us that we are still confronted by a severe energy crisis. I firmly believe that a comprehensive energy policy is one of the top priorities facing Congress today. While I favor a public policy to promote a strong conservation ethic in this country, development of alternative energy sources has also been discussed. Nuclear energy has frequently been mentioned in this regard. While nuclear energy has brought with it great promise, it has provided as with some thorny dilemmas. One of those is the question of nuclear waste.

The commercial use of nuclear materials to generate electricity, as well as the military use of similar materials for nuclear weapons and naval propulsion, have generated and will continue to generate at an increasing pace a vast amount of radioactive waste. Current estimates are that the number of nuclear powerplants will increase from the 50-plus stations now in existence to nearly 200 in 1985 and perhaps 800 or 900 by the year 2000. The Energy Research and Development Administration has projected that, unless nuclear power construction is restricted, between 720,000 and 800,000 megawatts of electric capacity will be supplied by nuclear power in the year 2000.

At this time, existing military radioactive waste alone is approximately 215 million gallons of liquid waste. High-level waste from ERDA programs is being generated at an annual rate of 7.5 million gallons. It is also estimated that the commercial nuclear power industry in the United States will have generated 60 million gallons of liquid high-level waste by the year 2000. This waste remains dangerously radioactive for hundreds of thousands of years. We are all familiar with the hazards posed to mankind by radioactive material. If a human being is exposed to excessive amounts of radiation, he may die immediately, contract radiation-induced cancer, or suffer temporary but severe illness. It is also possible that genetic changes from exposure to radiation could occur in subsequent generations.

Already failures in high-level waste disposal have resulted in 423,500 gallons of radioactive liquid leaking from the Hanford disposal site in Richland, Wash. Although no one was injured from the leaks, radiation still remains in the ground and will remain hazardous for hundreds of thousands of years.

The findings of a recent Louis Harris poll confirm the seriousness with which the public views the radioactive waste problem. According to this poll, 67 percent express the view that "the disposal of radioactive waste materials which remain radioactive for many centuries to come is a major problem."

Louis Harris and Associates made the following observation based on this finding:

Certainly, by any measure, both the public and the leadership groups feel the major unfinished business in nuclear power development is to come up with an answer to the problem of radioactive waste disposal. There is a depth of feeling that adequate and permanent steps simply have not been taken to properly dispose of nuclear wastes.

I concur in that judgment.

Thus, there is no doubt that a safe means of disposal for these high-level, long-lived radioactive wastes must be demonstrated beyond a reasonable doubt before the further expansion of nuclear power can be undertaken. Since radioactive waste already exists in considerable quantities, a safe method for their long-term disposal is in any case required, whatever is decided about future development of nuclear power.

To date, an inadequate effort has been devoted to the problems of long-term waste management. A more urgent approach is needed. Congress has taken no action specifically relating to high-level radioactive waste disposal other than to provide funding for waste operations. Before we go any further in nuclear power, we must face the critical issue of nuclear waste disposal.

The bill which I am introducing today is designed to resolve the inaction and stagnation which has plagued the nuclear waste disposal program. The permanent challenge which radioactive waste disposal poses to Government must be squarely faced immediately, before it is too late and future generations are forced to cope with grave risks to health and environment. I do not wish to be associated with that wind of legacy, and I am sure my colleagues do not.

This bill would establish an independent, self-financing Government agency to control existing and future commercial and military radioactive waste facilities. This agency would be known as the Radioactive Waste Authority. The Authority would deal with the high-level and transuranic wastes which are the most threatening to mankind.

A study done for the Energy Research and Development Administration by Mason Willrich under the auspices of the Energy Laboratory at the Massachusetts Institute of Technology concluded that the "existing organization for radioactive waste management will be unworkable if left unchanged. * * * Bifurcated responsibility for an essentially integrated series of waste management operations creates incentives for each sector to pass through to the other as much as possible of the risks and costs. * * * One pervasive deficiency in the existing waste management structure is that it does not tend to generate strong incentives for efficient management."

Our present organization for dealing with radioactive waste thwarts the effective management of waste disposal. The diffuse pattern of responsibility in this area has resulted in too little being

done. The bill I am introducing today provides a new and efficient means of managing waste disposal by fixing responsibility for waste disposal in a new, independent Government authority. This agency would finance itself through the charging of fees for waste disposal and the selling of bonds. Thus, while safety and efficiency would increase, there would be no increase in Federal expenditures. There would be an advisory board of directors for the new agency, drawn from Government, the public, nuclear industry, and the academic research community. In this way, all segments of society affected by nucear power will be represented.

This agency would own all high-level and transuranic waste facilities, including facilities for temporary storage, treatment and permanent disposition of waste, and any specially constructed waste transport containers. It would take over existing commercial and military waste facilities. The agency could contract work out to private organizations if it found this was a safe and efficient course.

The Energy Research and Development Administration will continue to have primary Government responsibility for research and development of radioactive waste technology.

It is essential that the Nuclear Regulatory Commission establish a comprehensive regulatory framework to insure the safety and efficiency of nuclear waste management operations. In other words, both military and commercial wastes operations would require licensing by the NRC. The bill accomplishes this.

Finally, the Nuclear Waste Management Act of 1977 would provide a foundation for the international regulation of hazardous radioactive materials. Under the bill, a commission would undertake a worldwide feasibility study to recommend sites to serve as repositories for nuclear wastes. Any site recommended must be safe for the long-term storage of nuclear wastes until such time as those wastes are harmless to the environment and must be acceptable to the country in which the site is located.

Upon completion of the study, a treaty could be negotiated among the countries involved. Such a treaty should include procedures for transporting the radioactive waste and the designation of an international agency to administer any such site in cooperation with the government in which the site is located.

We face a permanent challenge in the disposal of nuclear wastes. Up to this time, radioactive waste policy has contained no provisions for rational institutional arrangements for safe waste management and regulation. Yet such provitions are necessary for safe, effective management of long-term nuclear waste management. The Nuclear Waste Management Act of 1977, would provide the unified action, centralized responsibility, and clearly defined policy essential to a resolution of the critical nuclear waste problem.

Mr. President, I ask unanimous consent that the text of the Nuclear Waste Management Act of 1977 be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 63

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Nuclear Waste Management Act of 1977".

ESTABLISHMENT

SEC. 2. There is established an independent executive agency to be known as the Radioactive Waste Authority (hereinafter in this Act referred to as the "Authority").

OFFICERS

SEC. 3. (a) There shall be at the head of the Authority an Executive Director of the Authority (hereinafter in this Act referred to as the "Executive Director") who shall be appointed by the President by and with the advice and consent of the Senate. The authority shall be administered under the supervision and direction of the Executive Director who shall be responsible for the efficient and coordinated management of the Authority.

(b) There shall be in the Authority a Deputy Executive Director, who shall be appointed by the President, by and with the advice and consent of the Senate.

(c) The President shall appoint the Executive Director and the Deputy Executive Director from among individuals who by reason of their general background and experience are specially qualified to manage a full range of nuclear waste management programs.

(d) There shall be in the Authority a General Counsel who shall be appointed by the Executive Director and who shall serve at the pleasure of and be removable by the Executive Director. Officers appointed pursuant to this section shall perform such functions as the Executive Director shall specify from time to time. The Executive Director shall delegate to one such officer a special responsibility for international cooperation in all nuclear waste management programs.

FUNCTIONS OF THE AUTHORITY

SEC. 4. (a) Subject to the provisions of this Act the Executive Director shall perform such functions as are necessary to carry out the purposes of this Act including—

(1) the establishment of temporary and permanent nuclear waste facilities;

(2) the establishment of programs for the treatment of nuclear wastes;

(3) the establishment of fees or user charges for nuclear waste treatment or storage facilities; and

(4) the promulgation of such rules and regulations to implement the authority granted under this Act.

(b) Nothing in this section shall be construed as granting to the Authority regulatory functions presently within the Nuclear Regulatory Commission.

ADMINISTRATIVE PROVISIONS

SEC. 5. (a) The Executive Director is authorized to prescribe such policies, standards, criteria, procedures, rules, and regulations as he may deem to be necessary or appropriate to perform functions now or hereafter vested in him.

(b) The Executive Director shall engage in such policy planning, and perform such program evaluation analysis and other studies, as may be necessary to promote the efficient and coordinated administration of the Authority and properly assess progress toward achievement of its stated goals.

(c) Except as otherwise expressly provided by law, the Executive Director may delegate any of his functions to such officers and employees of the Authority as he may designate, and may authorize successive redelegations of such functions as he may deem necessary or appropriate.

(d) The Executive Director is authorized to establish, maintain, alter or discontinue such State, regional, district, local or other field offices as he may deem necessary or appropriate to perform functions now or hereafter vested in him.

(e) The Executive Director shall cause a seal of the office to be made for the Authority of such device as he shall approve and judicial notice shall be taken on such seal.

INTERAGENCY COOPERATION

SEC. 6. Each department, agency, and instrumentality of the Executive Branch of the government is authorized to furnish the Executive Director, upon his request, any information or other data which the Executive Director deems necessary to carry out his duties under this Act.

PERSONNEL AND SERVICES

SEC. 7. (a) The Executive Director is authorized to select, appoint, employ, and fix the compensation of such officers and employees, including attorneys, as are necessary to perform the functions now or hereafter vested in him and to prescribe their functions.

(b) The Executive Director is authorized to obtain services as provided by section 3109 of title 5 of the United States Code. The Executive Director is authorized to pay transportation expenses, and per diem in lieu of subsistence expenses in accordance with chapter 57 of title 5 of the United States Code for travel while at places of duty, of persons appointed for emergency, temporary or seasonal services in the field services of the Authority.

(c) The Executive Director is authorized to utilize on a reimbursable basis, the services of any personnel made available by any department, agency, or instrumentality including any independent agency of government.

(d) The Executive Director is authorized to establish advisory boards, in accordance with the provisions of the Federal Advisory Committee Act (Public Law 92-463), to advise with and make recommendation to the Authority on legislation, policies, administration, research, and other matters.

(e) The Executive Director is authorized to employ persons who are not citizens of the United States in expert, scientific, technical, or professional capacities whenever he deems it in the public interest.

(f) Except for public buildings as defined in the Public Buildings Act of 1959, and with respect to the lease space subject to the provisions of the Reorganization Plan No. 18 of 1950, the Executive Director is authorized to acquire (by purchase, lease, condemnation, or otherwise), construct, improve, repair, operate, and maintain facilities and real property as the Executive Director deems to be necessary in and outside the District of Columbia. Such authority shall apply only to facilities required for the maintenance and operation of facilities, quarters and related accommodations for employees and dependents of employees of the Authority and such other special purpose real property as the Executive Director deems to be necessary in and outside the District of Columbia. Title to property or interest therein, real, personal, or mixed acquired pursuant to this section shall be in the United States.

(g) (1) The Executive Director is authorized to provide, construct, or maintain, as necessary and when not otherwise available, the following for employees and their dependents stationed at remote locations:

(A) emergency medical services and supplies;

(B) food and other subsistence supplies;

(C) messing facilities;

(D) audio-visual equipment, accessories, and supplies for recreation and training;

(E) reimbursement for food, clothing, medicine, and other supplies furnished by such employees in emergencies for the temporary relief of distressed persons;

(F) living and working quarters and facilities; and

(G) transportation for school age dependents of employees to the nearest appropriate educational facilities.

(2) The furnishing of medical treatment under subparagraph (A) of paragraph (1) and the furnishing of services and supplies under subparagraphs (B) and (C) of paragraph (1) shall be at prices reflecting reasonable values as is determined by the Executive Director.

(h) The Executive Director is authorized to require any of the following described rights if the property acquired thereby is for use in, or is useful to the performance of the functions vested in him:

(1) copyrights, patents, and applications for patents, designs, processes, specifications and data;

(2) licenses under copyrights, patents, and applications for patents; and

(3) releases before suit is brought, for past infringement of patents or copyrights.

(i) Subject to the provisions of chapter 12 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2161), and other applicable law, the Executive Director shall disseminate scientific, technical, and practical information required pursuant to this Act through information programs and other appropriate means and shall encourage the dissemination of scientific, technical and practical information relating to nuclear waste management so as to enlarge the fund of such information and to provide a free interchange of ideas and criticism which is essential to scientific and industrial progress and public understanding.

(j) The Executive Director is authorized to accept, hold, administer and utilize gifts, and bequests of property, both real and personal, for the purpose of aiding and facilitating the work of the Authority. Gifts and bequests of money and proceeds from sales or of other property received as gifts or bequests shall be deposited in the Treasury and shall be disbursed upon the order of the Executive Director. For the purposes of Federal income, State, and gift taxes, property accepted under this section shall be considered as the gift or bequest of the United States.

NUCLEAR WASTE MANAGEMENT FUND

SEC. 8. (a) There is hereby established in the Treasury of the United States a Nuclear Waste Management Fund. The Fund shall be administered by the Executive Director without the requirement of annual authorizations in order to secure payment, when due of the principal of, any redemption premium on and any interest on all Fund bonds, by a first pledge of a lien on all revenues payable to and assets held in the Fund, and to carry out the purposes, functions and powers authorized in this Act.

(b) The purpose of the Fund is to provide capital which is necessary to furnish financial assistance for nuclear waste management and such other financial needs as the Executive Director proves in accordance with this Act.

(c) In order to achieve the objectives and to carry out the purposes of this Act the Executive Director may—

(1) issue and sell securities and Fund bonds;

(2) make and enforce such rules and regulations and make and perform such contracts, agreements, and commitments as may be necessary to carry out the purposes of this Act;

(3) prescribe and impose fees and charges for services rendered by the Authority pursuant to this Act;

(4) settle, adjust, and compromise, and with or without consideration or benefit to the Fund, release or waive, in whole or in part, in advance or otherwise, any claim, demand, or right of, by or against the Executive Director or the Fund;

(5) sue or be sued, complain and defend in any State, Federal, or other court;

(6) acquire, take, hold, own, deal with and dispose of any property, including bonds issued under this section; and

(7) determine in accordance with appropriations, the amount to be withdrawn from the Fund and the manner in which such withdrawal shall be effected.

(d) There shall be deposited in the Fund—

(1) funds received by the Executive Director for deposit in the Fund representing the proceeds from the issuance and sale of securities and Fund bonds as provided;

(2) income and gains realized by the Fund from any investment of excess funds of the Fund; and

(3) income from fees and charges established pursuant to this Act for the use of nuclear waste facilities operated by or for the Authority.

(e) If the Secretary determines that the amount of money in the Fund exceeds the amount required for current needs, the Executive Director may invest such amounts as he deems advisable and obligations of or obligations guaranteed by the government of the United States, or in such other governmental agency obligations or other securities of the United States.

(f) The Secretary may deposit monies of the Fund with any Federal Reserve Bank, and depository for public funds or in such other places and in such manner as the Secretary of the Treasury deems appropriate.

FUND BONDS

SEC. 9. (a) The Executive Director may issue Fund bonds in denominations of $100,000 (or any integral multiple thereof), and such total amounts as may be authorized by Congress. No Fund bonds—

(1) shall be issued which mature in less than 8 or more than 15 years from the date of original issuance thereof;

(2) shall be issued later than the tenth anniversary of the date of publication of the final standards and designations under this Act; and

(3) shall, except as otherwise provided pursuant to this Act, be subject to redemption (at the option of the Executive Director)—

(A) at any time prior to the tenth anniversary date of the original issuance thereof, and

(B) at any time thereafter.

(b) The Executive Director shall impose a first pledge of and a first lien on, all revenues payable to the assets held in the Fund, and appropriated for the use of the Executive Director pursuant to this Act. The Executive Director may impose such a pledge of and lien on all other revenues or property of the Fund. The purpose of any such pledge and lien shall be to secure the payment when due, or the principal and any redemption premiums on, and any interest on all Fund bonds, and for other purposes incidental thereto. Such incidental purposes may include the creation of reserve and other funds which may be similarly pledged and used, to such extent and in such manner as the Executive Director deems necessary or desirable. Any pledge made by the Executive Director shall be valid and binding from the time it is made. The revenues and assets held in the Fund, and the revenues or property of the Fund which are so pledged and which are subsequently received by the Fund, shall immediately be subject to the lien of such pledge without any physical delivery thereof or any further act. The lien of any such pledge shall be valid and binding as against all parties having claims of any kind, in tort, contract, or otherwise against the Executive Director or the Fund, without regard to whether such parties have notice thereof, no instrument by which a pledge is created need be recorded or filed to protect such a pledge.

(c) The Executive Director may enter into binding covenants with the holders of Fund bonds and with the trustee, if any, under any agreement entered into in connection with the issuance of such bonds with respect to—

(1) the establishment of reserves and other funds;

(2) stipulations concerning the subsequent issuance of obligations; and

(3) such other matters as the Secretary deems necessary or desirable to enhance the marketability of Fund bonds.

(d) Subject to the provisions of subsection (a) of this section, the Executive Director may determine with respect to Fund bonds—

(1) the form and denominations in which they shall be issued;

(2) the time when they shall be sold, and in what amount;

(3) the time and when they shall mature;

(4) the price thereof at sale;

(5) the rate of interest thereon;

(6) whether and in what manner, they may be redeemed prior to the date when they mature; and

(7) whether they shall be negotiable or nonnegotiable and whether they shall be bearer or registered instruments, and any indentures or covenants relating thereto.

(e) Fund bonds issued by the Secretary under this section shall—

(1) contain a recital that they are issued under this section, which shall be conclusive evidence as to the validity and regularity of the issuance and sale of such Fund bonds;

(2) be subject to such other terms and conditions as the Secretary may, by resolution authorizing the issuance, determine;

(3) be lawful investments and may be accepted as security for all fiduciary, trust, and public funds, investment or deposit of which shall be under the authority or control of any officer or agency of the United States;

(4) not be exempted from Federal, State and local taxation; and

(5) not to be debts or enforceable general obligations of nor shall be payment of a principal thereof or interest thereon be guaranteed by the United States.

Neither the full faith or credit nor the general taxing power of the Federal government shall be pledged to the payment of the principal or of any premium on or interest on such Fund bonds.

(f) Neither the Executive Director, nor any other individual, who executes any Fund bond shall be subject to any personal liability or accountability by reason of issuance of such bond.

(g) If, after the tenth anniversary of the date of the original issuance of the initial series of Fund bonds the amount in the Fund exceeds 250 percent of the amount required to satisfy amounts due in the succeeding fiscal year on account of Fund bonds, the Executive Director may use such excess to redeem Fund bonds in accordance with their terms or may withdraw all or part of such excess from the Fund and transfer it to the General Fund of the United States, when all Fund bonds have been redeemed, all amounts remaining in the Fund or thereafter accruing to it shall be transferred to the General Fund of the United States, except to the extent necessary to cover such expense of the Fund as may be required to carry out and complete the responsibilities of the Authority.

LICENSING

SEC. 10. Notwithstanding any other provision of law, the Nuclear Regulatory Commission shall have licensing and related regulatory authority with regard to all existing and future military and commercial nuclear waste materials treatment and storage facilities including but not limited to—

(1) temporary storage;
(2) permanent storage; and
(3) treatment of military high-level waste and trans-uranic nuclear waste.

TRANSFER OF AUTHORITY

SEC. 11. All functions, powers and duties of the Energy Research and Development Administration with regard to nuclear waste disposal are hereby transferred to the Authority. Nothing in this section shall be construed as transferring any authority of the Energy Research and Development Administration with regard to research and development related to nuclear waste management.

STUDY

SEC. 12. (a) The Executive Director shall appoint a commission to undertake a worldwide feasibility study to recommend sites to the Authority to serve as repositories for nuclear waste. Any site recommended should be safe for the long term storage of nuclear waste until such time as those wastes are harmless to the environment and should be acceptable for use as a repository site for such waste by the country in which such site is located.

(b) Upon completion of the study and receipt of the recommendations, the Authority shall send a report of such study to the President and the Congress. Such study shall include site location, procedures for transporting nuclear waste to any such site, methods of storage at such site, and compensation for the use of such site. The designation or establishment of an international agency to administer any such site in cooperation with the government in which the site is located should also be included in the study.

By Mr. CRANSTON:

S. 64. A bill to designate certain lands in the Yosemite National Park in California as wilderness;

S. 65. A bill to designate certain lands in San Luis Obispo County, Calif., as the "Santa Lucia Wilderness";

S. 66. A bill to designate certain lands in the Sequoia and Inyo National Forests, Calif., as the Golden Trout Wilderness; and

S. 67. A bill to add certain lands in the Los Padres National Forest, Calif., to the Ventana Wilderness; to the Committee on Interior and Insular Affairs.

CALIFORNIA WILDERNESS LEGISLATION

Mr. CRANSTON. Mr. President, I introduce for appropriate reference legislation to designate three new wilderness areas in California and make additions to one. The new areas are Yosemite within Yosemite National Park, Santa Lucia within the Los Padres National Forest, and Golden Trout in the Sequoia and Inyo National Forests. The additions are to the Ventana Wilderness in Los Padres National Forest. Altogether 490,512 acres of California land would be added to the national wilderness preservation system, bringing the total amount of wilderness in the State to 2,321,701 acres.

Mr. President, Yosemite National Park is located in the central portion of the Sierra Nevada Mountains, in portions of Tuolumne, Mariposa, and Madera Counties. Known as perhaps the most beautiful and scenic units of our national park system, Yosemite National Park in recent years has experienced tremendous increases in visitor usage resulting in congestion, intolerable crowding, and confusion around campsites on the valley floor. Yet in areas away from the campsites, solitude and natural serenity can readily be found.

There are outstanding geologic, biological and scenic resources—exceptional glaciated topography, sheer massive granite walls, magnificent waterfalls, virgin conifer forests, mountain lakes, streams, and meadows. The park provides a home for mule deer, black bear, wildcat, and the rare mountain lion.

To insure that this rich resource is not further endangered, I am proposing that 692,500 acres be designated as the Yosemite Wilderness. The wilderness would be in two units, north and south, with some additional lands in wilderness reserve.

The proposed Santa Lucia wilderness lies within and adjacent to the Los Padres National Forest in San Luis Obispo County, along the central coast of California. The area is basically a wild, rough highland with numerous outcroppings of rock. Except for three flat, fern-covered valleys, the area is mostly covered with trees. The Santa Lucia area contains the only stand of knobcone pine between Monterey and the San Bernardino Mountains, one of the most extensive stands of bigcone pine in existence, and fine groves of manzanita, canyon oak, tan oak, maple, and sycamore.

The bill I am introducing today designates 22,250 acres of this area as the Santa Lucia Wilderness. When the Senate Interior Committee held hearings on an earlier Santa Lucia Wilderness bill, then called Lopez Canyon, there were some criticisms voiced about manmade intrusions, in particular a 70-kilovolt power transmission line within the boundaries I then proposed. I have amended the bill to exclude the power line from the wilderness, but to provide that the area automatically receive wilderness designation when the transmission line is removed. The power line is a temporary easement granted for 50 years, ending in 1991. I have also revised the proposed boundaries to exclude all roads which are now open to public vehicles. I am hopeful that with these changes we can move ahead and establish the Santa Lucia Wilderness.

The proposed Golden Trout Wilderness is located within the Sequoia and Inyo National Forests immediately south of Sequoia National Park and within a three-hour drive of Los Angeles. The 260,000-acre area extends from the more gentle western slopes of the Sierra Nevada to the more precipitous ridges on the eastern side of the mountains. Elevations range from 5,000 to 12,000 feet.

At the heart of the Golden Trout area is Golden Trout Creek, the only native habitat of California's State fish. This is a separate trout species which developed its unique golden brown coloring isolated from other trout in the remoteness of the creek. The area is also the home of the spotted owl and pine marten as well as more common wildlife such as deer, bear, and coyote.

The Forest Service has proposed to study the northern half of the Golden Trout area for possible wilderness classification. However, the balance of the area is not protected in any special way and is subject to multiple-use management.

Timber sales are presently under consideration in the Little Kern area. The Golden Trout cannot withstand heavy fishing pressure or siltation of the small streams in which it is found. Logging and construction of timber access roads would increase these problems and seriously threaten the Golden Trout. I believe the entire 260,000 acres should be protected as wilderness, as proposed in my bill.

When the Ventana Wilderness was originally established in 1969, the area comprised a total of 95,152 acres. The bill I am introducing today would add to the wilderness another 60,000 acres in the Los Padres National Forest in Monterey County. The proposed additions include Cone Peak-Coast Ridge, Miller Canyon-Church Creek Canyon, Tassajara Creek, and the Santa Lucia Creek watershed.

The Cone Peak area would add a diversified ecosystem including a substantial portion of the major coast ridge south of the present Ventana Wilderness. Below Cone Peak itself, elevations range from 500 to 5,000 feet less than 3 miles from the Pacific Ocean. The ridge area offers a breathtaking view of the coastline on one side and the rugged interior mountains on the other. Miller Canyon and Church Creek Canyon are easily accessible by trail and are used extensively. This area has stands of Santa Lucia fir on the ridges and grass in the canyons because of the two streams which run year round. The Santa Lucia Creek Canyon lies to the east and is separated from the present wilderness by a dirt road. The lower end of the canyon is deep and rugged and little used because of its inaccessibility.

I am aware that the University of California wishes to locate an astronomical observatory on Junipero Serra Peak in this portion of the proposed wilderness. I understand that there may be other places in the Los Padres National Forest suitable for the observatory. I intend to explore this possibility before considering a minor boundary adjustment to the wilderness addition. I am hopeful that an accommodation with the university can be worked out and the Ventana Wilderness expanded.

Mr. President, I ask unanimous consent that the texts of the four bills be printed at this point in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 64

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in accordance with subsection 3(c) of the Wilderness Act (78 Stat. 890; 16 U.S.C. 1132 (c)), certain lands in the Yosemite National Park, California, which comprise about six hundred and ninety-two thousand five hundred acres and which are depicted on a map entitled "Yosemite North Wilderness and Yosemite South Wilderness—Proposed" and dated January 1977, are hereby designated as wilderness: Provided, however that each tract identified on said map as "Wilderness Reserve" is designated as wilderness,

subject only to the removal from each such tract of the existing nonconforming improvements, at which times the Secretary of the Interior is directed to publish notice thereof in the Federal Register. Pending such notice, and subject to the existing nonconforming improvements, each such tract shall be managed as wilderness in accordance with section 3 of this Act.

SEC. 2. As soon as practicable after this Act takes effect, a map and a legal description of the wilderness areas designated by and pursuant to this Act shall be filed with the Interior and Insular Affairs Committees of the United States Senate and House of Representatives and such map and description shall have the same force and effect as if included in this Act: Provided, however, That correction of clerical and typographical errors in such legal description and map made be made.

SEC. 3. The wilderness areas designated by and pursuant to this Act shall be known as the "Yosemite South Wilderness" and the "Yosemite North Wilderness" and shall be administered in accordance with the provisions of the Wilderness Act governing areas designated by this Act as wilderness areas, except that any reference in such provisions to the Secretary of Agriculture shall be deemed to be a reference to the Secretary of the Interior.

S. 65

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in furtherance of the purposes of the Wilderness Act (78 Stat. 890) certain lands in and adjacent to the Los Padres National Forest, San Luis Obispo County, California, which comprise about twenty-one thousand two hundred and fifty acres and which are generally depicted on a map entitled "Santa Lucia Wilderness—Proposed" and dated January 1977, are hereby designated as wilderness: *Provided, however,* That the tract identified on said map as "Wilderness Reserve" is designated as wilderness, subject only to the removal of the existing and temporary nonconforming improvement, at which time the Secretary of Agriculture is directed to publish notice thereof in the Federal Register. Pending such notice, and subject only to the maintenance of the existing nonconforming improvement, said tract shall be managed as wilderness in accordance with section 3 of the Act.

SEC. 2. As soon as practicable after this Act takes effect, a map and a legal description of the wilderness area designated by and pursuant to this Act shall be filed with the Interior and Insular Affairs Committees of the United States Senate and House of Representatives, and such map and description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in such legal description and map may be made.

SEC. 3. (a) The wilderness area designated by and pursuant to this Act shall be known as the "Santa Lucia Wilderness" and shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness areas, except that portion outside the boundary of the Los Padres National Forest shall be so administered by the Secretary of the Interior.

(b) Notwithstanding the provisions of section 5 of the Wilderness Act, the Secretary of Agriculture, and, within the portion of such area outside the boundary of the Los Padres National Forest, the Secretary of Interior, are authorized to acquire by donation, purchase with donated or appropriated funds, exchange or otherwise any non-Federal lands located within the area designated as wilderness by this Act as the appropriate Secretary may determine necessary or desirable for the purposes of this Act and the Wilderness Act.

SEC. 4. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

S. 66

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in accordance with section 3(b) of the Wilderness Act (16 U.S.C. 1132), certain lands in the Sequoia and Inyo National Forests which comprise about two hundred and sixty thousand acres and which are generally depicted on the map entitled "Golden Trout Wilderness—Proposed", dated January 1977, are hereby designated as wilderness. The map and description of the boundaries of such lands shall be on file and available for public inspection in the offices of the Chief of the Forest Service, Department of Agriculture.

SEC. 2. As soon as practicable after this Act takes effect, the Secretary of Agriculture shall file a map of the wilderness area and a description of its boundaries with the Interior and Insular Affairs Committees of the United States Senate and House of Representatives, and such map and description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in such legal description and map may be made.

SEC. 3. The wilderness area designated by this Act shall be known as the "Golden Trout Wilderness" and shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness areas, except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act, and any reference to the Secretary of the Interior shall be deemed to be a reference to the Secretary of Agriculture.

S. 67

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the area proposed for addition to the Ventana Wilderness as generally depicted on a map entitled "Ventana Wilderness Additions", dated January 1977, which is on file and available for public inspection in the Office of the Chief, Forest Service, Department of Agriculture, are hereby designated for addition to and a part of the Ventana Wilderness, Los Padres National Forest, California, which addition comprises an area of approximately 60,080 acres.

SEC. 2. As soon as practicable after this Act takes effect, the Secretary of Agriculture shall file a map and a legal description of the Ventana Wilderness as revised by this Act with the Interior and Insular Affairs Committees of the United States Senate and House of Representatives, and such description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in such legal description and map may be made.

SEC. 3. The additions to the Ventana Wilderness provided by this Act shall be administered as a part of the Ventana Wilderness by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness areas, except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act.

By Mr. CRANSTON:

S. 68. A bill to amend the Immigration and Nationality Act to establish a different numerical limitation for immigrants born in foreign contiguous territories, and for other purposes; to the Committee on the Judiciary.

CONTIGUOUS NEIGHBOR AMENDMENTS TO THE IMMIGRATION AND NATIONALITY ACT

Mr. CRANSTON. Mr. President, I am introducing legislation today, which I consider to be of an emergency nature, to retain for our contiguous neighbors, Mexico and Canada, their 1976 share of immigration visas.

My proposal will permit a combined total of 50,000 visas to be issued to immigrants from Canada and Mexico entering this country subject to the Western Hemisphere numerical limitation. This total approximates the combined number of visas issued annually to Canadian and Mexican immigrants in 1976 and previous years.

The Contiguous Neighbor Amendments to the Immigration and Nationality Act will reverse several unfortunate consequences of Congress action in enacting Public Law 94–571—H.R. 14535—in the final hours of the 94th Congress. The new immigration law, which went into effect on January 1, drastically changes the traditional patterns of lawful immigration from Mexico and Canada into the United States.

Briefly, the new law establishes for the first time a per country limitation of 20,000 on immigration in the Western Hemisphere. Although this is the worldwide standard, it is completely unrealistic when applied to Mexico. Mexican immigration—lawful immigration, I might add—averages about 70,000 annually. Of these about 45,000 are issued visas subject to numerical limitations and the rest are admitted under various exempt categories.

The new law also imposes the preference category system on immigration in the Western Hemisphere.

In addition, the new law closes opportunities for Mexican parents of children born in the United States to immigrate unless they also obtain labor certification.

These changes will effectively deny many Mexican nationals the opportunity to immigrate to the United States for lawful permanent residence.

The fact that it will be more difficult for families to reunite and live together on the U.S. side of the border will destroy a mutually beneficial pattern of migration that has persisted for many years.

I think at least three steps should be taken immediately to deal with these new problems.

First, I am proposing legislation to restore to our contiguous neighbors—Canada and Mexico—their traditional share of Western Hemisphere immigration visas.

I think that is only fair.

By reason of proximity and history, Canada and Mexico should have greater access to immigration into the United States.

Our border is a two-way street and it is in the best interest of all our people that we preserve a special status for our next door neighbors.

I propose to establish a special overall numerical limitation of 50,000 to be reserved for Mexico and Canada combined.

This higher ceiling will not undo all of the damage of the Immigration Act Amendments of 1976.

But I think it will help.

Under the old law, the number of immigration visas granted to Mexicans ranged from 42,000 to 45,000 annually.

Canadian immigration has declined over the years to less than 3,000 annually.

A joint pool shared by both nations would permit migration patterns to continue as they have in recent years.

Our problem is the unlimited flood of illegal aliens, not reasonably regulated legal immigration.

There is no reason to cut Mexico's limitation in half as the new law does.

To avoid penalizing other Western Hemisphere nations, I intend to recommend an increase in the overall hemisphere limitation from 120,000 to 130,000.

Second, I ask Congress and the new administration to reexamine who, as a practical matter, will be eligible to obtain an immigration visa. My bill proposes a return to the 1976 law with respect to permitting parents of U.S. citizens to immigrate from Mexico and Canada without obtaining labor certification under section 212(a)(14) of the Immigration and Nationality Act.

Contrary to the claims of the sponsors of the new act, the major changes it made in immigration law are controversial in many California communities and elsewhere.

In the light of these circumstances, some action, whether legislative or administrative, will be necessary to alleviate undue disruption in the lives and plans of many persons of Mexican origin and descent on both sides of our border.

Third, we need to establish a rational and consistent plan of attack on the hiring and exploitation of workers who have entered the country without inspection.

I have been convinced for some time that we can control the hiring of unlawful entrants without the need for new legislation.

I am opposed to bills which make it a crime to hire illegal aliens. That would put unfair pressure on legitimate employers who might find it easier not to hire any Latinos at all rather than risk prosecution.

I am totally opposed to a national citizen identity card system to control the hiring of illegal aliens.

In my judgment, the persistent cry of the Immigration and Naturalization Service for such punitive legislation has been a sustitute for the absence of any constructive thought by the agency on how to limit the growing presence of illegal aliens in our work force.

A recent Department of Labor study contains some important recommendations that deserve careful consideration.

The study shows that an employer who hires illegal aliens and violates one tax or labor standards law is likely to violate others.

I believe these employers should be investigated and prosecuted in the interest not only of the alien who is victimized but in the interest of justice for all Americans.

I support the report's proposal that a Federal strike force be established consisting of enforcement officers from each of the following agencies:

Employment Standards Administration to ferret out minimum wage violations;

Occupational Safety and Health Administration to spot OSHA violations;

Internal Revenue Service to check social security and income tax withholdings;

State employment security agencies to look for violations of unemployment insurance tax laws; and

Immigration and Naturalization Service to identify illegal aliens on company payrolls.

The task force would be triggered by discovery of illegal aliens as employees.

Its responsibility would be to see to it that all minimum wage, health and safety, tax laws, and immigration laws are rigorously enforced.

Employers may lose the incentive for hiring illegal aliens if it turns out to be a lighting rod that attracts Federal agents to their plants.

Finally, given our own population pressures and the limits of our resources, our overall immigration policy requires better quality attention than it has been getting.

Both INS and the consular service need to be upgraded.

I urge President-elect Carter to name persons of outstanding ability, knowledge, and sensitivity to positions in these services.

In the long run, we probably never will be able to control Mexican immigration until the economic disparity between our two nations is eased.

But I believe the steps I have outlined, beginning with enactment of the Contiguous Neighbor Amendments to the Immigration and Nationality Act will establish for the first time in our history a firm and manageable policy on immigration, both lawful and unlawful from our next door neighbors. We can no longer sweep this problem into the long-neglected corners of INS and the consular service. We need to lay the foundation for a practical approach to regulating entry both for permanent residence and for temporary work in the United States. Time is running fast. We must catch up.

I ask unanimous consent that the text of my bill and the analysis be printed at the end of my remarks.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 68

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Contiguous Neighbor Amendments to the Immigration and Nationality Act".

SEC. 2. Section 201(a)(2) of the Immigration and Nationality Act is amended—

(1) by striking out "32,000" and inserting in lieu thereof "35,000"; and

(2) by striking out "120,000" and inserting in lieu thereof "130,000".

SEC. 3. Section 202 of the Immigration and Nationality Act is amended—

(1) by inserting "(other than a foreign state which is a foreign contiguous territory)" immediately after "foreign state" in the proviso to subsection (a);

(2) by adding at the end of subsection (a) the following: *"Provided further,* That the total number of immigrant visas and the number of conditional entries made available to the natives of all foreign contiguous territories under paragraphs (1) through (8) of section 203(a) shall not exceed 50,000 in any fiscal year."; and

(3) by striking out all through the colon in subsection (e) and inserting in lieu thereof the following:

"(e) Whenever the maximum number of visas or conditional entries has been made available under section 202 to natives of any single foreign state as defined in subsection (b) of this section, any dependent area as defined in subsection (c) of this section, or all foreign contiguous territories as defined in subsection (a) of this section in any fiscal year, in the next following fiscal year a number of visas and conditional entries, not to exceed 20,000 in the case of a foreign state (other than a foreign state which is a foreign contiguous territory), 600 in the case of a dependent area, or 50,000 in the case of all foreign contiguous territories, shall be made available and allocated as follows:".

SEC. 4. Section 212(a)(14) of the Immigration and Nationality Act is amended by striking out the last sentence and inserting in lieu thereof the following: "The exclusion of aliens under this paragraph shall apply to immigrant aliens born in any foreign contiguous territory (other than the parents, spouses, or children of United States citizens or of aliens lawfully admitted to the United States for permanent residence), to preference immigrant aliens described in section 203(a)(3) and (6), and to nonpreference immigrant aliens described in section 203(a)(8).".

SECTION-BY-SECTION ANALYSIS

Section 1. Provides that the bill may be cited as "The Contiguous Neighbor Amendments to the Immigration and Nationality Act."

Section 2. Makes certain adjustments in the Western Hemisphere numercial limitation to permit an increase in the overall limitation from 120,000 to 130,000.

Section 3. Establishes a numercial limitation of 50,000 on immigration visas issued to natives of foreign contiguous territories.

Section 4. Re-establishes exemption from labor certification requirements for parents of United States citizens immigrating from any foreign contiguous territory.

By Mr. STEVENSON (for himself and Mr. MOYNIHAN):

S. 69. A bill to amend and extend the Export Administration Act; to the Committee on Banking, Housing and Urban Affairs.

EXPORT ADMINISTRATION AMENDMENTS OF 1977

Mr. STEVENSON. Mr. President, today I am again introducing legislation to extend the Export Administration Act. That act expired on September 30 of last year, because of administration opposition to the antiboycott provisions of legislation which would have extended the

act until September 30, 1978. The bill I am introducing today is identical to the compromise reached by an informal Senate-House conference in the closing days of the 94th Congress.

The bill deals with a number of critical issues.

It deals realistically and forcefully with one of the greatest threats to mankind—the proliferation of nuclear weapons. It calls for action by the United States alone and by the United States in concert with the other nuclear powers to halt the spread of nuclear weapons-making capability.

The bill contains a measure to protect American farmers and grain exporters from arbitrarily imposed embargoes by permitting the Congress to override Presidential embargoes on agricultural sales abroad. It also permits agricultural commodities, once purchased for shipment abroad, to be stored in the United States without fear of embargoes against their shipment. Both measures are of importance to American farmers and the American economy.

The bill also contains measures to expand U.S. trade with Eastern Europe and the Soviet Union while at the same time improving our ability to prevent transfers of strategic materials to adversaries. In the ebb and flow of détente this is of crucial importance to improved relations with the Soviet Union, to the expansion of our economy, and to the protection of our national security.

And finally, Mr. President, the bill contains measures to protect American citizens and American sovereignty from the Arab boycott of Israel.

Its goal is not to end the boycott of Israel itself. An attempt to do so by legislation would be futile and counterproductive. The boycott is grounded in long-standing and deepseated antagonisms. It is part of the continuing Arab struggle against Israel, and it will be ended only when there is permanent peace in the Middle East.

Instead this legislation seeks to prevent the boycott from interfering with American sovereignty and the rights of American citizens. Its goal is to protect American citizens and American business from discrimination dictated by foreign governments. Its goal is to prevent American business from conspiring to deprive employment and commercial opportunities to those on Arab blacklists. Its goal is to prevent some from gaining economic advantage over others because of compliance with foreign political objectives. And its goal is to insure equal opportunities for all who seek to do business with the Middle East.

To accomplish these goals, the bill which I am introducing would do the following:

First, it would enact into law the present requirement that all requests for, and acts of compliance with, foreign boycotts be publicly disclosed and subject to public scrutiny. It would also enact into law the present requirement that documents initiating enforcement proceedings for a violation of the law be made public. Both actions were ordered by President Ford last year after the boycott bill passed the Senate. Both actions give the American public an opportunity to know who is complying with the boycott and how.

Second, pursuant to rules and regulations issued by the President, it would be a violation of the law for any U.S. person to do any of the following with intent to comply with, further, or support a foreign boycott against a country friendly to the United States:

Refrain from doing business with any person or country other than the boycotted country or its nationals;

Refrain from doing business with the boycotted country or its nationals pursuant to an agreement with, requirement of, or request from or on behalf of the boycotting country. The mere absence of a business relationship with or in the boycotted country or its nationals would not constitute a violation of this provision;

Refrain from employing or otherwise to discriminate against persons on the basis of race, religion, or national origin;

Furnish information regarding a person's race, religion, or national origin; and

Furnish information about whether a person does, has done, or proposes to do business with any boycotted person or country.

These prohibitions would not apply to the following:

Compliance with the boycotting country's rules prohibiting the import of goods from the boycotted country or its nationals or shipment of such goods on a carrier of the boycotted country or via route proscribed by the boycotting country;

Compliance with the boycotting country's import and shipping document requirements with respect to the name and route of the carrier and the identity of the supplier and the country of origin of the goods;

Compliance with the boycotting country's export requirements with respect to the shipment or transshipment of its goods to the boycotting country;

Compliance by individuals with the immigration requirements of the boycotting country; and

Refusing to honor a letter of credit where the beneficiary fails to comply with its lawful terms.

The legislation would apply to U.S. individuals and corporations, U.S.-controlled subsidiaries and affiliates, and any subsidiary or affiliate of a foreign concern with respect to its activities in the United States. Enforcement would be through the Commerce Department administrative process in accordance for the most part with the Administrative Procedure Act. Rules and regulations implementing the bill must become effective within 3 months of enactment, and existing agreements must be brought into compliance within 3 months of the effective date of such regulations.

Mr. President, these antiboycott provisions represent a realistic and workable approach to a complicated and vexing issue. The goals are sound; its principles are irrefutable.

They are designed to prevent foreign boycotts from impinging on American rights and enlisting American citizens in acts of economic reprisal. They stand foresquare for the principle that no American who seeks to do business in the Middle East should be forced or allowed to discriminate against others in order to do so. And no one doing business in the United States should be permitted to close its doors to blacklisted American citizens in order to secure commercial advantage.

The bill recognizes, however, that just as we seek to protect American sovereignty, we should also avoid interference with the sovereignty of others. The bill, therefore, permits compliance with trading requirements which are intended to protect the Arabs from dealing with Israel indirectly when they are unwilling to do so directly. It bows to the reality that an end to the primary boycott rests upon resolution of the underlying issues in the Middle East conflict, and that an attempt by the Congress to legislate an end to the boycott would be futile and contrary to the best interests of both Israel and the United States.

Mr. President, this legislation makes major improvements in the Export Administration Act. On the question of the Arab boycott, it reaffirms that U.S. principles are not for sale, while at the same time avoiding confrontation and striking a balance—one which protects the rights of all without destroying the rights of any. On such other pressing matters as nuclear proliferation, East-West trade, grain embargoes, and strategic exports, it contains new and useful approaches to difficult and delicate questions.

I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 69

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SEC. 1. This Act may be cited as the "Export Administration Amendments of 1977".

TITLE I—EXPORT ADMINISTRATION IMPROVEMENTS AND EXTENSION

EXTENSION OF EXPORT ADMINISTRATION ACT

SEC. 101. Section 14 of the Export Administration Act of 1969 is amended by striking out "September 30, 1976" and inserting in lieu thereof "September 30, 1978".

AUTHORIZATION OF APPROPRIATIONS

SEC. 102. The Export Administration Act of 1969 is amended by inserting after section 12 the following new section 13 and redesignating existing sections 13 and 14 as sections 14 and 15, respectively:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 13. Notwithstanding any other provision of law, no appropriation shall be made under any law to the Department of Commerce for expenses to carry out the purposes of this Act for any fiscal year commencing on

or after October 1, 1977, unless previously and specifically authorized by legislation enacted after the enactment of this section.".

CONTROL OF EXPORTS FOR NATIONAL SECURITY PURPOSES; FOREIGN AVAILABILITY

SEC. 103. (a) Section 4(b) of the Export Administration Act of 1969 is amended—

(1) by striking out the third sentence of paragraph (1);

(2) by striking out paragraphs (2) through (4); and

(3) by inserting the following new paragraph (2):

"(2)(A) In administering export controls for national security purposes as prescribed in section 3(2)(C) of this Act, United States policy toward individual countries shall not be determined exclusively on the basis of a country's Communist or non-Communist status but shall take into account such factors as the country's present and potential relationship to the United States, its present and potential relationship to countries friendly or hostile to the United States, its ability and willingness to control retransfers of United States exports in accordance with United States policy, and such other factors as the President may deem appropriate. The President shall periodically review United States policy toward individual countries to determine whether such policy is appropriate in light of the factors specified in the preceding sentence. The results of such review, together with the justification for United States policy in light of such factors, shall be included in the semiannual report of the Secretary of Commerce required by section 10 of this Act for the first half of 1977 and in every second such report thereafter.

"(B) Rules and regulations under this subsection may provide for denial of any request or application for authority to export articles, materials, or supplies, including technical data, or any other information, from the United States, its territories and possessions, to any nation or combination of nations threatening the national security of the United States if the President determines that their export would prove detrimental to the national security of the United States. The President shall not impose export controls for national security purposes on the export from the United States of articles, materials, or supplies, including technical data or other information, which he determines are available without restriction from sources outside the United States in significant quantities and comparable in quality to those produced in the United States, unless the President determines that adequate evidence has been presented to him demonstrating that the absence of such controls would prove detrimental to the national security of the United States. The nature of such evidence shall be included in the semiannual report required by section 10 of this Act. Where, in accordance with this paragraph, export controls are imposed for national security purposes notwithstanding foreign availability, the President shall take steps to initiate negotiations with the governments of the appropriate foreign countries for the purpose of eliminating such availability."

(b)(1) Section 4(h) of the Export Administration Act of 1969 is amended by striking out "controlled country" in the first sentence of paragraph (1) and in the second sentence of paragraph (2) and inserting in lieu thereof "country to which exports are restricted for national security purposes".

(2) Section 4(h)(2)(A) of such Act is amended by striking out "controlled" and inserting in lieu thereof "such".

(3) Section 4(h)(4) of such Act is amended—

(A) by inserting "and" at the end of subparagraph (A); and

(B) by striking out the semicolon at the end of subparagraph (B) thereof and all that follows the semicolon and inserting in lieu thereof a period.

(4) The amendments made by this subsection shall become effective upon the expiration of ninety days after the receipt by the Congress of the semiannual report of the Secretary of Commerce required by section 10 of such Act for the first half of 1977.

(c) Section 4(h) of such Act is amended—

(1) in paragraph (1)—

(A) in the first sentence by striking out "significantly increase the military capability of such country" and inserting in lieu thereof "make a significant contribution to the military potential of such country"; and

(B) in the second sentence by striking out "significantly increase the military capability of such country" and inserting in lieu thereof "make a significant contribution, which would prove detrimental to the national security of the United States, to the military potential of such country"; and

(2) in paragraph (2)(A), by striking out "significantly increase the military capability of such country" and inserting in lieu thereof "make a significant contribution, which would prove detrimental to the national security of the United States, to the military potential of such country or any other country".

(d) Section 6(b) of such Act is amended by striking out "Communist-dominated nation" and inserting in lieu thereof "country to which exports are restricted for national security or foreign policy purposes".

EXEMPTION FOR CERTAIN AGRICULTURAL COMMODITIES FROM CERTAIN EXPORT LIMITATIONS

SEC. 104. Section 4(f) of the Export Administration Act of 1969 is amended—

(1) by redesignating such section as section 4(f)(1); and

(2) by adding at the end thereof the following new paragraph:

"(2) Upon approval of the Secretary of Commerce, in consultation with the Secretary of Agriculture, agricultural commodities purchased by or for use in a foreign country may remain in the United States for export at a later date free from any quantitative limitations on export which may be imposed pursuant to section 3(2)(A) of this Act subsequent to such approval. The Secretary of Commerce may not grant approval hereunder unless he receives adequate assurance and, in conjunction with the Secretary of Agriculture, finds that such commodities will eventually be exported, that neither the sale nor export thereof will result in an excessive drain of scarce materials and have a serious domestic inflationary impact, that storage of such commodities in the United States will not unduly limit the space available for storage of domestically owned commodities, and that the purpose of such storage is to establish a reserve of such commodities for later use, not including resale to or use by another country. The Secretary of Commerce is authorized to issue such rules and regulations as may be necessary to implement this paragraph.".

CONGRESSIONAL REVIEW OF EXPORT CONTROLS ON AGRICULTURAL COMMODITIES

SEC. 105. Section 4(f) of the Export Administration Act of 1969, as amended by section 104 of this Act, is further amended by adding at the end thereof the following new paragraph:

"(3) If the authority conferred by this section is exercised to prohibit or curtail the exportation of any agricultural commodity in order to effectuate the policies set forth in clause (B) of paragraph (2) of section 3 of this Act, the President shall immediately report such prohibition or curtailment to the Congress, setting forth the reasons therefor in detail. If the Congress, within 30 days after the date of its receipt of such report, adopts a concurrent resolution disapproving such prohibition or curtailment, then such prohibition or curtailment shall cease to be effective with the adoption of such resolution. In the computation of such 30-day period, there shall be excluded the days on which either House is not in session because of an adjournment of more than 3 days to a day certain or because of an adjournment of the Congress sine die.".

PERIOD FOR ACTION ON EXPORT LICENSE APPLICATIONS

SEC. 106. Section 4(g) of the Export Administration Act of 1969 is amended to read as follows:

"(g)(1) It is the intent of Congress that any export license application required under this Act shall be approved or disapproved within 90 days of its receipt. Upon the expiration of the 90-day period beginning on the date of its receipt, any export license application required under this Act which has not been approved or disapproved shall be deemed to be approved and the license shall be issued unless the Secretary of Commerce or other official exercising authority under this Act finds that additional time is required and notifies the applicant in writing of the specific circumstances requiring such additional time and the estimated date when the decision will be made.

"(2)(A) With respect to any export license application not finally approved or disapproved within 90 days of its receipt as provided in paragraph (1) of this subsection, the applicant shall, to the maximum extent consistent with the national security of the United States, be specifically informed in writing of questions raised and negative considerations or recommendations made by any agency or department of the Government with respect to such license application, and shall be accorded an opportunity to respond to such questions, considerations, or recommendations in writing prior to final approval or disapproval by the Secretary of Commerce or other official exercising authority under this Act. In making such final approval or disapproval, the Secretary of Commerce or other official exercising authority under this Act shall take fully into account the applicant's response.

"(B) Whenever the Secretary determines that it is necessary to refer an export license application to any multilateral review process for approval, he shall first, if the applicant so requests, provide the applicant with an opportunity to review any documentation to be submitted to such process for the purpose of describing the export in question, in order to determine whether such documentation accurately describes the proposed export.

"(3) In any denial of an export license application, the applicant shall be informed in writing of the specific statutory basis for such denial.".

EXPORTS OF TECHNICAL INFORMATION

SEC. 107. Section 4 of the Export Administration Act of 1969 is amended by adding at the end thereof the following new subsection (j):

"(j)(1) Any person (including any college, university, or other educational institution) who enters into any contract, protocol, agreement, or other understanding for, or which may result in, the transfer from the United States of technical data or other information to any country to which exports are restricted for national security or foreign policy purposes shall furnish to the Secretary of Commerce such documents and information with respect to such agreement as the Secretary shall by regulation require in order to enable

him to monitor the effects of such transfers on the national security and foreign policy of the United States.

"(2) The Secretary of Commerce shall conduct a study of the problem of the export, by publications or any other means of public dissemination, of technical data or other information from the United States, the export of which might prove detrimental to the national security or foreign policy of the United States. Not later than 6 months after the enactment of this subsection, the Secretary shall report to the Congress his assessment of the impact of the export of such technical data or other information by such means on the national security and foreign dom of press, or the freedom of scientific policy of the United States and his recommendations for monitoring such exports without impairing freedom of speech, free-exchange. Such report may be included in the semiannual report required by section 10 of this Act.".

CERTAIN PETROLEUM EXPORTS

SEC. 108. Section 4 of the Export Administration Act of 1969, as amended by section 107 of this Act, is further amended by adding at the end thereof the following new subsection (k):

"(k) Petroleum products refined in United States Foreign-Trade Zones, or in the United States Territory of Guam, from foreign crude oil shall be excluded from any quantitative restrictions imposed pursuant to section 3(2)(A) of this Act, except that, if the Secretary of Commerce finds that a product is in short supply, the Secretary of Commerce may issue such rules and regulations as may be necessary to limit exports.".

EXPORT OF HORSES

SEC. 109. Section 4 of the Export Administration Act of 1969, as amended by sections 107 and 108 of this Act, is further amended by adding at the end thereof the following new subsection (l):

"(l)(1) Notwithstanding any other provision of this Act, no horse may be exported by sea from the United States, its territories and possessions, unless such horse is part of a consignment of horses with respect to which a waiver has been granted under paragraph (2) of this subsection.

"(2) The Secretary of Commerce, in consultation with the Secretary of Agriculture, may issue rules and regulations providing for the granting of waivers permitting the export by sea of a specified consignment of horses, if the Secretary of Commerce, in consultation with the Secretary of Agriculture, determines that no horse in that consignment is being exported for purposes of slaughter.".

TECHNICAL ADVISORY COMMITTEES

SEC. 110. (a) Section 5(c)(1) of the Export Administration Act of 1969 is amended by striking out "two" in the last sentence thereof and inserting in lieu thereof "four".

(b) The second sentence of section 5(c)(2) of such Act is amended to read as follows: "Such committees, where they have expertise in such matters, shall be consulted with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to any articles, materials, and supplies, including technical data or other information, and (D) exports subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls.".

(c) Section 5(c)(2) of such Act is further amended by striking out the third sentence and inserting in lieu thereof the following: "The Secretary shall include in each semiannual report required by section 10 of this Act an accounting of the consultations undertaken pursuant to this paragraph, the use made of the advice rendered by the technical advisory committees pursuant to this paragraph, and the contributions of the technical advisory committees to carrying out the policies of this Act.".

PENALTIES FOR VIOLATIONS

SEC. 111. (a) Section 6(a) of the Export Administration Act of 1969 is amended—

(1) in the first sentence, by striking out "$10,000" and inserting in lieu thereof "$25,000"; and

(2) in the second sentence, by striking out "$20,000" and inserting in lieu thereof "$50,000".

(b) Section 6(b) of such Act is amended by striking out "$20,000" and inserting in lieu thereof "$50,000".

(c) Section 6(c) of such Act is amended by striking out "$1,000" and inserting in lieu thereof "$10,000".

(d) Section 6(d) of such Act is amended by adding at the end thereof the following new sentence: "In addition, the payment of any penalty imposed under subsection (c) may be deferred or suspended in whole or in part for a period of time no longer than any probation period (which may exceed one year) that may be imposed upon such person. Such a deferral or suspension shall not operate as a bar to the collection of the penalty in the event that the conditions of the suspension, deferral, or probation are not fulfilled.".

AVAILABILITY OF INFORMATION TO CONGRESS

SEC. 112. (a) Section 7(c) of the Export Administration Act of 1969 is amended by adding at the end thereof the following new sentence: "Nothing in this Act shall be construed as authorizing the withholding of information from Congress, and any information obtained under this Act, including any report or license application required under section 4(b) and any document or information required under section 4(j)(1), shall be made available upon request to any committee of Congress or any subcommittee thereof.".

(b) Section 4(c)(1) of such Act is amended by inserting immediately before the period at the end of the last sentence thereof "and in the last sentence of section 7(c) of this Act".

SIMPLIFICATION OF EXPORT REGULATIONS AND LISTS

SEC. 113. Section 7 of the Export Administration Act of 1969 is amended by adding at the end thereof the following new subsection (e):

"(e) The Secretary of Commerce, in consultation with appropriate United States Government departments and agencies and with appropriate technical advisory committees established under section 5 (c), shall review the rules and regulations issued under this Act and the lists of articles, materials, and supplies which are subject to export controls in order to determine how compliance with the provisions of this Act can be facilitated by simplifying such rules and regulations, by simplifying or clarifying such lists, or by any other means. Not later than one year after the enactment of this subsection, the Secretary of Commerce shall report to Congress on the actions taken on the basis of such review to simplify such rules and regulations. Such report may be included in the semiannual report required by section 10 of this Act.".

TERRORISM

SEC. 114. Section 3 of the Export Administration Act of 1969 is amended by adding at the end thereof the following:

"(8) It is the policy of the United States to use export controls to encourage other countries to take immediate steps to prevent the use of their territory or resources to aid, encourage, or give sanctuary to those persons involved in directing, supporting, or participating in acts of international terrorism. To achieve this objective, the President shall make every reasonable effort to secure the removal or reduction of such assistance to international terrorists through international cooperation and agreement before resorting to the imposition of export controls.".

SEMIANNUAL REPORTS

SEC. 115. (a) Section 10 of the Export Administration Act of 1969 is amended by adding at the end thereof the following new subsection (c):

"(c) Each semiannual report shall include an accounting of—

"(1) any organizational and procedural changes instituted, any reviews undertaken, and any means used to keep the business sector of the Nation informed, pursuant to section 4(a) of this Act;

"(2) any changes in the exercise of the authorities of section 4(b) of this Act;

"(3) any delegations of authority under section 4(e) of this Act;

"(4) the disposition of export license applications pursuant to sections 4 (g) and (h) of this Act;

"(5) the effects on the national security and foreign policy of the United States of transfers from the United States of technical data or other information which are reported to the Secretary of Commerce pursuant to section 4(j) of this Act;

"(6) consultations undertaken with technical advisory committees pursuant to section 5(c) of this Act;

"(7) violations of the provisions of this Act and penalties imposed pursuant to section 6 of this Act; and

"(8) a description of actions taken by the President and the Secretary of Commerce to effect the policies set forth in section 3(5) of this Act."

(b)(1) The section heading of such section 10 is amended by striking out "quarterly".

(2) Subsection (b) of such section is amended—

(A) by striking out "quarterly" each time it appears; and

(B) by striking out "second" in the first sentence of paragraph (1).

SPECIAL REPORT ON MULTILATERAL EXPORT CONTROLS

SEC. 116. Not later than 12 months after the enactment of this section, the President shall submit to the Congress a special report on multilateral export controls in which the United States participates pursuant to the Export Administration Act of 1969 and pursuant to the Mutual Defense Assistance Control Act of 1951. The purpose of such special report shall be to assess the effectiveness of such multilateral export controls and to formulate specific proposals for increasing the effectiveness of such controls. That special report shall include—

(1) the current list of commodities controlled for export by agreement of the group known as the Coordinating Committee of the Consultative Group (hereafter in this section referred to as the "Committee") and an analysis of the process of reviewing such list and of the changes which result from such review;

(2) data on and analysis of requests for exceptions to such list;

(3) a description and an analysis of the process by which decisions are made by the Committee on whether or not to grant such requests;

(4) an analysis of the uniformity of interpretation and enforcement by the partcipat-

ing countries of the export controls agreed to by the Committee (including controls over the re-export of such commodities from countries not participating in the Committee), and information on each case where such participating countries have acted contrary to the United States interpretation of the policy of the Committee, including United States representations to such countries and the response of such countries;

(5) an analysis of the problem of exports of advanced technology by countries not participating in the Committee, including such exports by subsidiaries or affiliates of United States businesses in such countries;

(6) an analysis of the effectiveness of any procedures employed, in cases in which an exception for a listed commodity is granted by the Committee, to determine whether there has been compliance with any conditions on the use of the excepted commodity which were a basis for the exception; and

(7) detailed recommendations for improving, through formalization or other means, the effectiveness of multilateral export controls, including specific recommendations for the development of more precise criteria and procedures for collective export decisions and for the development of more detailed and formal enforcement mechanisms to assure more uniform interpretation of and compliance with such criteria, procedures, and decisions by all countries participating in such multilateral export controls.

REVIEW OF UNILATERAL AND MULTILATERAL EXPORT CONTROL LISTS

SEC. 117. The Secretary of Commerce, in cooperation with appropriate United States Government departments and agencies and the appropriate technical advisory committees established pursuant to the Export Administration Act of 1969, shall undertake an investigation to determine whether United States unilateral controls or multilateral controls in which the United States participates should be removed, modified, or added with respect to particular articles, materials, and supplies, including technical data and other information, in order to protect the national security of the United States. Such investigation shall take into account such factors as the availability of such articles, materials, and supplies from other nations and the degree to which the availability of the same from the United States or from any country with which the United States participates in multilateral controls would make a significant contribution to the military potential of any country threatening or potentially threatening the national security of the United States. The results of such investigation shall be reported to the Congress not later than 12 months after enactment of this Act.

SUNSHINE IN GOVERNMENT

SEC. 118. (a) Each officer or employee of the Department of Commerce who—

(1) performs any function or duty under this Act or the Export Administration Act of 1969; and

(2) has any known financial interest in any person subject to such Acts, or in any person who obtains any license, enters into any agreement, or otherwise receives any benefit under such Acts;

shall, beginning on February 1, 1977, annually file with the Secretary of Commerce a written statement concerning all such interests held by such officer or employee during the preceding calendar year. Such statement shall be available to the public.

(b) The Secretary of Commerce shall—

(1) within ninety days after the date of enactment of this Act—

(A) define the term "known financial interest" for purposes of subsection (a) of this section; and

(B) establish the methods by which the requirement to file written statements specified in subsection (a) of this section will be monitored and enforced, including appropriate provisions for the filing by such officers and employees of such statements and the review by the Secretary of such statements; and

(2) report to the Congress on June 1 of each calendar year with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

(c) In the rules prescribed under subsection (b) of this section, the Secretary may identify specific positions within the Department of Commerce which are of a nonregulatory or nonpolicymaking nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

(d) Any officer or employee who is subject to, and knowingly violates, this section or any regulation issued hereunder, shall be fined not more than $2,500 or imprisoned not more than one year, or both.

TITLE II—FOREIGN BOYCOTTS

PROHIBITION ON COMPLIANCE WITH FOREIGN BOYCOTTS

SEC. 201. (a) The Export Administration Act of 1969 is amended by redesignating section 4A as section 4B and by inserting after section 4 the following new section:

"FOREIGN BOYCOTTS

"SEC. 4A. (a)(1) For the purpose of implementing the policies set forth in section 3(5)(A) and (B), the President shall issue rules and regulations prohibiting any United States person from taking any of the following actions with intent to comply with, further, or support any boycott fostered or imposed by a foreign country against a country which is friendly to the United States and which is not itself the object of any form of embargo by the United States:

"(A) Refraining from doing business with or in the boycotted country, with any business concern organized under the laws of the boycotted country, or with any national or resident of the boycotted country, pursuant to an agreement with, a requirement of, or a request from or on behalf of the boycotting country. The mere absence of a business relationship with or in the boycotted country, with any business concern organized under the laws of the boycotted country, or with any national or resident of the boycotted country, does not indicate the existence of the intent required to establish a violation of rules and regulations issued to carry out this subparagraph.

"(B) Refraining from doing business with any person (other than the boycotted country, any business concern organized under the laws of the boycotted country, or any national or resident of the boycotted country). The mere absence of a business relationship with a person does not indicate the presence of the intent required to establish a violation of rules and regulations issued to carry out this subparagraph.

"(C) Refraining from employing or otherwise discriminating against any United States person on the basis of race, religion, nationality, or national origin.

"(D) Furnishing information with respect to the race, religion, nationality, or national origin of any other United States person.

"(E) Furnishing information about whether any person has, has had, or proposes to have any business relationship (including a relationship by way of sale, purchase, legal or commercial representation, shipping or other transport, insurance, investment, or supply) with or in the boycotted country, with any business concern organized under the laws of the boycotted country, with any national or resident of the boycotted country, or with any other person which is known or believed to be restricted from having any business relationship with or in the boycotting country.

"(2) Rules and regulations issued pursuant to paragraph (1) shall provide exceptions for—

"(A) compliance with requirements (i) prohibiting the import of goods from the boycotted country or of goods produced by any business concern organized under the laws of the boycotted country or by nationals or residents of the boycotted country, or (ii) prohibiting the shipment of goods to the boycotting country on a carrier of the boycotted country or by a route other than that prescribed by the boycotting country or the recipient of the shipment;

"(B) compliance with import and shipping document requirements with respect to country of origin, the name of the carrier and route of shipment, and the name of the supplier of the shipment;

"(C) compliance with export requirements of the boycotting country relating to transshipments of exported goods to the boycotted country, to any business concern organized under the laws of the boycotted country, or to any national or resident of the boycotted country;

"(D) compliance by an individual with the immigration or passport requirements of the any country; or

"(E) the refusal of a Untied States person to pay, honor, advise, confirm, process, or otherwise implement a letter of credit in the event of the failure of the beneficiary of the letter to comply with the conditions or requirements of the letter, other than conditions or requirements compliance with which is prohibited by rules and regulations issued pursuant to paragraph (1) which conditions or requirements shall be null and void.

"(3) Nothing in this subsection may be construed to supersede or limit the operation of the antitrust laws of the United States.

"(4) Rules and regulations pursuant to this subsection and section 11(2) shall be issued and become effective not later than 90 days after the date of enactment of this section, except that rules and regulations issued pursuant to this subsection shall apply to actions taken pursuant to contracts or other agreements in effect on such date of enactment only after the expiration of 90 days following the date such rules and regulations become effective.

"(b)(1) In addition to the rules and regulations issued pursuant to subsection (a) of this section, rules and regulations issued under section 4(b) of this Act shall implement the policies set forth in section 3(5).

"(2) Such rules and regulations shall require that any United States person receiving a request for the furnishing of information, the entering into or implementing of agreements, or the taking of any other action referred to in section 3/5 shall report that fact to the Secretary of Commerce, together with such other information concerning such request as the Secretary may require for such action as he may deem appropriate for carrying out the policies of that section. Such person shall also report to the Secretary of Commerce whether he intends to comply and whether he has complied with such request. Any report filed pursuant to this paragraph after the date of enactment of this section shall be made available promptly for public inspection and copying, except that information regarding the quantity, description, and value of any articles, materials, and supplies, including technical data and other information, to which such report relates may be kept confidential if the Secretary determines that disclosure thereof would place the United States person involved at a competitive disadvantage. The Secretary of Commerce shall periodically

transmit summaries of the information contained in such reports to the Secretary of State for such action as the Secretary of State, in consultation with the Secretary of Commerce, may deem appropriate for carrying out the policies set forth in section 3(5) of this Act.".

(b) Section 4(b)(1) of such Act is amended by striking out the next to the last sentence.

(c) Section 7(c) of such Act is amended by striking out "No" and inserting in lieu thereof "Except as otherwise provided by the third sentence of section 4A(b)(2) and by section 6(c)(2)(C) of this Act, no".

STATEMENT OF POLICY

SEC. 202. (a) Section 3(5)(A) of the Export Administration Act of 1969 is amended by inserting immediately after "United States" the following: "or against any United States person".

(b) Section 3(5)(B) of such Act is amended to read as follows: "(B) to encourage and, in specified cases, to require United States persons engaged in the export of articles, materials, supplies, or information to refuse to take actions, including furnishing information or entering into or implementing agreements, which have the effect of furthering or supporting the restrictive trade practices or boycotts fostered or imposed by any foreign country against a country friendly to the United States or against any United States person,".

ENFORCEMENT

SEC. 203. (a) Section 6(c) of the Export Administration Act of 1969 is amended—

(A) by redesignating such section as section 6(c)(1); and

(B) by adding at the end thereof the following new paragraph:

"(2)(A) The authority of this Act to suspend or revoke the authority of any United States person to export articles, materials, supplies, or technical data or other information, from the United States, its territories or possessions, may be used with respect to any violation of the rules and regulations issued pursuant to section 4A(a) of this Act.

"(B) Any sanction (including any civil penalty or any suspension or revocation of authority to export) imposed under this Act for a violation of the rules and regulations issued pursuant to section 4A(a) of this Act may be imposed only after notice and opportunity for an agency hearing on the record in accordance with sections 554 through 557 of title 5, United States Code.

"(C) Any charging letter or other document initiating proceedings for the imposition of sanctions for violations of the rules and regulations issued pursuant to section 4A(a) of this Act shall be made available for public inspection and copying.".

(b) Section 8 of such Act is amended by striking out "The" and inserting in lieu thereof "Except as provided in section 6(c)(2), the".

DEFINITIONS

SEC. 204. Section 11 of the Export Administration Act of 1969 is amended to read as follows:

"DEFINITIONS

"SEC. 11. As used in this Act—

"(1) the term 'person' includes the singular and the plural and any individual, partnership, corporation, or other form of association, including any government or agency thereof; and

"(2) the term 'United States person' includes any United States resident or national, any domestic concern (including any subsidiary or affiliate of any foreign concern with respect to its activities in the United States), and any foreign subsidiary or affiliate of any domestic concern which is controlled in fact by such domestic concern, as determined under regulations of the President."

TITLE III—EXPORTS OF NUCLEAR MATERIAL AND TECHNOLOGY

NUCLEAR EXPORTS

SEC. 301. The Export Administration Act of 1969 is amended by adding at the end thereof the following new section:

"NUCLEAR EXPORTS

"SEC. 16. (a)(1) The Congress finds that the export by the United States of nuclear material, equipment, and devices, if not properly regulated, could allow countries to come unacceptably close to a nuclear weapon capability thereby adversely affecting international stability, the foreign policy objectives of the United States, and undermining the principle of nuclear nonproliferation agreed to by the United States as a signatory to the Treaty on the Non-Proliferation of Nuclear Weapons.

"(2) The Congress finds that nuclear export activities which enable countries to possess strategically significant quantities of unirradiated, readily fissionable material are inherently unsafe.

"(3) It is, therefore, the purpose of this section to implement the policies stated in paragraphs (1) and (2) of section 3 of this Act by regulating the export of nuclear material, equipment, and devices which could prove detrimental to United States national security and foreign policy objectives.

"(b)(1) No agreement for cooperation providing for the export of any nuclear material, equipment, or devices for civil uses may be entered into with any foreign country, group of countries, or international organization, and no amendment to or renewal of any such agreement may be agreed to, unless—

"(A) the provisions of the agreement concerning the reprocessing of special nuclear material supplied by the United States will apply equally to all special nuclear material produced through the use of any nuclear reactor transferred under such agreement; and

"(B) the recipient country, group of countries, or international organization, has agreed to permit the International Atomic Energy Agency to report to the United States, upon a request by the United States, on the status of all inventories of plutonium, uranium 233, and highly enriched uranium possessed by that country, group of countries, or international organization and subject to International Atomic Energy Agency safeguards.

"(2)(A) The Secretary of State shall undertake consultations with all parties to agreements for cooperation existing on the date of enactment of this section in order to seek inclusion in such agreements of the provisions described in paragraph (1)(A) and (1)(B) of this subsection.

"(B) The Secretary of State shall seek to acquire, from any party to an agreement for cooperation who is not a nuclear-weapons State (as defined in Article IX(3) of the Treaty on the Non-Proliferation of Nuclear Weapons), periodic reports on the status of all investories of plutonium, U-233, and highly enriched uranium possessed by that party which are not subject to International Atomic Energy Agency safeguards.

"(3)(A) No license may be issued for the export of any nuclear material, equipment, or devices pursuant to an agreement for cooperation unless the recipient country, group of countries, or international organization, has agreed that the material, equipment, and devices subject to that agreement will not be used for any nuclear explosive devices, regardless of how the device itself is intended to be used.

"(B) Subparagraph (A) of this paragraph shall take effect at the end of the one year period beginning on the date of enactment of this section.

"(4) In any case in which a party to any agreement for cooperation seeks to reprocess special nuclear material produced through the use of any nuclear material, equipment, or devices supplied by the United States, the Secretary of State may only determine that safeguards can be applied effectively to such reprocessing if he finds that the reliable detection of any diversion and the timely warning to the United States of such diversion will occur well in advance of the time at which that party could transform strategic quantities of diverted nuclear material into explosive nuclear devices.".

INTERNATIONAL AGREEMENT ON NUCLEAR EXPORTS

SEC. 302. (a) It is the sense of the Congress that the President should actively seek, and by the earliest possible date secure, an agreement or other arrangement under which—

(A) nuclear exporting nations will not transfer to any other nation any equipment, material, or technology designed or prepared for, or which would materially assist the establishment of, national uranium enrichment, nuclear fuels reprocessing, or heavy water production facilities until and while alternatives to such national facilities are explored and pursued;

(B) nuclear exporting nations will not transfer any nuclear equipment, material, or technology to any other nation that has not agreed to implement safeguards promulgated by the International Atomic Energy Agency;

(C) minimum physical security standards are established to prevent the unauthorized diversion of nuclear equipment, materials, and technology;

(D) arrangements are established for effective and prompt responses in the event of violations of any international agreement to control the use of nuclear materials and technology;

(E) nuclear exporting nations, in cooperation with nuclear importing nations, pursue the concept of multi-national facilities for the purpose of meeting the world's nuclear fuel needs while reducing the risks associated with the spread of national facilities for fuel reprocessing, fabrication, and enrichment; and

(F) nuclear exporting nations establish arrangements for appropriate response, including the suspension of transfers of nuclear equipment, material, or technology, to any non-nuclear weapons country which has detonated a nuclear explosive device or which has clearly demonstrated the intention to embark upon a nuclear weapons program.

Within one year after the date of enactment of this Act, the President shall report to the Congress on the progress made toward the achievement of international agreement or other arrangements on the matters specified in this section.

(b) For purposes of this section, the term "nuclear exporting nations" means the United States, the United Kingdom, France, the Federal Republic of Germany, Canada, Japan, the Union of Soviet Socialist Republics, and such other countries as the President may determine.

EXPORTS OF NUCLEAR TECHNOLOGY

SEC. 303. Section 4(j) of the Export Administration Act of 1969, as added by section 107 of this Act, is amended by adding at the end thereof the following new paragraph:

"(3) The President shall conduct an in-depth study of whether, or the extent to which, the education and training of foreign nationals within the United States in nuclear engineering and related fields contributes to the proliferation of explosive nuclear devices or the development of a capability of

producing explosive nuclear devices. Not later than the end of the 6-month period beginning on the date of enactment of this paragraph, the President shall submit to the Congress a detailed report containing the findings and conclusions of such study. Such report shall analyze the direct and indirect contribution of such education and training to nuclear proliferation.".

NUCLEAR POWERPLANTS

SEC. 304. None of the funds authorized by the Foreign Assistance Act of 1961 may be used to finance the construction of, the operation or maintenance of, or the supply of fuel for, any nuclear powerplant under an agreement for cooperation between the United States and any other country.

By Mr. MATHIAS:

S. 70. A bill to broaden homeownership opportunities by providing alternative types of mortgage loans in order to better match the ability of families to meet monthly payments, and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

HOMEBUYERS ASSISTANCE ACT OF 1977

Mr. MATHIAS. Mr. President, I send to the desk the Homebuyers Assistance Act of 1977, an innovative approach to helping people buy their own homes. A growing number of families and individuals are being squeezed out of the homebuying market due to the escalation of cost in housing. Those costs have gone up in such areas as land, labor, code compliance, materials, and the cost of borrowing money with which to buy a home. All of those costs have risen, and continue to rise, at a faster rate than real personal income.

The results are rather obvious. Fewer people are able to purchase a home. Those who are buying homes today are, on the average, older, or in a higher income bracket than the typical homebuyer of 20 years ago.

The ironic thing is that many young couples and individuals who are currently renters and would like to purchase their first home have the future earnings potential that would support a home purchase.

The bill I am introducing today, the Homebuyers Assistance Act of 1977, is intended to alleviate one of those housing costs I have noted—the cost of money. By enabling federally chartered institutions, such as savings and loans, banks, and credit unions to offer a variety of mortgage instruments, I believe we can better match monthly mortgage payments to the homebuyer's income and thus open the door of homeownership to all of our citizens.

My bill authorizes lending institutions to offer such new mortgages as: graduated payment mortgages; flexible payment mortgages; reverse annuity; deferred interest; variable rate; dual-rate, variable-rate; graduated-payment, variable rate.

Mr. President, I ask unanimous consent that a paper explaining these different types of mortgages appear in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection.

Mr. MATHIAS. To protect the consumer, my bill requires that each of these new types of mortgages may only be offered to a homebuyer at the same time as the conventional level payment mortgage, presently the only vehicle for purchasing a home. This provision is meant to assure that the consumer is given a choice and is not talked into something he cannot afford, does not want, or does not understand.

Other consumer protection features of the bill include:

Advance disclosure of each alternative contract's provision to the prospective purchaser. Such disclosure must include projected monthly payments for the life of the loan; the interest rate at the beginning and end of the loan; fees; insurance; and related expenses. The responsibility for developing a uniform format for such disclosure pursuant to the Truth-in-Lending Act should be lodged with the Federal Home Loan Bank Board.

Assumability of the loan. Should the consumer who purchases another home later in life decide not to take his original loan with him, that loan may remain with his original house and be assumed by the new purchaser.

No prepayments penalty. In order to facilitate refinancing for homebuyers and give them as many options as possible, my bill prohibits the lender from charging a penalty if the homeowner with one of these new mortgage instruments decides to complete his outstanding mortgage payments for whatever reason. Such a situation could arise if the homeowner is relocated, because of his or her job, decided to trade up or down to a house which better fit his needs, or decided to pay off his or her mortgage.

Sixty days' advance disclosure of any change in interest rate charged on the mortgage. This provision would apply in the case of a variable rate mortgage.

It is my belief that those types of mortgages should have an interest rate tied to an intermediate index—3-to-5-year Treasury notes for example. When that index goes up or down as measured on an annual basis, the interest rate on the variable rate mortgage would change also.

I also believe that the maximum change in the interest rate for life of the loan should not exceed 2.5 percent, nor should the interest rate fluctuate by more than one-half of 1 percentage point each year. While this provision is not explicitly stated in the bill, I am sure my colleagues would join me in endorsing this basic consumer protection feature and would include it in the committee report as a directive to regulatory bodies. The limit on changes in the interest rate is intended to prevent wide fluctuations in interest rates which translate into higher unanticipated costs to the borrower—when rates go up—and to the lender—when rates go down.

Annual report on the use of alternative mortgage instruments. As part of their annual report, each of the Federal regulatory bodies with control over lenders would analyze the consumer acceptance of different types of mortgages, their lender acceptance, and the effect on the mortgage market of their use.

A public information program. My bill requires the Federal Home Loan Bank Board to develop a public information program for both lenders and borrowers to explain the new kinds of mortgages and who might want to use them. I foresee such a program including public information pamphlets with typical monthly payment schedules for several mortgage amounts.

I believe these consumer protection features offer protection to the home buyer, will reassure him that he does have options or home finance and will give him the opportunity to see the monthly bill laid out for him for the life of the mortgage. I want to emphasize to my colleagues that the lender is required to offer the homebuyer the conventional level-payment mortgage at the prevailing market rate at the same time he offers any of these alternate mortgage instruments. This bill is not intended to press any of these new mortgage instruments on anybody—either the homebuyer or the lender. It is simply to create that option and provide an informed atmosphere in which both parties can decide whether an alternative mortgage instrument meets their needs.

This is also the reason why my bill limits the amount of assets of a thrift institution which may be offered in alternate morgage form to 35 percent. And it is also why my bill limits the HUD section 245 experimental mortgage insurance program to 15 percent of all HUD outstanding aggregate principal.

The idea in both cases is to provide enough leeway for these new home financing mechanisms to come into use and be evaluated by all concerned as to their usefulness. After a period of time we would look again at the track record of lending institutions, the consumer acceptance and experience with such new mortgages, and the larger housing sector of our economy to evaluate whether they are serving their purpose and should be continued, adjusted, or abandoned.

I might add here that I believe that one of the first new kinds of mortgages to be permitted should be similar to a graduated payment mortgage. However, much of those final decisions await the results of the alternative mortgage instrument study currently being conducted by the Home Loan Bank Board. The results of this extensive research investigation are scheduled for completion by this summer. We in the Congress would be well advised to carefully review those findings as they become available to insure that this legislation meets the need and is comprehensive.

Other sections of my bill are intended to deal with the problem of the volatility of credit for financing home purchases and easing the burden of downpayments.

My bill eliminates the Federal income tax on interest or dividends earned on savings accounts. The purpose is twofold. It is intended to remove a deterrent to savers who wish to accumulate savings for a downpayment. Presently, 68.2 percent of savings accounts in savings and loans are less than $5,000. These are the accounts of average middle-income Americans striving to make ends meet in these high inflation times and trying to put away a little something whenever they can. Why then do we penalize them

for saving by taxing the earnings on those savings?

The second purpose of lifting this tax is to encourage savings inflows. This, in turn, provides more funds for residential lending, particularly when coupled with the mortgage investment tax credit provided at the end of my bill. The more funds flowing to savings, the more chance there is that either lending will increase on more favorable terms or the interest rate on mortgages will go down.

The long-term effect of this savings account tax treatment, I believe, will more than offset the revenue loss to the Treasury.

Another feature of my bill aimed at reducing downpayments has to do with the secondary mortgage market. It permits the major Government corporations which buy mortgages in the secondary market to buy 95 percent mortgages. This means a stronger market will be created for 5 percent downpayment mortgages, while not threatening the basic equity requirements of most lenders.

Experts generally agree that a 3- to 5-percent equity requirement is sufficient for most lenders to make a safe, "bankable," loan. This provision of my bill simply facilitates the offering of such low downpayment loans.

In order to assure and bolster long-term deposits which are then used for residential lending, the Homebuyers Assistance Act permits federally chartered lending institutions to offer long term—5- to 7-year securities.

Several States presently have laws which the interest rate which may be charged on residential loans. While well-intentioned, these ceilings have often had the effect of halting conventional residential mortgage lending. For example, in my own State of Maryland, the interest rate was set at 8 percent several years ago. In short order, interest rates for loans exceeded that ceiling and lenders ceased making loans in my State.

The limit was then raised to 10 percent. However, the cost of mortgage money may rise above this limit, too, and the credit supply in Maryland will again dry up.

As the cost of lending and borrowing rises, interest rates rise beyond those usury levels and State legislatures find themselves quickly convening to raise the usury limit in order that all lending activity not come to a stop.

My bill overrides State usury limits only as they apply to residential mortgage lending in order to permit these new mortgage instruments with varying interest rates to operate in a freer market.

Finally, my bill provides for uniform tax treatment of all financial institutions. This section of my bill is virtually the same as title VII of the Financial Institutions Act which passed the Senate last year, minus that title, under the able leadership of my colleague, Senator McIntyre.

The basic purpose of this section is to encourage residential mortgage lending by all financial institutions, be they banks, savings and loans, or credit unions. It does this by means of a mortgage investment tax credit which is highest for those who invest the largest amount of their assets—up to 80 percent—in residential mortgages.

Mr. President, the interest rate on a new home mortgage today ranges from 8½ to 9 percent. The downpayment requirements for an individual mortgage frequently can run up to 20 or 30 percent.

Using the 1975 median new home sales price of $45,600, this meant your downpayment could range from $9,120 to $13,680. Your minimum income had to be at least $18,200, or more to buy that median priced new home. The median family income in 1975 was $13,719 which is $4,900 less than the income needed to buy that new house.

A recent insurance company survey estimates there are 4.5 million couples in the 25- to 34-age group looking to buy a home today. In addition, many retired couples already owning a home want to purchase a smaller, easier to maintain home.

I have structured my bill to help those people afford a home now when they want to buy. In the good old days of their parents, those 25- to 34-year-olds would have been able to purchase a home when they were first setting out in life on their own. Today inflation has eaten away at the American dream of homeownership. I do not believe my colleagues want to see that happen in America.

Mr. President, it is my belief that the Homebuyers' Assistance Act will provide one form of relief to those desiring to purchase a home in today's market. It will ease the cost of financing for the homebuyer, one of the major items in the catalog of escalating costs in the housing sector of our economy.

My bill is a remedy to part of the home purchase cost problem and will provide new avenues to broaden homeownership opportunities.

Mr. President, I ask unanimous consent that the text of the Homebuyers Assistance Act of 1977 be printed at this point in the Record, along with a description of the different types of new mortgages authorized by the bill.

There being no objection, the bill and material were ordered to be printed in the Record, as follows:

S. 70

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Home Buyers' Assistance Act".

STATEMENT OF PURPOSE

Sec. 2. The purpose of this Act is to broaden the homeownership opportunities and enable both first-time homebuyers as well as others, to purchase homes by providing a variety of mortgage instruments which better match monthly payments to the buyer's income, by increasing the amount of credit available for residential mortgage lending, and by providing tax mechanisms to facilitate the accumulation of savings for downpayments.

TITLE I—HOMEOWNERSHIP OPPORTUNITIES

ALTERNATIVE MORTGAGE LOANS

Sec. 101. (a) As used in this section—

(1) the term "appropriate Federal regulatory agency" means the Comptroller of the Currency with respect to national banks, the Federal Home Loan Bank Board with respect to Federal savings and loan associations, and the Federal Credit Union Administration with respect to Federal Credit Unions; and

(2) the term "alternative mortgage loan" means a mortgage loan which is made to finance the purchase of a one- to four-family dwelling and which has a varying monthly payment amount, a maturity which may be extended or shortened, an interest rate which may be adjusted from time to time, a loan to value ratio which may change from time to time, or any combination of the foregoing.

(b) Notwithstanding any other provision of law, a national bank, Federal savings and loan association, or Federal credit union may make alternative mortgage loans in accordance with such terms and conditions as may be prescribed by the appropriate Federal regulatory agencies and subject to such limitations as such agencies may from time to time prescribe. The aggregate amount of alternative mortgage loans may not exceed 35 per centum of the assets of any such bank, association, or credit union.

(c) An alternative mortgage loan may be offered only if the bank, savings and loan association, or credit union offering such loan—

(1) as an alternative to the alternative loan, offers the prospective borrower a conventional level payment mortgage loan at the prevailing market rate;

(2) discloses in advance on a uniform disclosure statement to be developed by the Federal Home Loan Bank Board, in consultation with the other appropriate Federal regulatory agencies, the relevant provisions of the alternative mortgage loan, including a projection or estimate of monthly payment amounts during the life of such loan, a projection or estimate of interest rates at the beginning and end of the life of any such loan, and the amount of any fee, insurance, or other charge to be imposed in connection with any such loan;

(3) provides that such a loan may be assumed by a subsequent qualified purchaser of the property securing the loan if such an assumption is permitted by the appropriate Federal regulatory agency;

(4) discloses, at least 60 days in advance, any adjustment to be made in the interest rate; and

(5) imposes no penalty in case of prepayment of the loan except where such a penalty is permitted by the appropriate Federal regulatory agency.

(d) Alternative mortgage loans shall be eligible for insurance under title II of the National Housing Act or under title V of the Housing Act of 1949 or for guaranties under chapter 37 of title 38, United States Code.

(e) Paragraph (5) of section 107 of the Federal Credit Union Act, as amended 12 U.S.C. 1757(5), is amended by inserting after "maturities specified therein," the following: "and residential mortgage loans and loans made pursuant to section 101 of the Home Buyers' Assistance Act (which in the aggregate may not exceed 35 per centum of the credit union's assets) may have maturities in accordance with regulations prescribed by the Administrator,".

(f) Each appropriate Federal regulatory agency shall include in its annual report an analysis of the use of alternative mortgage loans, the extent of lender and consumer acceptance of such loans, and the effect of such loans on mortgage markets.

(g) The Federal Home Loan Bank Board shall develop and carry out a program to inform consumers and lenders of the availability and nature of alternative mortgage loans.

(h) Any alternative mortgage loan which has a variable interest rate shall be limited by regulations of the appropriate Federal regulatory agency so that—

(1) adjustments in the interest rate are made in accordance with an approved intermediate term index;

(2) the total of interest rate adjustments during the life of the mortgage may not exceed 2½ percentage points; and

(3) adjustments in any 12-month period may not exceed one-half of a percentage point.

REDUCED DOWNPAYMENT REQUIREMENTS

SEC. 102. (a) The second sentence of section 302(b)(2) of the National Housing Act is amended—

(1) by striking out "80 per centum" each place it appears and inserting in lieu thereof "90 per centum"; and

(2) by striking out "10 per centum" in clause (A) and inserting in lieu thereof "5 per centum".

(b) Section 313(b) of such Act is amended by striking out "80 per centum" and inserting in lieu thereof "90 per centum".

(c) The first sentence of section 305(a)(2) of the Federal Home Loan Mortgage Corporation Act is amended—

(1) by striking out "80 per centum" each place it appears and inserting in lieu thereof "90 per centum"; and

(2) by striking out "10 per centum" and inserting in lieu thereof "5 per centum".

LONG-TERM SECURITIES

SEC. 103. Section 5(b)(2) of the Home Owners' Loan Act of 1933 is amended by adding at the end thereof the following: "The Board shall, from time to time as conditions require, authorize an association to issue long-term securities, as defined in regulations of the Board."

USURY CEILINGS

SEC. 104. The provisions of the law or constitution of any State which limit the rate of interest which may be charged, taken, received, or reserved in connection with mortgage loans are preempted to the extent that such provisions would apply to any loan made by a national bank, Federal savings and loan association or Federal credit union to finance the purchase of a one- to four-family dwelling.

EXPERIMENTAL FINANCING

SEC. 105. Section 245 of the National Housing Act is amended— (1) by striking out "1 per centum" and inserting in lieu thereof "15 per centum"; and

(2) by striking out "September 30, 1977" and inserting in lieu thereof "September 30, 1982".

EXCLUSION OF INTEREST ON SAVINGS FROM FEDERAL INCOME TAXATION

SEC. 106. (a) Part III of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to items specifically excluded from gross income) is amended by redesignating section 124 as 125, and by inserting after section 123 the following new section:

"SEC. 124. INTEREST.

"In the case of an individual, gross income does not include any amount received as interest or dividends on a time or demand deposit with—

"(1) a commercial or mutual savings bank the deposits or accounts of which are insured by the Federal Deposit Insurance Corporation or which are otherwise insured in accordance with the requirements of the law of the State in which the bank is located,

"(2) a savings and loan association, building and loan association, or similar association the deposits or accounts of which are insured by the Federal Savings and Loan Insurance Corporation or which are otherwise insured in accordance with the requirements of the law of the State in which the association is located, or

"(3) a credit union the shares of which are insured by the National Credit Union Administration Share Insurance Fund or which are otherwise insured in accordance with the requirements of the law of the State in which the credit union is located.".

(b) The table of sections for such part is amended by striking out the last item and inserting in lieu thereof the following items:

"Sec. 124. Interest.

"Sec. 125. Cross references to other Acts.".

(c) The amendments made by this section apply to taxable years beginning after December 31, 1976.

TITLE II—UNIFORM APPLICATION OF THE TAX LAWS TO ALL FINANCIAL INSTITUTIONS

SEC. 201. SHORT TITLE; ETC.

(a) SHORT TITLE.—This title may be cited as the "Uniform Tax Treatment of Financial Institutions Act".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this title an amendment is expressed in terms of an amendment to a section or other provision, the reference is to a section or other provision of the Internal Revenue Code of 1954.

SEC. 202. DEFINITION OF BANK.

Section 581 (relating to definition of bank) is amended to read as follows:

"SEC. 581. DEFINITION OF BANK.

"(a) DEFINITION.—For purposes of this subtitle, the term 'bank' means—

"(1) a bank or trust company doing business under the laws of the United States (including laws relating to the District of Columbia) or of any State, a substantial part of the business of which consists of receiving deposits and making loans and discounts, or of exercising fiduciary powers similar to those permitted to national banks under authority of the Comptroller of the Currency, and which is subject by law to supervision and examination by State, or Federal authority having supervision over banking institutions,

"(2) a domestic building and loan association,

"(3) a mutual savings bank not having capital stock represented by shares, and

"(4) a cooperative bank without capital stock organized and operated for mutual purposes and without profit.

"(b) SPECIAL RULE FOR TAXABLE YEARS BEGINNING BEFORE JANUARY 1, 1979.—Notwithstanding subsection (a) of this section, for purposes of section 585 (relating to reserves for losses on loans of banks) the term 'bank' shall not include a taxpayer described in subsection (a), (2), (3), or (4) for a taxable year beginning before January 1, 1979, unless the taxpayer makes an election in the manner prescribed by the Secretary on or before the due date (including extensions of time) for filing its tax return under this chapter for the taxable year to be a bank for such purpose. The election shall be irrevocable and shall apply to the taxable year and each succeeding taxable year."

SEC. 203. RESERVES FOR LOSSES ON LOANS OF BANKS.

Section 585 (relating to reserves for losses on loans of banks) is amended—

(1) by striking out in subsection (a)(1) "other than an organization to which section 593 applies",

(2) by striking out the matter following subparagraph (B) in subsection (b)(2) and inserting in lieu thereof the following:

"(C) For purposes of this paragraph, the term 'allowable percentage' means 1.8 percent for taxable years beginning before 1978; 1.2 percent for taxable years beginning after 1977 but before 1984; and 0.6 percent for taxable years beginning after 1983.

"(D) The amount determined under this paragraph shall not exceed 0.6 percent of eligible loans outstanding at the close of the taxable year or an amount sufficient to increase the reserve for losses on loans to 0.6 percent of eligible loans outstanding at the close of the taxable year, whichever is greater.

"(E) for purposes of this paragraph, the term 'base year' means (except as provided in subparagraph (F))—

"(i) for taxable years beginning after 1976, the last taxable year beginning on or before July 11, 1969, for taxable years beginning after 1975 but before 1982, the last taxable year beginning before 1976, and for taxable years beginning after 1981, the last taxable year beginning before 1982;

"(ii) in the case of a bank described in section 581(a) (2), (3), or (4) which did not make an election under section 581(b)) and which had adopted or used either method described in section 593(b) (2) or (4) for the last taxable year beginning on or before December 31, 1978, the taxable year provided in clause (i) of this subparagraph or the last taxable year beginning on or before December 31, 1978, whichever is later; or

"(iii) in the case of a bank described in section 581(a) (2), (3), or (4) which made an election under section 581(b) and which had adopted or used either method described in section 593(b) (2) or (4) for the last taxable year before the first taxable year to which such election applies, the taxable year provided in clause (i) of this subparagraph or the last taxable year before the first taxable year to which the election applies, whichever is later.

"(F) For purposes of subparagraph (A) the term 'base year' means the taxable year provided in subparagraph (E) or the last taxable year before the most recent adoption of the percentage method, whichever is later.",

(3) by inserting in subsection (b)(3), immediately following the last sentence, "With respect to a bank described in section 581(a) (2), (3), or (4) the adoption or use of the experience method under section 593(b)(1)(A) prior to January 1, 1979 (or, in the case of a bank described in section 581(a) (2), (3), or (4) making an election under section 581(b), prior to the first taxable year to which an election under section 581(b) applies) shall be disregarded when determining the base year.",

(4) by redesignating paragraph "(4)" in subsection (b) as paragraph "(5)", and inserting immediately after paragraph (3) thereof the following:

"(4) CHARGING OF BAD DEBTS.—Any debts becoming worthless or partially worthless shall be charged to the reserve for losses on loans.", and

(5) by inserting immediately after subsection (b) the following new subsection:

"(c) SPECIAL RULES.—

"(1) In the case of a bank described in section 581(a) (2), (3), or (4) that was in existence on December 31, 1978, and did not make an election under section 581(b), the net amounts, determined as of the close of the last taxable year beginning on or before December 31, 1978, accumulated in the reserve for losses on nonqualifying loans, the reserve for losses on qualifying real property loans, and the supplemental reserve for losses on loans as such reserves were maintained under section 593(c), shall be allocated to and constitute—

"(A) the opening balance of the reserve for losses on loans for the first taxable year beginning after December 31, 1978, and

"(B) the balance of the reserve for losses on loans at the close of the base year, where the base year, as determined under subsection (b) (2) or (3), is the last taxable year beginning on or before December 31, 1978.

"(2) In the case of a bank described in section 581(a) (2), (3), or (4) that made an election under section 581(b) and was in existence during the taxable year before the first taxable year to which such election applies, the net amounts, determined as of the close of the taxable year before the first tax-

able year to which the election under section 581(b) applies, accumulated in the reserve for losses on nonqualifying loans, the reserve for losses on qualifying real property loans, and the supplemental reserve for losses on loans as such reserves were maintained under section 593(c), shall be allocated to and constitute—

"(A) the opening balance of the reserve for losses on loans for the first taxable year to which the election under section 581(b) applies, and

"(B) the balance of the reserve for losses on loans at the close of the base year, where the base year, as determined under subsection (b) (2) or (3), is the last taxable year before the first taxable year to which the election applies."

SEC. 204. RULES OF GENERAL APPLICATION TO BANKING INSTITUTIONS.

Part I (relating to rules of general application to banking institutions) of subchapter H of chapter 1 is amended by adding at the end thereof the following new sections:

"SEC. 587. FORECLOSURE ON PROPERTY SECURING LOANS.

"(a) NONRECOGNITION OF GAIN OR LOSS AS A RESULT OF FORECLOSURE.—In the case of a creditor which is a bank defined in section 581, no gain or loss shall be recognized, and no debt shall be considered as becoming worthless or partially worthless, as the result of such bank having bid in at foreclosure, or having otherwise reduced to ownership or possession by agreement or process of law, any property which was security for the payment of any indebtedness.

"(b) CHARACTER OF PROPERTY.—For purposes of sections 166 and 1221, any property acquired in a transaction with respect to which gain or loss to a bank was not recognized by reason of subsection (a) shall be considered as property having the same characteristics as the indebtedness for which such property was security. Any amount realized by such bank with respect to such property shall be treated for purposes of this chapter as a payment on account of such indebtedness, and any loss with respect thereto shall be treated as a bad debt to which the provisions of section 166 (relating to allowance of a deduction for bad debts) apply.

"(c) BASIS.—The basis of any property to which subsection (a) applies shall be the basis of the indebtedness for which such property was secured (determined as of the date of the acquisition of such property), properly increased for costs of acquisition.

"(d) REGULATORY AUTHORITY.—The Secretary shall prescribe such regulations as he may deem necessary to carry out the purposes of this section.

"SEC. 588. DISTRIBUTION TO SHAREHOLDERS.

"(a) IN GENERAL.—For purposes of this chapter, any distribution of property (as defined in section 317(a)) by a bank described in section 581(a)(2) to which section 585 applies to a shareholder with respect to its stock; if such distribution is not allowable as a deduction under section 591, shall be treated as made—

"(1) first out of its earnings and profits accumulated in taxable years beginning after December 31, 1951, to the extent thereof,

"(2) then out of the reserve for losses on loans to the extent total additions to such reserve exceed the maximum additions which would have been allowed under section 585(b)(3),

"(3) then out of such other accounts as may be proper.

This subsection shall apply in the case of any distribution in redemption of stock or in partial or complete liquidation of the taxpayer, except that any such distribution shall be treated as made first out of the amount referred to in paragraph (2), second out of the amount referred to in paragraph (1), and then out of such other accounts as may be proper. This subsection shall not apply to any transaction to which section 381 (relating to carryovers in certain corporate acquisitions) applies.

"(b) AMOUNTS CHARGED TO RESERVE ACCOUNTS AND INCLUDED IN GROSS INCOME.—If any distribution is treated under subsection (a) as having been made out of the reserves described in paragraph (2) of such subsection, the amount charged against such reserve shall be the amount which, when reduced by the amount of tax imposed under this chapter and attributable to the inclusion of such amount in gross income, is equal to the amount of such distribution; and the amount so charged against such reserve shall be included in gross income of the taxpayer.

"(c) SPECIAL RULES.—

"(1) For purposes of subsection (a)(2), additions to the reserve for losses on loans for the taxable year in which the distribution occurs shall be taken into account.

"(2) For purposes of computing under section 585 the amount of a reasonable addition to the reserve for losses on loans for any taxable year, any amount charged during any year to such reserve pursuant to the provisions of subsection (b) shall not be taken into account.

"SEC. 589. DEDUCTION FOR REPAYMENT OF CERTAIN LOANS.

"In the case of a bank described in section 581(a) (2), (3), or (4), there shall be allowed as deductions in computing taxable income amounts paid by the taxpayer during the taxable year in repayment of loans made before September 1, 1951, by—

"(1) the United States or any agency or instrumentality thereof which is wholly owned by the United States, or

"(2) any mutual fund established under the authority of the laws of any State.

"SEC. 590. ALTERNATIVE TAX FOR CERTAIN BANKS CONDUCTING LIFE INSURANCE BUSINESS.

"(a) ALTERNATIVE TAX.—In the case of a bank described in section 581(a)(3), authorized under State law to engage in the business of issuing life insurance contracts, and which conducts a life insurance business in a separate department the accounts of which are maintained separately from the other accounts of the mutual savings bank, there shall be imposed in lieu of the taxes imposed by section 11 or section 1201(a), a tax consisting of the sum of the partial taxes determined under paragraphs (1) and (2):

"(1) a partial tax computed on the taxable income determined without regard to any items of gross income or deductions properly allocable to the business of the life insurance department, at the rates and in the manner as if this section had not been enacted; and

"(2) a partial tax computed on the income of the life insurance department determined without regard to any items of gross income or deductions not properly allocable to such department, at the rates and in the manner provided in subchapter L (section 801 and following) with respect to life insurance companies.

"(b) LIMITATIONS OF SECTION.—Subsection (a) shall apply only if the life insurance department would, if it were treated as a separate corporation, qualify as a life insurance company under section 801.

"SEC. 591. DEDUCTION FOR DIVIDENDS PAID ON DEPOSITS.

"In the case of a bank described in section 581(a) (2), (3), or (4) and other savings institutions chartered and supervised as savings and loan or similar associations under Federal or State law, there shall be allowed as deductions in computing taxable income amounts paid to, or credited to the accounts of, depositors or holders of accounts as dividends or interest on their deposits or withdrawable accounts, if such amounts paid or credited are withdrawable on demand subject only to customary notice of intention to withdraw.".

SEC. 205. MUTUAL SAVINGS BANKS, ETC.

(a) APPLICATION OF PART II.—Section 593 (a) (relating to reserves for losses on loans of certain organizations) is amended by inserting at the end thereof, "This part does not apply to a bank (as defined in section 581) to which section 585 applies."

(b) REPEAL.—Section 591 (relating to deduction for dividends paid on deposits), section 594 (relating to alternative tax for mutual savings banks conducting life insurance business), and section 595 (relating to foreclosure on property securing loans) are repealed.

(c) AMENDMENT OF TABLE OF SECTIONS.—The table of sections for part II of subchapter H of chapter 1 is amended to read as follows:

"PART II—MUTUAL SAVINGS BANKS, ETC.

"Sec. 593. Reserves for losses on loans.
"Sec. 596. Limitation on dividends received deduction.".

(d) REDESIGNATION.—Subchapter H (relating to banking institutions) of chapter 1 is amended by striking out part II, thereof, and redesignating "Part III. Bank affiliates." as "Part II. Bank affiliates.".

(e) AMENDMENT OF TABLE OF PARTS.—In the table of parts for subchapter II of chapter I is amended by striking out "Part II. Mutual savings banks, etc." and "Part III. Bank affiliates" and inserting in lieu thereof "Part II. Bank affiliates.".

(f) EFFECTIVE DATE.—The amendments made by subsections (d) and (e) of this section shall be effective December 31, 1981.

SEC. 206. DEFINITIONS OF DOMESTIC BUILDING AND LOAN ASSOCIATION AND COOPERATIVE BANK.

(a) DOMESTIC BUILDING AND LOAN ASSOCIATIONS.—Section 7701(a)(19) (relating to definition of domestic building and loan association) is amended—

(1) by inserting "a Federal savings bank," after "domestic savings and loan association,"; and

(2) by inserting "in the case of a bank (as defined in section 581) to which section 585 does not apply" at the beginning of subparagraph (C).

(b) DOMESTIC BUILDING AND LOAN ASSOCIATIONS FOR TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1980—Section 7701(a)(19) (relating to definition of domestic building and loan association) is amended—

(1) by inserting "and" at the end of subparagraph (A);

(2) by striking out "loans; and" in subparagraph (B) and inserting in lieu thereof "loans."; and

(3) by striking out subparagraph (C).

(c) COOPERATIVE BANKS.—Section 7701(a)(32) (relating to definition of cooperative bank) is amended—

(1) by striking out ", and" at the end of subparagraph (A)(ii) and inserting in lieu thereof ";"; and

(2) by striking out subparagraph (B) and inserting in lieu thereof:

"(B) in the case of a bank described in section 581(a)(4) to which section 585 does not apply, meets the requirements of subparagraphs (B) and (C) of paragraph (19) of this subsection (relating to definition of domestic building and loan association); or

"(C) in the case of a bank described in section 581(a)(4) to which section 585 applies, engages principally in the business of acquiring the savings of the public and investing in loans.".

(d) COOPERATIVE BANKS FOR TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1980.—Section 7701(a)(32) (relating to definition of cooperative bank) is amended—

(1) by striking out ";" at the end of sub-

paragraph (A) (ii) and inserting in lieu there of ", and"; and

(2) by striking out all after subparagraph (A) and inserting in lieu thereof:

"(B) engages principally in the business of acquiring the savings of the public and investing in loans.".

(e) EFFECTIVE DATE.—The amendments made by subsections (b) and (d) of this section shall be effective December 31, 1981.

SEC. 207. CREDIT FOR INTEREST FROM QUALIFYING RESIDENTIAL MORTGAGE LOANS.

Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable) is amended by inserting before section 45 the following new section:

"SEC. 44B. INTEREST FROM QUALIFYING RESIDENTIAL MORTGAGE LOANS.

"(a) CREDIT ALLOWED.—There shall be allowed as a credit against the tax imposed by this chapter for a taxable year the amount determined under subsection (b).

"(b) DETERMINATION OF AMOUNT.—

"(1) GENERAL RULE.—The amount of credit allowed by subsection (a) for the taxable year shall be equal to the allowable percentage of the interest received or accrued by the taxpayer from a qualifying residential mortgage loan.

"(2) ALLOWABLE PERCENTAGES.—

"(A) INDIVIDUALS.—In the case of an individual, the allowable percentage for purposes of this subsection shall be 1.5 percent.

"(B) OTHER TAXPAYERS.—In the case of a taxpayer other than an individual, the allowable percentage for purposes of this subsection shall be 3⅝ percent if for the taxable year, at least 80 percent of the total assets of such taxpayer are qualifying residential mortgage loans. If, for the taxable year, the percentage of assets of the taxpayers which are qualifying residential mortgage loans is less than 80 percent of the total assets of the taxpayer, the allowable percentage shall be 3⅝ percent reduced by 1/30 of 1 percentage point for each 1 percentage point (or fraction thereof) of such difference: *Provided however*, That the allowable percentage shall be zero if, for the taxable year, less than 10 percent of the total assets of such taxpayer are qualifying residential mortgage loans.

"(c) LIMITATIONS.—

"(1) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) for a taxable year shall not exceed the tax imposed by this chapter, reduced by the sum of the credits allowable under section 33 (relating to foreign tax credits), section 35 (relating to partially tax-exempt interest), section 37 (relating to retirement income), section 38 (relating to investment in certain depreciable property), section 40 (relating to expenses of work incentive programs), and section 41 (relating to contributions to candidates for public office).

"(2) VERIFICATION.—The credit allowed by subsection (a) shall be allowed, with respect to interest from qualifying residential mortgage loans, only if such interest is verified in such manner as the Secretary shall prescribe by regulations.

"(d) QUALIFYING RESIDENTIAL MORTGAGE LOAN DEFINED.—

"(1) Except as provided in paragraph (2), for purposes of this section, the term 'qualifying residential mortgage loan' means any loan evidenced by an agreement which constitutes a first lien against the real property in the jurisdiction in which such real property is located (provided such property is located in the United States or a possession thereof), which loan is either—

"(A) a loan (including redeemable ground rents, as defined in section 1055) secured by an interest in real property which is (or, from the proceeds of the loan, will become) residential real property, or a loan made for the improvement of residential real property, provided that for purposes of this clause, residential real property shall include single or multifamily dwellings, facilities in residential developments dedicated to public use or property used on a nonprofit basis for residents, and mobile homes not used on a transient basis, or

"(B) a loan secured by an interest in real property located within an urban renewal area to be developed for predominantly residential use under an urban renewal plan approved by the Secretary of Housing and Urban Development under part A or part B of title I of the Housing Act of 1949, as amended, or located within any area covered by a program eligible for assistance under section 103 of the Demonstration Cities and Metropolitan Development Act of 1966, as amended, or a loan made for the improvement of any such real property.

For purposes of subparagraph (A), if a multifamily structure securing a loan is such in part for nonresidential purposes, the entire loan is deemed a qualifying residential mortgage loan if the planned residential use exceeds 80 percent of the property's planned use (determined as of the time the loan is made). For purposes of subparagraph (A), a loan made to finance the acquisition or development of land shall be deemed to be a qualifying residental loan if, under regulations prescribed by the Secretary, there is reasonable assurance that the property will become residential real property within a period of 3 years from the date of acquisition of such land; but this sentence shall not apply for any taxable year unless, within such 3-year period, such land becomes residential real property.

"(2) For purposes of this section the term 'qualifying residential mortgage loan' does not include—

"(A) any loan evidenced by a security (as defined in section 165(g)(2)(C));

"(B) any loan, whether or not evidenced by a security (as defined in section 165(g)(2)(C)), the primary obligor on which is—

"(i) a government or political subdivision or instrumentality thereof;

"(ii) a bank (as defined in section 581); or

"(iii) another member of the same affiliated group;

"(C) any loan, to the extent secured by a deposit in or share of the taxpayer; or

"(D) any loan which, within a 60-day period beginning in one taxabable year of the creditor and ending in its next taxable year, is made or acquired and then repaid or disposed of, unless the transaction by which such loan was made or acquired and then repaid or disposed of are established to be for bona fide business purposes.

For purposes of subparagraph (B)(iii), the term 'affiliated group' has the meaning assigned to such term by section 1504(a); except that the phrase 'more than 50 percent' shall be substituted for the phrase 'at least 80 percent' each place it appears in section 1504(a), and all corporations shall be treated as includible corporations (without any exclusion under section 1504(b)).

"(3) For purposes of this section, a qualifying residential mortgage loan shall include an instrument which terms, yields, maturities and other provisions of such qualifying residential mortgage loans. The payment terms, yields, maturities, and other provisions of such instrument may be different from those of the underlying residential mortgages so long as the terms and provisions of such instrument reasonably reflect anticipated principal and interest payments on the underlying mortgages, including consideration for retirements or prepayments of the underlying mortgages.

"(e) CARRYBACK AND CARRYOVER OF UNUSED CREDITS.

"(1) ALLOWANCE OF CREDIT.—If the amount of the credit determined under subsection (b) for any taxable year exceeds the limitation provided by subsection (c) for such taxable year (hereinafter in this subsection referred to as 'unused credit year') such excess shall be—

"(A) a credit carryback to each of the 3 taxable years preceding the unused credit year, and

"(B) a credit carryover to each of the 7 taxable years following the unused credit year,

and shall be added to the amount otherwise allowable as a credit by this section for such years, except that such excess may be a carryback only to a taxable year ending after the effective date of the Uniform Tax Treatment of Financial Institution Act. In the case of a bank described in section 581(a)(2), (3), or (4) which did not make an election under section 581(b), such excess may be a carryback only to a taxable year beginning after December 31, 1978. In the case of a bank described in section 581(a)(2), (3), or (4) which made an election under section 581(b), such excess may be a carryback only to a taxable year beginning with or after the first taxable year to which such election applies. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the 10 taxable years to which (by reason of subparagraphs (A) and (B)) such credit may be carried and then to each of the other 9 taxable years to the extent, that, because of the limitation contained in paragraph (2), such unused credit may not be added for a prior taxable year to which such unused credit may be carried.

"(2) LIMITATION.—The amount of the unused credit which may be added under paragraph (1) for any preceding or succeeding taxable year shall not exceed the amount by which the limitation provided by subsection (c) for such taxable year exceeds the sum of—

"(A) the amount of credit determined under subsection (b) for such taxable year, and

"(B) the amounts which, by reason of this subsection (b) for such taxable year, and for such taxable year and attributable to taxable years preceding the unused credit year.

"(f) ESTATES AND TRUSTS.—In the case of an estate or trust—

"(1) the interest from qualifying residential mortgage loans for a taxable year shall be apportioned between the estate or trust and the beneficiaries on the basis of the income of the estate or trust allowable to each, and

"(2) any beneficiary to whom interest from qualifying residential mortgage loans has been apportioned under paragraph (1) shall be treated (for purposes of this section) as the taxpayer who received or accrued the interest from qualifying residential mortgage loans, and such interest shall not (by reasons of such apportionment) lose its character as interest from qualifying residential mortgage loans.

"(g) SMALL BUSINESS CORPORATIONS.—In the case of an electing small business corporation (as defined in section 1371)—

"(1) the interest from qualifying residential mortgage loans for a taxable year shall be apportioned pro rata among the persons who are shareholders of such corporation on the last day of such taxable year, and

"(2) any person to whom any interest from qualifying residential mortgage loans has been apportioned under paragraph (1) shall be treated (for purposes of this section) as the taxpayer who received or accrued such interest, and such interest shall not (by reason of such apportionment) lose its character as interest from qualifying residential mortgage loans.

"(h) CREDIT DISALLOWED.—The credit al-

lowed by subsection (a) shall be denied a taxpayer that—

"(1) is formed or availed of primarily for the purpose of obtaining such credit, or

"(2) issues obligations that are—

"(A) supported by an authority to borrow from the Treasury of the United States, and

"(B) approved, at issuance, by the Department of the Treasury of the United States.

The Secretary may prescribe such regulations as he may deem necessary in order to carry out the intent of paragraph (1).

"(i) This section shall not apply to a bank (as defined in section 581) to which section 585 does not apply."

SEC. 208. CONFORMING AND CLERICAL AMENDMENTS.

(a) Section 11(e)(1) (relating to exceptions to tax imposed on corporations) is amended to read as follows:

"(1) section 590 (relating to alternative tax for certain banks conducting life insurance business),".

(b) Section 57(a)(7) (relating to items of tax preference) is amended by striking out "financial institution to which section 585 or 593 applies" and inserting in lieu thereof "bank (as defined in section 581)".

(c) Section 116(c)(1) (relating to special rules for partial exclusion of dividends received by individuals) is amended by striking out "(relating to deduction for dividends paid by mutual savings banks, etc.)" and inserting in lieu thereof "(relating to deduction for dividends paid by certain banks, etc.)".

(d) Section 172(b)(1)(F) (relating to years to which net operating losses may be carried back and carried over) is amended by striking out "financial institution to which section 585, 586, or 593" and inserting in lieu thereof "bank (as defined in section 581) or a financial institution to which section 586".

(e) Section 243(c)(1) (relating to special rules for dividends received by corporations) is amended by striking out "(relating to deduction for dividends paid by mutual savings banks, etc.)" and inserting in lieu thereof "(relating to deduction for dividends paid by certain banks, etc.)".

(f) Section 381(c) (relating to items taken into account in certain corporate acquisitions) is amended by adding at the end thereof the following new paragraph:

"(26) CREDIT UNDER SECTION 44B FOR INTEREST FROM QUALIFYING RESIDENTIAL MORTGAGE LOANS.—The acquiring corporation shall take into account (to the extent proper to carry out the purposes of this section and section 44B and under such regulations as may be prescribed by the Secretary) the items required to be taken into account for purposes of section 44B in respect to the distributor or transferor corporation.".

(g) Section 542(c)(2) (relating to exceptions to definition of personal holding company) is amended to read as follows:

"(2) a bank (as defined in section 581);".

(h) Section 582(c)(1) (relating to bad debts, etc., with respect to securities held by financial institutions) is amended by striking out "a financial institution to which section 585, 586, or 593 applies," and inserting in lieu thereof "a bank or a financial institution to which section 586 applies.".

(i) Section 811(b)(1) (relating to deduction for dividends to policyholders) is amended by striking out "a mutual savings banks subject to the tax imposed by section 594," and inserting in lieu thereof "certain banks subject to the tax imposed by section 590,".

(j) Section 992(d)(3) (relating to corporations ineligible to be domestic international sales corporations) is amended to read as follows:

"(3) a bank (as defined in section 581),".

(k) Section 1038(f) (relating to certain reacquisitions of real property) is amended to read as follows:

"(f) CERTAIN REACQUISITIONS.—This section shall not apply to a reacquisition of real property by a bank described in section 581(a)(2), (3), or (4).".

(l) Section 6096(b) (relating to income tax liability) is amended by striking out "and 44A" and inserting in lieu thereof "44A, and 44B".

(m) Section 6323(b)(10) (relating to validity and priority against certain persons) is amended—

(1) by striking out "with an institution described in section 581 or 591," and inserting in lieu thereof "with a bank (as defined in section 581),", and

(2) by striking out "institution" the second time it appears and inserting in lieu thereof "bank".

(n) Statutes of limitations and interest relating to residential mortgage loan credit carrybacks.—

(1) ASSESSMENT AND COLLECTION.—Section 6501 (relating to limitation on assessment and collection) is amended by adding at the end thereof the following new subsection:

"(p) RESIDENTIAL MORTGAGE LOAN CREDIT CARRYBACKS.—In the case of a deficiency attributable to the application to the taxpayer of a residential mortgage loan credit carryback (including deficiencies which may be assessed pursuant to the provisions of section 6213(b)(3)), such deficiency may be assessed at any time before the expiration of the period within which a deficiency for the taxable year of the unused residential mortgage loan credit which results in such carryback may be assessed, or, with respect to any portion of a residential mortgage loan credit carryback from a taxable year attributable to a net operating loss carryback or a capital loss carryback from a subsequent taxable year, at any time before the expiration of the period within which a deficiency for such subsequent taxable year may be assessed."

(2) CREDIT OR REFUND.—Section 6511(d) (relating to limitations on credit or refund) is amended by adding at the end thereof the following new paragraph:

"(9) SPECIAL PERIOD OF LIMITATIONS WITH RESPECT TO RESIDENTIAL MORTGAGE LOAN CREDIT CARRYBACKS.—

"(A) PERIOD OF LIMITATIONS.—If the claim for credit or refund relates to an overpayment attributable to a residential mortgage loan credit carryback, in lieu of the 3-year period limitation prescribed in subsection (a), the period shall be that period which ends with the expiration of the 15th day of the 40th month (or 39th month, in the case of a corporation) following the end of the taxable year of the unused residential mortgage loan credit which results in such carryback (or, with respect to any portion of a residential mortgage loan credit carryback from a taxable year attributable to a net operating loss carryback or capital loss carryback from a subsequent taxable year, the period shall be that period which ends with the expiration of the 15th day of the 40th month, or 39th month, in the case of a corporation, following the year of such taxable year) or that period prescribed in subsection (c) in respect of such taxable year, whichever expires later. In the case of such a claim, the amount of the credit or refund may exceed the portion of the tax paid within the period provided in subsection (b)(2) or (c), whichever is applicable, to the extent of the amount of the overpayment attributable to such carryback.

"(B) APPLICABLE RULES.—If the allowance of a creditor refund of an overpayment of tax attributable to a residential mortgage loan credit carryback is otherwise prevented by the operation of any law or rule of law other than section 7122, relating to compromises, such credit or refund may be allowed or made, if claim therefor is filed within the period provided in subparagraph (A) of this paragraph. In the case of any such claim for credit or refund, the determination by any court, including the Tax Court, in any proceeding in which the decision of the court has become final, shall not be conclusive with respect to the residential mortgage loan credit, and the effect of such credit, to the extent that such credit is affected by a carryback which was not in issue in such proceeding."

(3) INTEREST OF UNDERPAYMENTS.—Section 6601(c) (relating to income tax reduced by carryback or adjustment for certain unused deductions) is amended by adding at the end thereof the following new paragraph:

"(5) RESIDENTIAL MORTGAGE LOAN CREDIT CARRYBACK.—If the credit allowed by section 44B for any taxable year is increased by reason of a residential mortgage loan credit carryback, such increase shall not affect the computation of interest under this section for the period ending with the last day of the taxable year in which the residential mortgage loan credit carryback arises, or, with respect to any portion of a residential mortgage loan carryback from a taxable year attributable to a net operating loss carryback or a capital carryback from a subsequent taxable year, such increase shall not affect the computation of interest under this section for the period ending with the last day of such subsequent taxable year."

(4) INTEREST ON OVERPAYMENT.—Section 6611(f) (relating to refund of income tax caused by carryback or adjustment for certain unused deductions) is amended by adding at the end thereof the following new paragraph:

"(5) RESIDENTIAL MORTGAGE LOAN CREDIT CARRYBACK.—For purposes of subsection (a), if any overpayment of tax imposed by subtitle A results from a residential mortgage loan credit carryback, such overpayment shall be deemed not to have been made prior to the close of the taxable year in which such residential mortgage loan credit carryback arises, or, with respect to any portion of a residential mortgage loan credit carryback from a taxable year attributable to a net operating loss carryback or capital loss carryback from a subsequent taxable year, such overpayment shall be deemed not to have been made prior to the close of such subsequent taxable year."

(o) TENTATIVE CARRYBACK ADJUSTMENTS.—

(1) APPLICATION FOR ADJUSTMENT.—Section 6411 (relating to quick refunds in respect of tentative carryback adjustments) is amended—

(A) by striking out "or unusued work incentive program credit" each place it appears in such section and inserting in lieu thereof "unused work incentive program credit, or residential mortgage loan credit",

(B) by inserting after "section 172(b)," in the first sentence of subsection (a) "by a residential mortgage loan carryback provided in section 44B(e),", and

(C) by inserting after "investment credit carryback" in the second sentence of subsection (a) "a residential mortgage loan carryback,".

(2) TENTATIVE CARRYBACK ADJUSTMENT ASSESSMENT PERIOD.—Section 6501(m) (relating to tentative carryback adjustment period) is amended—

(A) by striking out "or a work incentive program carryback" and inserting in lieu thereof "a work incentive program carryback, or a residential mortgage loan carryback", and

(B) by striking out "(j) or (o)" each place it appears and inserting in lieu thereof "(j), (o), or (p)".

(p) The table of sections for part I of subchapter H of chapter 1 (relating to rules of general application to banking institutions)

is amended by adding immediately after the last item the following:

"SEC. 587. Foreclosure on property securing loans.
"SEC. 588. Distributions to shareholders.
"SEC. 589. Deduction for repayment of certain loans.
"SEC. 590. Alternative tax for certain banks conducting life insurance business.
"SEC. 591. Deduction for dividends paid on deposits.".

(q) The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting before the item relating to section 45 the following:

"SEC. 44B. Interest from qualifying residential mortgage loans.".

SEC. 209. CONFORMING AND CLERICAL AMENDMENTS FOR TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1980.

(a) Section 46(e)(1) (relating to limitations on investment credit) is amended by striking out subparagraph (A) and by redesignating subparagraph (B) and (C) as subparagraphs (A) and (B), respectively.

(b) Section 46(e)(2) is amended by striking out subparagraph (A), redesignating subparagraphs (B) and (C) as subparagraphs (A) and (B), respectively, and striking out "subparagraph (B)" where it appears in the flush material and inserting in lieu thereof "subparagraph (A)".

(c) Section 50B(f) (relating to limitations for work incentive programs) is amended by striking out paragraph (1) and by redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

(d) Section 166(g) (relating to bad debts) is amended by striking out paragraph (3) thereof and by redesignating paragraph "(4)" as paragraph "(3)".

(c) Section 246 (relating to rules applying to deductions for dividends received) is amended by striking out subsection (e) thereof.

(f) The amendments made by subsections (a) through (e) of this section shall be effective December 31, 1979.

SEC. 210. EFFECTIVE DATE.

Except as otherwise expressly provided in this title, the amendments made by this title shall be effective for taxable years beginning after the date of enactment of this title.

REFORMING THE MORTGAGE INSTRUMENT

ABSTRACT

This paper contends that the conventional fixed-rate mortgage does not fit the needs of either the borrower or the lender very well in an inflationary economy. Seven alternative mortgage instruments are described as illustrations of positive changes that could be made to make the mortgage instrument more viable and also to meet some of the specific needs of individual borrowers. The paper contends that mortgage borrowers should be able to select from a wide range of mortgage instruments in order that the instrument selected can best fit their individual needs and expectations.

The mortgage instruments described are: the conventional fixed-rate mortgage; the graduated-payment mortgage; the variable-rate mortgage; the dual-rate, variable-rate mortgage; the graduated-payment, variable-rate mortgage; the reverse annuity mortgage; the deferred interest mortgage; and the contingent appreciation mortgage.

REFORMING THE MORTGAGE INSTRUMENT

(By David L. Smith)

For the last 40 years, the United States has relied almost exclusively on the long-term, fixed-rate, fully amortized mortgage as the sole instrument for financing single-family housing. This instrument worked very well during the first 30 years of its life when interest rates were relatively stable and inflation was not a serious problem. However, the wild swings in interest rates and housing construction and the inflation of the last 10 years have illustrated all too well the inadequacies of such an instrument as the sole means of financing housing.

The defects of the conventional mortgage in today's economic environment are numerous, including the facts that:

1. Mortgage lenders must charge high interest rates to new borrowers in order to offset their loss on the low-yield loans still on their books. In effect, new borrowers are forced to subsidize old borrowers who are lucky enough to have low interest rate loans.

2. Many potential borrowers are priced out of the housing market altogether, either because they lack the required downpayment or because they cannot afford the required monthly payments. The latter problem is particularly serious because the amount of house a family can purchase depends upon its current income—even though the home will be occupied well into the future, when a typical family's income will be much higher.

3. Potential borrowers are forced to pay an inflation premium that reflects the lender's estimate of the future rate of inflation. This can be an especially excessive burden on potential borrowers during periods of unstable prices and uncertainty regarding the future pattern of inflation.

4. Thrift institutions are prevented from paying competitive rates for deposits because their portfolio yields are locked into fixed interest rate loans.

The net result is that the conventional mortgage does not fit the needs of either the borrower or the lender very well in an inflationary economy. Consequently, some lenders such as commercial banks and insurance companies, have virtually withdrawn from the single-family mortgage market.

This paper presents several alternative instruments as illustrations of changes that could be made to make mortgages more responsive to the needs of individual borrowers. The intent is not to drive the conventional mortgage out of existence, but rather to create a whole smorgasbord of mortgage loan instruments that would be available to meet the requirements of individual homebuyers.

It should be emphasized that federally chartered savings and loan associations could issue these mortgage instruments under present Federal laws. However, the Federal Home Loan Bank Board would have to issue regulations authorizing them. In contrast, Federal legislation would be required before national banks could issue some of the instruments. Similarly, some States would have to adopt either legislative or regulatory changes before State-chartered banks, savings and loan associations, and mutual savings banks could issue some of the mortgages.

ALTERNATIVE MORTGAGE INSTRUMENTS

In order to be effective, any new mortgage document must provide more benefits to both borrowers and lenders than the present conventional mortgage. From the borrower's standpoint, desirable characteristics include: (1) the ability to choose a particular ratio of mortgage payments to family income; (2) a low level of uncertainty about the cost of the mortgage; and (3) relative short-run stability in the ratio of payments to income.

Ideally, a borrower should be able to select a mortgage payment-to-income ratio that will vary over the life of the loan according to his particular needs. For example, one family might desire to have the ratio rise over time, another might select a declining ratio, and a third might select a stable ratio. Families should not be expected to enter into long-term contracts that contain a high degree of uncertainty about the payment-to-income ratio. Finally, although the long-run trend of the payment-to-income ratio may be either up or down, the ratio should be relatively stable in the short run.

Thus, the borrower's major interest lies in his ability to select a mortgage with a relatively stable payment-to-income ratio that can be tailored to fit his individual circumstances.

The mortgage lender's needs, however, are quite different. The major mortgage lenders—savings and loan associations and mutual savings banks—finance their long-term mortgages with relatively short-term deposits. This maturity mismatch causes serious problems for thrift institutions when short-term interest rates rises sharply, because thrifts cannot pay competitive rates for deposits due to the fact that they are locked in to long-term mortgages. (At present, Regulation Q interest rate ceilings also prevent thrifts from paying competitive rates for deposits.) Therefore, the most desirable characteristic for a mortgage instrument—from the lender's standpoint—is the ability to provide a short-term rate of return commensurate with money market instruments. Such an instrument would be equivalent to a series of rollover short-term instruments and would enable thrift institutions to compete effectively for funds through all phases of the credit cycle, assuming that Regulation Q is modified.

At first glance, the interests of borrower and lender appear to clash head on. The borrower desires stability in the payment-to-income ratio and the lender desires short-term yield variability. The solution to this apparent dilemma lies in the nature of the mortgage itself. Interest rates are used to determine both mortgage payments and mortgage interest. However, it is not necessary that payments and interest be determined by employing the same interest rate. In fact, a wide range of mortgage instruments are possible if one interest rate is used to calculate the mortgage payment and another interest rate is used to calculate the borrower's interest obligation. In addition, other mortgage instruments are possible if the outstanding balance is allowed to increase during the early years of the loan.

The alternative mortgage instruments described in this article cover a wide range of possibilities and would provide varying degrees of benefits to borrowers and/or lenders. It must be emphasized that not all of the instruments are equally beneficial to both borrowers and lenders, nor do they all contain all of the desirable characteristics just outlined.

THE CONVENTIONAL MORTGAGE

The conventional mortgage uses the same interest rate to calculate both payments and interest owed. The primary advantage of this mortgage, from the borrower's point of view, is the fact that the monthly payment is fixed for the life of the loan. However, since family income tends to rise over time, the payment-to-income ratio falls, thereby forcing the family to devote relatively more of its income to housing in the early years of the loan. Another advantage, and a major reason for its introduction in the first place, is that the loan will be completely paid off at maturity—usually 30 years.

A major defect of the conventional level payment mortgage in an inflationary environment is that it imposes an uneven cash flow burden on the average borrower. The burden is heaviest in the early years of the loan and declines each year as inflation raises the borrower's income. This phenomenon is often referred to as the inflationary gap between what families currently can afford in monthly payments and the actual amount the market requires them to pay.

The net result is that the use of conventional mortgages in an inflationary environment reduces the demand for housing by inducing potential buyers—especially young families—to scale down their demands in terms of quantity and/or quality or to forego acquisition until their income or financial assets have risen to the point where they can afford housing.

Another defect of the conventional mortgage is the high cost imposed on a homeowner when he gives up an old, low-interest mortgage in order to buy a new house. Many families are simply unable to afford the added costs associated with such a move. Other families—for example, those transferred to another city—not only must give up the low-interest mortgage, but must finance much more expensive homes because of the general inflation of house prices.[1]

GRADUATED PAYMENT MORTGAGES

A graduated payment mortgage also uses the same interest rate to calculate both payments and interest owed, but the monthly payments start out at a low level and gradually increase (for example, at 5 percent a year) until they rise above the level at which a standard conventional mortgage would have been written.[2] This type of mortgage directly attacks the problem caused by the conventional mortgage when the amount of house a family can buy depends upon its current income. Thus, the graduated payment mortgage would be particularly attractive to the young family buying its first home because the income requirements to support a conventional mortgage could be reduced significantly. In effect, a graduated payment mortgage would enable a family to raise its housing standard to a level that would average out more accurately with its expected lifetime income.

TABLE 1.—COMPARISON OF A CONVENTIONAL AND A DEFERRED INTEREST LOAN

	Choice No. 1.— 2 way to finance a $33,000 house with different initial payments		Choice No. 2.—2 different houses with the same initial payment	
	Conventional	Deferred interest	Conventional	Deferred interest
Original price	$33,000	$33,000	$33,000	$39,300
Downpayment	3,000	3,000	3,000	3,000
Loan amount	30,000	30,000	30,000	36,300
Interest rate (percent)	9	7	9	7
Monthly payment	$242	$200	$242	$242
Annual income required	16,400	14,400	16,400	16,400
Refinance at end of 5 yr:				
Appreciated value after 5 yr (assuming 5-percent annual increase)		42,117		50,158
Outstanding balance		28,230		28,230
Equity		13,887		21,928
Deferred interest due		3,000		3,700
Loan fee		900		1,100
Net equity		9,987		17,128
New loan amount		32,130		33,030
Term (years)		30		30
Interest rate (percent)		9		9
Monthly payment		$258		$266
Annual income required		17,185		17,600
Required increase in income per year (percent)		3.6		1.4
Sell house at end of 5 yr:				
Appreciated value	$42,117	$42,117	$42,117	$50,158
Capital gain	9,117	9,117	9,117	10,858
Broker's fee (6 percent)	2,527	2,527	2,527	3,010
Deferred interest due		3,000		3,700
Loan fee		900		1,100
Net capital gain	6,590	2,690	6,590	3,048
Amortization	1,230	1,770	1,230	1,770
Net equity	7,820	4,460	7,820	4,818

The major differences between a graduated payment mortgage and a conventional mortgage are that:

1. The payments rise over time, rather than remaining fixed over the life of the loan; and

2. The payments in the early years of the loan are not sufficient to amortize the loan so that the family would, in effect, be borrowing the difference between its payments and the current interest due and paying off these amounts in later years.

A $30,000 conventional mortgage at 9 percent would require an annual income of $16,400.[3] A graduated payment mortgage—that also yielded 9 percent to the lender—could enable a family with an income of $12,000 to afford the same mortgage. If the mortgage payments rose 5 percent annually, 10 years would elapse before the monthly payments reached the same level as a conventional mortgage for the same house. Thus, a family with an annual income of $12,000 that had good reason to expect its income to grow by at least 5 percent a year could afford a $30,000 graduated payment mortgage whereas it would not be able to afford a $30,000 conventional mortgage.

A major drawback of the graduated payment mortgage is that a family's income may not increase in line with the rate of increase in the payments. Another disadvantage of this mortgage is that it does not help to solve the thrift institutions' mismatch of long-term mortgages financed by short-term deposits. In fact, the lender's yield on a graduated payment mortgage would be slightly below that on a conventional mortgage in the early years because of the former's negative amortization feature.

FLEXIBLE PAYMENT MORTGAGES

The Federal Home Loan Bank Board recently authorized federally chartered savings and loan associations to issue a form of graduated payment mortgage called the flexible payment mortgage. This instrument permits interest-only payments for the first 5 years (no negative amortization is allowed), at which time the payments are increased to a fully amortized basis for the remaining term.[4] For example, a $30,000 conventional 30-year mortgage at 9 percent would require monthly payments of $242. With a flexible payment mortgage, the monthly payments would be $225 for the first 5 years and would rise to $252 in the sixth year.

As in the case of the graduated payment mortgage, an important advantage of the flexible payment mortgage is that it reduces the income required to support a given mortgage, thereby permitting a family to afford a mortgage for which it otherwise might not have qualified. As already noted, a borrower obtaining a $30,000 conventional mortgage at 9 percent would need an annual income of $16,400. However, if the same borrower were offered a 9-percent, 30-year flexible payment mortgage, his annual income would need to be only $15,600. If the borrower had good reason to expect his income to rise to at least $17,000 by the end of the fifth year, he would benefit from a flexible payment mortgage.

Use of a flexible payment mortgage also would permit the borrower to purchase a larger house than he could with a conventional loan. For example, if the borrower had an annual income of $16,400 and had $3,000 for a downpayment, he would just qualify for a $30,000 conventional mortgage and, thus, could purchase a $33,000 home. With a flexible payment mortgage, the borrower could maintain the same ratio of payments to income and obtain a loan for $32,300. Thus, he could purchase a $35,300 home—7 percent more than with a conventional mortgage.

Although flexible payment mortgages do offer some benefits to the borrower, they are very limited in terms of the reduced income requirements for a larger mortgage than can be afforded. This limitation is due to the restriction that prohibits negative amortization. In addition, the flexible payment mortgage fails to offer any benefits to the lender, because it is a fixed rate instrument that does not have any cash flow from amortization during the first five years of the loan.

Charts 1 and 2 compare conventional, graduated payment and flexible payment mortgages in terms of the monthly payments and the outstanding balance on a $30,000, 30-year mortgage at 9 percent. It must be noted that the graduated payment mortgage involves negative amortization in the early years of the loan. Thus, sale of the home could require the borrower to repay the lender more than the original amount of the loan. This situation could present problems if the value of the property does not increase as fast as the outstanding balance of the loan.

THE VARIABLE RATE MORTGAGE

The standard variable rate mortgage also uses the same interest rate to calculate both mortgage payments and interest owed. However, the interest rate is tied to some reference rate that fluctuates over the life of the contract. Changes in the interest rate may be affected by any one of three methods. First, it could be a variable payment loan, wherein maturity is fixed and changes in interest rate are reflected in the monthly payment. Second, it could be a variable maturity loan, under which the monthly payment would be fixed, but the maturity would be adjusted to reflect changing in-

[1] For a more detailed discussion of the problems of the conventional mortgage instrument, see Donald Lessard and Franco Modigliani, "Inflation and the Housing Market: Problems and Potential Solutions," in Modigliani and Lessard, editors, *New Mortgage Designs for Stable Housing in an Inflationary Environment*, (Boston: Federal Reserve Bank of Boston, January 1975), pages 13–45, and William Poole, "Housing Finance Under Inflationary Conditions," in *Ways to Moderate Fluctuations in Housing Construction*, (Washington: Board of Governors of the Federal Reserve System, December 1972), pages 355–376.

[2] The rate of increase in the payments does not have to be fixed for the life of the loan—it could be adjusted to fit individual circumstances. For example, it could rise at 5 percent annually for 10 years, remain level for 10 years, and then decline for the remaining ten. Or, to fit the needs of older borrowers who expect to retire in a few years the payments could start out higher than for a conventional loan and then gradually decline.

[3] Assuming a 30-year mortgage at 9 percent, with property taxes and insurance of $100 per month, where total housing expenses (principal, interest, taxes, and insurance) do not exceed 25 percent of family income.

[4] See Henry J. Cassidy and Josephine M. McElhone, "The Flexible Payment Mortgage," Federal Home Loan Bank Board Journal, August 1974, pages 7–11. See also, Maurice D. Weinrobe, "Whatever Happened to the Flexible Payment Mortgage," FHLBB Journal, December 1975, pages 16–21.

terest rates. Third, changes could be made in both the maturity and the payment in order to minimize the variability in the payment-to-income ratio. All of these methods would tie the interest rate to a reference index that would be some market interest rate.[5]

Variable payment mortgages have recently gained prominence in California with seven State-chartered savings and loan associations and two commercial banks presently offering the instrument. Restrictions may be placed on both the frequency and magnitude in changes in the index. In the case of California, State-chartered savings and loan associations are required by law to implement index changes no more frequently than semi-annually, use the weighted average cost of funds to savings and loan associations in California, and implement changes only if the index moves at least 10, but not more than 25, basis points. Decreases are mandatory, but increases are optional. Finally, there is an absolute ceiling of 250 basis points over the original contract rate.[6]

A significant advantage of variable rate mortgages is that changes in interest rates are reflected in changes in all outstanding variable rate loans, so that the burden of interest rate shifts is not entirely borne by new borrowers. Thus, variable rate mortgages should eventually result in lower average rates for new loans because lenders will not be forced to charge new borrowers high interest rates so that, in effect, they subsidize borrowers who have below market loans. Several California lenders also have provided that variable rate mortgages may be assumed by new buyers so that the seller is guaranteed that financing is available if the prospective buyer meets the lender's credit standards.

In addition, several California lenders have provided an open-end line of credit on variable rate mortgages by which additional funds may be advanced to the borrower—at the mortgage rate—for any purpose. Thus, the mortgage can be used to borrow on the equity for such purposes as vacations, home modernization, college financing, etc.

The principal problem with the variable payment mortgage is that, while it meets the lender's needs, it fails to provide the borrower with a stable payment-to-income ratio. This problem can be reduced by limiting the amount of change in any given period or by using a less volatile reference index. For example, the cost-of-funds index used in California is relatively stable in the short run. However, use of a stable index fails to provide the mortgage lender with the short-term yield volatility needed to compete for short-term funds.

THE DUAL-RATE VARIABLE RATE MORTGAGE

The dual-rate variable rate mortgage attempts to provide the borrower with a relatively stable payment-to-income ratio while simultaneously providing the lender with a short-term yield by using two distinct rates—one to compute interest on the outstanding balance and one to compute the monthly payment.

With this instrument, a short-term interest rate would be used to compute interest on the outstanding balance, but a long-term interest rate would be used to compute the monthly payment. In effect, the dual-rate VRM would enable the lending institution to earn a rate adequate to keep its deposit rate competitive with other short-term market instruments, while simultaneously providing the borrower with a relatively smooth path of monthly payments. Thus, the dual-rate VRM would be more beneficial to both borrowers and lenders than the standard variable rate mortgage, especially the version now used in California.[7]

Charts 3 and 4 compare the monthly payments and outstanding balance for a $30,000 mortgage issued in 1960 for a conventional loan at 6 percent, a standard variable rate mortgage using the 1-year U.S. Treasury bill rate as the reference index and a dual-rate variable rate mortgage using the 1-year U.S. Treasury bill rate as the reference index and a dual-rate variable rate mortgage using the 1-year U.S. Treasury bill rate as the rate to determine the interest owed, and the 3- to 5-year U.S. Treasury bond rate to calculate the payment.

As shown in Chart 3, the dual-rate VRM produces a more stable path of payments than does the standard variable rate mortgage.

GRADUATED PAYMENT VARIABLE RATE MORTGAGE

This instrument combines the features of the graduated payment mortgage that are beneficial to the borrower with the features of the standard variable rate mortgage that are beneficial to the lender, so that the result is an instrument that provides significant benefits to both borrowers and lenders.

The graduated payment VRM would enable the borrower to select an initial payment (and, thus, an initial payment-to-income ratio) and also the rate at which the payments would increase (or decrease) over time. The lender would calculate the amount of interest owed by using a reference index, such as the interest rate on 1-year U.S. Treasury bills.

Charts 5 and 6 illustrate how a graduated payment variable rate mortgage issued in 1960 would have compared with the dual-rate VRM described above. The graduated VRM provides the borrower with the advantages of a low start payment and certainty about the future payments. However, the payments do reach a relatively high level after the 10th year. This type of mortgage might be very attractive to the young family buying its first home—particularly if the buyer did not expect to live in it more than 10 years.

The dual VRM does have a low start feature and involves more uncertainty about the path of payments, but the payments do not rise to abnormally high levels. This type of instrument might be very attractive to somewhat older families that were not overly concerned with relatively modest changes in mortgage payments—particularly if it expected to live in the house for a long time.

The essential point is that different families have different needs and expectations and should be able to select mortgage instruments that fit their particular circumstances, rather than have to use any one instrument.

REVERSE ANNUITY MORTGAGES

Senior citizen homeowners often face the reverse problem of young families in that their incomes are relatively low and that, although they may own their homes free and clear, they must move in order to utilize their equities. Under a reverse annuity mortgage, the lender would pay the borrower a fixed annuity, based on a percentage of the value of the property. The annuitant would not be required to repay the loan until his demise, at which time the loan would be paid through probate. In effect, a reverse annuity mortgage would enable a retired couple to draw on the equity of their home by increasing their loan balance each month. No cash payment of interest would be involved, as the increase in the loan balance each month would represent the cash advanced, plus interest on the outstanding balance.

For example, assume a retired couple had a $37,500 house and wanted additional money to supplement retirement income. With a reverse annuity mortgage, the mortgage lender could make monthly payments of $167 to the couple for 10 years. At the end of 10 years, the couple would have been advanced $20,040 and would owe the lender a total of $29,960.[8] In effect, the couple would be able to live in their home while simultaneously drawing down their equity in it. The interest owed to the lender would represent rent of $83 per month for the 10-year period; i.e., $9,920 divided by 120 months.

If the annuitants die before maturity of the annuity, the proceeds of the estate would be used to pay the lender for the money extended. If the couple lived beyond the 10-year period, they could sell their home and move to other living quarters. If they wished to remain in the house, and if the house had appreciated in value, a new reverse annuity could be issued, based on the current market value of the house. Finally, the couple could enter into a sale lease-back arrangement with the lender so that they could continue to live in the home for the rest of their lives. In this case, the lender could let the couple live in the house for a nominal lease (equal to the taxes) and take the risk that the house will appreciate in value.

TABLE 2.—COMPARISON OF A CONVENTIONAL AND A CONTINGENT APPRECIATION PARTICIPATION MORTGAGE

Item	Conventional	Contingent participation
Original sales price	$33,000	$33,000
Downpayment	$3,000	$3,000
Loan amount	$30,000	$30,000
Term (years)	30	30
Interest rate (percent)	9	8
Monthly payment	$242	$220
Annual income required	$16,400	$15,400
House sold after 5 yr:		
Appreciated value (assuming 5-percent appreciation)	$42,117	$42,117
Capital gain	9,117	9,117
Broker's fee (6 percent)	2,527	2,527
CAP fee (18 percent of $9,117)		1,641
Net capital gain	6,590	4,949
Amortization	1,230	1,470
Net equity	7,820	6,419

THE DEFERRED INTEREST LOAN

With a deferred interest mortgage, the borrower would receive a significantly lower initial interest rate and, thus, lower initial mortgage payments. In return, the lender would receive the deferred interest plus a fee upon resale of the house. In the event the house is not sold within 5 years, the mortgage could be refinanced as a conventional loan, with the deferred interest and the fee coming from the borrower's equity in the home.

[5] Another form of a variable rate mortgage is a renegotiated loan, under which the maturity is fixed, but the interest rate and the monthly payment are renegotiated periodically, say every 5 years. This type of loan is often referred to as the Canadian roll-over loan. See Donald R. Lessard, "Roll-over Mortgages in Canada," Modigliani and Lessard, editors, *New Mortgage Designs for Stable Housing in an Inflationary Environment* (Boston: Federal Reserve Bank of Boston, January 1975), pages 131–141.

[6] For a discussion of the California experience, see Mark J. Riedy, "VRM's in California: The Early Experience," FHLBB Journal, March 1976, pages 14–16.

[7] For a more complete discussion of the dual-rate VRM, see Richard A. Cohn and Stanley Fischer, "Alternative Mortgage Design," in Modigliani and Lessard, editors, *New Mortgage Designs for Stable Housing in an Inflationary Environment*, (Boston: Federal Reserve Bank of Boston, January 1975), pages 47–74.

[8] Assuming a fixed interest rate of 9 percent. This type of loan could be either on a fixed or variable interest rate basis.

Such a mortgage instrument might be very attractive to families that did not expect to live in a house for more than 5 years because it would offer them a choice between two different payments for the same house, or a choice between two different houses, each with the same initial monthly payments.

For example, if a prospective borrower wished to purchase a $33,000 house with a $30,000 mortgage, a conventional loan at 9 percent interest for 30 years would require monthly payments of $242. With a deferred interest loan at 7 percent for the first 5 years, the monthly payments would be $200. Assuming that the fee was three points on the value of the mortgage ($900) and that the home was sold at the end of the fifth year, the borrower would pay the lender the deferred interest ($3,000) plus the $900 out of his equity in the home.

The deferred interest loan would also enable the borrower to choose a more expensive home rather than reduce his monthly payments. Instead of purchasing the $33,000 home with a conventional mortgage, assume that the borrower chooses to purchase a $39,300 home with a $36,300 deferred interest loan at 7 percent. Again, assume that the house is sold at the end of the fifth year. The borrower would owe the lender $4,800 ($3,700 is deferred interest, plus a $1,100 fee) out of his equity in the home. Assuming that the value of both houses rose 5 percent annually, the borrower's net equity would be only $3,002 less with the more expensive home than with the $33,000 home financed conventionally and sold at the same time—but the borrower would have had the benefit of living in the better home for 5 years at a cost of only $50 per month; i.e., $3,002 divided by 60 months.

Table 1 illustrates how a deferred interest loan would compare with a conventional loan and provide the borrower with a choice between two different payments for the same house, or a choice between two different houses, each at the same initial payment. Both examples assume that the borrower chooses to remain in the house for the full 30-year term and, thus, the deferred interest loan is converted to a conventional loan at the end of the fifth year. In the event that the house is sold before the fifth year, the deferred interest loan would simply be repaid.

A different version of the deferred interest loan is the contingent appreciation participation (CAP) [9] mortgage that also would provide the borrower with a significantly lower initial interest rate. In return, the lender would be permitted to share in the appreciated value of single-family homes.

In contrast to the deferred interest loan, where the deferred interest plus the fee would be independent of any appreciation in the value of the house, the CAP mortgage would provide that the lender share in any capital appreciation according to some specified formula. For example, if the basic CAP factor were fixed at one-fifth and the lender provided a mortgage equal to 90 percent of the value of the property, the lender's eventual share in any net gain realized on resale would equal one-fifth of 90 percent, or 18 percent.

The basic mechanics of the CAP loan are summarized in table 2. In this case, a $33,000 home is financed with a $30,000 CAP loan and sold after 5 years with an average rate of appreciation in the value of the house of 5 percent. At the time of sale, the borrower would pay the lender 18 percent of his capital gain, or $1,641. In return, the borrower would have received a CAP loan with an 8-percent interest rate, instead of a conventional loan at 9 percent. Thus, the borrower's monthly payments would have been $220, instead of $242.

A major advantage of the CAP loan is its flexibility because the borrower could obtain an even lower interest, say 7 percent, if he were willing to provide the lender with a larger proportion of his eventual capital appreciation.

ADDITIONAL MORTGAGE CONTRACT FEATURES

In addition to providing for financing of the house, any new mortgage contract should also contain a number of additional features specifically designed to aid the borrower. These features should include:

1. Using the equity in the house as collateral for additional credit. Given the fact that much of the wealth of American families is tied up in their homes, the mortgage loan should be used to extend additional credit at the current mortgage interest rate. As previously noted, the mortgage would function as an open line of credit and provide funds for a new automobile, college education, a vacation, etc.

2. A skip payment provision in the event the borrower loses his job or becomes disabled.

3. A provision that any form of variable rate mortgage can be assumed by a new borrower. In effect, the due on sale clause that provides that the loan is due and payable upon resale could be eliminated from mortgage contracts.

Summing up, the conventional fixed-rate level payment mortgage should be supplemented with new mortgage contracts that can be tailor-made to fit the needs and expectations of individual borrowers. No one or two or three mortgage instruments can possibly meet all of the diverse needs of individual borrowers and simultaneously meet the needs of mortgage lenders. The mortgage and housing markets of the United States would be best served if borrowers were free to choose from a whole smorgasbord of mortgage instruments.

By Mr. PROXMIRE:

S. 71. A bill to strengthen the supervisory authority of the Federal banking agencies over financial institutions and their affiliates; to the Committee on Banking, Housing, and Urban Affairs.

Mr. PROXMIRE. Mr. President, I am today introducing a bill recommended by the bank regulatory agencies to amend the Financial Institutions Supervisory Act of 1966 for reference to the Committee on Banking, Housing, and Urban Affairs. The legislation will substantially strengthen the authority of the financial institutions regulatory agencies to take effective action against insured banks or savings and loan associations which engage in unsafe or unsound practices or whose officials participate in such practices.

This bill is identical to S. 2304 which I sponsored in the 94th Congress and which was reported by the Senate Banking Committee on May 13, 1976. The legislation was unanimously recommended in the 94th Congress by Chairman Burns and the Federal Reserve, the Comptroller of the Currency, the Federal Deposit Insurance Corporation and the Federal Home Loan Bank Board. I believe the regulatory agencies need these additional powers even more today than they did last year to enable them to deal with the more egregious abuses in our financial system. Specifically this legislation would:

First. Empower the regulatory agencies to issue cease and desist orders under the Financial Institutions Supervisory Act of 1966 and against individuals—directors, officers, employees, agents, or other persons participating in the institution's affairs—directly, without the necessity for naming a corporate financial institution in proceeding.

Second. Authorize civil money penalties to be assessed against an institution or any such individual for violating various provisions of law or for violating any outstanding cease and desist order. The amount of the civil penalty which may be assessed varies: $10,000 per day in the case of a violation of a cease and desist order; $1,000 a day for any violation of the legal proscriptions on insider loans or affiliate transactions; $1,000 per day in the case of a violation of a provision of the Bank Holding Company Act or Savings and Loan Holding Company Act.

Third. Authorize the removal of an officer, director or other person participating in the affairs of an institution in circumstances where the individual has evidence gross negligence in the operation or management of the institution or a willful disregard for the safety and soundness of the institution. These are adopted as alternatives to the present requirement that the personal dishonesty of such an individual in his transactions with the institution be shown prior to removal under the Financial Institutions Supervisory Act.

Fourth. Require that loans to bank insiders—officers, directors, or persons controlling at least 5 percent of any class of voting securities of the institution—be aggregated with loans to the companies they control. When aggregated,

the loans must conform to the limitations on loans to one borrower contained in section 5200 of the Revised Statutes in the case of national banks or to the limitations under applicable State law in the case of State member or insured nonmember banks. Existing loans which violate these proscriptions must be brought into conformity with these provisions within a reasonable time under rules to be established by the Federal Reserve Board. This provision is not made applicable to the Federal Home Loan Bank Board because that agency already has authority to prohibit insider loans.

Fifth. Authorize the divestiture of a nonsavings and loan or nonbank subsidiary of a savings and loan holding company or bank holding company where such subsidiary constitutes a serious risk to the financial safety of a subsidiary bank or savings and loan of the holding company.

In addition, S. 2304 requires that the expenditures of the Comptroller of the Currency, the Federal Deposit Insurance Corporation and the National Credit Union Administration be within limitations set by the Congress in yearly appropriations acts in order to control flagrant and wasteful expenditures of public money.

Mr. President, I ask unanimous consent that a section-by-section analysis of the bill together with the text of the bill be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 71

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

AMENDMENTS TO THE FEDERAL RESERVE ACT

SECTION 1. The Federal Reserve Act is amended by redesignating sections 29 and 30 as sections 30 and 31, respectively, and by inserting after section 28 a new section as follows:

"SEC. 29. Any member bank which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such member bank who violates any provision of section 22 or 23A of this Act, or any regulation issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The Comptroller of the Currency, in the case of a national bank, or the Board, in the case of a State member bank, shall have authority to assess such a civil penalty, after giving notice and an opportunity to the member bank or other person to submit data, views, and arguments, and after giving due consideration to the appropriateness of the penalty with respect to the size of financial resources and good faith of the member bank or person charged, the gravity of the violation, the history of previous violations, and any data, views, and arguments submitted. The Comptroller of the Currency or the Board, as the case may be, may collect such civil penalty by agreement with the bank or other person or by bringing an action in the appropriate United States district court, except that in any such action, the member bank or other person against whom the penalty has been assessed shall have a right to a trial de novo. As used in this section, the term 'violates' includes without limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.".

SEC. 2. Section 19 of the Federal Reserve Act is amended by adding at the end thereof the following new subsection:

"(l) Any member bank which violates any provision of this section, or any regulation or order issued by the Board pursuant thereto, shall forfeit and pay a civil penalty not exceeding $100 per day for each day during which such violation continues. The Board shall have authority to assess such a civil penalty, after giving notice and an opportunity to the member bank or other person to submit data, views, and arguments, and after giving due consideration to the appropriateness of the penalty with respect to the size of financial resources and good faith of the member bank or person charged, the gravity of the violation, the history of previous violations, and any data, views, and arguments submitted. The Board may collect such civil penalty by agreement with the bank or other person or by bringing an action in the appropriate United States district court, except that in any such action; the member bank or other person against whom the penalty has been assessed shall have a right to a trial de novo.".

SEC. 3. Section 22 of the Federal Reserve Act, is amended by adding at the end thereof the following new subsection:

"(h)(1) No member bank shall make any loan or extension of credit in any manner to any officer or director of that member bank or to any individual who directly or indirectly or acting through or in concert with one or more persons owns, controls, or has the power to vote more than 5 per centum of any class of voting securities of that member bank or to any company controlled by such an officer, director, or individual, where such loan or extension of credit, when aggregated and combined with all the bank's loans or extension of credit to such officer, director, or individual and to all companies controlled by such officer, director, or individual, exceeds the limits on loans to one borrower established by section 5200 of the Revised Statutes, as amended, in the case of national banking associations, or by the State law applicable in the case of State member banks.

"(2) For purposes of this section, an officer, director, or individual shall be considered to have control of a company if said officer, director, or individual—

"(A) directly or indirectly or acting through or in concert with one or more other persons owns, controls, or has power to vote 25 per centum or more of any class of voting securities of the company;

"(B) controls in any manner the election of a majority of the directors of the company; or

"(C) has the power, directly or indirectly, to exercise a controlling influence over the management or policies of such company.

"(3) For the purposes of this section—

"(A) the term 'company' means any corporation, partnership, business trust, association, joint venture, pool syndicate, sole proprietorship, unincorporated organization, any other form of business entity not specifically listed herein, or any other trust, but shall not include any insured bank or any corporation the majority of the shares of which are owned by the United States or by any State; and

"(B) the term 'extension of credit' has the same meaning assigned such term in the fourth paragraph of section 23A of this Act.

"(4) The Board is authorized to prescribe rules providing a reasonable period of time after the date of enactment of this subsection to permit the repayment of loans or extensions of credit made prior to such date of enactment in a manner which conforms to the requirements of this subsection.".

SEC. 4. (a) Section 5 of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1844), is amended by adding at the end thereof the following new subsection:

"(e)(1) Notwithstanding any other provision of this Act, the Board may, whenever it has reasonable cause to believe that the continuation by a bank holding company of any activity or of ownership or control of any of its nonbank subsidiaries, other than a nonbank subsidiary of a bank, constitutes a serious risk to the financial safety, soundness, or stability of a bank holding company subsidiary bank and is inconsistent with sound banking principles or with the purposes of this Act or with the Financial Institutions Supervisory Act of 1966, order the bank holding company or any such nonbank subsidiaries, after due notice and opportunity for hearing, and after considering the views of the bank's primary supervisor, which shall be the Comptroller of the Currency, in the case of a national bank, the Federal Deposit Insurance Corporation, in the case of an insured nonmember bank, or the appropriate State supervisory authority, to terminate such activities or to terminate (within one hundred and twenty days or such longer period as the Board may direct in unusual circumstances) its ownership or control of any such subsidiary either by sale or by distribution of the shares of the subsidiary to the shareholders of the bank holding company. Such distribution shall be pro rata with respect to all of the shareholders of the distributing bank holding company, and the holding company shall not make any charge to its shareholders arising out of such a distribution.

"(2) The Board may in its discretion apply to the United States district court within the jurisdiction of which the principal office of the holding company is located, for the enforcement of any effective and outstanding order issued under this section, and such court shall have jurisdiction and power to order and require compliance therewith, but except as provided in section 9 of this Act, no court shall have jurisdiction to effect by injunction or otherwise the issuance or enforcement of any notice or order under this section, or to review, modify, suspend, terminate, or set aside any such notice or order.".

(b) Section 408(h) of the National Housing Act (12 U.S.C. 1730a(h)) is amended by adding, immediately after "under subsection (a)(2)(D)" in paragraphs (3)(A) and (3)(B) of subsection (h) the phrase "or under subsection (h)(5)" and is amended by redesignating paragraph (h)(5) as (h)(6) and by adding a new paragraph (h)(5) to read as follows:

"(5) Notwithstanding any other provision of this section, the Corporation may, whenever it has reasonable cause to believe that the continuation by a savings and loan holding company of any activity or of ownership or control of any of its noninsured subsidiaries constitutes a serious risk to the financial safety, soundness, or stability of a savings and loan holding company's subsidiary insured institution and is inconsistent with sound business principles or with the purposes of this section or with the Financial Institutions Supervisory Act, order the savings and loan holding company or any of its subsidiaries, after due notice and opportunity for hearing, to terminate such activities or to terminate (within one hundred and twenty days or such longer period as the Corporation directs in unusual circumstances) its ownership or control of any such noninsured subsidiary either by sale or by distribution of the shares of the subsidiary to the shareholders of the savings and loan holding company. Such distribution shall be pro rata with respect to all of the shareholders of the distributing savings and loan holding company, and the holding company shall not make any charge to its shareholders arising out of such a distribution.".

SEC. 5. (a) Section 8 of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1847), is amended by redesignating "SEC. 8"

as "Sec. 8. (a)" and by adding a new subsection (b) to read as follows:

"(b) Any company which violates or any individual who participates in a violation of any provision of this Act, or any regulation or order issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The Board shall have authority to assess such a civil penalty, after giving notice and an opportunity to the company or individual to submit data, views, and arguments and after giving due consideration to the appropriateness of the penalty with respect to the size of financial resources and good faith of the company or individual charged, the gravity of the violation, the history of previous violations, and any data, views, and arguments submitted. The Board may collect such civil penalty by agreement with the company or individual or by bringing an action in the appropriate United States district court, except that in any such action, the company or individual against whom the penalty has been assessed shall have a right to a trial de novo."

(b) Section 408(j) of the National Housing Act (12 U.S.C. 1730a(j)) is amended by adding thereto a new paragraph (j)(4) to read as follows:

"(4) Any company which violates or any individual who participates in a violation of any provision of this section, or any regulation or order issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The Corporation shall have authority to assess such a civil penalty, after giving notice and an opportunity to the company or individual to submit data, views, and arguments, and after giving due consideration to the appropriateness of the penalty with respect to the size of financial resources and good faith of the company or individual charged, the gravity of the violation, the history of previous violations, and any data, views, and arguments submitted. The Corporation may collect such civil penalty by agreement with the company or individual or by bringing an action in the appropriate United States district court, except that in any such action, the company or individual against whom the penalty has been assessed shall have a right to a trial de novo.".

SEC. 6. (a)(1) Section 8(b)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1818(b)(1)) is amended to read as follows:

"(b)(1) If, in the opinion of the appropriate Federal banking agency, any insured bank, bank which has insured deposits, or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such a bank is engaging or has engaged, or the agency has reasonable cause to believe that the bank or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank is about to engage, in an unsafe or unsound practice in conducting the business of such bank, or is violating or has violated, or the agency has reasonable cause to believe that the bank or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank is about to violate, a law, rule, or regulation, or any condition imposed in writing by the agency in connection with the granting of any application or other request by the bank or any written agreement entered into with the agency, the agency may issue and serve upon the bank or such director, officer, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the bank or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the agency at the request of any party so served. Unless the party or parties so served shall appear at the hearing by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the agency shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the agency may issue and serve upon the bank or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank an order to cease and desist from any such violation or practice. Such order may, by provisions which may be mandatory or otherwise, require the bank or its directors, officers, employees, agents, and other persons participating in the conduct of the affairs of such bank to cease and desist from the same, and further, to take affirmative action to correct the conditions resulting from any such violation or practice.".

"(b)(2) A cease-and-desist order shall become effective at the expiration of thirty days after the service of such order upon the bank or other person concerned (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable as provided therein, except to such extent as it is stayed, modified, terminated, or set aside by action of the agency or a reviewing court.".

(2) Section 407(e) of the National Housing Act (12 U.S.C. 1730(e)) is amended to read as follows:

"(e)(1) If, in the opinion of the Corporation, any insured institution, institution which has insured accounts or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is engaging or has engaged, or the Corporation has reasonable cause to believe that the institution or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is about to engage, in an unsafe or unsound practice in conducting the business of such institution, or is violating or has violated, or the Corporation has reasonable cause to believe that the institution or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is about to violate, a law, rule, or regulation, or any condition imposed in writing by the Corporation in connection with the granting of any application or other request by the institution or any written agreement entered into with the Corporation, including any agreement entered into under section 403 of this title, the Corporation may issue and serve upon the institution or such director, officer, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the institution or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the Corporation at the request of any party so served. Unless the party or parties so served shall appear at the hearing by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the Corporation shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the Corporation may issue and serve upon the institution or the director, officer, employee, agent or other person participating in the conduct of the affairs of such institution an order to cease and desist from any such violation or practice. Such order may, by provisions which may be mandatory or otherwise, require the institution or directors, officers, employees, agents and other persons participating in the conduct of the affairs of such institution to cease and desist from the same, and, further to take affirmative action to correct the conditions resulting from any such violation or practice.

"(2) A cease-and-desist order shall become effective at the expiration of thirty days after service of such order upon the institution or the party or parties so served (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable except to such extent as it is stayed, modified, terminated, or set aside by action of the Corporation or a reviewing court.".

(3) Section 5(d)(2) of the Home Owners' Loan Act, as amended (12 U.S.C. 1464(d)(2)), is amended to read as follows:

"(2)(A) If, in the opinion of the Board, any association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association is engaging or has engaged, or the Board has reasonable cause to believe that the association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association is about to engage, in an unsafe or unsound practice in conducting the business of such association, or is violating or has violated, or the Board has reasonable cause to believe that the association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association is about to violate, a law, rule, or regulation, or charter, or any condition imposed in writing by the Board in connection with the granting of any application or other request by the association or any written agreement entered into with the Board, the Board may issue and serve upon the association or such director, officer, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the association or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such association. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the Board at the request of any party so served. Unless the party or parties so served shall appear at the hearing by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the Board shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the Board may issue and serve upon the association or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such association an order to cease and desist from any such violation or practice. Such order may, by pro-

visions which may be mandatory or otherwise require the association or its directors, officers, employees, agents, and other persons participating in the conduct of the affairs of such association to cease and desist from the same, and, further, to take affirmative action to correct the conditions resulting from any such violation or practice.

"(B) A cease-and-desist order shall become effective at the expiration of thirty days after service of such order upon the association or the party or parties so served (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable, except to such extent as it is stayed, modified, terminated, or set aside by action of the Board or a reviewing court.".

(b) Section 8(b)(3) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1818(b)(3)) is amended: (1) by inserting after "Bank Holding Company Act of 1956" a comma and the following: "and to any organization organized and operated under section 25A of the Federal Reserve Act or operating under section 25 of the Federal Reserve Act,"; and (2) by adding at the end thereof the following new sentence: "Nothing in this subsection or in subsection (c) of this section shall authorize any Federal banking agency, other than the Board of Governors of the Federal Reserve System, to issue a notice of charges or cease-and-desist order against a bank holding company or any subsidiary thereof (other than a bank or subsidiary of that bank).".

(c)(1) Section 8(c) (1) and (2) of the Federal Deposit Insurance Act (12 U.S.C. 1818(c) (1) and (2)) are amended to read as follows:

"(c)(1) Whenever the appropriate Federal banking agency shall determine that the violation or threatened violation or the unsafe or unsound practice or practices specified in the notice of charges served upon the bank or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank pursuant to paragraph (1) of subsection (b) of this section, or the continuation thereof, is likely to cause insolvency or substantial dissipation of assets or earnings of the bank, or is likely to otherwise seriously prejudice the interests of its depositors, the agency may issue a temporary order requiring the bank or such director, officer, employee, agent, or other person to cease and desist from any such violation or practice. Such order shall become effective upon service upon the bank or such director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank and, unless set aside, limited, or suspended by a court in proceedings authorized by paragraph (2) of this subsection, shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the agency shall dismiss the charges specified in such notice or if a cease-and-desist order is issued against the bank or such director, officer, employee, agent, or other person, until the effective date of such order.

"(2) Within ten days after the bank concerned or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank has been served with a temporary cease-and-desist order, the bank or such director, officer, employee, agent, or other person may apply to the United States district court for the judicial district in which the home office of the bank is located, or the United States District Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of charges served upon the bank or such director, officer, employee, agent, or other person under paragraph (1) of subsection (b) of this section, and such court shall have jurisdiction to issue such injunction.".

(2) Section 407(f) (1) and (2) of the National Housing Act (12 U.S.C. 1730(f) (1) and (2)) is amended to read as follows:

"(f)(1) Whenever the Corporation shall determine that the violation or threatened violation or the unsafe or unsound practice or practices, specified in the notice of charges served upon the institution or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution or any institution any of the accounts of which are insured pursuant to paragraph (1) of subsection (e) of this section, or the constitution thereof, is likely to cause insolvency or substantial dissipation of assets or earnings of the institution, or is likely to otherwise seriously prejudice the interests of its insured members, the Corporation may issue a temporary order requiring the institution or such director, officer, employee, agent, or other person to cease and desist from any such violation or practice. Such order shall become effective upon service upon the institution and/or such director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution and, unless set aside, limited, or suspended by a court in proceedings authorized by paragraph (2) of this subsection, shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the Corporation shall dismiss the charges specified in such notice, or if a cease-and-desist order is issued against the institution or such director, officer, employee, agent, or other person, until the effective date of any such order.

"(2) Within ten days after the institution concerned or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution has been served with a temporary cease-and-desist order, the institution or such director, officer, employee, agent, or other person may apply to the United States district court for the judicial district in which the principal office of the institution is located, or the United States District Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of charges served upon the institution or such director, officer, employee, agent, or other person under paragraph (1) of subsection (e) of this section, and such court shall have jurisdiction to issue such injunction.".

(3) Section 5(d)(3) (A) and (B) of the Home Owners' Loan Act, as amended (12 U.S.C. 1464(d)(3) (A) and (B)), is amended to read as follows:

"(3)(A) Whenever the Board shall determine that the violation or threatened violation or the unsafe or unsound practice or practices, specified in the notice of charges served upon the association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association pursuant to paragraph (2) (A) of this subsection, or the continuation thereof, is likely to cause insolvency (as defined in paragraph (6)(A)(i) of this subsection) or substantial dissipation of assets or earnings of the association, or is likely to otherwise seriously prejudice the interests of its savings account holders, the Board may issue a temporary order requiring the association or such director, officer, employee, agent, or other person to cease and desist from any such violation or practice. Such order shall become effective upon service upon the association or such director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution and, unless set aside, limited, or suspended by a court in proceedings authorized by subparagraph (B) of this paragraph shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the Board shall dismiss the charges specified in such notice, or if a cease-and-desist order is issued against the association or such director, officer, employee, agent, or other person, until the effective date of such order.

"(B) Within ten days after the association concerned or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association has been served with a temporary cease-and-desist order, the bank or such director, officer, employee, agent, or other person may apply to the United States district court for the judicial district in which the home office of the association is located, or the United States District Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of charges served upon the bank or such director, officer, employee, agent, or other person under paragraph (2)(A) of this subsection, and such court shall have jurisdiction to issue such injunction.".

(d)(1) Section 8(e) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1818(e)), is amended to read as follows:

"(e)(1) Whenever, in the opinion of the appropriate Federal banking agency, any director or officer of an insured bank has committed any violation of law, rule, or regulation or of a cease-and-desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the bank, or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director or officer, and the agency determines that the bank has suffered or will probably suffer substantial financial loss or other damage or that the interests of its depositors could be seriously prejudiced by reason of such violation or practice or break of fiduciary duty, and that such violation or practice or breach of fiduciary duty is either one involving personal dishonesty on the part of such director or officer, or one which demonstrates his gross negligence in the operation or management of the bank or a willful disregard for the safety or soundness of the bank, the agency may serve upon such director or officer a written notice of its intention to remove him from office.

"(2) Whenever, in the opinion of the appropriate Federal banking agency, any director or officer of an insured bank, by conduct or practice with respect to another insured bank or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or his gross negligence in the operation or management of the bank or institution or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to continue as a director or officer and, whenever, in the opinion of the appropriate Federal banking agency, any other person participating in the conduct of the affairs of an insured bank, by conduct or practice with respect to such bank or other insured bank or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or his gross negligence in the operation or management of the bank or institution or a willful disregard for its safety and soundness, and in addition, has evidenced his unfitness to participate in the conduct of the affairs of such insured bank, the agency may serve such director, officer, or other person a written notice of its intention to remove him from office or to prohibit his further participation

in any manner in the conduct of the affairs of the bank.

"(3) In respect to any director or officer of an insured bank or any other person referred to in paragraph (1) or (2) of this subsection, the appropriate Federal banking agency may, if it deems it necessary for the protection of the bank or the interests of its depositors, by written notice to such effect served upon such director, officer, or other person, suspend him from office or prohibit him irom further participation in any manner in the conduct of the affairs of the bank. Such suspension or prohibition shall become effective upon service of such notice and, unless stayed by a court in proceedings authorized by subsection (f) of this section, shall remain in effect pending the completion of the administrative proceedings pursuant to the notice served under paragraph (1) or (2) of this subsection and until such time as the agency shall dismiss the charges specified in such notice, or, if an order of removal and/or prohibition is issued against the director or officer or other person, until the effective date of any such order. Copies of any such notice shall also be served upon the bank of which is a director or officer or in the conduct of whose affairs he has participated.

"(4) A notice of intention to remove a director, officer, or other person from office or to prohibit his participation in the conduct of the affairs of an insured bank, shall contain a statement of the facts constituting grounds therefor, and shall fix a time and place at which a hearing will be held thereon. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after the date of service of such notice, unless an earlier or a later date is set by the agency at the request of (A) such director or officer or other person, and for good cause shown, or (B) the Attorney General of the United States. Unless such director, officer, or other person shall appear at the hearing in person or by a duly authorized representative, he shall be deemed to have consented to the issuance of an order of such removal or prohibition. In the event of such consent, or if upon the record made at any such hearing the agency shall find that any of the grounds specified in such notice has been established, the agency may issue such orders of suspension or removal from office, or prohibition from participation in the conduct of the affairs of the bank, as it may deem appropriate. In any action brought under this section by the Comptroller of the Currency in respect to any director, officer or other person with respect to a national banking association or a District bank, the findings and conclusions of the Administrative Law Judge shall be certified to the Board of Governors of the Federal Reserve System for the determination of whether any order shall issue. Any such order shall become effective at the expiration of thirty days after service upon such bank and the director, officer, or other person concerned (except in the case of an order issued upon consent, which shall become effective at the time specified therein). Such order shall remain effective and enforceable except to such extent as it is stayed, modified, terminated, or set aside by action of the agency or a reviewing court.".

(2) Section 407(g) (1) and (2) of the National Housing Act (12 U.S.C. 1730(g) (1) and (2)) is amended to read as follows:

"(g)(1) Whenever, in the opinion of the Corporation, any director or officer of an insured institution has committed any violation of law, rule, or regulation or of a cease-and-desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the institution; or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director or officer, and the Corporation determines that the institution has suffered or will probably suffer substantial financial loss or other damage or that the interests of its insured members could be seriously prejudiced by reason of such violation or practice or breach of fiduciary duty, and that such violation or practice or breach of fiduciary duty is either one involving personal dishonesty on the part of such director or officer, or one which demonstrates his gross negligence in the operation or management of the institution or a willful disregard for the safety or soundness of the institution, the Corporation may serve upon such director or officer a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the institution.

"(2) Whenever, in the opinion of the Corporation, any director or officer of an insured institution, by conduct or practice with respect to another insured institution or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or his gross negligence in the operation or management of the insured institution or business institution or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to continue as a director or officer and, whenever, in the opinion of the Corporation, any other person participating in the conduct of the affairs of an insured institution, by conduct or practice with respect to such institution or other insured institution or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or his gross negligence in the operation or management of the insured institution or business institution or a willful disregard for its safety and soundness, and in addition, has evidenced his unfitness to participate in the conduct of affairs of such insured institution, the Corporation may serve upon such director, officer, or other person a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the institution.".

(3) Section 5(d)(4) (A) and (B) of the Home Owners' Loan Act, as amended (12 U.S.C. 1464(d)(4) (A) and (B)) is amended to read as follows:

"(4)(A) Whenever, in the opinion of the Board, any director or officer of an association has committed any violation of law, rule, or regulation or of a cease-and-desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the association, or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director or officer, and the Board determines that the association has suffered or will probably suffer substantial financial loss or other damage or that the interests of its savings account holders could be seriously prejudiced by reason of such violation or practice or breach of fiduciary duty, and that such violation or practice or breach of fiduciary duty is either one involving personal dishonesty on the part of such director or officer or one which demonstrates his gross negligence in the operation or management of the association or a willful disregard for the safety or soundness of the association, the Board may serve upon such director or officer a written notice of its intention to remove him from office and/or to prohibit his further participation in any manner in the conduct of the affairs of the association.

"(4)(B) Whenever, in the opinion of the Board, any director or officer of an association, by conduct or practice with respect to another savings and loan association or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or his gross negligence in the operation or management of the association or business institution or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to continue as a director or officer and, whenever, in the opinion of the Board, any other person participating in the conduct of the affairs of an association, by conductor practice with respect to such association or other savings and loan association or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or his gross negligence in the operation or management of the savings and loan association or business institution or a willful disregard for its safety and soundness, and, in addition, has evidence his unfitness to participate in the conduct of the affairs of such association, the Board may serve upon such director, officer, or other person a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the association.".

(e)(1) Section 8(i) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1818 (i)), is amended by redesignating section 8 (i) as 8(i)(1) and by adding a new paragraph as follows:

"(2) Any insured bank which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such a bank who violates the terms of any order which has become final and was issued pursuant to subsection (b) or (c) of this section, shall forfeit and pay a civil penalty of not more than $10,000 per day for each day during which such violation continues. The appropriate Federal banking agency shall have authority to assess such a civil penalty, after giving notice and an opoprtunity to the insured bank or other person to submit data, views, and arguments, and after giving the consideration to the appropriateness of the penalty with respect to the size of financial resources and good faith of the insured banks or persons charged, the gravity of the violation, and any data, views, and arguments submitted. The agency may collect such civil penalty by agreement with the bank or other person or by bringing an action in the appropriate United States district court except that in any such action, the member bank or other person against whom the penalty has been assessed shall have a right to a trial de novo.".

(2) Section 407(k) of the National Housing Act (12 U.S.C. 1730(k)) is amended by adding a new paragraph (k)(3) to read as follows:

"(3) Any insured institution or any institution any of the accounts of which are insured which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such an institution who violates the terms of any order which has become final and was issued pursuant to subsection (e) or (f) of this section, shall forfeit and pay a civil penalty of not more than $10,000 per day for each day during which such violation continues. The Corporation shall have authority to assess such a civil penalty, after giving notice and an opportunity to the insured institution or other person to submit data, views, and arguments, and after giving due consideration to the appropriateness of the penalty with respect to the size of financial resources and good faith of the insured banks or person charged, the gravity of the violation, and any data, views, and arguments submitted. The Corporation may collect such civil penalty by agreement with the institution or other person or by bringing an action in the appropriate United States district court except that in any such action, the institution or other person against whom the penalty has been assessed shall have a right to a trial de novo.".

(3) Section 5(d)(8) of the Home Owners' Loan Act, as amended (12 U.S.C. 1464(5) (d)(8)), is amended by redesignating "sec-

tion 5(d)(8)' and "5(d)(8)(A)" and by adding the following new paragraph:

"(B Any association which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such an association who violates the terms of any order which has become final and was issued pursuant to paragraph (2) or (3) of this subsection, shall forfeit and pay a civil penalty of not more than $10,000 per day for each day during which such violation continues. The Board shall have authority to assess such a civil penalty, after giving notice and an opportunity to the association or other person to submit data, views, and arguments, and after giving due consideration to the appropriateness of the penalty with respect to the size of financial resources and good faith of the association or person charged, the gravity of the violation, and any data, views, and arguments submitted. The Board may collect such civil penalty by agreement with the association or other person or by bringing an action in the appropriate United States district court except that in any such action, the association or other person against whom the penalty has been assessed shall have a right to a trial de novo."

SEC. 7. Section 18(j) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1828(j)), is amended by redesignating section 18(j) as "18(j)(1)" and by adding at the end thereof the following:

(2) The provisions of section 22(h) of the Federal Reserve Act, as amended, relating to limits on loans and extensions of credit by a member bank to its officers or directors or to any individual who directly or indirectly owns, controls, or has the power to vote more than 5 per centum of any class of voting securities of such member bank or to companies controlled by such an officer, director, or individual, shall be applicable to every nonmember insured bank in the same manner and to the same extent as if such nonmember insured bank were a State member bank.

"(3) Any nonmember insured bank which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such nonmember insured bank who violates any provision of section 23A or 22(h) of the Federal Reserve Act, as amended, or any lawful regulation issued pursuant thereto, shall forfeit any pay, a civil penalty of not more than $1,000 per day for each day during which such violation continues. The Corporation shall have authority to assess such a civil penalty, after giving notice and an opportunity to the nonmember insured bank or other person to submit data, views, and arguments, and after giving due consideration to the appropriateness of the penalty with respect to the size of financial resources and good faith of the bank or person charged, the gravity of the violation, the history of previous violations, and any data, views, and arguments submitted. The Corporation may collect such civil penalty by agreement with the bank or other person or by bringing an action in the appropriate United States district court except that in any such action, the bank or other person against whom the penalty has been assessed shall have a right to a trial de novo. As used in this section, the term 'violates' includes without limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.".

SEC. 8. (a) Section 5240 of the Revised Statutes (12 U.S.C. 482) is amended by inserting after "The expense of examinations herein provided or shall be assessed by the Comptroller of the Currency upon national banks in proportion to their assets and resources." the following new sentence: "The expenditures by the Comptroller of the Currency during any fiscal year beginning September 30, 1977, may not exceed the limitation provided for such expenditures or that year in an appropriation Act.".

(b) Section 10(a) of the Federal Deposit Insurance Act (12 U.S.C. 1820A) is amended by adding after the second sentence thereof the following new sentence: "The expenditures by the Board of Directors in any fiscal year beginning after September 30, 1977, except expenditures of the Corporation for loans to, the purchase of assets of, or deposits in insured banks, or for the payment of insured deposits, may not exceed the limitation provided for such expenditures for that year in an appropriation Act.".

(c) Section 120(i) of the Federal Credit Union Act is amended by adding at the end thereof the following flush sentence:

"The expenditures by the Administration in any fiscal year beginning after September 30, 1977, except in connection with its functions as a liquidating agent under section 207 or in payments of insured accounts may not exceed the limitation provided for such expenditures for that year in an appropriation Act.".

SEC. 9. Any amendment made by this Act which provides for the imposition of civil penalties shall apply only to violations occurring or continuing after the date of its enactment.

SEC. 10. Section 22(g) of the Federal Reserve Act, as amended (12 U.S.C. 375a), is amended by inserting the figure "$60,000" in lieu of the figure "$30,000" in paragraph (2), and by inserting the figure "$20,000" in lieu of the figure "$10,000" in paragraph (3); and by inserting the figure "$10,000" in lieu of the figure "$5,000" in paragraph (4).

SECTION-BY-SECTION ANALYSIS

Section 1 would add a new section to the Federal Reserve Act which would authorize the Federal Reserve in the case of any member bank and the Comptroller of the Currency in the case of a national bank to assess civil money penalties against a member bank or an individual for any violation of Section 22 or Section 23A of the Federal Reserve Act. Those sections limit loans to insiders and loans to affiliates. A civil money penalty may be assessed of not more than $1,000 per day for each violation. The penalty may be assessed only after notice and consideration of the appropriateness of the penalty with respect to the size of financial resources and good faith of the member bank or person charged, the gravity of the violation, the history of previous violations, and the data, views, and arguments of the member bank or person against whom such civil penalty may be assessed. When assessed, the penalty may be collected by agreement or by the filing of a suit in the United States District Court, with the right of trial *de novo*.

Section 2 would authorize the assessment of a civil money penalty in the same manner as authorized under Section 1 for any violation of Section 19 of the Federal Reserve Act. The amount of the penalty under this section, however, is limited to not more than $100 per day for each violation. Section 19 of the Federal Reserve Act prescribes reserve requirements and the amount of interest which may be paid on deposits at member banks.

Section 3 would amend Section 22 of the Federal Reserve Act and place additional restrictions on loans to insiders. Loans to officers, directors, and stockholders are required to be aggregated with loans to companies which such individuals control. This section provides definitions for the term company and for the term control. When aggregated, such insider loans may not exceed the limitations provided for single borrowers under Section 5200 of the Revised Statutes for national bank (10 percent of the capital and surplus of the bank) or the limitations provided under applicable state law for state member banks or insured non-member banks.

Section 4(a) would authorize the Federal Reserve Board to require the divestiture of a non-bank subsidiary of a holding company, not a subsidiary of a bank, or the termination of such non-bank activities wherever there is reasonable cause to believe that such subsidiary constitutes a serious risk to the financial safety, soundness, or stability of a bank holding company's subsidiary bank(s) and is inconsistent with sound banking principles or with the purpose of the Bank Holding Company Act or with the Financial Institutions Supervisory Act. Such divestiture or termination is required to be consummated within 120 days or such longer period as the Federal Reserve Board in its sole discretion may direct in unusual circumstances.

Section 4(b) would authorize the Federal Savings and Loan Insurance Corporation, whenever it has reasonable cause to believe that the continuation by a savings and loan holding company of any activity or of ownership or control of any of its non-insured subsidiaries, constitutes a serious risk to the safety, soundness or stability of a subsidiary insured institution or institutions, and is inconsistent with sound business principles or with the purposes of Section 408 or with the Financial Institutions Supervisory Act, to order the savings and loan holding company or any of its non-insured subsidiaries, after due notice and opportunity for a hearing to terminate such activities or to terminate (within 120 days—or such longer period as the FSLIC in its sole discretion directs in unusual circumstances) its ownership or control of any such subsidiary.

Section 5(a) would authorize the assessment of a civil money penalty in the same manner as provided in Section 1 of the bill for any violation of a provision of the Bank Holding Company Act. The amount of the penalty which may be assessed by the Federal Reserve Board under this provision is not more than $1,000 per day per violation.

Section 5(b) would provide that any company which violates or any individual who participates in a violation of any provision of section 408 of the National Housing Act or any regulation or order issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day per violation for each day during which such violation continues. The FSLIC would have the authority to assess such a civil penalty after notice and consideration of the data, views and arguments of the institution or individual against whom the penalty may be assessed and collect it by agreement or suit. In assessing the civil penalty, the Corporation would be required to give due consideration to the appropriateness of the penalty with regard to the size or financial resources and good faith of the company or individual charged, the gravity of the violation, and the history of previous violations. This provision would be an alternative to the sanctions provided in 408(j) of the National Housing Act and give greater flexibility in the choice of remedies available to the FSLIC.

Section 6(a)(1) would authorize cease and desist proceedings and cease and desist orders to be issued under the Financial Institutions Supervisory Act directly against individuals: any director, officer, employee, agent, or any other person participating in the conduct of the affairs of a bank, without the necessity for naming the bank in such proceeding or order.

Section 6(a)(2) would amend section 407 of the National Housing Act to expand the scope and effectiveness of cease-and-desist orders issued by the FSLIC. The amendment would make it clear that cease-and-desist proceedings could be instituted against directors, officers, employees, agents or other

persons participating in the conduct of the affairs of an insured institution, regardless of whether the insured institution itself is named in the proceeding.

Section 6(a)(3) would provide the Federal Home Loan Bank Board with cease-and-desist powers, with respect to Federal savings and loan associations, similar to the powers subsection 6(a)(2) would provide to the FSLIC with respect to state-chartered insured savings and loan associations.

Section 6(b) would authorize the extension of cease and desist powers under the Financial Institutions Supervisory Act to Edge Act and Agreement Corporations whether or not any such corporation is a subsidiary of a bank holding company.

Section 6(c)(1) would authorize the issuance of temporary cease and desist orders under the Financial Institutions Supervisory Act against individuals: any director, officer, employee, agent or other person participating in the conduct of the affairs of a bank, without the necessity for naming the bank in the temporary order.

Section 6(c)(2) would conform the FSLIC's temporary cease-and-desist authority with respect to state-chartered insured institutions, with changes proposed in subsection 6(a)(2) respecting cease-and-desist actions against individuals.

Section 6(c)(3) would conform the FHLBB's temporary cease-and-desist authority, with respect to Federal savings and loan associations, with changes proposed in subsection 6(a)(3) respecting cease-and-desist actions against individuals.

Section 6(d)(1) would authorize the issuance of an order to any director, officer or other person participating in the affairs of a bank removing any such person from office or from participating in any manner in the conduct of the affairs of a bank upon a showing that such individual has exhibited personal dishonesty in a transaction or has demonstrated gross negligence in the operation or management of the bank or a willful disregard for the safety or soundness of the bank.

Removal proceedings may be initiated upon persons participating in the affairs of national banks by the Comptroller of the Currency. However, removal orders may be issued only by the Federal Reserve Board with respect to such officials of national banks. At the present time, the Comptroller may not initiate such a proceeding. The procedural and substantive aspects of such matters respecting national banks under current law are the responsibility of the Federal Reserve Board. This bill would shift the procedural aspects to the Comptroller over national banks.

Section 6(d)(2) proposes to expand the criteria for the removal of a director or officer from an insured savings and loan institution. The amendment would authorize the FSLIC to remove a director or officer of an insured savings and loan institution who demonstrates personal dishonesty or gross negligence in the operation or management of the institution or a willful disregard for the safety or soundness of the institution.

Section 6(d)(3) would amend the Home Owners' Loan Act of 1933, as amended, to permit the FHLBB to remove an officer, or director of a Federal savings and loan association, under the criteria set forth under subsection (d)(2) to the FSLIC with respect to state-chartered insured institutions.

Section 6(e)(1) authorizes the assessment civil money penalties of not more than $10,000 per day per violation of any outstanding cease-and-desist or removal order under the Financial Institutions Supervisory Act. The civil money penalties may be assessed and collected under this section in a similar manner as that under Section 1 of the bill after consideration of the appropriateness of the penalty with respect to the size of financial resources of the bank or person charged.

Section 6(e)(2) would provide that any insured institution, savings and loan, or any institution the accounts of which are insured which violates, or any officer, director, employee, agent, or other person participating in the conduct of the affairs of an institution who violates a cease-and-desist order which has become final, shall forfeit and pay a civil penalty of not more than $10,000 per day per violation for each day during which such violation continues. The amendment provides the FSLIC with authority to assess such a civil penalty, giving due consideration to the appropriateness of the penalty with respect to the size of financial resources of the institution or person charged in a similar manner as under Section 1 of the bill.

Section 6(e)(3) would provide the FHLBB with the authority to assess a civil penalty against Federal savings and loan associations and personnel similar to the authority vested in the FSLIC under subsection (e)(2).

Section 7 would make applicable to insured non-member banks the requirements of Section 22 of the Federal Reserve Act and would authorize civil money penalties to be assessed against insured non-member banks to the same extent as civil money penalties may be assessed against member banks.

Section 8 (a), (b), and (c), would require that administrative expenditures by the Comptroller of the Currency, the Federal Deposit Insurance Corporation and the National Credit Union Administration in any fiscal year beginning after September 30, 1977 may not exceed the limitations provided for such expenditures for that year in an appropriations Act.

Section 9 makes clear that the civil money penalty provisions of S. 2304 apply only to violations occurring after the date of the enactment of the bill.

Section 10 would amend section 22(g) of the Federal Reserve Act to increase the limits on loans which may be made by a member bank to its executive officers. Under this section, a member bank may make loans to executive officers of: $60,000 for the purpose of purchasing a home; $20,000 to finance the education of children; and $10,000 for any other purpose.

By Mr. PROXMIRE:

S. 72. A bill to amend the Bank Holding Company Act and the Bank Merger Act to restrict the activities in which registered bank holding companies may engage and to control the acquisition of banks by bank holding companies and other banks; to the Committee on Banking, Housing and Urban Affairs.

COMPETITION IN BANKING ACT OF 1977

Mr. PROXMIRE. Mr. President, I am today introducing a bill for reference to the Committee on Banking, Housing and Urban Affairs to control the concentration of the banking resources of the Nation into fewer hands and to put brakes on the unbridled growth of bank holding companies into nonbanking fields.

The legislation titled the "Competition in Banking Act of 1977' is identical to legislation which I sponsored in the 94th Congress (S. 2721).

My statement in support of the bill on the floor of the Senate on December 1, 1975, is fully applicable today. The Senate Banking Committee held 2 days of hearings on this bill last year. Strong statements in support of the provisions of the bill were made by spokesmen for the various commercial industries into which bank holding companies have expanded and competed unfairly. Such industries included insurance, and insurance agency, data processing, securities, automobile leasing, travel agencies, courier and armored cars, and realtors.

Chairman Burns has been quoted in the public press as having said that if he had to do it all over again, he would fight for a tougher bank holding company bill than the Bank Holding Company Act Amendments of 1970. Chairman Burns expressed the desire for a much more restrictive legislative scope to the kinds of nonbank businesses that bank holding companies should be permitted to engage. I could not agree more with the distinguished Chairman of the Federal Reserve in this regard. This bill will do the job.

Bank holding companies will continue to be permitted to engage in nonbanking activities outside the geographic areas applying to their subsidiary banks. But, under the bill, such activities must be shown to be directly related to banking and shown to have significant public benefits that clearly outweigh possible adverse effects such as unfair competition or concentration of resources. In making determinations as to which activities are permissible for bank holding companies the Federal Reserve will be required to do so on the record. Ex parte communications are forbidden.

The testimony before the committee on this bill last year was that a cozy relationship exists between the bank regulators and the banks which results in unfair treatment to bank competitors in the marketplace. The marriage between the banks and the bank regulators must be broken. This bill will accomplish this purpose with respect to bank holding companies. On a broader level, however, I believe that the bank regulatory agencies should be consolidated into a single agency which has the will to protect the public interest.

Bank holding companies have come to dominate the business of banking. The largest institutions acquired an increasing share of the Nation's banking resources over the past several years and State markets are highly concentrated. Yet banking institutions operate in a protected market where entry is restricted and capital is highly leveraged by the use of depositors funds. In these circumstances great care needs to be taken so that banks do not unfairly compete in industries outside of banking. Many customers will naturally prefer to purchase their commercial services from banks which also dispense credit rather than to purchase such services from nonbank enterprises. This is not competition based on quality and price but rather smacks of an involuntary tie-in. We cannot allow our commercial markets to be distorted in this fashion. This bill provides the needed public protections.

To deal with concentration of banking resources, this bill amends the bank merger laws to prohibit any further bank acquisitions by a banking organization already holding 20 percent of the banking deposits in any State.

Mr. President, the Senate Banking Committee did not have the time to com-

plete the record on this legislation in the last Congress. My intent is to complete the record in this Congress and to see this bill become law. I ask unanimous consent that the section-by-section analysis of the bill, together with the full text of the bill be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 72

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Competition in Banking Act of 1977".

FINDINGS AND PURPOSES

SEC. 2. Congress finds that—

(a) concentration of the banking resources of the Nation into fewer hands has continued unabated; and

(b) the explosive growth of bank holding companies has resulted in an increasing share of such banking resources coming under the control of those institutions; and

(c) bank holding companies have extended their services into product markets beyond those directly related to banking, thereby eroding the line between banking and commerce in the Nation: (i) in offering insurance agency and underwriting services, (ii) in offering leasing, accounting, travel, and courier services, (iii) in offering management and data processing service, and (iv) in marketing securities; and

(d) credit resources of the Nation have been misallocated by the activities of bank holding companies and the Federal Reserve has not adequately protected the public interest in approving activities in which bank holding companies could engage and the Federal Reserve has not maintained continued oversight over the activities of bank holding companies in a manner which protects the public interest.

STANDARDS FOR BANK MERGERS

SEC. 101. Paragraph (5) of section 18(c) of the Federal Deposit Insurance Act is amended to read as follows:

"(5) The responsible agency shall not approve—

"(A) any proposed merger transaction which would result in a monopoly, or which would be in furtherance of any combination or conspiracy to monopolize or to attempt to monopolize the business of banking in any part of the United States, or

"(B) any other proposed merger transaction whose effect in any section of the country may be substantially to lessen competition, or tend to create a monopoly, or which in any other manner would be in restraint of trade, unless it finds that the anticompetitive effects of the proposed transaction are clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served, or

"(C) any other proposed merger transaction if, either as a result of such merger transaction or because of its preexisting assets, the acquiring, assuming, or resulting bank would upon consummation of transaction hold more than 20 per centum of the total assets held by all banks located in the State in which such bank is located: *Provided, however,* That this subparagraph shall not apply to any merger or consolidation of banks in which the responsible agency finds that immediate action is necessary to prevent the probable failure of a bank and that a less anticompetitive alternative is not available.

For purposes of this paragraph, if any company has, or upon consummation of the merger transaction would have, control, as defined in section 2 of the Bank Holding Company Act of 1956, over the acquiring, assuming, or resulting bank, total assets held by all banks over which the same company has such control shall be attributed to such bank. As used in this paragraph, the terms 'bank' and 'company' have the meaning ascribed to such terms in section 2 of the Bank Holding Company Act of 1956. In every case, the responsible agency shall take into consideration the financial and managerial resources and future prospects of the existing and proposed institutions, and the convenience and needs of the community to be served. Nothing contained in this paragraph or in any other paragraph of this subsection shall prevent the responsible agency from disapproving any other merger transaction on the grounds that such transaction would have adverse effects on competition or concentration in any market, region, State, or other area which, although not requiring disapproval under subparagraph (A), (B), or (C) of this paragraph, are not clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served.".

SEC. 102. Section 18(c) of the Federal Deposit Insurance Act is amended by inserting in paragraph (8) after "(the Clayton Act," the words "paragraph (9) of this subsection, and"; and by renumbering section "(9)" section "10"; and by adding a new paragraph "(9)" as follows:

"(9)(A) Every merger transaction having the effects set forth in subparagraph (C) of paragraph (5) of this subparagraph is declared to be illegal.

"(B) The district courts of the United States have jurisdiction to prevent and restrain violations of subparagraph (A) of this paragraph, and it is the duty of the United States attorneys, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. The proceedings may be by way of a petition setting forth the case and praying that the violation be enjoined or otherwise prohibited. When the parties complained of have been duly notified of the petition, the court shall proceed, as soon as possible, to the hearing and determination of the case. While the petition is pending, and before final decree, the court may at any time make such temporary restraining order or prohibition as it deems just. Whenever it appears to the court that the ends of justice require that other parties be brought before it, the court may cause them to be summoned whether or not they reside in the district in which the court is held, and subpenas to that end may be served in any district by the marshal thereof.

"(C) In any action brought by or on behalf of the United States under subparagraph (A) of this paragraph, subpenas for witnesses may run into any district, but no writ of subpena may issue for witnesses living out of the district in which the court is held at a greater distance than one hundred miles from the place of holding the same without the prior permission of the trial court upon proper application and cause shown.

"(D) Nothing contained in this paragraph shall be construed as affecting in any manner the right of the United States or of any other party to bring an action under any other law of the United States or of any State, including any right which may exist in addition to specific statutory authority, challenging the legality of any merger transaction which may be proscribed by this paragraph.".

STANDARDS FOR BANK HOLDING COMPANY ACQUISTIONS OF BANKS

SEC. 201. Paragraph (c) of section 3 of the Bank Holding Company Act of 1956 is amended to read as follows:

"(c) The Board shall not approve—

"(1) any acquisition or merger or consolidation under this section which would result in a monopoly, or which would be in furtherance of any combination or conspiracy to monopolize or to attempt to monopolize the business of banking in any part of the United States, or

"(2) any other proposed acquisition or merger or consolidation under this section whose effect in any section of the country may be substantially to lessen competition, or to tend to create a monopoly, or which in any other manner would be in restraint or trade, unless it finds that the anticompetitive effects of the proposed transaction are clearly outweighed in the public interest by the probable effect of the transaction in meeting th convenience and needs of the community to be served, or

"(3) any other proposed acquisition, merger, or consolidation transaction under this section if, either as a result of such transaction or because of the preexisting bank assets over which it has control, the acquiring or resulting company would have control over aggregate total banking assets exceeding 20 per centum of the total banking assets held by all banks and bank holding companies located in the State in which such company is located: *Provided, however,* That this paragraph shall not apply to any acquisition, merger, or consolidation transaction in which the Board finds that immediate action is necessary to prevent the probable failure of a bank and that a less anticompetitive alternative is not available.

In every case, the Board shall take into consideration the financial and managerial resources and future prospects of the company or companies and the banks concerned, and the convenience and needs of the community to be served. Nothing contained in this chapter shall prevent the Board from disapproving any other acquisition, merger, or consolidation transaction on the grounds that such transaction would have adverse effects on competition or concentration in any market, region, State, or other area which, although not requiring disapproval under paragraph (1), (2), or (3) of this subsection, are not clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served.".

SEC. 202. The Bank Holding Company Act of 1956 is amended by inserting in section 1849(f) after "(the Clayton Act," the words "subsection (g) of this section"; and by adding to section 1849 a new section (g) as follows:

"(g)(1) Every acquisition, merger, or consolidation transaction having the effects set forth in paragraph (3) of subsection (c) of section 3 of this chapter is declared to be illegal.

"(2) The district courts of the United States have jurisdiction to prevent and restrain violations of paragraph (1) of this subsection, and it is the duty of the United States attorneys, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. The proceedings may be by way of a petition setting forth the case and praying that the violation be enjoined or otherwise prohibited. When the parties complained of have been duly notified of the petition, the court shall proceed, as soon as possible, to the hearing and determination of the case. While the petition is pending, and before final decree, the court may at any time make such temporary restraining order or prohibition as it deems just. Whenever it appears to the court that the ends of justice require that other parties be brought before it, the court may cause them to be summoned whether or not they reside in the district in which the court is held, and subpenas to that end may be served in any district by the marshal thereof.

"(3) In any action brought by or on behalf of the United States under paragraph (1) of this subsection, subpenas for witnesses may run into any district, but no writ of subpena may issue for witnesses living out of the district in which the court is held at a greater distance than one hundred miles from the place of holding the same without the prior permission of the trial court upon proper application and cause shown.

"(4) Nothing contained in this subsection shall be construed as affecting in any manner the right of the United States or any other party to bring an action under any other law of the United States or of any State, including any right which may exist in addition to specific statutory authority, challenging the legality of any acquisition, merger, or consolidation transaction which may be proscribed by this subsection.".

STANDARDS FOR BANK HOLDING COMPANY ENTRY INTO BANK RELATED ACTIVITIES

SEC. 301. (a) Section 4(c)(8) of the Bank Holding Company Act of 1956 is amended to read as follows:

"(8)(a) shares of any company the activities of which the Board, on the record and after due notice and opportunity for hearing, has determined (by order or regulation)—

"(A) to be so closely and directly related to banking or managing or controlling banks as to be a proper and necessary incident thereto, and

"(B) is likely to produce substantial benefits to the public which clearly and significantly outweigh possible adverse effects. For the purposes of this subparagraph, (i) the term 'substantial benefits to the public' includes increased competition over the course of time and greater convenience or gains in efficiency of operation that will substantially benefit the public, and (ii) the term 'adverse effects' includes undue concentration of economic or financial resources, decreased competition over the courses of time, unfair competition, conflicts of interests, unsafe or unsound banking or business practices, risk to the financial soundness of a bank holding company or its banking subsidiaries, and interference with the primary responsibility of a bank holding company or its banking subsidiary to provide effective banking services to the public. For the purposes of determining in specific cases whether the performance of a particular activity by an affiliate of a bank holding company is likely to produce substantial benefits to the public which clearly and significantly outweigh possible adverse effects, the Board, in addition to its other considerations, shall take into consideration the relative economic size and market power of the bank holding company and that of those with whom the affiliate would compete.".

(b)(1) Notwithstanding the provisions of subsection (a), and subject to the provisions of subparagraph (2) of this subsection, a bank holding company may continue to engage in those activities in which it directly or through a subsidiary (A) was lawfully engaged on November 1, 1975 (or on a date subsequent thereto in the case of activities carried on as the result of the acquisition by such bank holding company or subsidiary thereof, pursuant to a binding written contract entered into on or before November 1, 1975, of another company engaged in such activities at the time of the acquisition), and (B) has been continuously engaged since November 1, 1975 (or such subsequent date), except that such a bank holding company shall not permit the scope or size (in terms of volume of business) of those activities to expand to any significant degree.

(2) The Federal Reserve Board by order or regulation, after opportunity for hearing, may terminate the authority conferred by subparagraph (1) on any bank holding company to engage directly or through a subsidiary in any activity otherwise permitted by subparagraph (1) if the Board determines, having due regard for the purposes of this Act, that such action is necessary to prevent undue concentration of economic or financial resources, decreased competition over the course of time, unfair competition, conflicts of interest, unsafe or unsound banking or business practices, risk to the financial soundness of a bank holding company, or its banking subsidiaries, or interference with the primary responsibility of a bank holding company or its banking subsidiary to provide effective banking services to the public.

UNIFORM APPLICATION OF STANDARDS GOVERNING ENTRY INTO BANK RELATED FIELDS

SEC. 401. (a) Subject to the provisions of subsection (b), no national bank shall directly or through a subsidiary engage in any activity which is found—

(1) pursuant to a regulation of the Federal Reserve Board issued after the effective date of this Act to be an improper activity for bank holding companies under section 4(c)(8) of the Bank Holding Company Act of 1956, or

(2) pursuant to an order of the Federal Reserve Board issued after the effective date of this Act to be an improper activity for the bank holding company of which such national bank is a subsidiary.

(b) Nothing contained in this section shall be interpreted or construed as authorizing a national bank to engage in any activity prohibited to it under any other provision of law.

STANDARDS FOR SOUND AND COMPETITIVE FINANCING OF NONBANKING ACTIVITIES

SEC. 501. (a) Section 4 of the Bank Holding Company Act of 1956 is amended by inserting at the end thereof the following new subsection:

"(f) In keeping with its responsibilities to administer and carry out the purposes of this Act, and with particular attention to the standards established under subparagraph (8) of subsection (c) of this section, the Board shall require, both in connection with a bank holding company application to engage in a particular activity and in connection with the Board's ongoing supervision of bank holding companies, that (1) bank holding companies and their subsidiaries be capitalized and otherwise financed in a safe and sound manner, and (2) bank subsidiaries of bank holding companies refrain from discriminating in favor of their parent holding company or their affiliated subsidiaries in the making of loans or in the establishing of terms and conditions of credit.

(b) Subsection (c) of section 5 of the Bank Holding Company Act of 1956 is amended by striking out "(c)" and inserting in lieu thereof "(c)(1)" and by inserting at the end of such subsection the following new subparagraph:

"(2) In addition to such other reports as the Board may from time to time require, the Board shall require each bank holding company to submit to the Board each year a report detailing the terms and conditions of all intercompany loans and investments, as between the bank holding company and its subsidiaries and as between any such subsidiaries, made during the twelve-month period immediately preceding such report. The Board shall make such reports available to the public.".

ADMINISTRATIVE PROCEDURES AND JUDICIAL REVIEW

SEC. 601. (a) The Bank Holding Company Act of 1956 is amended by redesignating sections 9, 10, 11, and 12 as sections 10, 11, 12, and 13, respectively, and by inserting immediately after section 8 the following new section:

"SEC. 9. (a) The provisions of subchapter II of chapter 5 of title 5 of the United States Code (relating to administrative procedure) shall apply with respect to all Board proceedings under section 4(c)(8).

"(b) All Board determinations (whether by order or regulation) under section 4(c)(8) shall be made on the record after opportunity for hearing, and the provisions of sections 556 and 557 of title 5 of the United States Code shall apply with respect thereto. The Board shall give all interested persons an opportunity to participate in any such hearing.

"(c)(1) In connection with any proceeding under section 4(c)(8), no person shall, directly or indirectly, make or attempt to make any ex parte communication in connection with the subject matter of any such proceeding to any member of the Board or any member of the Board staff participating in such proceeding.

"(2) No application made under section 4(c)(8) shall be held or considered to be an application for an initial license within the meaning of subsection (d) of section 554 of title 5 of the United States Code.

"(d) In connection with any proceeding under section 4(c)(8) to which the requirements of sections 556 and 557 of title 5 of the United States Code are being applied, any interested person participating in such proceeding may call upon (1) the Board, or, (2) in the case of the consideration of an application, the applicant, for any information or documents, not privileged, for purposes of discovery or for use as evidence. In addition, in any such proceeding where there is an absence of relevant information, the Board, upon its own motion or that of any interested person participating in such proceeding, shall undertake such studies (and make reports thereon available) as will provide the relevant information required.".

(b) Section 9 of the Bank Holding Company Act of 1956 (as in effect immediately prior to the enactment of this Act) is amended (1) by inserting "or regulation" immediately after "order" each place that it appears, and (2) by striking out "as provided in section 2112 of title 28, United States Code" and inserting in lieu thereof the following: "in the same manner as provided in section 2112 of title 28, United States Code, with respect to orders of administrative agencies".

PUBLIC'S RIGHT TO PETITION FOR MODIFICATION OF ORDERS AND REGULATIONS

SEC. 701. The Bank Holding Company Act of 1956 (as amended by section 501 of this Act) is further amended by inserting at the end of the new section 9 thereof the following new subsection:

"(e)(1) Any interested person, including a consumer or consumer organization, may petition the Board to commence a proceeding to consider the issuance, amendment, or revocation of an order or regulation promulgated under the authority of section 4(c)(8). Such petition shall set forth (a) facts which it claimed established that the issuance, amendment, or revocation of an order or regulation is necessary, and (b) a description of the substance of the amendment or of the order or regulation it is claimed should be issued, as the case may be.

"(2) The Board may conduct a public hearing or may conduct such investigation or proceeding as it deems appropriate in order to determine whether or not such petition should be granted. Facts which warrant the issuance amendment, or revocation of an order or regulation shall include, in addition to such other matters as the Board may from time to time determine to be appropriate, the following matters:

"(A) a finding that a particular activity conducted on the part of a bank holding company or its subsidiary fails to conform to the scope of the activity for which Board approval was originally given;

"(B) a finding that a particular activity

conducted on the part of a bank holding company or its subsidiary fails to conform to new or amended Board orders or regulations or judicial determinations altering the scope of the activity for which Board approval was originally given;

"(C) a finding that the continued conduct of a particular activity on the part of a bank holding company or its subsidiary has ceased to produce, within the meaning of section 4(c)(8), substantial benefits to the public which clearly and significantly outweigh possible adverse effects; or

"(D) a finding that the continued conduct of a particular activity on the part of a bank holding company or its subsidiary otherwise violates the standards established under section 4(c)(8) for permissible bank holding company activity.

"(3) Within one hundred and twenty days after filing of a petition referred to in subparagraph (1), the Board shall either grant or deny the petition. If the Board grants such petition, it shall promptly proceed to determine, on the record and after opportunity for hearing, whether to issue, amend, or revoke such order or regulation. If the Board denies such petition, it shall publish in the Federal Register its reasons for such denial.

"(4) If the Board denies such petition, or if the Board fails to grant or deny such petition within one hundred and twenty days after the filing of the petition, the petitioner may commence a civil action in a United States district court to compel the Board to grant such petition. Any such action shall be filed within sixty days after the Board's denial of the petition, or, if the Board fails to grant or deny the petition within one hundred and twenty days after the filing of the petition, within sixty days after the expiration of the one hundred and twenty day period. If the petitioner can demonstrate to the satisfaction of the court, by a preponderance of evidence in a de novo proceeding before such court, that sufficient facts exist to justify the granting of the petition, the court shall order the Board to grant such petition.

"(5) In any action under this subsection, the district court shall have no authority to compel the Board to take any action other than to grant such a petition.".

EFFECTIVE DATE

SEC. 801. The Act and the amendments made by this Act shall take effect upon the expiration of ninety days following the date of enactment of this Act.

SECTION-BY-SECTION ANALYSIS

Section 1. The short title of the bill is the Competition in Banking Act of 1975.

Section 2. This section provides the basic findings and policy declarations relating why this legislation is necessary. Congress finds that the banking resources of the Nation are becoming concentrated into fewer hands and that holding companies have come to control an increasing share of such resources. The line between industry, commerce and banking is being eroded in insurance services and leasing transactions, among other industries. The credit resources of the Nation have been misallocated by the activities of holding companies which have not been adequately supervised by the bank regulatory agencies.

Sections 101 and 201. These sections amend the Bank Merger Act and the Bank Holding Company Act to require more stringent standards for both the bank regulatory agencies and the courts with respect to bank mergers and bank holding company acquisitions of banks. The sections expand existing law to prohibit merger transactions or holding company acquisitions in cases where the resultant bank or bank holding company will control more than 20% of the banking assets held by banks or bank holding companies in States in which the bank or bank holding company is located. An exception to the 20% prohibition is provided where the regulatory agencies determine that immediate action is necessary to prevent the immediate failure of a bank and a less anticompetitive alternative is not available. Technical amendments are provided in sections 102 and 202 to give the Department of Justice an independent right to seek a court injunction for any violation of these prohibitions. Sections 101 and 201 also give to the bank regulatory agencies the discretion to deny anticompetitive bank acquisitions which do not violate the Sherman Act, the Clayton Act or the 20% prohibition where the anticompetitive consequences of such mergers are not clearly outweighed in the public interest by the probable effects of such transactions in meeting the convenience and needs of the community.

Section 301. This section restricts permissible activities under section 4(c)(8) of the Bank Holding Company Act of 1956 to those "directly" related to banking. This section is to tighten both the existing "closely related" test and the "public benefits" test. The section makes explicit the fact that 4(c)(8) activities must meet two tests.

The legislation provides that, in order to be permissible, an activity will have to be "so closely and directly related" to banking or managing or controlling banks as to be "a proper and necessary incident thereto." The effect of the employment of the terms "directly" and "necessary" is to the permissible activities strictly to banking activities.

In addition, section 301 will tighten the existing public benefits test in several important respects. Under the amended public benefit test—

(1) it will be necessary that the activity be "likely" (in lieu of "can reasonably be expected") to produce benefits to the public;

(2) it will be necessary that the activity be likely to produce increased competition over time, not just in the short run as suggested by present law;

(3) it will be necessary that the beneficial effect of the activity "clearly outweigh" adverse effects, not just "outweigh" as provided by present law;

(4) it will be necessary that the activity not have a tendency to lead to an undue concentration of "economic or financial" resources, not just "economic resources" as provided by present law;

(5) it will be necessary that the activity not lead to decreased competition over time, not just in the short run as suggested by present law;

(6) it will be necessary that the activity not risk the financial soundness of the bank holding company or its banking subsidiaries (the present law is silent on this point); and

(7) it will be necessary that the activity not interfere with the primary responsibility of the bank holding company or its banking subsidiaries to provide banking services to the public (the present law is silent on this point). It is intended by item (7) to reestablish the preeminence of banking as the central purpose and function of bank holding companies.

In addition, the amended test will require that, in making a determination under the public benefit standard, consideration must be given to the relative economic size and market power of the bank holding company and those with whom the proposed affiliate would compete.

Section 301 also establishes a grandfather clause under which a bank holding company may continue to engage in those activities in which it was lawfully engaged on a fixed date prior to enactment of these amendments so long as the holding company has continuously engaged in those activities. However, under the grandfather clause, the bank holding company may not permit the scope or size (in terms of volume of business) of the grandfathered activities to expand to any significant degree.

Section 301 would permit the regulatory agency to require a bank holding company to terminate a grandfathered activity under certain circumstances.

Section 401. This section prohibits national banks or their subsidiaries from engaging in activities found by the Federal Reserve Board, after the effective date of this Act, to be prohibited to bank holding companies under section 4(c)(8) of the Bank Holding Company Act of 1956.

The purpose of this provision is to make more sensible and consistent the law relating to permissible activities of banking institutions. Under the law as it exists national banks under some circumstances are permitted by the Comptroller of the Currency to engage in activities which have been found by the Federal Reserve Board, after lengthy hearings and deliberations, to be outside the scope of permissible bank activities. This provision will eliminate competitive permissiveness between agencies of the Federal government which has had unfortunate public results.

The prohibition would apply (1) generally to those activities which the Fed has found, after rulemaking and by way of regulation, to be improper for bank holding companies, and (2) specifically in the case of a particular national bank when the Fed has found by way of an order, that a given activity is unsuitable for the parent bank holding company of such national bank.

Section 401 also makes clear that its provisions do not permit a national bank to undertake any activity prohibited to it under any other provision of law.

Section 501. This section requires that: (1) bank holding companies and their subsidiaries be capitalized and otherwise financed in a safe and sound manner; (2) bank subsidiaries of bank holding companies refrain from discriminating in favor of their parent or their affiliated subsidiaries in the making of loans or in the establishing of terms and conditions of loans; and (3) bank holding companies disclose on a regular basis to the Fed the terms and conditions of all loans to or investments in bank holding company subsidiaries (the Fed in turn will be required to make the information public). These requirements must be imposed in connection with the review of applications to commence section 4(c)(8) activities, and in connection with the continuing monitoring of the activities of bank holding company subsidiaries.

Section 601. This section mandates certain administrative procedures in connection with rulemaking and adjudicatory proceedings under the Bank Holding Company Act. The section applies the provisions of the Administrative Procedure Act (Chapter 6 of Title 5 of the United States Code) to all proceedings under section 4(c)(8).

The effect of the provision is to apply the Administrative Procedure Act (1) in the case of formulation of regulations with respect to what constitutes permissible 4(c)(8) activities, and (2) in the case of issuance of orders in connection with the commencement of 4(c)(8) activities by particular bank holding companies (whether commenced de novo or by acquisition).

This section also provides for suitable discovery proceedings and will prohibit the Board or its staff from engaging in ex parte discussions regarding matters before the Board.

With respect to judicial review, the section provides that all Board orders and rulings (e.g., regulations) will be subject to judicial review by United States Court of Appeals. Under present law, only Board or-

ders are expressly made subject to judicial review.

Section 701. This section provides interested persons with an opportunity to petition the Federal Reserve Board to consider the issuance, amendment or revocation of an order or regulation.

Under the section, the Federal Reserve Board may conduct a public hearing or investigation to determine if the petition should be granted. If the Fed fails to grant a petition, appeal lies to the United States District Court.

Where the Fed grants a petition to commence a proceeding to consider the issuance, amendment or revocation of an order, the proceeding must be conducted in full accordance with the requirements of the Administrative Procedure Act.

Facts which warrant the issuance, amendment or revocation of an order or regulation include (1) a finding that the activities of a bank holding company no longer conform to the scope of the activity for which Board approval was originally given, (2) a finding that such activities no longer conform to new or amended Fed orders or regulations or judicial determinations, (3) a finding that such activities have ceased to produce substantial benefits to the public, or (4) a finding that such activities otherwise violate the standards established under section 4(c)(8).

Section 701 has the dual purpose of (1) providing consumers with a mechanism to call to the attention of the Fed errant behavior on the part of the bank holding companies and (2) requiring the Fed to exercise positive responsibility for the ongoing supervision of bank holding company section 4(c)(8) activity.

Section 801. Establishes an effective date for the Act 90 days after the date of enactment.

By Mr. PROXMIRE:

S. 73. A bill to prohibit interlocking management and director relationships between depositary institutions; to the Committee on Banking, Housing and Urban Affairs.

DEPOSITARY INSTITUTIONS MANAGEMENT INTERLOCKS ACT

Mr. PROXMIRE. Mr. President, I am today introducing legislation for reference to the Committee on Banking, Housing and Urban Affairs which will prohibit management interlocks between financial institutions. This legislation was recommended in the 1975 annual report of the Board of Governors of the Federal Reserve System.

The legislation, titled the "Depositary Institutions Management Interlocks Act" prohibits interlocking management and director relations between all depositary institutions located in the same metropolitan statistical area or within 50 miles of each other. This prohibition would apply without regard to geographical limits to depositary institutions with assets of over $1 billion which seek interlocking relationships with any other such institutions whose assets are over $500 million. The term depositary institution is defined to include commercial banks, savings banks, trust companies, savings and loan associations, and credit unions. Therefore, management and director interlocks between such institutions would be covered by the bill.

In my judgment this legislation if passed will have highly beneficial effects. Credit is a sometimes scarce and always a very valuable commodity. Indeed, credit comes as near as any one thing to being the lifeblood of a community. Where small groups of individuals are able to control various types of lending institutions in a community by interlocking relationships, the public suffers. Credit tends to flow to favored customers and interlocking relationships place individuals in conflicting relationships and competition is diminished. This bill will put an end to such anticompetitive practices.

Mr. President, I ask that Chairman Burns' letter dated September 28, 1976, recommending and explaining the legislation be printed in the RECORD along with the text of the bill.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 73

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Depositary Institutions Management Interlocks Acts."

DEFINITIONS

SEC. 2. (a) The term "depositary institution" means a commercial bank, a savings bank, a trust company, a savings and loan association, a building and loan association, a homestead association, a cooperative bank, an industrial bank, or a credit union.

(b) The term "depositary holding company" means a bank holding company as defined in Section 2(a) of the Bank Holding Company Act of 1956, or a savings and loan holding company as defined in Section 408 (a) (1) (D) of the National Housing Act.

(c) The characterization of any corporation (including depositary institutions and depositary holding companies), as an "affiliate of," or as "affiliated" with any other corporation means that:

(i) one of the corporations is a depositary holding company and the other is a subsidiary thereof, or both corporations are subsidiaries of the same depositary holding company, as the term "subsidiary" is defined in either section 2(d) of the Bank Holding Company Act of 1956 in the case of a bank holding company or section 408(a) (1) (H) of the National Housing Act in the case of a savings and loan holding company; or

(ii) more than 50 per cent of the voting stock of one corporation is beneficially owned in the aggregate by one or more persons who also beneficially own in the aggregate more than 50 per cent of the voting stock of the other corporation, excluding from the computation of each aggregate the voting stock held by any person who owns less than 5 per cent of the voting stock of the corporation.

(d) The term "management official" means an employee or officer with management functions, a director (including an advisory or honorary director), a trustee of a business organization under the control of trustees, or any person who has a representative or nominee serving in any such capacity.

(e) The term "office" used with reference to a depositary institution means either a principal office or a branch.

INTERLOCKS PROHIBITED

SEC. 3. A management official of a depositary institution or a depositary holding company may not serve as a management official of any other depositary institution or depositary holding company not affiliated therewith if an office of one of the institutions or any depository institution that is an affiliate of such institutions is located within either

(a) the same standard metropolitan statistical area as defined by the Office of Management and Budget, or

(b) 50 miles of an office of the other institution or any depositary institution that is an affiliate of such other institution.

SEC. 4. If a depositary institution or a depositary holding company has total assets exceeding $1 billion a management official of such institution or any affiliate thereof may not serve as a management official of any other nonaffiliated depositary institution or depositary holding company having total assets exceeding $500 million, or as a management official of any affiliate of such other institution.

SEC. 5. The prohibitions contained in section 2, 3, and 4 shall not apply in the case of any one or more of the following or any branch thereof:

(a) A depositary institution or depositary holding company which has been placed formally in liquidation, or which is in the hands of a receiver, conservation, or other official exercising a similar function.

(b) A corporation operating under section 25 or 25A of the Federal Reserve Act.

SEC. 6. A person whose service in any given position as a management official was not prohibited by this Act at the time of the beginning of such service is not prohibited by this Act from continuing to serve in that position for a period not exceeding 15 months after any change in circumstances, other than the coming into effect of this Act, which would make such service prohibited by this Act.

ENFORCEMENT

SEC. 7. This Act shall be administered and enforced by:

(a) The Comptroller of the Currency with respect to national banks and banks located in the District of Columbia,

(b) The Board of Governors of the Federal Reserve System with respect to State banks which are members of the Federal Reserve System, and bank holding companies,

(c) The Board of Directors of the Federal Deposit Insurance Corporation with respect to State banks which are not members of the Federal Reserve System but the deposits of which are insured by the Federal Deposit Insurance Corporation,

(d) The Federal Home Loan Bank Board with respect to Federal savings and loan associations and institutions the accounts of which are insured by the Federal Savings and Loan Insurance Corporations and savings and loan holding companies,

(e) The National Credit Union Administration with respect to Federal credit unions and institutions the accounts of which are insured by the National Credit Union Administration, and

(f) The Department of Justice for all other institutions.

CONFORMING AMENDMENTS

SEC. 8. The following provisions of the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914 (Clayton Act, 38 Stat. 732, as amended) are repealed:

(a) The first three paragraphs of section 8 (15 U.S.C. 19);

(b) The words "bank or other" in the last paragraph of section 8 each time they appear; and

(c) The words "in the Federal Reserve Board where applicable to banks, banking associations, and trust companies;" in section 11(a) (15 U.S.C. 21).

SEC. 9. (a) Section 8(e) of the Federal Deposit Insurance Act (12 U.S.C. 1818(e)) is amended by adding at the end thereof the following new paragraph:

"(9) For the purpose of enforcing any law, rule, regulation, or cease-and-desist order in connection with an interlocking relationship, the term 'officer' as used in this subsection means an employee or officer with management functions, and the term 'director,' includes an advisory or honorary

director, a trustee of a bank under the control of trustees, or any person who has a representative or nominee serving in any such capacity."

(b) Section 5(d) of the Homeowners' Loan Act (12 U.S.C. 1464(d)) is amended by adding at the end thereof the following new paragraph:

"(15) For the purpose of enforcing any law, rule, regulation, or cease-and-desist order in connection with an interlocking relationship, the term 'officer' as used in this subsection means an employee or officer with management functions, and the term 'director' includes an advisory or honorary director, a trustee of an association under the control of trustees, or any person who has a representative or nominee serving in any such capacity."

SEC. 10. The Board of Governors of the Federal Reserve System may prescribe such rules and regulations, including authorization for a management official of a depositary institution to serve as a management official of any other depositary institution, as are consistent with the purposes of this Act and necessary to effectuate those purposes and to prevent evasion of this Act.

SEC. 11. This Act shall take effect five years after the date of enactment.

CHAIRMAN OF THE
BOARD OF GOVERNORS,
FEDERAL RESERVE SYSTEM,
Washington, D.C., September 28, 1976.

Hon. WILLIAM PROXMIRE,
Chairman, Committee on Banking, Housing and Urban Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The Board of Governors of the Federal Reserve System is pleased to reply to your request for appropriate language to carry out the Board's recommendation contained in its Annual Report for 1975 for changes in the law regarding interlocking relationships between depositary institutions. A proposed bill is enclosed, the principal provisions of which are explained below.

Section 8 of the Clayton Act (15 U.S.C. 19) at present prohibits interlocking personnel relationships between a member bank and another bank located in the same or a contiguous or adjacent community. After a special review of interlocking bank relationships by the Reserve Banks and Board staff, the Board concluded in 1970 that expansion of the prohibition to cover all depositary institutions is justified. The need for this broadening of the prohibition has increased over the years as the range of powers of institutions has expanded and their roles as financial intermediaries have become somewhat more alike.

Interlocking directorates are not necessarily harmful. They can benefit the corporations involved and the public they serve by facilitating the free interchange of advice, ideas, and experiences among directors of the varied backgrounds that are necessary to maintain high standards of performance by boards of directors. The Clayton Act recognizes this fact in its design to prohibit only those interlocks that tend to diminish or eliminate competition.

However, interlocking relationships between institutions that compete for the funds of the public involve a risk of abuse that the Board believes outweighs the reasonable expectation of benefits that might flow from such relationships. This reasoning is valid not only with respect to relationships between member banks and other banks. It is equally applicable to interlocking management personnel relationships between any institutions engaged in the business of receiving deposits that may be in competition with each other: member bank, nonmember bank, savings and loan association, mutual savings bank, industrial bank, credit union, or other similar institution, whether or not its deposits are insured by a Federal agency.

The proposed bill is drafted as a separate Act, applicable to all despositary institutions (Section 1), rather than as an amendment to Section 8 of the Clayton Act. However, the banking sections of Section 8 would be repealed (Section 8).

The draft would apply the prohibitions to all depositary institutions and holding companies for depositary institutions (Section 5(a)(b)). In order to avoid time-consuming determinations of whether two communities are adjacent to one another, now required under Section 8 of the Clayton Act, the prohibitions are applied on a combination of market area and distance. Specifically, any interlock between institutions located in either the same standard metropolitan statistical area or within 50 miles of each other would be prohibited (Section 2). This limitation is supplemented by a prohibition against any interlock between an institution exceeding $1 billion in total assets and another exceeding $500 million in total assets (Section 3).

Section 8 of the Clayton Act at present exempts interlocks between banks under common control. Thus, the prohibition does not apply to a holding company and its subsidiaries or to two subsidiaries of the same holding company. In addition, the exemption applies whenever the same persons own 50 per cent of the stock of two institutions. As a result, the prohibitions of the Act can be evaded by exchange of a few shares of stock between two persons where one owns more than 50 per cent of the shares of one depositary institution and the other owns more than 50 per cent of the shares of another depositary institution. To correct this problem the proposed bill, while continuing the common control exemption, would eliminate shareholders of less than 5 per cent from the computation of the 50 per cent common ownership (Section 5(c)(ii)).

Section 8 of the Clayton Act at present applies to interlocking service as a "director, officer or employee." To avoid unnecessarily prohibiting interlocking relationships between depositary institutions that do not present significant potential for diminishing competition, the attached draft does not prohibit interlocking service by an employee or officer unless he performs management functions for one of the institutions involved (Section 5(d)).

The prohibition would be administered and enforced by the Comptroller of the Currency for national banks, the Board of Governors for State member banks, the Federal Deposit Insurance Corporation for nonmember insured banks, the Federal Home Loan Bank Board for insured savings and loan associations, the National Credit Union Administration for insured credit unions, and the Department of Justice for all other institutions (Section 7). The respective government agencies will use their existing powers for enforcement purposes.

It is not contemplated that extensive regulation would be required to enforce the revised interlock prohibition. However, as a precaution, general regulatory authority is conferred on the Board of Governors. In addition, the Board would have authority to prescribe regulations, consistent with the purposes of the Act, that would permit some interlocks (Section 10). This is appropriate in our view since Section 8 of the Clayton Act now permits the Board to authorize one interlock and the Board's Regulation L now authorizes an interlock between institutions in the process of consolidation or merger and an interlock with an institution in a low income area that is in need of managerial skills. Other situations may arise in the future that would warrant special treatment and where more than one interlock would be desirable. For example, it is possible that the authorization of some interlocks involving an established depositary institution and a small depositary institution or newly established depositary institution for a limited period of time might foster rather than diminish competition.

The draft bill provides five years for phasing out existing interlocks (Section 11). The Board believes that making the legislation effective at an earlier time would be unnecessarily disruptive to institutions in their efforts to maintain qualified management and directors.

The Board urges introduction and enactment of the draft bill. Please let us know if we may be of assistance to you or your Committee's staff in connection with this legislative proposal.

Sincerely yours,

ARTHUR F. BURNS.

By Mr. BUMPERS:

S. 74. A bill to amend the Act of October 20, 1976, relating to payments to local governments based upon certain public lands within the boundaries of the jurisdiction of such governments, to include payments for lands on which certain semiactive or inactive military installations are located; to the Committee on Interior and Insular Affairs.

PAYMENTS TO LOCAL GOVERNMENTS WHERE INACTIVE MILITARY INSTALLATIONS ARE LOCATED

Mr. BUMPERS. Mr. President, the Federal Government owns approximately 1,027,094 acres of land that are designated by the Army as semiactive or inactive installations and are retained by the Army for mobilization purposes or for support of Reserve component training. These are inactive military installations which are tax exempt in the following counties and States:

Installation and county	Acreage
Fort Pickett, Va.:	
Brunswick	8,397
Dinwiddie	12,030
Mottoway	24,499
Total	44,926
Fort A.P. Hill, Va.: Caroline	77,028
Fort Indiantown Gap, Pa.: Lebanon	64.3
Fort Drum, N.Y.:	
Jefferson	104,426
Lewis	2,839
Total	107,265
Fort McCoy, Wis. Monroe	59,228
	551
Total	58,779
Fort Chaffee, Ark.:	
Sebastian	59,635.91
Franklin	10,857.43
Crawford	261.52
Total	70,754.86
NG Camp Roberts, Calif.:	
San Luis Obispo	35,040.91
Monterey	17,290
Total	42,330.91
Fort Irwin, Calif.: San Bernardino	621,459.02
Branch USDB, Lopmoc, Calif.: Santa Barbara	3,159.19

The tax immunity of these public lands places an unfair burden on the taxpayers within the counties and local government units where the lands are located.

The Public Land Law Review Commission best summed up the problem with this recommendation:

If the national interest dictates that lands should be retained in federal ownership, it is the obligation of the United States to make certain that the burden of that policy is spread among all the people of the United States and is not borne only by those states and governments in whose area the lands are located.

Therefore, the federal government should make payments to compensate state and local governments for the tax immunity of federal lands.

Recognizing this responsibility in the last session, Congress passed Public Law 94–565, the Payments in Lieu of Taxes Act, in order to partially compensate States and local governments for the impact of Federal ownership.

When the Senate Interior Committee considered this act late in the session, the committee unanimously recommended that counties where semiactive or inactive Army installations are located were entitled to payments under the payments in lieu of taxes bill.

However, this amendment and all of the other amendments which had been added in the Senate Interior Committee were not considered by the full Senate when the House bill, H.R. 9719, was brought to the floor. If the amendments had been passed, the legislation would have been returned to the House for concurrence, and that would have effectively defeated the bill during the waning hours of the session.

The legislative history of the Payments in Lieu of Taxes Act is important because I am introducing today a bill which will provide for payments to those counties where semiactive military installations are located.

Mr. President, in many ways the counties where the inactive military installations are located have experienced a greater hardship than counties entitled to payments under the Payments in Lieu Act. Most of these counties prospered when the bases were active and have had nothing to replace this revenue when the bases have been closed.

Not only do the county governments lose essential revenue because of the base closing, but the public schools in the counties are no longer entitled to impact aid, which is financial assistance for local education in areas affected by Federal activity through 20 U.S.C. 236 et seq.

Over the years, the Congress has established programs to partially compensate States and local governments for the impact of Federal ownership, but in most cases the revenues that they receive do not approach what would be received from property taxes if these lands were in private ownership.

Mr. President, I consider this bill a long overdue step toward solving a problem that is straining the fiscal health of those local governments and school districts where inactive military installations are located.

Mr. President, I ask unanimous consent that my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 74

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6(a) of the Act entitled "An Act to provide for certain payments to be made to local governments by the Secretary of the Interior based upon the amount of certain public lands within the boundaries of such locality," approved October 20, 1976 (90 Stat. 2662), is amended by redesignating clauses (4) and (5) as clauses (5) and (6), respectively, and adding after clause (3) a new clause (4) as follows:

"(4) lands on which are located semiactive or inactive installations, not including industrial installations, retained by the Army for mobilization purposes and for support of reserve component training;".

By Mr. INOUYE:

S. 75. A bill to authorize reduced postage rates for certain mail matter sent to Members of Congress; to the Committee on Post Office and Civil Service.

Mr. INOUYE. Mr. President, I rise today to introduce a bill to provide for the issuance of a special 1-cent postage stamp to be used for corespondence with Members of Congress.

The introduction of this legislation emanates from my firm belief that the essence of our democratic system is the continuing operation of a two-way communication system between the people of this country and their elected Representatives.

Each Member of Congress is directly responsible to those people in his State or district whom he represents. He must not only keep communication channels open, but more importantly, he must be responsive to the opinions he receives through these channels. The most practical means of transmitting these signals is through the mail. It is most difficult for many of us to imagine ourselves in a situation where the desire to express an opinion is frustrated because we must think twice about spending money on a postage stamp. Unfortunately, we must face the fact that many of our Nation's citizens are forced to consider the purchase of postage stamps for the purpose of expressing a grievance to their Representatives as something beyond their means.

The issuance of a 1-cent stamp for this purpose would effectively remove this prohibition and allow all citizens to advise their Representatives of their individual opinions on the issues facing our Nation. I cannot overestimate the importance of this concept of individual expression. Every citizen has the right and the responsibility to participate in the democratic system through both the ballot box and the use of correspondence. This measure would amend the Postal Reform Act of 1970 to provide for the issuance of these 1-cent stamps to be sold only at U.S. post offices. The bill also authorizes appropriations necessary to account for the difference in postal revenue resulting from the sale of 1-cent stamps as opposed to prevailing postage rates for mail matter addressed to Congressmen, which does not exceed 4 ounces in weight. In view of the franking privileges available to Members of Congress, this measure would effectively equalize the treatment of mail from both the Congress and its constituency.

By Mr. STONE (for himself, Mr. INOUYE, Mr. WILLIAMS, Mr. HUMPHREY, Mr. CASE, Mr. GRAVEL, Mr. METCALF, Mr. GOLDWATER, Mr. MCINTYRE, and Mr. ABOUREZK):

S. 76. A bill to amend title XVIII of the Social Security Act to authorize payment under the medicare program for certain services performed by chiropractors; to the Committee on Finance.

Mr. STONE. Mr. President, today I am reintroducing legislation which will extend the coverage of chiropractic services under medicare. This bill had the support of 21 Senators last Congress and merits further consideration.

The medicare program already recognizes chiropractice health care as a reimbursable expenditure. However, I see two important inequities in the present system.

Current regulations limit reimbursable chiropractic services to treatment of subluxation—partial disclosures. They mandate the use of X-rays for diagnosis and specifically limit treatment to manual manipulation of the spine, yet medicare will not pay for the mandatory diagnostic X-rays.

The logic behind these regulations eludes me. Partial dislocation can often be diagnosed without the use of X-rays. In fact, exposing the patient to unnecessary radiation can often have a detrimental effect on their condition. In addition, since medicare does not consider this mandatory X-ray a reimbursable cost, many medicare recipients are discouraged from receiving proper medical attention. Limiting coverage to one specific treatment results in the patient incurring the cost of all diagnostic tests as well as any other necessary treatment. This additional financial burden is often enough to discourage further medical care.

The legislation I propose will correct this situation. It will both eliminate the mandatory use of X-rays and include, under medicare coverage, additional methods of treatment and diagnosis. By removing unnecessary limitations which now apply to this field, S. 76 will afford chiropractic patients the same benefits that medicare recipients now receive.

These amendments are in complete accord with those adopted in the 1975 Federal Employees Compensation Act (Public Law 93–416). Medicare recipients have a right to quality health care including chiropractic treatment. It is time we allow the doctor to treat his patients appropriately without being limited by a reimbursable cost clause.

I have included a cost analysis of this proposal and ask that it be printed in the RECORD. I am pleased to introduce this amendment to title VIII of the Social Security Act and urge its timely adoption.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

ST. LOUIS, MO.,
November 1, 1976.

Mr. HARRY N. ROSENFIELD,
Washington Counsel, American Chiropractic Association, Washington, D.C.

DEAR HARRY: David R. McKusick, F.S.A., Director of Health Insurance Studies in the Office of the Chief Actuary of S.S.A., very kindly provided me with the backup assumptions and calculations which led to the $45,000,000 cost estimate for H.R. 11290 cited in the March 12, 1976 memo from Haeworth Robertson to Congressman Corman. A copy of Mr. McKusick's letter to me, dated July 1, 1976, is enclosed.

I have carefully studied the various assumptions and figures outlined in Mr. McKusick's letter, and I believe there are a number of points at which the assumptions and values lead to substantial over-estimation of the probable cost. The key items are as follows:

1. The S.S.A. estimate assumes that 4% of the 21.9 million aged, or 0.9 million persons, would use chiropractic services if covered. This compares to their estimate of only ⅓ this number, or 0.3 million, currently being reimbursed under present law.

This 4% assumption is in my opinion much too high, even though it happens to be *identical* to the 4% utilization rate I ended up with in my 1969 study of the legislation being proposed at that time. It was drawn from some of the same sources I utilized in my own study, indicating that approximately 3% of the aged used chiropractic services nationally, whereas in California 5% utilized chiropractic services in an "insured setting." What is overlooked here is that the ratio of chiropractors to population in California, at the time of the California study, was more than twice the national ratio. Hence the utilization rate, under an "insured setting" in California, which involved zero deductible first dollar coverage, was actually less than the national rate, when viewed in proportion to the *relative supply* of chiropractors.

Secondly, if we can accept Mr. McKusick's estimates of the actual incidence of chiropractic care under *present law*, he is projecting that the utilization rate will triple under the liberalized coverage proposed under H.R. 11290. Such an enormous increase is highly unlikely.

I do not believe that any real justification exists for projecting anything above the 3%, which would translate into 0.66 million utilizers among the 21.9 million aged, under Medicare with a $60 Part B Deductible and 80% coverage above that.

2. Mr. McKusick's estimated additional costs are subject to the same flaw that we *invariably* encounter in outside estimates of "additional" chiropractic costs: namely, that no offset against alternative forms of already covered treatment is assumed. The entire amount of additional chiropractic benefits is assumed to be *100% additional net cost* to the program.

This is not reasonable, since it depends on the assumption that there will be no shift at all, from other presently covered alternative treatment, over to chiropractic treatment once the latter becomes more adequately covered. Putting this another way, it assumes that those additional persons who will utilize chiropractic services, under the liberalized benefits, are currently obtaining no care at all from other practitioners, or else are currently simply not submitting their expenses. I believe this is a highly unrealistic assumption. Surely there will be substantial offset against alternative services presently covered. Moreover, since it has been well documented that total cost of treatment, under chiropractic care, is less than total cost under alternative forms (on the order of 70 to 80%), wherever a shift to chiropractic care occurs there will not only be an *offset*, but a *savings* in addition to the offset.

My earlier study estimated that roughly 15% of the total utilizers were to be *offset* utilizers, and, with the added savings, we can reasonably assume that roughly 20% of the chiropractic cost estimate will be offset plus savings.

3. The S.S.A. estimate assumes that among the 0.3 million already receiving covered care, the cost of the additional covered charges would average $60 per person ($20 exam, $25 x-rays and $15 lab), leading to $48 additional Medicare benefits per reimbursee. Surely not *every* claim would involve x-rays, since part of the object of H.R. 11290 is to eliminate the specific requirement of x-ray diagnosis. In any case, I think this total of $60 is too high, and more reasonably should be estimated as about $35, 58% of the S.S.A. estimate.

4. In dealing with the potential additional 0.6 million utilizers, the S.S.A. estimate assumes that 0.3 million incur exam only, the other 0.3 million exam, x-ray and lab (all 3), and that 0.2 million are actually treated. This is all added up to $42 million additional "covered charges". Again, I think the projected incidence of services is too high. Using my number of potential utilizers, 0.36 million (Item #1, above), a more realistic projection would be:

100% receive at least an exam ($15 average)

33% receive an x-ray ($25 average)

20% receive a lab test ($15 average)

50% receive treatment, at a $75 average treatment cost, vs. $90 for present recipients, since certainly the average severity would be less among these additional utilizers (and, finally, we would discount 20% of this total additional cost as offset and savings, per item #2 above)

5. Finally, the S.S.A. estimate assumes that actual Medicare reimbursement would be about ⅔ of covered charges, after applying the deductible and coinsurance, the same as for Part B claimants generally. A similar assumption was made in the 1969 S.S.A. cost estimate, and, in my responding critique of that estimate, I went to considerable pains to explain why it is not appropriate to assume the same ratio for these chiropractic expenses. In the 1969 estimates, S.S.A. assumed a ratio of 63%. My own estimate was 36%, against the $50 Deductible then in effect. Now, against a $60 Deductible, I think a similar relative ratio remains appropriate, that is ⅔ or 67%, ×36/63, or 38.3%, and let's round that *upward* to 40%.

Cost Estimate. Translating these several modifications into dollars, I then get the following:

1) Additional Medicare liability on 0.3 million current utilizers:

$35 covered charge per recipient, or $28 Medicare liability per recipient = $8,400,000.
(Vs. 14,000,000 S.S.A. estimate)

2) New Medicare liability on 0.36 million additional users:

	Covered charges
100% Exams, at $15 average	$5,400,000
33% x-rays, at $25 average	2,970,000
20% lab tests, at $15 average	1,080,000
50% treated, at $75 average	13,500,000
Total covered chiropractic charges	22,950,000

(Vs. $42,000,000 S.S.A. estimate)

Next, I estimate 20% reduction against this, because of offset and alternate cost savings, leaving: $18,360,000.

Next, I estimate that 40% of this will actually become Medicare liability, or $7,340,000.

I thus obtain $15,740,000 as added Medicare liability among the aged, and adding to this 15% for the disabled, assuming higher severity (vs. 10% in the S.S.A. estimate), I finally obtain, as total additional projected Medicare liability, $18,100,000, over the first full year, compared to the $45,000,000 estimated by S.S.A., according to Haeworth Robertson's March 12, 1976 memo to Congressman Corman.

Sincerely,
E. PAUL BARNHART, F.S.A., M.A.A.A.

By Mr. MATHIAS:

S. 77. A bill to amend title II of the Social Security Act to increase the annual amount which individuals may earn without suffering deductions from their social security benefits, and to provide a graduated reduction in benefits for widows and widowers who remarry; to the Committee on Finance.

SOCIAL SECURITY ACT AMENDMENTS

Mr. MATHIAS. Mr. President, I send to the desk S. 77, a bill to amend the Social Security Act so as to provide more equitable treatment for elderly Americans.

Perhaps the cruelest feature of the Federal Government's policies affecting older Americans are the restraints on the elderly's freedom to make the most elementary personal decisions, such as whether or not to remarry or to take a job. Our social security laws make those decisions very costly ones for the elderly. Remarriage for some widows means an immediate 50-percent reduction in social security benefits. And earned income above $3,000 annually, other than interest on dividends, means a reduction in social security benefits.

The real cost to the elderly is the loss of dignity. Older couples may be forced to live together without being married or to avoid a rewarding relationship because the immediate loss of their combined income would be too burdensome for already severely strained finances. A job, which may be fulfilling for an older person, as well as a relief to a tight budget, must be weighed against the extremely low penalty level for earned income.

Older Americans deserve a more thoughtful and sensitive public policy. Social security is a deserved right for people who have made their lives' contributions. The rules should be designed to preserve the humanism and respect which the retirement system was created to maintain.

I am introducing legislation which amends the Social Security Act in order to eliminate these obstacles to free choice. The act now requires that men and women receiving widow's or widower's benefits lose them immediately upon remarriage. My bill would amend the act to eliminate any immediate penalty for remarriage. It would require that benefits derived from a former marriage be gradually eliminated over a 5-year period. I recognize that to ignore remarriage completely for purposes of those benefits would result in a permanently unequal situation between remarried widows or widowers and those people in their first marriage. My bill would permit an equitable solution to this dilemma by allowing for a gradual adjustment to a lower combined income as a couple begins to fully realize the economic benefits of a single household.

My bill also raises the penalty level on earned income from $3,000 to $5,040 annually. The penalty now takes $1 out of retirement benefits for every $2 earned above the $3,000. This bill retains the same 1-for-2 formula, but it raises the income level to

an amount which allows the older person a much freer choice among a variety of employment opportunities.

Mr. President, I ask unanimous consent that the provision of the bill I am introducing today be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 77

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraphs (1), (3), and (4)(B) of section 203 (f) of the Social Security Act are each amended by striking out "$200" and inserting in lieu thereof "$420".

(b) Paragraph (1)(A) of section 203 (h) of such Act is amended by striking out "$200" and inserting in lieu thereof "$420".

SEC. 2. Paragraph (4) of section 202 (e) of such Act is amended to read as follows:

"(4) If a widow, otherwise eligible under paragraph (1), marries an individual (other than one described in subparagraph (A) or (B) of paragraph (3)), such marriage shall, for purposes of paragraph (1), be deemed not to have occurred; except that, notwithstanding the provisions of paragraph (2) and subsection (q), such widow's insurance benefit shall be reduced over a five-year period, commencing with the year following the year of such marriage, until such insurance benefit equals one-half of the primary insurance amount of the deceased individual on whose wages and self employment income such benefit is based. The reduction shall be prorated over the five-year period in a manner which will insure that the yearly reductions are as equal as possible, taking into consideration any changes which occur in the primary insurance amount during the five-year period. The insurance benefits shall be restored to the full primary insurance amount in the month in which the husband dies or such marriage is otherwise terminated.".

SEC. 3. Paragraph (5) of section 202 (f) of such Act is amended to read as follows:

"(5) If a widower otherwise eligible under paragraph (1), marries an individual (other than one described in subparagraph (A) or (B) of paragraph (4)), such marriage shall, for the purposes of paragraph (1), be deemed not to have occurred; except that, notwithstanding the provisions of paragraph (3) and subsection (q), such widower's insurance benefit shall be reduced over a five-year period, commencing with the year following the year of such marriage, until such insurance benefit equals one-half of the primary insurance amount of the deceased individual on whose wages and self employment income such benefit is based. The reduction shall be prorated over the five-year period in a manner which will insure that the yearly reductions are as equal as possible, taking into consideration any changes which occur in the primary insurance amount during the five-year period. The insurance benefits shall be restored to the full primary insurance amount in the month in which the wife dies or such marriage is otherwise terminated.".

SEC. 4. (a) The amendments made by the first section of this Act shall be effective with respect to taxable years beginning after December 31, 1976.

(b) The amendments made by sections 2 and 3 of this Act shall apply with respect to marriages occurring more than ninety days after the date of enactment of this Act.

By Mr. STONE:

S. 78. A bill to amend title II of the Social Security Act to provide that the provisions thereof requiring deductions from benefits on account of excess earnings shall not be applied to any individual, if and to the extent that the application of such provisions would reduce the individual's annual income, in the form of earnings and social security benefits, to less than $7,800 (which amount shall be annually adjusted to reflect increases in the cost of living); to the Committee on Finance.

Mr. STONE. Mr. President, I am introducing today a bill designed to correct a glaring inequity in the present social security system.

This inequity is the penalty imposed on social security recipients who continue to work. This penalty exists despite the fact that people receiving unearned income, such as investment dividends and interest, are not similarly penalized.

The bill that I am introducing would have the effect of permitting social security recipients to receive up to $7,800 per year from working before social security benefits are reduced on account of "excess earnings." This amount would be adjusted annually to reflect increases in the cost of living.

Under present law, the social security recipient who is between 65 and 72 years of age is denied $1 in social security payments for every $2 earned over $3,000 a year. This means that a social security beneficiary who receives the average $206.58 monthly payment loses all social security benefits if he or she earns $7,717 in a year.

This provision forces many senior citizens who are able and willing to work, to retire or limit drastically their earnings in order to receive social security benefits. This is a terrible injustice to American working men and women who have been led to believe that social security benefits will be paid to them as a matter of right when they reach a certain age. This right is earned by years and years of payroll deductions and matching payments by employers.

In view of the continuing rise in the cost of living, we must recognize that social security alone does not provide enough money for many people to live on. We should remove the legal barrier for those who can help provide for themselves. Can we afford to waste the specialized skills of our senior citizens by discouraging them from working? Do we wish to force our senior citizens to live unproductive lives when they have further energy and ambition? I do not think so.

This bill would not be a windfall for high income people. Their benefits would be reduced or eliminated as their income increases above the $7,800 level. Rather, this bill is tailored to assist the millions of average income older Americans who remain able to work and who need to work.

Congress originally intended social security to be a supplemental security program. People were encouraged to add to their social security protection through private pension plans, savings, and continued employment. At present, however, the law nearly forces people to fall into the ranks of the indigent in order to receive benefits. This bill would reaffirm Congress original intent.

By Mr. HELMS (for himself, Mr. MCCLURE, Mr. DOMENICI, Mr. STONE, Mr. CANNON, and Mr. LAXALT):

S. 79. A bill to restore the freedom to use gold clauses in contracts; to the Committee on Banking, Housing and Urban Affairs.

GOLD CLAUSE CONTRACTS—OVERDUE REFORM

Mr. HELMS. Mr. President, last year, the Senate leadership was prepared to accept as an amendment to H.R. 13955, the Bretton Woods Agreement Amendments of 1976, my proposal to amend the joint resolution of June 5, 1933, in order to legalize contracts calling for payment in gold or in dollars measured in gold. Because it appeared that an amended version of that bill could not be approved by the House of Representatives before adjournment of the 94th Congress, the Senate passed the House bill without amendment.

I hope we can obtain speedy consideration of this matter in the new, 95th Congress.

The bill I am introducing today would make the Federal code consistent with action Congress took in 1974 to legalize gold ownership. Right now, contracts can be made specifying payment in any commodity—except gold. In this day and age, such a prohibition is anachronistic.

My bill has been endorsed by former Treasury Department Secretary, William E. Simon who states:

I believe this in fact, may be a good time to repeal the Joint Gold Clause Resolution.

Federal Reserve Board Chairman Arthur F. Burns says:

I personally would not object to legislative action that would permit citizens to make contracts containing legally-enforceable gold clauses.

Contracts containing "gold clause" have as a basic purpose, to protect the maker of a loan or the seller of merchandise from having to accept a depreciated medium of exchange. In some ways, it is a form of indexing and a way to avoid the effects of inflation. Congress has long recognized the hardships which inflation causes, and it has adopted legislation which increased the incomes of certain groups as inflation increases the cost of living. These groups include social security recipients, civil service employees, military pensioners, and Members of the U.S. House of Representatives and Senate.

The pertinent law on the books is the joint resolution of June 5, 1933, 31 U.S.C. 463, which prohibited gold ownership and gold clause contracts, "to assure uniform value to coins and currencies of the United States." Since we have no gold "coins" or "currencies," it is doubly anachronistic to keep this provision on the books.

Before the freedom to own gold was restored, the Treasury Department and others predicted that there would be a mad rush to buy gold. This in turn would depress the value of the dollar. That would, in turn, force up the price of imports and inflation would accelerate and

confidence in the dollar would be undermined.

Well, everyone knows that the average American does not keep a gold ingot under his bed, and every economist will point out that buying gold abroad for dollars has the same foreign exchange effect of buying anything else abroad. Yet, Treasury did not propose that we prevent people from owning Volkswagens.

On August 14, 1974, the President signed into law a bill which contained the repeal of that section of the joint resolution concerning the ownership of gold. In a news release dated December 9, 1974, the Treasury declared that gold clause contracts continued to be prohibited even after repeal of the prohibition against gold ownership did not affect the prohibition against contracts containing gold clauses.

Opponents of the restoration of this freedom state that gold clauses could call into question the strength of the dollar and undermine our efforts to control inflation and maintain confidence in our currency. Some discussion of this is in order.

First, we must assume that the opponents are referring to international exchange markets when they refer to the "strength of the dollar." But as most economists agree, the strength or relative value of the dollar in these markets is dependent, in the long run, on the relative rates of inflation in other nations and whether or not the United States is inflating faster or slower—or not inflating at all—compared to other major nations. The strength of the dollar is therefore not related to contracts Americans may enter into, but to relative rates of inflation.

When opponents refer to efforts to control inflation, they perhaps mean efforts by the administration or the entire Federal Government. In the scheme of things, Congress starts the inflation ball rolling with deficit spending. The Treasury is Congress agent and is responsible for selling Federal securities in order to finance the Federal debt. The Federal Reserve Board then acts to ameliorate the effects massive Treasury borrowing has on the economy and pumps money into the system. This causes inflation. If so, the major forces which can undermine efforts to control inflation are the Federal Reserve Board and the big-spending Congress, which requires the Treasury to finance debt. Inflation is not caused by any sort of contract—be it in gold or any other commodity.

Finally, the opponents refer to the maintenance of "confidence in our currency." Confidence in the currency is undermined by its debasement. Debasement is caused by too much money pumped out by the Federal Reserve Board, an action initiated by big-spending Congresses. Confidence in the currency is reflected in the ways people use to cushion themselves from the effects of inflation. Various forms of indexing, including the indexing of congressional salaries, are indications that people—including Members of Congress—do not have a lot of confidence in our currency. The "confidence in our currency," is however, an important issue, since gold clauses, along with other inflation-hedging arrangements, provide an indication of the health of our currency. Gold clauses can give a warning signal that can tell us that Government must cut back and restore balance to the budget. If the Government is inflating, and people seek a refuge, they will adopt this type of device. It is far better to have no inflation and no such devices, but since we have inflation, we should have freedom to cushion its effects.

One of the major indictments against the present prohibition is that it is simply an unreasonable infringement on the rights of Americans. We have been allowed to own gold since 1974, but we are not allowed to use it as we can other commodities. Anyone can enter into agreements which state that a sum of dollars will be paid on a certain date measured in the value of porkbellies or any other commodities. But, because of this archaic provision on the books, we could not use gold as a measure of payment.

In a commentary written by a midlevel Treasury Department aide on this issue, the telling argument against repeal of the joint resolution of 1933 is that the resolution, by prohibiting gold clause contracts, "helps to assure that gold will not assume a monetary role through widespread use in private transactions." It seems, therefore, it is not the economics of the matter that is of concern to Treasury Department folks, it is the particular material affected. Imagine the Treasury Department saying that they wanted to make sure that "peanuts will not assume a monetary role through widespread use in private transactions."

The arguments of the opponents of gold clause freedom rest on two shaky assumptions. The first is that gold clauses in contracts would be "widespread." The only reason for gold clauses in contracts is that they provide a hedge against inflation. Much like the indexing of salaries—such as Congressmen and civil servants now enjoy. The only reason people seek a hedge against inflation is when there is inflation, and the value of the dollar is declining. If that is the case, people should be free to try to protect themselves in any way they see fit. But, will gold clause contracts be "widespread"? I doubt it. Just as gold ownership is not particularly widespread. Or, for that matter, no single inflation-hedge is particularly widespread. In 1974, the Treasury feared the freedom of gold ownership would result in mass purchases of gold ingots. They now seem to fear that gold clause contracts would result in mass amendments to contracts.

Second, opponents seem to view the existence of gold clause contracts as a return of gold to the monetary system. But money must serve as a stable store of value, and a commodity freely traded and subject to the vagaries of the market does not serve as an absolutely stable store of value. The only reason people would choose gold clause contrasts is that the gold market might—just might—provide a better store of value than dollars. That is a subjective judgment. And, people should be free to exercise their judgment in the marketplace. They should be free to hedge against the declining value of the dollar in any medium they choose. As long as gold is subject to market swings, and to the sort of market manipulations such as the sales of gold by the International Monetary Fund, it is stretching things to say that gold would be used as money. It is a further reach to say that gold clauses in contracts means gold is assuming a monetary role.

I believe that reasonable men would agree with the arguments.

The contradictory aspects of the present situation has attracted the attention of legal experts. For example, Prof. Gerald Dunne, editor of the Banking Law Journal, is of the opinion that the present prohibition of gold clause contracts is legally inconsistent with the present right to own gold. In his paper, "Gold Clause Prohibition Derelict of the Law," Professor Dunne states that a court ruling made in Williams against Standard Oil would require that the gold clause prohibition be declared void. In that case, the court stated:

> The remaining portions of the act, seeming merely to facilitate or contribute to the consummation of that purpose must also fail.

In other words, once Congress repealed the prohibition against gold ownership, gold clauses cannot consistently be prohibited.

There are other legal opinions, of course. Congress should remove all doubt about this issue by a simple amendment to the present law. Professor Dunne's arguments and the court's past ruling are clear and their validity should encourage Congress to act.

Another aspect of this issue is that the prohibition against using gold clauses applies only for Americans dealing with Americans since there is no recourse in U.S. courts. As a result, rich individuals with foreign dealings or multinational corporations can make contracts abroad containing gold clauses, because other nations' courts will enforce such contracts. But, because gold clauses are not enforceable here the average American and the average domestic company cannot as a practical matter enter into these contracts containing gold payment clauses.

Gold clauses in contracts, bonds, and other loan instruments, would be extremely attractive to some borrowers and lenders. For example, it is fully possible that a bond with a gold clause could be sold at 5 percent interest, while one without would require a 10-percent rate of interest. One attorney who works with electric utility companies told me of the high interest rate inflation requires for utility securities. He states that—

> Your bill would obviate the investors' need for such compensation, the utilities would be able to obtain capital funds at a much lower cost, and that lower cost would be reflected in lower utility rates to the public.

Those investors who recognize gold as a standard of value would not demand an inflation "cushion" in the interest

rate they would require for an investment.

What some London school economists appear to object to is the concept that gold represents a standard of value against which the dollar can be measured. Gold has obvious faults in this regard, but many people regard it as a good measure; and it is an arbitrary and excessive exercise of power for our democratic Government to deprive people of the right to such a standard, whatever it might be.

As I mentioned, the Congress itself has adopted legislation which inflation-proofs its own salaries, and thus protects itself in a very concrete way. It seems strangely inconsistent for Congress to deny private individuals a right to avoid the effects of inflation in ways of their own choosing.

Supporters of the gold clause prohibition in the bureaucracy of the Treasury Department seem to forget that our common enemy is inflation—not gold, gold clauses, pork-belly prices, peanut futures, or the price of any other commodity.

What is difficult to determine is whether the bureaucrat and the supporters of the prohibition are afraid of gold or whether they are afraid of people. Regardless, that fear has only one basis, and that is a standard of value—be it gold or some other commodity or index—will indicate when the Government is debasing the currency.

Since I introduced a bill on this subject in the 94th Congress, S. 3563, none of my arguments have been contested. I am afraid that the status quo is the main thing that the gold clause prohibition has going for it. The other thing is the unnatural fear of gold that all mid-level bureaucrats in the Treasury Department seem to have.

The text of my proposal is slightly different from that of the bill I have previously introduced on this topic. My bill, if approved, will make enforceable, gold clause contracts entered into after the enactment of the bill. It is intended to stand neutral with regard to the enforceability of gold clause obligations issued in the past. It has come to my attention that there is at least one case pending in the courts which would require gold clause bonds issued before the 1933 resolution, be paid in gold. Since this matter is in the courts, I would not want any legislation to prejudice the case one way or another.

Mr. President, I ask unanimous consent that the letters from William Simon and Arthur Burns be printed in the RECORD, and that the text of my bill be printed in the RECORD.

There being no objection, the bill and letters were ordered to be printed in the RECORD, as follows:

S. 79

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the joint resolution entitled "Joint resolution to assure uniform value to the coins and currencies of the United States", approved June 5, 1933 (31 U.S.C. 463), shall not apply to obligations issued on or after the date of enactment of this act.

THE SECRETARY OF THE TREASURY,
Washington, D.C., September 21, 1976.

Hon. JESSE HELMS,
U.S. Senate,
Washington, D.C.

DEAR JESSE: In my letter to you of May 6, I mentioned several concerns I have had with a proposal to repeal the Joint Gold Clause Resolution. I fully agree that gold should be treated like any other commodity and that, at an appropriate time, the legal restriction on gold clauses in contracts should be repealed. I had some question, however, whether this is the best time to repeal the Joint Resolution.

In my earlier letter, I indicated my concern that the monetary role of gold not re-emerge upon repeal of the Joint Resolution through possible widespread use of gold clauses in private transactions. Second, since gold clauses in contracts call into question the strength of the dollar, their widespread use in contracts might undermine our efforts to control inflation.

Upon reflection, I believe this in fact may be a good time to repeal the Joint Gold Clause Resolution. We are well on our way in our efforts to restore stability to the U.S. economy. With a clear U.S. Government commitment to sound fiscal and monetary policies and with a substantially reduced level of inflation, the widespread use of gold clauses by U.S. citizens in their contracts appears unlikely. Moreover, the demonstrated volatility in the price of gold over the last several years makes even more unlikely its use as a measure of value in private transactions.

Therefore, in my view, repeal of the Joint Resolution at this time should not have any undesirable monetary and economic effects.

Sincerely yours,

BILL.

FEDERAL RESERVE SYSTEM,
Washington, D.C., June 2, 1976.

Hon. JESSE HELMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HELMS: I am pleased to respond further to your letter of March 31, 1976, asking for the Board's views on a paper by Professor Gerald Dunne on gold clause contracts.

In December 1974, I testified on behalf of the Board in favor of a bill that would have postponed the date when U.S. citizens would be permitted to deal in gold without a Treasury license. While the Board favored restoring to U.S. citizens the right to deal in gold, it was concerned that removal of restrictions on private trading in gold at that time might have an adverse impact on an already strained financial situation. Fortunately, this did not happen. In the past year and a half our financial institutions and markets have strengthened markedly, and economic recovery is well under way.

In light of the changed circumstances, I personally would not object to legislative action that would permit private citizens to make contracts containing legally-enforceable gold clauses. However, the Board is split on the advisability of such action. Our discussions have suggested that opinions on this subject may vary widely, and that hearings could be helpful in fully exploring the advantages and disadvantages of permitting the use of gold clauses. The Federal Reserve would be pleased to assist the Congress in this deliberation.

Sincerely yours.

ARTHUR F. BURNS.

By Mr. BURDICK:

S. 80. A bill to restore to Federal civilian and Postal Service employees their rights to participate voluntarily, as private citizens, in the political processes of the Nation, to protect such employees from improper political solicitations, and for other purposes; to the Committee on Post Office and Civil Service.

FEDERAL EMPLOYEES' POLITICAL ACTIVITIES ACT OF 1977

Mr. BURDICK. Mr. President, I have submitted to the Senate a bill to significantly amend the so-called Hatch Act in order to provide Federal civilian and postal employees with wider latitude within which to exercise their basic political rights as citizens of the United States.

My bill is virtually identical to legislation which the Congress approved in its last session, though it fell victim to a Presidential veto. Now, I believe, its time has truly come.

The bill would restore to citizens who happen to work for the Government a greater measure of rights to participate, voluntarily, in the political processes by which this Nation, its several States, and local governments within the States determine public policies. I would, at the same time, and by this legislation, strengthen the protection of employees against unwarranted political coercion. In drafting the bill, care has been taken to incorporate provisions which were supported here in the Senate last year, including continuance of the existing prohibitions against political activities for employees in sensitive positions with the Department of Justice, Internal Revenue Service, and Central Intelligence Agency.

Existing law, commonly known as the Hatch Act, dates to 1939 and represents a reaction to abuses which were an outgrowth of a depression economy. As such, the Hatch Act may be viewed as an understandable answer to a then-current problem. It is considerably less understandable in 1977. The time has come to update the law and to restore to Federal employees their birthright as citizens. That is precisely what the bill introduced today would do, with careful attention to the corollary need to insure the public at large against any possibility of future manipulation of the civil service for political purposes.

Mr. President, we are talking about the rights of 2.8 million Americans. They do not differ from any other group of citizens, except by the nature of their employment. There is no earthly reason for continuing to deny them the right to be heard where it counts—in the political councils of their precincts, wards, counties, States, and the Nation.

It is my intention to schedule early hearings on this proposal so that the Senate may again consider what I believe is an overdue bill of rights for Federal employees.

By Mr. INOUYE:

S. 81. A bill to amend the Social Security Act to provide that certain persons, who have innocently entered into a legally defective marriage to an insured individual and have lived with such individual as his husband or wife for at least 5 years, shall be treated, for benefit purposes, as if such marriage had been legally valid; to the Committee on Finance.

Mr. INOUYE. Mr. President, today I am reintroducing a bill to amend the Social Security Act to provide that an individual who has innocently entered into a legally defective marriage to an insured individual, and who has lived with such individual as husband or wife for at least 5 years, shall be treated, for purposes of qualifying for benefits, as if such marriage had been legally valid.

This legislation was promoted by a problem which faced a constituent of mine. Mrs. X had lived with her husband for over 25 years, and then found that she was ineligible for social security benefits even though all agree that she had acted in good faith. To quote the Social Security Administration:

I would like to say at the outset that Mrs. X's case merits sympathy. . . . It would appear that she may have been grossly deceived in 1943, and was, in consequence, inveigled into an invalid marriage by deliberate misrepresentation . . . Since it was determined in February, 1969, that Y is the legal wife of X, only she should be paid wife's benefits for months thereafter.

Thus, after living with her husband for over 25 years, Mrs. X found herself ineligible for social security benefits because she was not legally married.

Mr. President, in reviewing this bill, you will note that both wives will be treated as if their marriage were, in fact, valid. Accordingly, benefits paid to one would not affect the eligibility status or extent of coverage which the other is entitled to receive. Further, a clause is included which would penalize the individual responsible for his deception by reducing his old-age benefit by an amount equal to that paid to his "second" wife.

Mr. President, I hope you will recognize the need which is felt by those who would benefit by this legislation, and will assist in its speedy passage.

I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 81

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a)(1) section 216(h)(1)(B) of the Social Security Act is amended—

(A) in the second sentence thereof, by striking out "The" and inserting in lieu thereof "Except as provided in subparagraph (C), the", and

(B) in the third sentence thereof, by striking out "The" and inserting in lieu thereof "Except as provided in subparagraph (C), the".

(2) Section 261(h)(1) of such Act is further amended by adding at the end thereof the following new subparagraph:

"(C) In the case of any individual who—

"(i) by reason of the provisions of subparagraph (B) has become entitled, for any month, to benefits under subsection (b), (c), (e), (f), or (g) of section 202, on the basis of the wages and self-employment income of any person,

"(ii) by reason of the provisions of the second or third sentence of subparagraph (B) ceases to be entitled to such benefits, and

"(iii) has lived with such person, as such person's husband or wife, for at least 5 years, such individual shall, notwithstanding the provisions of the second and third sentences of subparagraph (B), be deemed to be the husband or wife, or widow or widower, as the case may be, for purposes of entitlement to benefits under subsection (b), (c), (e), (f), or (g) of section 202, on the basis of the wages and self-employment income of such person, in like manner as if such individual had been legally married to such person and was such person's husband or wife, or widow or widower (as the case may be), as determined without regard to subparagraph (B)."

(b) Section 203(a)(3) of such Act is amended—

(1) by inserting "(A)" immediately after "(3)", and

(2) by inserting, immediately before the period at the end thereof, the following: ", and (B) when any of such individuals is a person who would not be entitled to a monthly benefit except for the provisions of section 216(h)(1)(C), the benefit to which such person is entitled on the basis of the wages and self-employment income of such insured individual for such month shall be determined without regard to this subsection, and the benefits of all other individuals who are entitled for such month to monthly benefits under section 202 on the wages and self-employment income of such insured individual shall be determined as if such person were not entitled to benefits for such month".

(c) Section 202(a) of such Act is amended—

(1) in the last sentence thereof by inserting "in the succeeding sentence and" immediately after "Except as provided", and

(2) by adding at the end of such section 202(a) the following new sentence: "In the case of any individual (A) who is entitled for any month to an old-age insurance benefit, (B) whose wife is entitled for such month to a wife's insurance benefit under subsection (b), and (C) on the basis of whose wages and self-employment income another person is entitled, by reason of the provisions of section 203(h)(1)(C), to a wife's insurance benefit under subsection (b), then such individual's old-age insurance benefit for such month shall be reduced (but not below zero) by an amount equal to the wife's insurance benefit of such person (referred to in clause (C)); and any reduction in an individual's old-age insurance benefit under this sentence shall be made after any reduction in such benefit under subsection (q) and after application of section 215(g).".

SEC. 2. The amendments made by this Act shall be effective with respect to monthly insurance benefits payable under title II of the Social Security Act payable for months after the month in which this Act is enacted, on the basis of applications for such benefits filed in or after the month in which this Act is enacted.

By Mr. BUMPERS:

S. 83. A bill to simplify the appellate jurisdiction of the Supreme Court of the United States, and for other purposes; to the Committee on the Judiciary.

THE SUPREME COURT'S APPELLATE JURISDICTION

Mr. BUMPERS. Mr. President, under present law the appellate jurisdiction of the Supreme Court of the United States falls, in the main, under two headings: appeals and petitions for writs of certiorari. Ever since the Judiciary Act of 1925, certiorari has been the most important source of the court's jurisdiction. It differs from appeals principally in being discretionary. The Court has a right to decide for itself whether to review cases that come to it on petition for writ of certiorari. Appeals, on the other hand, are obligatory. The Court, at least in theory, has no choice. It must hear and decide cases coming to it by appeal.

It is time to do away with this distinction. The entire trend of modern court reform points toward simplification of the forms of action, and this trend is just as commendable in appellate practice as it is in trial practice. Just as rule 1 of the Federal Rules of Civil Procedure, first adopted in 1938, made a great advance by declaring that in civil cases there shall be "one form of action," so also it would be in the public interest, from the point of view of the courts as well as litigants, to consolidate and simplify the means of access to the Supreme Court. I have in mind the elimination of most of the Court's obligatory appellate jurisdiction. Under my proposal, all of the Court's appellate jurisdiction, with very limited exceptions that I shall describe shortly, would be discretionary, by writ of certiorari. The number of cases that the Court actually decides on the merits should therefore be reduced, freeing the court to concentrate more effectively on the small number of cases that deserve its consideration.

It is true that in most cases the Court appears to treat appeals strikingly similarly to the way it deals with petitions for writs of certiorari. A statement as to jurisdiction, the document that formally initiates an appeal, is for most purposes the functional equivalent of a petition for writ of certiorari. Just as four votes are required to grant certiorari, thereby leading to full briefing, oral argument, and decision on the merits, so four votes are required to note probable jurisdiction of an appeal, a step that also leads to full consideration and decision on the merits.

Most cases that come before the Supreme Court, of course, do not reach this stage. They are disposed of "on the papers," either a petition for certiorari or a jurisdictional statement. The difficulty is that such a summary disposition of an appeal, unlike the denial of certiorari, technically is an adjudication on the merits and stands as a precedent. The traditional rule has been that a summary affirmance, or a dismissal of an appeal for want of a substantial Federal question, is the equivalent in its force of any other Supreme Court decision. See Stern & Gressman, Supreme Court Practice 197 (4th ed. 1969).

As recently as *Hicks* v. *Miranda*, 422 U.S. 332 (1975), the Supreme Court held that State and lower Federal courts are as bound by summary dispositions of appeals as by dispositions after plenary consideration.

The dilemma that this rule creates was aptly described in a dissenting opinion delivered on November 8, 1976. The Court of Appeals for the Seventh Circuit had upheld the validity of the Indiana guest statute. The Supreme Court denied certiorari, over the dissents of Justices Brennan and Marshall. Two years previously, the court had dismissed for want of a substantial federal question an appeal from the Supreme Court of Utah sustaining the constitutionality of the Utah guest statute. *Cannon* v. *Oviatt*, 419

U.S. 810 (1974), and this dismissal, under the rule of Hicks against Miranda, was apparently treated as a binding precedent justifying denial of certiorari in Sidle against Majors, the Indiana case.

The situation in which the Court finds itself is described as follows in the dissenting opinion of Mr. Justice Brannan, 42 U.S. Law Week 3343, 3344 (No. 75–309):

Hicks has now eliminated from the consideration of appeals the desirable latitude each of us formerly had to weigh, as in the case of petitions for certiorari, whether the issue presented is sufficiently important to merit plenary review, and whether in any event the question might better be addressed after we have had the benefit of the views of other courts. Particularly unfortunate, I think, is the inevitability that *Hicks* will prematurely cut off, as it has in the case of these guest statutes, consideration of important and evolving federal constitutional questions by the state and lower federal courts. It frequently happens that difficult constitutional issues go through a valuable maturing process, and this Court and developing jurisprudence generally profit enormously from the accumulated wisdom of various courts that have considered the issues in a number of contexts and from a number of angles. *Hicks*, however, now mandates that summary disposition must be following as fully binding precedents by state and lower federal courts, regardless of the maturity of the issue, and regardless of the fact that even when the issue is before us for the first time, our disposition is made without opinion, without briefing or oral argument, and after only the most cursory conference discussion.

The rule of the Hicks case, which I must admit is logically compelled by the fact that appeals are not optional with the Court, necessarily limits the Court to one of two choices under the present statutory scheme. It may greatly increase the number of appeals that are given plenary consideration, thus spreading itself even thinner than at present and diverting needed time and attention from those cases that come before it on certiorari and that deserve full briefing and argument. Or it may continue to dispose of appeals summarily, just as it does petitions for certiorari, and take the consequences of creating a body of off-handed but binding precedents.

The solution, Mr. President, is to make all of the court's appellate jurisdiction, or nearly all of it, discretionary by way of certiorari. In this way, the court will have full latitude to decide which cases to decide and which to refuse. It can consider the importance of the issue, the state of development of the law generally, the demands on its own time, and whether the public interest might be served by waiting until other courts have had a chance to express themselves on the point.

I am therefore introducing today for appropriate reference a bill to eliminate most of the Court's obligatory appellate jurisdiction. Specifically, my bill would make the following substantive changes:

First. Under 28 U.S.C. section 1254 decisions of district courts holding an act of Congress unconstitutional, in cases where an officer or employee of the United States is a party, are directly reviewable by appeal to the Supreme Court, whether the district court is composed of one judge or three. Repeal of this provision, which I propose, would make these cases reviewable on appeal to courts of appeals under the general provisions of 28 U.S.C. sections 1291 and 1292. Decisions holding acts of Congress unconstitutional are important, to be sure, but I submit that there is no reason why the intermediate appellate level should be skipped. Consideration of the question by a court of appeals will help the Supreme Court in its ultimate resolution of the issue, if it decides to grant review, and the rare case that is so important, or in which time is such a critical element, that an immediate final decision by the Supreme Court is in the public interest, can be handled by the Court's power to grant certiorari before judgment under section 1254.

Second. Under the same section 1254, the Court presently has jurisdiction by appeal over cases in which U.S. Courts of Appeals have held State statutes invalid. These cases are also reviewable by certiorari, and in my view this remedy is sufficient.

Third. Similarly, under 28 U.S.C. section 1257 (1) and (2), an appeal lies from a judgment of the highest court of a State holding unconstitutional a treaty or statute of the United States, or holding valid against a claim of Federal unconstitutionality any statute of any State. These two classes of cases are also reviewable under section 1257 (3) by writ of certiorari, and again this remedy, in my judgment, is sufficient.

Mr. President, the Judiciary Act of 1925 was passed at a time of greater leisure for the courts as well as for our lives generally. It made sense, at least theoretically, to require the Supreme Court to hear and determine on their merits certain classes of cases. With the passage of time and the substantial increase in the Court's business, and with the increasing tendency to determine appeals as well as petitions for certiorari "on the papers" without plenary consideration, the reason for this distinction in jurisdiction has gradually disappeared. It therefore seems appropriate to eliminate the distinction altogether, with one exception. A few cases, for example, those arising under the Civil Rights Act of 1965, as extended in 1975, are still required to be heard by district courts of three judges. In those cases an appeal lies directly to the Supreme Court under 28 U.S.C. section 1253, and I would not disturb this rule. The number of cases involved will be small, since Congress has recently abolished the requirement for most three-judge courts. Public Law 94–381, approved August 12, 1976. Direct appeals to the Supreme Court, instead to courts of appeals, seem appropriate from judgments of multijudge district courts.

Mr. President, I ask unanimous consent that the text of my bill, together with a letter commenting on it from Martin H. Redish, associate professor of law at the Northwestern University School of Law, be printed in the RECORD.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 83

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Section 1252 of the Judicial Code Act of June 25, 1948, c. 646, 62 Stat. 928, as amended, 28 U.S.C. 1252, is repealed.

SEC. 2. Section 1254 of the Judicial Code Act of June 25, 1948, c. 646, 62 Stat. 928, as amended, 28 U.S.C. 1254, is amended by striking out paragraph (2) and by renumbering paragraph (3) as paragraph (2).

SEC. 3. Section 1257 of the Judicial Code Act of June 25, 1948, c. 646, 62 Stat. 929, as amended, 28 U.S.C. 1257, is amended by striking out the words "as follows:" in the first unnumbered paragraph, by striking out paragraphs numbered (1) and (2), by striking out the words "(3) By" in paragraph numbered (3), and by inserting in lieu thereof the word "by".

SEC. 4. Section 206 of Title II of the Act of March 10, 1950, c. 54, as added by Section 3 of the Act of August 9, 1955, c. 645, 69 Stat. 563, 22 U.S.C. 1631e, is amended by striking out the words "1251, 1252," and by striking out the comma after "1291".

NORTHWESTERN UNIVERSITY,
SCHOOL OF LAW,
Chicago, Ill., November 2, 1976.

Hon. DALE BUMPERS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BUMPERS: As Dean Rahl indicated I would do in his letter of October 28, I am writing to give you my views concerning your proposal to abolish most of the Supreme Court's "appeal" jurisdiction and replace it with total discretionary review power.

If the sole goal of your proposal were to reduce the Supreme Court's workload, I am afraid that in my opinion, at least, the proposal will have little, if any, effect. This is due to the fact that as a general matter the Court treats appeals strikingly similar to the way it deals with certiorari review. Rule 16 (1)(b) of the Supreme Court Rules provides in relevant part:

"The court will receive a motion to dismiss an appeal from a state court on the ground that it does not present a substantial federal question"...

Rule 16(1)(c) of the Supreme Court Rules provides:

"The court will receive a motion to affirm the judgment sought to be reviewed on appeal from a federal court on the ground that it is manifest that the questions on which the decision of the case depends are so unsubstantial as not to need further argument."

Thus although Congress apparently intended that certain cases, those in the Court's "appeal" jurisdiction, were to receive automatic full Supreme Court review, "only a minority of the appeals to the Supreme Court receive such plenary consideration." R. Stern & E. Gressman, *Supreme Court Practice* 194 (1969). See also Frankfurter & Landis, "The Business of the Supreme Court at October Term, 1929," 44 Harv. L. Rev. 1, 12–14 (1930): "Plainly, the criterion of substantiality is neither rigid nor narrow. The play of discretion is inevitable, and whenever discretion is operative in the work of the Court the pressure of its docket is bound to sway its exercise." Those cases which lack a substantial federal question are summarily affirmed or are dismissed for want of a substantial question. See *Zucht* v. *King*, 260 U.S. 174 (1922).

The determination by the Court of the issue of substantiality is made without oral argument. In the jurisdictional statement to the Court in an appeal, Rule 15(1) (e) and (f) require that the appellant include "a

presentation of the grounds upon wnich it is contended that the federal questions are substantial", for appeals from state and federal courts, respectively.

Thus "the jurisdictional statement now performs a function similar to that of the petition for certiorari." Stern & Gressman, at 195. See also the statement of Mr. Justice Brennan in *Ohio ex rel. Eaton* v. *Price*, 360 U.S. 246, 246–47 (1959): "The Court's practice, when considering a jurisdictional statement whereby a litigant attempts to invoke the Court's jurisdiction on appeal, is quite similar to its well-known one on applications for writs of certiorari." It is therefore unlikely that significant time would be saved by converting the Court's appeal jurisdiction to a discretionary form of review.

This is not to suggest, however, that I am of the opinion that your proposal would be wholly ineffective. Quite the contrary. At the present time, there appears to exist considerable confusion over the effect of a summary affirmance or dismissal for want of a substantial question by the Court. As a technical matter, of course, a summary affirmance constitutes a decision by the Supreme Court on the merits, and thus retains full precedential value. This is quite different from the effect of a denial of certiorari, which is traditionally understood to say nothing of the Court's views on the merits of the case. See, e.g., *Maryland* v. *Baltimore Radio Show, Inc.*, 338 U.S. 912 (1950) (Frankfurter, J.). If, however, the Court provides little or no increase in the depth of its analysis in summarily affirming than it provides in denying certiorari, it is questionable whether such a summary affirmance should carry full precedential force.

The Court itself in recent years has not been entirely clear on the precedential value to be attributed to a summary affirmance. The traditional rule has been that a summary affirmance is equivalent in its force to any other Supreme Court decision. See Stern & Gressman, at 197. See also Mr. Justice Brennan's opinion in *Ohio ex rel. Eaton* v. *Price*, 360 U.S. 246, 247 (1959):

"Votes to affirm summarily, and to dismiss for want of a substantial federal question, it hardly needs comment, are votes on the merits of a case."

However, in *Edelman* v. *Jordan*, 94 S. Ct. 1347, 1359 (1974), the Court stated that several summary affirmances "obviously . . . are not of the same precedential value as would be an opinion of this Court treating the question on the merits." Yet more recently in *Hicks* v. *Miranda*, 95 S. Ct. 2281 (1975) the Court indicated that summary affirmance did, in fact, have the full force of a Supreme Court decision. It should be noted, however, that a possible distinction between the two is that *Edelman* concerned the binding effect of a summary affirmance on the Supreme Court in a subsequent action, while *Hicks* involved its effect on subsequent lower court action.

Your proposal presumably would permit the Supreme Court to deny review in all types of cases without creating uncertainty with respect to the precedential significance of the denial of review.

I hope that you find my comments to be of some help. Professor Nathanson has asked me to say that he concurs both with my analysis and my conclusions.

Sincerely yours,

MARTIN H. REDISH,
Associate Professor of Law.

By Mr. BUMPERS (for himself and Mr. MCCLURE):

S. 82. A bill to amend title 18, United States Code, to authorize courts, upon the completion of any juvenile proceeding to release to any victim of such juvenile delinquency information on the final disposition of the juvenile who has been adjudicated delinquent; to the Committee on the Judiciary.

INFORMATION TO VICTIMS OF JUVENILE CRIMES

Mr. BUMPERS. Mr. President, I am very sensitive to the privacy rights of criminal offenders, and particularly youthful offenders. Because of my concern in this area, I generally defend the secrecy provisions of the 1974 Juvenile Justice and Delinquency Act.

Having said that, I must take issue with one feature of the 1974 Act. It forgets the victims of juvenile crime in that its secrecy provisions preclude even those people who are damaged most directly by a juvenile's conduct from learning of the full disposition of the case.

A dramatic illustration of this point received some play recently in the press. A rape victim was denied information on the sentence meted out to her attacker. She had testified against him at the hearing and understandably was anxious to know whether he had been released or was still in custody. Yet even in the case of that serious felony, the magistrate refused to provide her with the requested information.

I feel very strongly that if anyone deserves to know the outcome of delinquency proceedings, it is the victim of the crime. To extend the cloak of secrecy to cover the victim represents overprotection of juvenile rights to the clear detriment of the victims' right to know the outcome. Accordingly, my bill would amend the 1974 act to permit the magistrate to answer inquiries of victims relating to the final disposition of such cases.

Again, Mr. President, let me reiterate that I am a firm believer in protecting juvenile offenders against any undue stigma resulting from their brush with the law. I am convinced that if we are to be successful in the war against crime, we must first reduce the unconscionably high percentage of crimes committed by our young. But in this instance we have gone too far in protecting the privacy rights of our delinquents.

I am proud to announce that Senator JOHN MCCLELLAN joins me as a cosponsor of this bill. Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 82

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 5038 (a) of title 18, United States Code is amended—

(1) by striking out "and" at the end of paragraph (4);

(2) by striking out the period at the end of paragraph (5) and inserting in lieu thereof a semicolon and "and"; and

(3) by adding immediately after paragraph (5) the following:

"(6) inquiries from any victim of such juvenile delinquency related to the final disposition of such juvenile by the court in accordance with section 5037.".

By Mr. BUMPERS:

S. 84. A bill to amend chapter 31 of title 10, United States Code, to prohibit the requirement for furnishing certain information as a condition to enlisting in the Armed Forces; to the Committee on Armed Services.

EXPUNGEMENT OF CRIMINAL RECORDS—ENLISTMENT IN ARMED SERVICES

Mr. BUMPERS. Mr. President, it was brought to my attention this last year by an irate Arkansas attorney that the Pentagon requires applicants for enlistment to divulge prior criminal involvement, even when the record of that involvement has been expunged under State law.

Specifically, section 40 of the Pentagon's application for enlistment—form DD 1966 requests "Yes or No" answers to questions of whether the applicant has ever been arrested, charged, or held by law enforcement authorities, including juvenile authorities, regardless of whether the charge was dismissed or the record of conviction expunged. A second question asks whether the applicant has ever been adjudicated a youthful offender or juvenile delinquent, even in cases where the record has been sealed or stricken.

Arkansas law, on the other hand, clearly states that upon expungement of a youthful offender's record, the person whose record was expunged may thereafter state in any application for employment, license, civil right, or privilege, that he has not been convicted of the offense for which he was convicted and sentenced. Hence, the Pentagon's application policy is directly contrary to Arkansas law.

After being notified of the Pentagon form last July, I wrote the Assistant Secretary of Defense for an explanation of why the Pentagon's policy deliberately flew in the face of Arkansas law and, I assume, comparable expungement statutes in other jurisdictions. The reply was hardly satisfying. I was told Federal military recruiters were not bound by State law and that consequently recruiters would continue to delve into the background of potential applicants for military service on the basis that "young people who have difficulty in conforming to the standards of the civilian community are even less able to satisfy the more demanding standards of the military."

But that is exactly the point. Youthful offenders who have had their cases dismissed or their records expunged or sealed are not lost causes to society. On the contrary, in such cases either a judge or some other official has made an affirmative finding that their cases were deserving of special consideration and that they should not be stigmatized for life by a criminal record.

Expungement means nothing if a subsequent republication of that record is allowed to take place under a highly dubious Pentagon policy. My bill, therefore, would prohibit the Pentagon from requesting information relating to dismissed charges or to arrests, charges, or convictions where the records of those people involved have been sealed or expunged.

Mr. President, we all agree that, once a man or woman is tarred with the brush of criminal activity, it becomes virtually impossible to remove that stain.

This, in my strong opinion, is what ultimately leads more and more of our young people down the grim path of antisocial behavior. They become, in effect, what society has dubbed them to be. And their records of criminal involvement, minor though they may be, act as a ball and chain at every turn in later life. That is why the policy of expungement is so important. It gives deserving young people a second chance to become useful and productive citizens.

Mr. President, the depressing fact that 60 percent of American crime is perpetrated by young people under the age of 22 is a constant reminder that our existing criminal proceduers are not working. I have never considered the military an alternative to prison. But military service does provide the discipline and sense of purpose and values that a young person may not otherwise have been privy to. Why make it that more difficult for those with expunged criminal histories to take advantage of this opportunity? The obvious answer is that we should not.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 84

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) chapter 31 of title 10, United States Code, is amended by adding at the end thereof a new section as follows:

"§ 502. Prohibition against requiring certain information

"No person shall be required, as a condition to making application for or enlisting in the armed forces, to furnish any information relating to any offense for which such person was arrested, charged, or convicted in any court if the charge against such person has been dismissed or if the record of the arrest, charge, or conviction of such person has been sealed or expunged by any court of competent jurisdiction or by any other official action.".

(b) The table of sections at the beginning of chapter 31 of title 10, United States Code, is amended by adding at the end thereof a new item as follows:

"520. Prohibition against requiring certain information.".

By Mr. BUMPERS:

S. 86. A bill to improve the administrative process by making Federal agencies more responsive to the will of the people as expressed by their elected representatives in Congress; to the Committee on the Judiciary.

MAKE FEDERAL AGENCIES MORE RESPONSIVE

Mr. BUMPERS. Mr. President, in 1975 I introduced S. 2408 (94th Congress, 1st session), a bill to amend the Administrative Procedure Act to make Federal agencies more responsive to the will of the people as expressed by their elected representatives in Congress. The bill was referred to the Subcommittee on Administrative Practice and Procedure of the Committee on the Judiciary. The chairman of the subcommittee, the distinguished Senator from Massachusetts (Mr. KENNEDY), convened hearings on S. 2408 and other measures on May 3, 1976, at which I testified.

Later, when S. 800, another administrative-law bill, passed the Senate, the Senator from Massachusetts and I discussed S. 2408 on the floor. At that time Mr. KENNEDY agreed to solicit the views of the bench and bar on this proposal, and I announced my intention to reintroduce the bill promptly on the convening of the 95th Congress. Therefore, Mr. President, I now introduce for appropriate reference S. 86, a bill identical to S. 2408 of the last Congress. The bill would accomplish two ends: it would direct the courts to decide for themselves, without deference to so-called administrative expertise, all issues of law, and it would reverse the traditional presumption that agency regulations are valid. For convenient reference, I ask unanimous consent that the text of the bill be printed in full at this point in my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 86

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the portion of Public Law 89–554, (80 Stat. 393), now codified as section 706 of title 5, United States Code, is amended by striking out the first sentence thereof and substituting therefor the following:

"To the extent necessary to decision and when presented, the reviewing court shall decide de novo all relevant questions of law, interpret constitutional and statutory provisions, and determine the meaning or applicability of the terms of the agency action. There shall be no presumption that any rule or regulation of any agency is valid, and whenever the validity of any such rule or regulation is drawn in question in any court of the United States or of any State, the court shall not uphold the validity of such challenged rule or regulation unless such validity is clearly and convincingly shown: *Provided, however,* That if any rule or regulation is set up as a defense to any criminal prosection or action for civil penalty, such rule or regulation shall be presumed valid until the party initiating the criminal prosecution or action for civil penalty shall have sustained the burden of proof normally applicable in such actions.".

Mr. BUMPERS. Mr. President, present doctrines of administrative law insure that almost every rule or regulation adopted by a Federal agency is upheld in the courts. There is a presumption, it is said, that such rules or regulations are within the authority granted by Congress, or by executive order, to the particular agency involved. It is my view that there should be no such presumption, and that administrative law has come to the point where the traditional doctrine should be reversed. The burden should be upon the Federal agency, which has at its command the resources of the sovereign, to establish the validity of its own action, instead of being placed upon the citizen to prove the reverse.

The bill I introduce today would do just that. First of all, it would restore the courts to their normal law-interpreting and law-applying role in our system of government. It would insert the words "de novo" in the first sentence of 5 U.S.C. section 706, the sentence that concerns decision by the courts of questions of law in actions to review Federal agencies. Courts could still defer to administrative expertise, if there is in fact such a thing, when deciding issues of fact, and the traditional "substantial evidence" rule applied to such issues would be undisturbed.

In the realm of law, however, the supremacy of the courts, who are sworn to apply and enforce the statutes of Congress, would be restored. A decision by an agency on an issue of law would no longer be upheld simply upon a finding that there is "warrant in the record" for it. The court would actually use its own judgment on such issues. Furthermore, the presumption in favor of the validity of agency rules and regulations would be eliminated, and the burden of establishing this validity would be shifted to the agency, a party better able to bear it. Only if a court were clearly and convincingly persuaded, for example, that a given rule or regulation was within the power delegated by Congress, would the rule or regulation be upheld.

In this way, Congress would be confirmed as the true and only source of legislative power in our society. Only those agency rules and regulations clearly within the congressional mandate would remain intact. Finally, a proviso in the bill would make clear that the traditional heavy burden of proof borne by the prosecution in criminal cases and, to a lesser extent, by the United States when seeking to enforce a civil penalty, would not be altered. In these instances, if a defendant asserted an agency rule or regulation in bar of a criminal prosecution or action for civil penalties, the opposing party, usually the United States, would still have to sustain the burden of proof usually associated with these kinds of enforcement proceedings.

Since Congress last adjourned on October 2, a number of persons and groups have been kind enough to review this proposal and offer their views. I am disappointed that some of these comments are unfavorable, but I nonetheless appreciate the time and effort they represent, because they do give me a chance to examine anew the justification for the bill, and to consider with care the objections that have been raised.

Two law professors are among those who have commented—Nathaniel L. Nathanson of Northwestern and Clark Byse of Harvard—in their capacity as members of the Committee on Judicial Review of the section of administrative law of the American Bar Association. In general, their objections to the bill are twofold: first, that courts are not in fact so deferential to the agencies as I have claimed, and second, that in any event they are no more deferential than they should be. In order that the full record may be laid before the Congress and the public, I ask unanimous consent that Professor Byse's letter of September 16, 1976, and Professor Nathanson's letter of September 8, 1976, be printed in full in the RECORD at this point in my remarks.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

HARVARD LAW SCHOOL,
Cambridge, Mass., September 16, 1976.

FRANCIS M. GREGORY, JR., Esq.,
K Street, N.W., Washington, D.C.

DEAR MR. GREGORY: The receipt of a copy of Nat Nathanson's September 8 letter to you

emphasizes my failure to reply to your inquiry re S. 2408, and so, amends, herewith.

In general, I agree with Nat's observations. More specifically, there is reason to believe that the proponents of the measure are proceeding on the basis of mistaken perceptions:

1. See 121 Cong. Rec. S. 16578, 1st col. (Sept. 24, 1975), where the holding of NLRB v. Hearst is discussed or the correct analysis of *Hearst*, see Nat's article in B.V. and L. Rev. 470–473 (1950), reprinted in Gellhorn and Byse, Administrative Law Cases and Comments 450–451 (6th ed. 1974). See also enclosed reprint, pp. 564–567. It is conceivable that the proponents of S. 2408 want courts to exercise a de novo review concerning administrative decisions on matters which Congress has rather clearly delegated to the agencies for decision by them. If that is their objective, I must, with all deference, say I think that would be most unwise. As the Court said in *United States* v. *Louisville and Nashville, R.R.*, 235 U.S. 314, 321 (1914), under such a view "the Commission would become but a mere instrument for the purpose of taking testimony to be submitted to the courts for their alternate action." The Court rejected that view in 1914. I do not believe that it should be resurrected in 1976.

2. I think that the government lawyers, who appear before the District of Columbia Circuit—would hardly agree that that court fails to discharge its judicial responsibility to determine the scope of discretion delegated to the agency by Congress. Judge Leventhal insists upon a "hard look" and a "reasoned decision"; Chief Judge Bazelon embraces the "new era." Although undoubtedly there are judges or panels of judges or courts which at times fail to discharge their reviewing responsibilities, I do not think this is a general weakness which needs the corrective action proposed by S. 2408. It seems to me that it is not accurate to state that courts are guilty of "virtually rubber-stamping every agency action that comes before them for review"—see Congressional Record S. 11350, col. 3, 1st 2 lines (July 1, 1976). My judgment on the matter is stated in the last sentence of the enclosed reprint.

3. I am not as confident of the point I now address as perhaps I should be. However, my impression is that the courts have shifted, or are in the process of shifting, from the view that regulations are presumptively valid. See, e.g., *Chicago v. FPC*, 458, F. 2d 731 (D.C. Cir. 1971), cert. denied 405 U.S. 1074 (1972), discussed in Gellhorn and Byse, supra, pp. 736–737.

I conclude that although there may be a problem concerning presumptive validity of rules, as presently advised I rather doubt it. If there is such a problem, it should be demonstrated. The proponents have not made such a demonstration. Until there is such a demonstration, there is no need to consider a remedy. When and if such a problem is demonstrated, the remedy should be tailored to fit the problem. The present proposal is thus premature.

I conclude further that there is no need for a statutory change in the APA provisions governing review of so-called questions of law.

Sincerely,

CLARK BYSE.

NORTHWESTERN UNIVERSITY
SCHOOL OF LAW,
September 8, 1976.

FRANCIS MARIA GREGORY, JR., ESQ.,
K Street, N.W.,
Washington, D.C.

DEAR FRANK: In further reference to your letter of July 21, 1976, and the enclosures, particularly S. 2408, I just want to say that I am not at all impressed with the desirability of such an amendment to the APA. I say this with some regret since Senator Bumpers is an alumnus of ours for whom I have considerable affection and regard.

In substance the bill seems to reopen an ancient controversy which, I believe, has been satisfactorily resolved in actual practice; namely, how much deference a reviewing court should pay to an administrative agency's determination of a question of law, particularly one involving an interpretation of the agency's authorizing statute or one of its own regulations. I doubt that any statutory formulation can improve upon the guidelines laid down in leading Supreme Court opinions, such as Cardozo's opinion in Norwegian Nitrogen Products v. United States, 288 U.S. 294 (1933), Jackson's opinion in Skidmore v. Swift Co., 323 U.S. 134 (1944), the Frankfurter opinion in Addison v. Holly Hill Fruit Products Co., 322 U.S. 607 (1944) and more recently the opinions in Mourning v. Family Public Service, Inc., 411 U.S. 356 (1973) and Morton v. Ruiz, 415 U.S. 199 (1974). I am particularly suspicious of a statutory provision that makes use of the cryptic phrase "de novo" with all its uncertain connotations.

So far as I am aware the federal courts have not been giving blind obeisance to administrative determinations of law in recent years. Consequently, I am curious about the stimulus for this particular proposal. The Congressional Record excerpt, attached to your communication, suggests that there is concern over the rulemaking power of the F.T.C., and certain new enforcement powers of the F.T.C. regarding their own orders. With respect to the rulemaking power, the statute provides considerable procedural protection, and deserves at least a trial period; judicial review of the validity of the rules is assured and there is no reason to believe it will be only a formality. With respect to enforcement of orders against respondents who were not parties to the original proceeding, that particular provision should be debated on its own merits and not made the occasion for a sweeping change in fundamental principles of judicial review.

I trust that this is sufficient to start a meaningful committee dialogue on the subject.

Sincerely,

NATHANIEL L. NATHANSON.

Mr. BUMPERS. Mr. President, I am especially struck by Professor Nathanson's belief that "the Federal courts have not been giving blind obeisance to administrative determinations of law in recent years," and by Professor Byse's "impression. —. that the courts have shifted, or are in the process of shifting, from the view that regulations are presumptively valid." These opinions call in question the very predicate for my bill—that courts in most cases are deferring to agencies, even on question of law—so it seems appropriate to begin the debate by examining the present state of the law at some length. The questions to be answered are, "Do courts defer to agencies on questions of law?," and "Is an agency regulation presumed valid?"

A number of opinions of the Supreme Court are in accord with the rule of *NLRB* v. *Hearst Pubs., Inc.*, 322 U.S. (1944), that an agency's interpretation of its own governing statute is to be upheld if it is reasonable and has warrant in the record, regardless of whether the court would itself have reached the same conclusion as an original matter. In Hearst, the question was whether newsboys are "employees" within the meaning of section 2(3) of the National Labor Relations Act, 29 U.S.C. section 152(3), as opposed to independent contractors. In upholding the Board, the Supreme Court said:

> Undoubtedly questions of statutory interpretation, especially when arising in the first instance in judicial proceedings, are for the courts to resolve, giving appropriate weight to the judgment of these whose special duty is to administer the questioned statute . . . but where the question is one of specific application of a broad statutory term in a proceeding in which the agency administering the statute must determine it initially, the reviewing court's function is limited . . . the Board's determination that specified persons are "employees" under this Act is to be accepted if it has "warrant in the record" and a reasonable basis in law. 322 U.S. at 130–31.

The key phrase "warrant in the record" appears to come from *Rochester Tel. Corp.* v. *United States*, 307 U.S. 125 (1939), in which the question was whether one company had "control" of another within the meaning of section 2(b) of the Communications Act of 1934, 47 U.S.C. section 152(b). The Court held that the agency's decision on this issue must be upheld:

> So long as there is warrant in the record for the judgment of the expert body it must stand. 307 U.S. at 145–46.

It should be observed, however, that the Court characterized the question of "control" as an issue of fact, so the Hearst Court's use of this citation can be questioned.

The wide latitude given to the NLRB by *Hearst* is further illuminated by the dissenting opinion of Mr. Justice Roberts. Taking what might have been thought, at least at one time, the more orthodox view, he argued:

> . . . Congress did not delegate to the NLRB the function of defining the relationship of employment so as to promote what the Board understood to be the underlying purpose of the statute. The question who is an employee, so as to make the statute applicable to him, is a question of the meaning of the Act and, therefore, is a judicial and not an administrative question. 322 U.S. at 125–26.

To the same effect is Gray v. Powell, 314 U.S. 402 (1941), involving the meaning of the term "producer" under the Bituminous Coal Act of 1937 (50 Stat. 72). The statute did not expressly define this term. On undisputed facts, the agency's interpretation and application of the statutory term were upheld. The Court spoke rather broadly of the range of power committed to the agency:

> In a matter left specifically by Congress to the determination of an administrative body, . . . the function of review placed upon the courts . . . is fully performed when they determine that there has been a fair hearing, with notice and an opportunity to present the circumstances and arguments to the decisive body, and an application of the statute in a just and reasoned manner. 314 U.S. at 411.
>
> Where, as here, a determination has been left to an administrative body, this delegation will be respected and the administrative conclusion left untouched. Certainly, a finding on Congressional reference that an admittedly constitutional act is applicable to a particular situation does not require such further scrutiny. Although we have here no dispute as to the evidentiary facts, that does not permit a court to substitute

its judgment for that of the Director . . . It is not the province of a court to absorb the administrative function to such an extent that the executive or legislative agencies become mere fact-finding bodies deprived of the advantages of prompt and definite action. Id. at 412.

In short, the agency will be upheld unless its conclusion "is so unrelated to the tasks entrusted by Congress to the Commission as in effect to deny a sensible exercise of judgment . . ." Id. at 413.

Another famous opinion often cited for a similar proposition is *Norwegian Nitrogen Prods. Co.* v. *United States*, 288 U.S. 294 (1933). The question there was whether the notice and hearings afforded by the U.S. Tariff Commission were "reasonable" within the meaning of section 315 of the Tariff Act of 1922 (42 Stat. 858, 941). In upholding the Commission, the Court, speaking through Mr. Justice Cardozo, said:

True indeed it is that administrative practice does not avail to overcome a statute so plain in its commands as to leave nothing for construction. True it also is that administrative practice, consistent and generally unchallenged, will not be overturned except for very cogent reasons if the scope of a command is indefinite and doubtful. The practice has peculiar weight when it involves a contemporary construction of a statute by the men charged with the responsibility of setting its machinery in motion, of making the parts work efficiently and smoothly while they are yet untried and new. 288 U.S. at 315.

The Supreme Court has continued to elaborate the doctrine in more recent cases. A good example is *Mourning* v. *Family Pubs., Inc.*, 411 U.S. 356 (1973). Section 121 of the Truth in Lending Act, 15 U.S.C. section 1631, requires creditors to disclose certain information "to each person to whom consumer credit is extended and upon whom a finance charge is or may be imposed." In addition, under section 105 of the act, 15 U.S.C. section 1611, the Federal Reserve Board "shall prescribe regulations to carry out the purposes of the act. These regulations may contain such classifications, differentiations, or other provisions, and may provide for such adjustments and exceptions for any class of transactions, as in the judgment of the Board are necessary or proper to effectuate the purposes of the act, to prevent circumvention or evasion thereof, or to facilitate compliance therewith." The Board thereupon issued regulation Z, requiring disclosure of the specified information whenever credit is offered to a consumer "for which a finance charge is or may be imposed or which pursuant to an agreement, is or may be payable in more than four installments" 12 C.F.R. section 226.2(k) (1972) (emphasis added).

A rather clear issue was thus drawn as to the power of the Board to issue regulations going beyond the terms of the statute as strictly phrased. Under the statute, a person is entitled to certain information, including the annual rate of simple interest, if two requirements are met: First, consumer credit is extended to him; and second, a finance charge is or may be imposed on this credit. Regulation Z, by contrast, specifically requires disclosure even if a finance charge is not imposed, if the obligation is payable in more than four installments pursuant to an agreement. The Court upheld the rule, relying particularly on the broad command to the Board to prescribe regulations not only to effectuate the purposes of the act, but also to prevent circumvention or evasion thereof:

We have consistently held that where reasonable minds may differ as to which of several remedial measures should be chosen, courts should defer to the informed experience and judgment of the agency to whom Congress delegated appropriate authority. 411 U.S. at 372.

It may be conceded that the force of the general rules here quoted varies with the individual circumstances and situations to which they are applied. How broadly the statute is worded, whether it is newly enacted, the specific terms of the statute's command to issue regulations, the technical complexity of the subject matter, whether a regulation is interpretative or legislative, all these factors are relevant to the latitude that the courts are willing to concede. On the whole, however, the law may be accurately summarized by the following quotation from *Udall* v. *Tallman*, 380 U.S. 1, 16 (1965):

When faced with a problem of statutory construction, this court shows great deference to the interpretation given the statute by the officers or agency charged with its administration. "To sustain the commission's application of this statutory term, we need not find that its construction is the only reasonable one, or even that it is a result we would have reached had the question arisen in the first instance in judicial proceedings."

A multitude of cases in the lower courts can be cited to sustain the same general proposition. For present purposes, it suffices to mention a few examples. *Gulf Oil Corp.* v. *Hickel*, 435 F. 2d 440, 444–45 (D.C. Cir. 1970) ("Deference is properly accorded by a court to administrative interpretations of statutes and regulations, unless plainly erroneous or inconsistent with the law or regulation"); *Housing Auth. of the City of St. Paul* v. *United States*, 432 F. 2d 455, 458–59 (Ct. Cl. (1970) ("In a number of cases this court has also held that it can invalidate such a regulation only if it clearly contradicts the terms or purposes of the new statute."); *E. W. Coslett & Sons, Inc.* v. *Bauman*, 354 F. Supp 330, 332–33 (E D. Pa. 1973) (deferring to a Federal agency on an issue of State law); *City of Burlington* v. *Turner*, 336 F. Supp. 594 602 (S.D. Iowa 1972) (deferring to the agency even where there is a dearth of expertise and the statute in question has neither been continuously interpreted nor examined contemporaneously with its enactment).

In practice, this doctrine can cede to administrative agencies, a branch of Government hardly contemplated by the Constitution, a share of the judicial power. It is hornbook law that Congress may not actually delegate legislative power to any other person or agency. What the agencies are doing, therefore, must be the interpretation and executive of law made by Congress. In deciding whether their actions accord with the will of Congress, assuming that a factual finding on which a certain proposal may be predicated has been made, the agencies must, as a matter of logical necessity, be construing and interpreting law. This is a traditional and proper function of the judiciary, and, to the extent that the courts affirm construction of statutes that they would not themselves have adopted as an original matter, they are abdicating one of their most important duties.

On the second question, whether rules and regulations issued by Federal agencies are entitled to a presumption of validity, my differences with Professors Byse and Nathanson are, if anything, sharper. In particular, Professor Byse has the "impression—that the courts have shifted, or are in the process of shifting from the view that regulations are presumptively valid." In support of this opinion he cites *City of Chicago* v. *FPC*, 458 F. 2d 731 (D.C. Cir. 1971), cert. denied, 405 U.S. 1074 (1972). The Federal Power Commission had decided to set gas rates on an areawide basis, using composite cost data from all of the producers in a given area, instead of setting rates for an individual producer, based upon that producer's own costs

The question arose whether the area-rate system should be applied to pipeline companies as well as to so-called independent producers of gas. The Commission decided to apply the area system to the pipeline companies, and the Court of Appeals affirmed this decision. Although Professor Byse's letter and casebook, Gellhorn & Byse, Administrative Law: Cases and Comments 736–37 (6th ed. 1974), both assert that the case is contrary to the traditional doctrine of presumptive validity, I must say that a thorough reading of the opinion fails to disclose any such tendency to me.

The casebook goes so far as to claim that City of Chicago repudiates the Supreme Court's opinion in *Pacific Box & Basket Co.* v. *White*, 296 U.S. 176 (1935). That was a unanimous opinion delivered by Mr. Justice Brandeis, in the course of which the Court said that there is "a rebuttable presumption of the existence of a state of facts to justify the exertion of the police power," 296 U.S. at 185. Referring to a regulation of a State administrative agency, the Court added:

But where the regulation is within the scope of authority legally delegated, the presumption of the existence of facts justifying its specific exercise attaches alike to statutes, to municipal ordinances, and to orders of administrative bodies. Id. at 186.

As I have already noted, nothing in City of Chicago appears contrary to this rule. It would not make any difference in any event, because an opinion of a court of appeals, even a recent one, surely cannot have enough force to overrule one of the Supreme Court. In any case, recent opinions of the Supreme Court, as well as lower Federal courts, prove that the presumption of validity is still a vital doctrine of law. A few examples will suffice.

Probably the leading recent case on judicial review of agency action is *Citizens to Preserve Overton Park* v. *Volpe*, 401 U.S. 402 (1971). In the course of a wide-ranging opinion strictly limiting the area in which agency action is not reviewable at all, the court reaffirmed traditional dogma:

Certainly, the Secretary's decision is entitled to a presumption of regularity. See, *e.g., Pacific States Box & Basket Co.* v. *White,* 296 U.S. 176, 185 (1935); *United States* v. *Chemical Foundation,* 272 U.S. 1, 14–15 (1926).

The origin of the rule may be in a generalized presumption, long dear to courts, that any official act is regular and lawful. Chemical Foundation, cited by the Court in Overton Park, states:

The presumption of regularity supports tho official acts of public officers and, in the absence of clear evidence to the contrary, courts presume that they have properly discharged their official duties 272 U.S. at 14–15.

This presumption operates not only on the overall question of validity of agency action, but also with respect to certain subsidiary issues that may be raised in a suit to overturn an agency's determination. A common issue in such cases, for example, is whether an agency's ruling in a particular case is a departure from its own precedents. There is a presumption, the Court has said, that the policies of Congress will be carried out best if these administrative precedents are adhered to:

There is, then, a presumption that ... the policies [committed to an agency by Congress], will be carried out best if the settled rule is adhered to. From this presumption flows the agency's duty to explain its departure from prior norms.

Atchison, T. & S. F. Ry. v. *Wichita Bd. of Trade,* 412 U.S. 800, 808 (1973) (opinion of Marshall J., joined by four Justices and announcing the judgment of the Court).

Cases in lower courts announcing the same rule are legion. Many such cases are in the District of Columbia, perhaps the most frequent forum for suits against federal administrative agencies. A typical statement is contained in *Maryland-National Capital Park & Planning Comm'n* v. *Lynn,* 514 F. 2d 829, 834 (D.C. Cir. 1975) (per curiam): "there is a judicial presumption of the validity of administrative action and the burden was upon the plaintiff—to overcome that presumption." *Accord, e.g. Air Transport Ass'n of America* v. *Federal Energy Office,* 382 F. Supp. 437, 453 (D.D.C. 1974) ("Moreover, the party attacking the regulatory scheme carries the burden of persuasion."); *United Black Fund, Inc.* v. *Hampton,* 352 F. Supp. 898, 903 (D.D.C. 1972) ("It should be noted—that there is a judicial presumption of the validity of administrative action, that the burden is on a plaintiff to overcome that presumption, and that the Court will uphold such action if it has a rational basis.").

Mr. President, it would unnecessarily lengthen this statement to add the citations of all the other cases that are to the same effect, but I have collected them in an appendix, including representative quotations, and I commend the appended list to the attention of my colleagues. All of the cases in the list are quite recent. As a matter of fact, I made an effort to single out all of the cases decided by the Federal courts in the last 5 years on this point, and they are remarkably uniform in their teaching. I feel sure that anyone reading these opinions with an open mind cannot fail to reach the conclusion that the presumption of administrative correctness is an entrenched doctrine of judge-made law, not likely to be changed or even substantially modified in the absence of an act of Congress.

I ask unanimous consent that the appendix be printed in the RECORD.

There being no objection, the material referred to was ordered to be printed in the RECORD, as follows:

APPENDIX: ADDITIONAL RECENT CASES IN THE LOWER FEDERAL COURTS AFFIRMING THE RULE THAT AGENCY ACTION IS PRESUMED VALID

SECOND CIRCUIT

TNT Tariff Agents, Inc. v. *Interstate Commerce Comm'n,* 525 F. 2d 1088, 1093 (2d Cir. 1975): "At the outset, we note the presumption of validity accorded to administrative bodies acting within their sphere of expertise."

Board of Education v. *United States Department of Health, Education and Welfare,* 384 F. Supp. 816, 820 (S.D.N.Y. 1974): "Further, a plaintiff alleging improper government action is faced with the presumption that the administration's action is valid."

Chieppo Bus Co. v. *United States,* 383 F. Supp. 1192, 1197 (D. Conn. 1974): "Although we do not attach a presumption of correctness to the decisions of administrative agencies on questions of law, deference to the experience and expertise of such adjudicative bodies requires that the agency be given wide latitude in finding the facts and applying to them the appropriate legal standard."

FOURTH CIRCUIT

Campaign Clean Water, Inc. v. *Train,* 489 F. 2d 492, 501 (4th Cir. 1973): "After all, there is a presumption of legality that attaches ordinarily to an administrator's action and the burden of establishing impropriety rests on him who challenges."

FIFTH CIRCUIT

Gables by the Sea, Inc. v. *Lee,* 365 F. Supp. 826, 831 (S.D. Fla. 1973): "In order to upset the final agency decision, there must be a clear showing that such decision was improper. The burden of proving that the action was improper is on the party challenging the decision. It is well settled that there is a definite presumption of regularity in favor of the administrative decision."

Opelika Nursing Home, Inc. v. *Richardson,* 356 F. Supp. 1338, 1341–43 (M.D. Ala. 1973).

Settle v. *Brown,* 345 F. Supp. 405, 408 (S.D. Tex. 1972): "It is well established that judicial review of an administrative agency determination is limited to an examination of whether the agency compiled with prescribed procedure in making the determination."

SIXTH CIRCUIT

Borg v. *Weinberger,* 381 F. Supp. 1212 (E.D. Mich. 1974): "There is a strong presumption that administrative exercise of discretion is proper, unless the action reflects such an abuse of power as to be arbitrary and capricious."

Smith v. *City of Cookeville,* 381 F. Supp. 100, 109: "While, as always, the agency determination in this case is entitled to a presumption of regularity, . . . that presumption is not to shield . . . [the decision] from a thorough, probing, in-depth review.'"

EIGHTH CIRCUIT

First National Bank of Fayetteville v. *Smith,* 508 F. 2d 1371, 1376 (8th Cir. 1974): "To have administrative action set aside as arbitrary and capricious, the party challenging the action must prove that it was willful and unreasoning action, without consideration and in disregard of the facts or circumstances of the case. . . . 73 C.J.S. Public Admin. Bodies and Procedure § 209 at 569 (1951)."

NINTH CIRCUIT

Daly v. *Volpe,* 514 F. 2d 1106, 1111 (9th Cir. 1975): ". . . the presumption of regularity that must be given to administrative decisions."

United States v. *Gomes,* 323 F. Supp. 1319, 1321 (E.D. Cal. 1971): ". . . there is a presumption of regularity in administrative processes which normally attaches."

TEMPORARY EMERGENCY COURT OF APPEALS

Texaco, Inc. v. *Federal Energy Admin.,* 531 F. 2d 1971, 1077 (T.E.C.A. 1976), *cert denied,* U.S. (1976): "The burden is on the objectors to demonstrate the invalidity of the regulations."

Air Transport Ass'n of America v. *Federal Energy Office,* 520 F. 2d 1339, 1341 (T.E.C.A. 1975) (per curiam): "This court has repeatedly recognized the strong presumption in favor of administrative decisions by agencies charged with the administration of a new federal statute."

American Nursing Home Ass'n v. *Cost of Living Council,* 497 F. 2d 909, 914 (T.E.C.A. 1974): "In general the burden is on the challenger of agency regulations to demonstrate that they are arbitrary and capricious."

COURT OF CLAIMS

Boege v. *United States,* 206 Ct. Cl. 560, 569 (1975): "The simple answer to plaintiff's argument is that the agency delegated authority for promulgating and interpreting the JTRs (Joint Travel Regulations) is presumed to have carried out such responsibilities properly.

Mountain States Tel. & Tel. Co. v. *United States,* 499 F. 2d 611, 615 (Ct. Cl. 1974): "Further, there is a presumption of the regularity of administrative action. This presumption is not rebutted by the mere fact that an agency's particular course of action is unique as compared to either the private sector or to the remainder of Government."

Mr. BUMPERS. Mr. President, one other specific objection to the bill should be addressed. Professor Nathanson dislikes "the cryptic phrase de novo with all its uncertain conotations." I find this attitude surprising, in view of the fact that the Administratve Procedure Act itself, 5 U.S.C. section 706(2)(F), already requires reviewing courts to set aside agency action that is "unwarranted by the facts to the extent that the facts are subject to trial de novo by the reviewing court." The Freedom of Information Act, 5 U.S.C. section 552(a)(3), also uses the phrase. As a matter, this act provides, in language that is a strong legislative precedent for the proposal I am making today:

In such a case [where an agency has withheld documents] the court shall determine the matter de novo and the burden is on the agency to sustain its action

The committee reports on the FOIA contain strong supportive language that is also applicable to the present bill:

That the proceeding must be de novo is essential in order that the ultimate decision as to the propriety of the agency's action is made by the court and to prevent it from becoming meaningless judicial sanctioning of agency discretion. S. Rep. No. 813, 89th Cong., 1st Sess. 8 (1965). See also H.R. Rep. No. 1497, 89th Cong., 2d Sess. 9 (1966).

In any case, the meaning of the phrase de novo is plain and obvious. It means that the courts will decide issues of law anew, without deference to previous agency determinations. Some such

phrase must be added to the statute if present judicial practice is to be changed. The Administrative Procedure Act, 5 U.S.C. section 706, already provides that "the reviewing court shall decide all relevant questions of law—and interpret constitutional and statutory provisions." That language, though plain enough, has not sufficed to require courts actually to decide issues of law for themselves.

A word should also be said about the objection of the Judicial Conference of the United States. Its position is simple enough: it opposes the bill because it does not want any more work to do. Mr. President, I am a little taken aback by this attitude, which hardly becomes a public servant. The judges, like the rest of us, should accept the tasks they are assigned and do their duty. At any rate, the answer to this objection, if it is a fact that the courts' workload will increase, is not to junk a needed reform, but to give the courts the manpower they need to do the job.

The question remains, after all the legal argumentation over precedents and other technical points is done with, Is there a need for a change in the law? Put another way, have agencies become so powerful today that they should be checked? This is not a question of law, strictly speaking, at all, but a question of Government, or politics. If there is an issue of public policy on which there is a broader consensus in this country, I am unaware of it. A glance at only a small portion of the mail that comes into congressional offices each day will suffice. The theme of overregulation recurs with at least as much frequency as any other. Nor does the voice of complaint come only from businessmen who, it might be thought, have an economic motive for their desire to shake the restraints of Government. Citizens' groups of all kinds, environmentalists, consumers, unions, and others, are unanimous in complaining that Government, most often manifested in regulations issued by executive or administrative agencies, has become too intrusive. For agencies to concern themselves with how close toilets should be to farm workers, or with whether a school's "dress code" can allow girls to have longer hair than boys, is nothing but ridiculous.

What is to be done about it? Most opponents of my proposal suggest that Congress created the problem and should therefore be responsible for solving it. In pointing the finger of blame at the legislative branch, they are correct, and I would be the last to dispute it. Beginning at least as early as the creation of the Interstate Commerce Commission in 1887, and continuing with ever greater intensity since the coming of the New Deal, Congress has avoided many hard choices simply by delegating much of its work to independent or executive agencies.

Most of this delegation has escaped constitutional censure because it was accompanied by some standards of action, however vague; but the fact remains that Congress, by giving the agencies such latitude, is responsible, at least vicariously, for much of the agencies' abuse of office.

Why then should Congress not correct its own errors? The answer is that it should, at least by the extent of being stingy about creating new agencies or delegating new powers to existing ones. Congress ought to rest from creation for a while, and I suspect such a respite would meet with universal public approval. As to those laws and agencies that already exist, the matter is not so simple. Congress could, in theory, review all the existing statutes and repass them, this time making more particular and specific the mandate of each agency. As a matter of fact, such an effort might fruitfully be part of so-called sunset legislation, if it ever comes to pass. The difficulty is that each of the broad legislative grants of power to agencies have already been particularized by the agencies themselves. These surrogates for Congress have spun out whole codes of regulations and interpretations, most of which have the force of law. Each of these specifications has acquired its own constituency of support, and it is not realistic to expect an elected Congress to tackle the massive task of reviewing the whole complex of administrative edicts now on the books.

One other possibility of congressional action for the future should be addressed. A number of bills were introduced in the last Congress to allow either House, by resolution, to prevent any rule or regulation of a Federal agency from going into effect. No doubt similar proposals will be before us this year. The idea has some appeal. It would interpose the Congress between the agencies and the people. The history of the device of one-House disapproval as a check on executive action, however, is discouraging. There is reason to fear that in practice most regulations would go routinely into effect. The sheer volume of material that would have to be reviewed each day would almost compel this result. In the end, agencies would be even more strongly insulated from judicial review than they are now. Suppose, for example, that you are a judge before whom a regulation's validity is being challenged. The regulation was transmitted to the appropriate committees of Congress and was not, within the time allotted by law, disapproved by either House. There is a strong inference, unlikely to escape even the most theoretical judge, that Congress has tacitly affirmed that the regulation is not contrary to its intent in enacting the agency's governing statute. The citizens contesting the regulation are probably worse off than they would have been had it never been submitted to Congress in the first place.

Some have suggested that the executive branch should put its own house in order, and that one way to help is to destroy the independence of the quasi-judicial agencies like the Securities and Exchange Commission and make them responsible to the President. The idea will appeal greatly to those who believe in symmetry as an end in itself, and certainly it would inescapably fix responsibility for all agency action in an elected officer answerable to the people. On the other hand, I can see no particular reason to believe that such a change would result in regulations more narrowly drafted, or more clearly within the intent of Congress. Agencies directly and immediately responsible to the President—HEW, FEA—have offended just as markedly as those that are in some sense independent. A thoroughgoing reorganization of the executive establishment, such as we expect from the new President-to-be, may yield great dividends, but I see no reason to wait for it before taking action.

The cure for the disease of administrative overreaching, Mr. President, is not exotic. It is not novel. It is simply a reliance on one of the three traditional branches of our Government—the courts. I can understand why those who initiated the great regulatory reforms of the New Deal and later years were fearful of broad judicial review. The judges, or most of them, had been appointed by previous Presidents, most of them of the opposite party, and they tended to be hostile to any change in the law. For much the same reason that led Congress to enact the Norris-LaGuardia Act, removing the Federal courts' jurisdiction to issue injunctions in labor disputes, Congress wished also to protect the social measures of the thirties from judicial pettifogging. The courts, from the Supreme Court on down, were seen as a reactionary enemy to be restrained, rather than a coordinate instrument of Government. The agencies, by contrast, could be staffed with younger, friendlier men—James M. Landis, William O. Douglas—who, even while acquiring that mystic quality called "expertise," would not only accept, but advocate, the new social policies of the Nation. As new judges were appointed and the national consensus for the new policies hardened, the courts themselves became willing partners in self-limitation, repeating with ever more force abstractions about expertise, the suitability of the administrative process to modern government, and the reluctance of appointed judges to interfere with social policy. Never mind that no one had elected the administrators, either. In fact, to the extent that agency staff members were the real locus of power, no one had elected even the persons who chose them.

Now, in the late 1970's, it is wrong to accept uncritically concepts of the distribution of power called forth by the needs of 40 years ago. The Federal Government now is widely perceived to be too active, not too passive, and no part of the national establishment is by the popular mind more identified with this tendency than the bureaucracy. To correct this trend of power, even to slow it, will be the work of not a few years.

But a start can be made, and the so-called presumption of regularity, by which the citizen challenging his government must always play with a deck legally stacked against him, is a good place to begin. One can easily see how the doctrine, along with its cousin sovereign immunity, took root in England, where the King—or the King in parliament, at any rate—was sovereign, and citizens were called subjects. But why it should have flourished in America, where the people are sovereign and the agents of government are servants, is a mystery. The proposition that the Government is presumed correct, that a tie,

so to speak, always goes against the individual, is an alien tenet deserving of a quick death. Let the Government, with its vast resources and superior knowledge, bear the burden of proof. To be sure, the citizen should still have the burden of raising the issue of a regulation's validity, by pleading or in some less formal way. He can still be given the burden of going forward with the evidence. But on the ultimate issue of whether an agency is lawfully within power delegated by Congress—itself only a creature of the people's Constitution—it is wrong to give the servant an automatic edge in the guise of a presumption. The same may be said of the rule that an agency's construction of its own statute should be deferred to. One can understand why the Supreme Court in the 1940's was anxious to defend the Labor Board's authority against unsympathetic courts of appeals, and some such motive may explain the language in Hearst. But on reflection the rule there announced is reduced to no more than this: that within some fairly broad range of choice, an agency decides the limits of its own powers, is judge in its own cause. In a lawsuit between A, a citizen, and B, an agent of Government, B wins because he says so. This is a monstrous rule, and no amount of usage or precedent should prevent the Congress from overturning it. The proper disposition of power in our Government has been described in the following clear-eyed dissent by Mr. Justice Jackson, joined by Mr. Justice Frankfurter, no foe of administration as a modern technique of governing:

> I suggest that administrative experience is of weight in judicial review only to this point—it is a persuasive reason for deference to the Commission in the exercise of its discretionary powers under and within the law. It cannot be invoked to support action outside the law. And what action is, and what is not, within the law must be determined by courts, when authorized to review, no matter how much deference is due to the agency's fact finding. Surely an administrative agency is not a law unto itself, but the Court does not really face up to the fact that this is the justification it is offering for sustaining the Commission's action. Securities & Exch. Comm'n. v. Chenery Corp., 322 U.S. 194, 215 (1947).

It was, after all, Franklin D. Roosevelt himself who wrote:

> The practice of creating independent regulatory commissions, who perform administrative work in addition to judicial work, threatens to develop a fourth branch of the Government for which there is no sanction in the Constitution. See Davis, Administrative Law Treatise, Section 1.04 at p. 28 (1958).

It may be objected that this proposal will intrude the courts into policy areas where they have no business. Courts have made policy, of course, ever since the common law was conceived, but in a society increasingly governed by specific statutory pronouncements enacted by an elected legislature—to say nothing of a written Constitution—it must be conceded that the courts' lawmaking power is largely interstitial. As statutes become more numerous and more detailed each year, the function of the courts becomes, or should become, rather to enforce the policies of the Congress, than to create and enforce policies of their own. To hold that agency decisions in conflict with a policy of Congress should be overtuned by the courts, however, is to aid the legislative process, not to hinder it, for legislation can never be specific enough to insure that in every instance the specific will of the legislators is carried out. A statute, once enacted, escapes the control of its writers, as it were, and becomes a living thing, with a life and growth of its own. Those chosen by the Congress to execute the statute may or may not do so faithfully. Political processes are not always sufficient to compel them to follow the spirit of the law. When they transgress it, a power of correction should reside somewhere and, under our system, that place is the courts.

Administrative agencies, after all, are no more lawmaking bodies than our courts. They are the creatures of Congress, possessing only those powers given them by legislation. It is not enough, for example, for an administrative official to argue that no law prohibits his action, and that therefore the courts should not intervene. As one court has properly observed:

> This argument misses the point. The Secretary of Transportation is not so omnipotent that he must be presumed to possess the power to act as he chooses unless there is some law prohibiting him from so acting. He possesses only the power which Congress has given him, and the scope of that power is defined by Congress. *Named individual Members of the San Antonio Conservation Society* v. *Texas Highway Department,* 446 F. 2d 1013, 1023, n. 18 (5th Cir. 1971).

Mr. President, I do not pretend to believe that the courts will ever wholly succeed in enforcing the will of Congress precisely as we would wish, in overruling those exercises of administrative power that truly go beyond the legislative mandate, and upholding those applications of statute that, while not perhaps to the judges' personal liking, are nevertheless within the range of choice left by Congress to the agency. The courts, that is, cannot do everything. I am convinced however, that they can do more than they have, if directed and encouraged by an amendment to the Administrative Procedure Act such as I am today proposing.

Judicial review, however imperfect, is at least a constant reminder to the administrative agencies that they are not all-powerful. Congress, after all, paints with a broad brush. That is the nature of our legislative process. It is for the courts to see that the broad policies commanded by Congress are not distorted in individual situations by the agents of Congress. The courts cannot write the tune, but at least they can see that those who are playing it maintain the key chosen by its composer. As Archibald MacLeish has argued, the courts' labor is "the labor of order," Apologia, 85 Harv. L. Rev. 1505, 1508 (1972), to reduce the confusion, sometimes the chaos of the administrative process to order, so that that process will make sense for the individual citizen.

Mr. President, it is my hope that the bill I introduce today will be a step toward restoring order to the administrative process and, even more important, toward restoring our citizens' confidence in their own Government.

By Mr. BUMPERS:

S. 87. A bill to amend title II of the Social Security Act to increase to $4,800 the amount of outside earnings permitted without deductions from benefits thereunder; to the Committee on Finance.

Mr. BUMPERS. Mr. President, today I am introducing legislation to provide a substantial increase in the amount of earnings an individual can have and still keep all of his social security benefits.

Under the present law an individual can earn up to $3,000 a year and still get all of his benefits. If he earns over $3,000, he losses $1 in benefits for each $2 in earnings above $3,000. However, regardless of the amount he earns in the year, he can get his full benefit for any month in which he earns no more than $250. Next year—1978—these amounts will rise automatically to about $3,240 a year and $270 a month. Under my bill, the 1978 amounts would be $4,800 a year and $400 a month with automatic increases each year thereafter as under present law.

Mr. President, I would prefer to have this change effective earlier than 1978, but the test is on an annual basis, and it seems unwise to change it now that we have started into 1977.

Judging from my mail and conversations with my colleagues, there seems to be pretty general agreement that the present retirement test is not equitable. It is little more than a heavy, regressive, 50-percent tax on the income of retired people who work, and it ought to be repealed. Furthermore, any amount of unearned income, such as interest or dividends can be received without affecting a person's eligibility.

Elimination of the earnings test altogether would be desirable, but it would also be very expensive, about $7 billion in the first year according to the social security actuary. The change to $4,800 which I propose is also expensive, $1.5 billion in 1978. But it is worth it, and we can afford it. In fact, we can not afford to put off this change.

Look at what the present test does to the average retiree who had a benefit of about $236 a month in June 1976, and who earns the minimum wage. His hourly rate is $2.30, $398.67 a month, $4,784 a year. Under the present law he would have his $2,832 social security benefit reduced as follows: $4,784 minus $3,240 equals $1,544; $1,544 divided by 2 equals $772.

His $4,784 annual wages would in effect be reduced to $4,012. Looking at it another way, assuming he works a 40-hour week for 52 weeks, his hourly rate would be reduced to $1.93 an hour—37 cents less than the Federal minimum wage.

Under my bill, this person would get to keep all of his wages, and we would not be using the Federal social security program to reduce real earnings to less than the Federal minimum wage.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 87

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (f)(3) of Section 203 of the Social Security Act is amended by striking out "$200" and inserting in lieu thereof "$400".

(b) Subsection (f)(1), (f)(4)(B), and (h)(1)(A) of such Section 203 are each amended by striking out "$200" and inserting in lieu thereof "$400".

SEC. 2. The amendments made by the first section of this Act shall be effective with respect to taxable years ending after December 31, 1977.

By Mr. CRANSTON:

S. 88. A bill to enlarge the Sequoia National Park in the State of California by adding to such park the Mineral King Valley area, to provide for certain planning respecting the management of such addition, and for other purposes; to the Committee on Interior and Insular Affairs.

Mr. CRANSTON. Mr. President, I introduce for appropriate reference a bill to add the area known as Mineral King to Sequoia National Park. The bill is a companion to a measure being introduced in the House by Congressman JOHN KREBS.

Mr. President, Mineral King is a 15,600-acre area within the Sequoia National Forest. It currently is designated as the Sequoia National Game Refuge. Located in the Sierra Nevada Mountains in south central California, Mineral King is about 65 miles east of Visalia, 228 miles north of Los Angeles, and 271 miles southeast of San Francisco.

Mineral King contains superb scenic and natural resources equaling those of Sequoia National Park which adjoins it on three sides. There are aspen and alder along the streambeds, strands of pine and fir at higher elevations, and barren and rocky terrain above the timber line. The main feature of the area is Mineral King Valley which is surrounded by spectacular mountain peaks rising over 12,000 feet.

Mineral King was named for the mining activity which took place there in the 1870's and 1880's. Because of this mining and the area's potential for further mineral development, Mineral King was not included in Sequoia National Park although both topographically and ecologically the area belongs to the park.

Today there is no commercial mining in the area. The current predominant use of Mineral King is recreation.

Because of its easy accessibility and proximity to the rapidly growing population centers of southern California, Mineral King is attracting over 200,000 visitor days of use each season. The area clearly has the potential for additional public recreation.

Since 1949 the U.S. Forest Service has been proposing development of Mineral King as a year-round recreation area. In 1965 the Forest Service selected Walt Disney Productions to develop Mineral King's outstanding recreation potential. The final environmental impact statement on the proposed development was filed with the Council on Environmental Quality on February 26, 1976.

The Forest Service plan calls for year-round high intensity use—skiing, sledding, and skating in the winter; camping, fishing, hiking, and horseback riding in the summer. Eighteen ski lifts, six campgrounds, lodging accommodations, restaurants, shops, and other support facilities are proposed. The Forest Service estimates peak capacities of 8,000 in the winter and 6,000 in the summer.

Serious questions have been raised about the compatibility of the Forest Service proposal with Mineral King's natural values and its game refuge status. The development is presently blocked by a lawsuit filed by the Sierra Club.

In the meantime, Mineral King is not being properly managed to meet public needs and protect the area. There is inadequate parking in the valley. The vegetation is being damaged and the river polluted. This deterioration of the Mineral King area must cease.

Mr. President, the bill I am introducing today takes Mineral King out of the Forest Service's jurisdiction and places it under the Interior Department as part of the Sequoia National Park. I believe that as part of the national park system the wildlife habitat and scenic and natural values of Mineral King can best be protected and preserved.

The bill also directs the Secretary of Interior within 2 years to develop a comprehensive management plan for Mineral King consistent with these objectives, taking into consideration the need for additional recreational opportunities. The bill provides that there will be full public participation in the development of this management plan. Should the plan call for concessions, facilities, or services, no party including Disney Productions would be excluded from competing for a contract.

There are approximately 730 acres of private land within the boundaries of Mineral King. The legislation stipulates that the private lands be acquired for the public and authorizes $1.5 million for this purpose. The bill gives private property owners a lifetime estate in their improved residential property or use up to 25 years, whichever is later.

There are also 67 summer cabins in Mineral King on leased national forest land. The bill provides that the leases remain in effect under the terms and conditions set therein.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 88

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Congress finds that—

(1) the Mineral King Valley area contains superb natural and scenic resources which should be preserved and protected;

(2) the Mineral King Valley area has outstanding potential for year-round recreational opportunities;

(3) because of its easy accessibility and proximity to the rapidly growing population centers of Southern California, Mineral King Valley is much-visited;

(4) present management of the Mineral King Valley area is inadequate both to meet public needs and to prevent deterioration of the area;

(5) the Mineral King Valley area is an integral part of Sequoia National Park and was excluded solely due to its potential for mineral development; and

(6) the Mineral King Valley area has not in this century produced any commercial ore, and the current predominant use of the area is recreation.

PURPOSES

SEC. 2. It is the purpose of this Act to assure the preservation for this and future generations of the area known as Mineral King Valley and presently designated as the Sequoia National Game Refuge and to enhance the ecological values and public enjoyment of such area by adding such area to the Sequoia National Park.

SEC. 3. (a) In order to carry out the purposes of this Act, all lands, waters, and interests therein, constituting approximately 15,600 acres, identified as the Sequoia National Game Refuge on the map entitled "Boundary Map, Sequoia-Kings Canyon National Park", numbered 102–90,000 and dated April 1975, are hereby added to Sequoia National Park (hereinafter in this Act referred to as "the Park"). A copy of such map shall be on file and available for public inspection in the offices of the National Park Service, Department of the Interior. After advising the Committees on Interior and Insular Affairs of the United States House of Representatives and the United States Senate in writing, the Secretary of the Interior (hereinafter referred to as "the Secretary") is authorized to make minor revisions of the boundaries of the Park when necessary by publication of a revised map or other boundary description in the Federal Register.

(b) Effective on the date of enactment of this Act, the Sequoia National Game Refuge is abolished and the Secretary of Agriculture shall transfer, without consideration, to the administrative jurisdiction of the Secretary of the Interior the area constituting such refuge, and any unexpended funds available for purposes of management of the refuge shall be available for purposes of management of the park.

ACQUISITION OF LANDS

SEC. 4. (a) Within the exterior boundaries of the area added to the Park by this Act, the Secretary is authorized to acquire land and waters, and interests therein, by donation, purchase with donated or appropriated funds, exchange, or transfer.

(b) The owner of improved property on the date of its acquisition by the Secretary under this Act, may as a condition of such acquisition, retain for himself and his heirs and assigns a right of use and occupancy of improved property for noncommercial residential purposes for a definite term of not more than twenty-five years or, in lieu thereof, for a term ending at the death of the owner or the death of his spouse, whichever is later. The owner shall elect the term to be reserved. Unless the property is wholly or partially donated to the United States, the Secretary shall pay the owner fair market value of the property on the date of acquisition minus the fair market value on that date of the right retained by the owner. A right retained pursuant to this section shall be subject to termination by the Secretary upon his determination that it is being exercised in a manner inconsistent with the purpose of this Act, and it shall terminate by operation of law upon the Secretary's notifying the holder of the right of such determination and tendering to him an amount

equal to the fair market value of that portion of the right which remains unexpired.

(c) The term "improved property" as used in subsection (b) means a detached noncommercial residential dwelling, together with not more than three acres of land on which the dwelling is situated, the said land being in the same ownership as the dwelling.

(d) If any individual tract or parcel of land acquired is partly inside and partly outside the boundaries of the Park the Secretary may, in order to minimize the payment of severance damages, acquire the whole of the tract or parcel.

(e) In exercising his authority to acquire property under this Act, the Secretary shall give prompt and careful consideration to any offer made by an individual owning property within Mineral King Valley to sell such property if such individual notifies the Secretary that the continued ownership of such property is causing, or would result in, undue hardship.

(f) The Secretary, within the thirty-six month period following the date of the enactment of this Act, shall report to the Congress the action taken by him pursuant to this section. Such report shall contain information sufficient to inform the Congress (1) the acquisitions made by him pursuant to this section during the period covered by such report; (2) his reasons why all of such property authorized to be acquired and not so acquired as of the date of such report, if any, have not been acquired; and (3) his schedule of a timetable for the acquisition of such property referred to in clause (2).

ADMINISTRATION

SEC. 5. (a) The area added to the Park by this Act shall be administered, protected, and developed in accordance with the provisions of the Act of August 25, 1916 (39 Stat. 535; 16 U.S.C. and following) and the Act of September 25, 1890 (26 Stat. 473; 16 U.S.C. 41 and following). Any other statutory authority available to the Secretary for the conservation and management of wildlife, wildlife habitat, and natural resources may be utilized to the extent he finds such authority will further the purposes of this Act.

(b) Except in the case of a valid existing lease which the Secretary determines to be incompatible with the administration of the Park, any lease of Federal land within the area added to the Park by this Act which is in effect on the date immediately before the date of the enactment of this Act shall continue in effect pursuant to its terms and conditions following the addition of such area of the Park by this Act.

MANAGEMENT PLAN; PUBLIC PARTICIPATION

SEC. 6. (a) Within 2 years from the date of enactment of this Act, the Secretary shall develop and submit to the Committees on Interior and Insular Affairs of the United States Senate and House of Representatives a comprehensive management plan for the area added to the Park by this Act. In developing such plan, the Secretary shall, to the extent consistent with the purposes of this Act, provide for additional recreational opportunities and other public uses.

(b)(1) In preparing the comprehensive management plan required by this section, the Secretary shall provide for full public participation and shall consider the comments and views of all interested agencies, organizations, and individuals.

(2) For purposes of insuring such full public participation, the Secretary shall provide reasonable advance notice to State and local governments, interested Federal agencies, private organizations and the general public of hearings, workshops, meetings and other opportunities available for such participation. Such notice shall be published in newspapers of general circulation in the localities affected by the development and management of the Park, published in the Federal Register, and communicated by other appropriate means. The Western Regional Advisory Committee of the National Park Service (or a subcommittee thereof) shall also be utilized for purposes of facilitating public involvement.

(3) The Secretaries or Directors of all Federal departments, agencies, and commissions having a relevant expertise are hereby authorized and directed to cooperate with the Secretary in his development of such plan and to make such studies as the Secretary may request on a cost reimbursable basis.

(4) If such plan provides for concessions, or facilities, services, or other accommodations for the public, the Secretary, notwithstanding any other provision of law, or regulation, or any agreement or other arrangement entered into pursuant thereto, shall not grant or recognize any privilege, lease, permit, or contract, or enter into any contract, agreement, or other arrangement, providing for concessions, or facilities, services, or other accommodations for the public within such area added to the Park by this Act, unless he has first given reasonable public notice, after the submission of such management plan, of his intention to do so and has considered and evaluated all proposals received as a result thereof, and acts on the basis thereof.

AUTHORIZATION

SEC. 7. There is hereby authorized to be appropriated not to exceed $1,500,000 for the acquisition of land, waters, and interests therein, under section 4 of this Act.

REPEAL OF CERTAIN LAWS APPLICABLE TO THE GAME REFUGE

SEC. 8. Effective upon the transfer referred to in section 3(b), the Act of August 14, 1958 (72 Stat. 604; 16 U.S.C. 45a-3) and section 6 of the Act of July 3, 1926 (44 Stat. 821; 16 U.S.C. 688) are hereby repealed. The repeal of such section 6 shall not be construed to prohibit or prevent the Secretary from exercising any authority applicable to the National Parks respecting the protection of birds, game, or other wild animals.

By Mr. STONE:

S. 89. A bill to amend the Older Americans Act of 1965 to provide nutrition programs for handicapped dependents of older Americans; to the Committee on Labor and Public Welfare.

Mr. STONE. Mr. President, I am today reintroducing a bill to amend the Older Americans Act of 1965 to include the handicapped dependents of older Americans, who qualify for elderly nutrition programs, as "eligible individuals" for such programs. I believe that this bill is a realistic and humane measure that will eliminate problems presently being faced by individuals who legally qualify for such elderly nutrition programs, but deprive themselves of the opportunity due to consideration for their handicapped children.

That this amendment is necessary is evidenced by the unyielding nature of this family bond. To detail accurately the full implications of this situation, it is necessary that we understand:

First. The living circumstances of older Americans who qualify for elderly nutrition programs.

Second. The excellent services that are available through these programs.

Third. Two specific cases in the State of Florida which graphically exemplify this tragic situation.

First, by virtue of the eligibility requirements of nutrition programs for the elderly, all participants must be age 60 or older and unable to eat adequately because, first, they cannot afford to do so; second, they lack the skills to select and prepare nourishing and well-balanced meals; third, they have limited mobility which may impair their capacity to shop and cook for themselves; or fourth, they have feelings of rejection or loneliness which obliterate the incentive to prepare and eat a meal alone. Therefore, in view of these specifications, it should be immediately evident that the forfeiture of benefits, which may be derived from elderly nutrition programs by qualifying individuals is not due to the lack of need.

Second, the funds allotted to any State during any fiscal year will only be dispersed by the State agency to recipients of grants or contracts who agree: First, to establish a "nutrition project" which provides at least one hot meal per day and any additional meals, hot or cold, 5 or more days per week; second, to furnish a site for such a nutrition project in as close proximity to the majority of eligible individuals as is feasible; third, to utilize methods of administration that will assure that the maximum number of eligible individuals will be served; fourth, to provide special menus for those with particular dietary needs for health, religious or ethnic reasons; fifth, to expand the nutrition project to include, as part of the project, recreational activities, informational, health and welfare counseling and referral services; sixth, to provide training for personnel as may be necessary to carry out the provisions of the project; seventh, to establish and administer the nutrition project with the advice of persons competent in nutritional fields, the elderly participants, and persons who are knowledgeable with regard to the needs of the elderly; eighth, to provide periodical evaluations of all aspects of the nutritional project; ninth, to give preference to persons age 60 or older for staff positions that they may qualify for and to encourage the participation of volunteer groups; and tenth, to comply with such standards as the Secretary of Health, Education, and Welfare may by regulation prescribe.

Without question, these standards define the excellent services available to qualifying senior citizens. It should be clear, therefore, that forfeiture of benefits, which may be derived from such a useful elderly assistance program, does not stem from inadequacies within the nutrition programs.

Finally, several cases which can be used as examples of this family situation in the State of Florida have been brought to my attention. In particular, I find two of these cases especially noteworthy.

The first case was reported to me by Mr. A. T. Holloman, Jr., Chairman of the Jacksonville Nutritional Advisory Council. Mr. Holloman made reference to a variety of incidents in which a qualified parent, in absolute need of the services, refused to take part in area nutrition projects since he would have to leave his hungry handicapped child at home in the process. In addition, Ms. Naomi Benson, project director of the

Jewish Vocational Service Nutrition Project of Miami, has informed me that similar problems have arisen about a half-dozen times in the last 18 months. Ms. Benson went on to site a specific case in which a local philanthropist is temporarily paying for the meals of the 53-year-old daughter of an 82-year-old woman in order that the mother, who is very poor and almost blind, will participate in the area nutrition project.

Certainly, these are only two of many similar cases in the State of Florida, yet their tragic message clearly represents the basic dilemma. In effect, the hardships of already unfortunate family circumstances are compounded by the threat of separating family units for preservations' sake.

The support that this bill offers for the maintenance of the family unit, in relation to participation in elderly nutrition programs, is by no means an entirely original concept. To imply the contrary would be to demean the wisdom of the authors of title VII—Nutrition Program for the Elderly—of the Older Americans Act of 1965—since, at the time of its writing, provisions were made to include the spouses of qualifying older Americans as "eligible individuals" for elderly nutrition programs. This is, of course, in keeping with my basic premise that such elderly nutrition programs must not compel "eligible individuals" to choose between family and survival.

In conclusion, it is evident that the combination of first, the unfortunate living conditions of older Americans who qualify for elderly nutrition programs and second, the excellent services available through elderly nutrition programs, constitutes an extraordinarily painful sacrifice on the part of those who deprive themselves of such benefits. This bill will respond to the needs of these older Americans who would rather starve than alienate their handicapped children, by including their handicapped dependents as "eligible individuals" for elderly nutrition programs.

By Mr. NELSON (for himself, Mr. HUMPHREY, and Mr. LEAHY):

S. 90. A bill to provide price support for milk at not less than 90 per centum of the parity price therefor, and for other purposes; to the Committee on Agriculture and Forestry.

Mr. NELSON. Mr. President, boom and bust continues to be the state of the economy for the dairy farmers of this Nation—and even during the so-called boom part of the cycle, dairy farmers are asked to accept far less than a fair return for their investment and for the labor put forth by themselves and their families.

It is for that reason that I am introducing at this time legislation that would raise dairy price support levels to a minimum of 90 percent of parity, and which also would require mandatory quarterly adjustment of the support level.

Under present law price support levels may be set by the Secretary of Agriculture at anywhere between 75 and 90 percent of parity. For the past year the chosen level was 80 percent, and the Secretary voluntarily did adjust the payment each quarter until this final one, which will end March 31, 1977.

For the most part in this past year, until just the past month or two, the market price of milk has been above the support level. The fact is, however, that even though the market price was above 80 percent of parity, the dairy farmer continued to receive an income insufficient in terms of his labor, his investment, and the return that any other businessman in America would expect in order to remain solvent.

This has been the picture during the past 20 years. As a result, over 70,000 Wisconsin dairy farmers have gone out of business since 1952.

The point is that we continue to ask our dairy farmers to produce the Nation's milk at a sacrifice to themselves and to their families. In 1975, for example, the all-milk price received by Wisconsin dairy farmers averaged $8.17 a hundredweight, but the actual production cost for that milk was $9.79 a hundredweight.

How did any Wisconsin dairy farmers survive under those circumstances? The answer is that thousands of them did not—it was a period in which many of them sold out. How did the others manage to survive? Simply by not taking any wages for their families' labor and by foregoing any return at all on their considerable investment.

Each year poses new and different problems for dairy farmers. One year the Nixon administration flooded the American market with heavily subsidized foreign cheese and broke the domestic market. Another year foreign sales of grains drove up the cost of supplemental feeds at a time the domestic milk price and support level were both very low.

This year the seasonal differences in milk prices are just the opposite of most years. Usually, in the fall and winter milk prices go up. But in December 1976, the price of milk, after having been fairly high during the summer, continued a decline that had started early in the fall.

As a result prices paid for manufacturing milk in the United States in December 1976 were 73 cents a hundredweight less to the dairy farmer than in December 1975.

And 1975 as I pointed out was the year dairy farmers lost an average of $1.62 for every hundredweight of milk they produced.

The basic premise of the dairy support program originally passed by the Congress in 1948 was simple—to assure the Nation's consumers an adequate supply of milk at reasonable prices by putting a floor under the dairy farmers' income.

That simple aim cannot be realized if the floor is not at a sufficient level to keep our family dairy farmers in production. The present 80 percent of parity is not adequate; the dairy farmer must be assured of at least 90 percent of parity.

By Mr. CHILES (for himself and Mr. STONE):

S. 91. A bill to amend section 8e of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, to subject imported tomatoes to restrictions comparable to those applicable to domestic tomatoes; to the Committee on Agriculture and Forestry.

Mr. CHILES. Mr. President, I introduce on behalf of myself and Senator STONE, legislation to amend section 8e of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, to require that imported tomatoes conform with pack-of-container standards imposed on domestic tomatoes under marketing orders. This bill is identical to legislation which I introduced in the last Congress that was passed by the Senate but could not be acted upon by the House of Representatives before adjournment.

The legislation we are proposing seeks to clarify section 8e with respect to requirements imposed under marketing order on the "pack" of the container in which tomatoes are shipped. This amendment is entirely consistent with the original intent of section 8e and is offered only to revise an interpretation of that section which the Department of Agriculture has adopted. The resolution of the current disagreement between domestic producers and the Department on this issue is important to an orderly marketing situation for tomatoes and to the ability of domestic producers to effectively compete with imports.

Section 8e of the act requires that imports of selected commodities—including tomatoes—meet the same minimum grade, size, quality or maturity standards imposed on domestic shipments under a marketing order. Its purpose is to insure that market regulation would have equal benefit to both domestic and foreign producers. It is no way aimed at excluding or curtailing imports. Rather its aim is to see that imports and domestic produce are on an equal footing with respect to marketing orders. In the case of tomatoes the Senate report for the original legislation states,

> Imports of tomatoes . . . would be prohibited if they did not comply with grade, size, quality and maturity provisions of all marketing orders applicable to the same commodities produced in the United States.

By marketing order, domestic producers of fresh tomatoes are prohibited from mixing different grades of tomatoes in a shipping container or mixing different sizes of tomatoes. Since tomatoes are sold by grade and size this requirement is quite significant from the standpoint of pricing and to the orderly marketing of fresh tomatoes.

The problem that has arisen is that the USDA maintains that the prohibition against the mixing of grades or sizes within a container is a pack regulation and not a grade or size regulation. The Department further maintains that pack regulations cannot be imposed on imports under section 8e of the Agricultural Marketing Agreement Act.

The result of this interpretation is that foreign shippers are permitted to ship different grades and sizes of tomatoes in a single container while American producers must comply with the pack regulation. Foreign-grown tomatoes constitute a substantial volume of the tomatoes sold in the United States. Consequently, the lack of pack restrictions on

these tomatoes is disruptive to marketing procedures, since the buyer often does not know what he is getting, and also places the domestic producer at a distinct disadvantage.

Over the years there have been numerous efforts to work out a solution to this problem. I am assured the solution lies in a clarifying amendment to definitely spell out the application of pack regulations to imports under section 8e. Such a change will carry forward the intent of section 8e and work to the benefit of both the producer and the consumer. Enactment of this legislation would incur no additional cost to the Government.

This legislation has been passed once by the Senate after appropriate committee consideration. I urge prompt action on the bill in this Congress.

Mr. President, I ask unanimous consent that the text of the bill I am introducing today be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 91

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 8e of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, is amended in the first sentence (1) by inserting after "eggplants" a comma and the following: "or regulating the pack of any container of tomatoes" and (2) by inserting a comma and "and in the case of tomatoes any provisions regulating the pack of any container," after "provisions" wherever it appears, and in the fourth sentence by inserting a comma and "and with respect to imported tomatoes such restrictions on the pack of any container," after "classifications".

PACKAGING STANDARDS FOR IMPORTED TOMATOES

Mr. STONE. Mr. President, I am pleased to join my distinguished colleague, Senator Chiles, in offering legislation to amend section 8e of the Agricultural Marketing Agreement Act of 1933 to require that imported tomatoes conform with pack-of-container standards imposed on domestic tomatoes under marketing orders. This bill, referred to as S.2440 in the 94th Congress, was reported favorable by the Senate Agriculture and Forestry Committee and passed by the Senate last September. Unfortunately, the House did not have time to act upon it. Therefore, we are reintroducing it for the Senate's immediate consideration.

The effect of this bill would simply be to subject the importation of tomatoes to the same packing requirements that our own domestic producers and packers now face. Florida tomato growers, along with many other domestic tomato growers, are faced with an unusual problem by Mexican tomato growers, particularly since Mexico has recently devalued and floated its currency. Because of this devaluation, Mexican tomatoes have been further cheapened as compared to our domestic tomatoes. The real problem lies in the fact that imported tomatoes do not have the same crating and boxing requirements that we have. Therefore, our growers who compete with imported tomatoes are faced with an even greater problem than cost reductions unless we can at least equalize the conditions under which these products are sold. Presently regulations governing tomato quality are now uniform for both domestic and imported tomatoes. This bill would simply add uniformity in packing standards for both domestic and imported tomatoes. The effect of the bill would be to require uniformity in packing practices on those imported tomatoes. This legislation will benefit American consumers as well as tomato growers. It will insure that our consumers will receive the proper grade of imported tomatoes for the price that they pay and will eliminate substandard tomatoes from being included in higher priced shippings.

This legislation will result in no cost to the Government. It is not aimed at curtailing imports. It will result in bringing needed order to the marketing of fresh tomatoes and will benefit both producers and consumers in the United States. I join my distinguished colleague in urging prompt action on this bill.

By Mr. WILLIAMS (for himself and Mr. PROXMIRE):

S. 92. A bill to amend and extend the Export Administration Act of 1969 to improve the administration of export controls pursuant to such act, to strengthen the antiboycott provisions of such act, and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

EXPORT ADMINISTRATION AND FOREIGN BOYCOTT AMENDMENTS ACT OF 1977

Mr. WILLIAMS. Mr. President, I am today introducing, on behalf of Senator PROXMIRE and myself, the Export Administration and Foreign Boycott Amendments Act of 1977.

As my colleagues are aware, the Export Administration Act expired last year as a result of the administration's opposition to the antiboycott provisions contained in the necessary extension legislation. As a result, the United States is now without the requisite authority to deal with the complex issues of national and international consequence arising under the jurisdiction of the act. The legislation Senator PROXMIRE and I are cosponsoring will reenact this important statute.

In addition, the bill deals with a panoply of issues—export controls for national security purposes; commodity control lists; simplifying and improving the operation of the Export Administration Act; international terrorism and nuclear proliferation. However, it deals with one issue of particular interest and special concern to this country and one of its closest allies—the Arab boycott of Israel and of American firms doing business in or with Israel.

The 1973 oil embargo has provided the members of the Arab boycott league with enormous leverage to enforce and enlarge the effectiveness and scope of the boycott of Israel. And this is precisely what has happened. What began in the mid-1940's as an economic boycott of Israel has evolved into an unfocused economic and religious campaign by certain Arab countries against not only an adversary, the State of Israel, but also its allies and suporters around the world, especially the United States.

The purpose of this bill is to provide an effective and responsible American position in the face of the serious legal, political, economic and moral questions raised by the Arab boycott at it is practiced in the world today. This would be achieved by making it unlawful for American businessmen to participate to any extent in the Arab boycott of Israel.

Mr. President, since 1965 and until the Export Administration Act expired several months ago, the law regarding foreign boycotts was a statement of official policy in opposition to foreign boycotts and restrictive trade practices. In addition, the law "encouraged and requested" American businessmen to refuse to take any action furthering or supporting restrictive trade practices or boycotts. There were no exact standards of lawful conduct in a boycott context and the law did not provide an effective enforcement mechanism.

As a sponsor in 1965 of these provisions, I pressed for more forceful antiboycott legislation at every opportunity. The need has never been greater than it is at present.

Since the oil embargo of 1973, the reach and purposes of the Arab boycott have been extended far beyond the regional problems in the Middle East. It is now directed against American citizens and businesses and toward altering American policies in that area. American firms doing business with Israel, and even with Jewish Americans in the United States, have become targets of Arab blacklisting, religious discrimination and economic reprisals. Discrimination and blackmail have been injected into U.S. national and international economic and political affairs. And we have allowed ourselves to become enforcers of the boycott against Israel.

Mr. President, I believe the Arab boycott exceeds recognized principles of international law, violates U.S. sovereignty, and abridges fundamental American freedoms—particularly, freedom from religious persecution. Moreover, existing law is inadequate to protect our commitments to all parties in the Middle East, Israel as well as the Arab League countries.

Unfortunately, in too many instances our Government, American business and especially our financial institutions, are collaborating with the boycotting countries to effectuate and enforce the boycott, contrary to our national standards and foreign policy interests and commitments.

Extensive hearings and investigations during the 94th Congress provided graphic illustrations. For example, there is probative evidence that the very officials and agencies charged with administering and enforcing U. S. antiboycott laws—the Commerce, State, and Treasury Departments, as well as the President—have intentionally undermined its purposes. Counseling American business in evasion of the law, withholding information from Congress and the public, and even allowing the Government itself to engage in discriminatory practices are just some examples.

A few actual instances demonstrate precisely how the Arab boycott of Israel tramples national goals and ideals and undermines our Constitution and Bill of Rights.

A U.S. bus manufacturer had its contract to sell buses to an Arab State terminated when it was learned that the seats were to be made by an American company on the Arab blacklist.

Two American investment banking firms were disciplined by the National Association of Securities Dealers for violating its rules of fair practice in substituting nonblacklisted affiliates for blacklisted firms in underwritings with Arab participation.

A large American contracting firm was sued by the Department of Justice because of its refusal to deal with blacklisted American subcontractors and requiring such subcontractors to refuse to deal with blacklisted persons or entities.

Two colonels in the Army Corps of Engineers testified that the corps had acquiesced to Arab pressure to exclude Jewish personnel from projects in Saudi Arabia.

The Department of Commerce—the agency charged with implementing and enforcing the antiboycott laws—distributed to U.S. businesses "trade opportunities" which contained boycott clauses until congressional pressure forced a termination.

In addition to blatant religious discrimination, the economic dimensions of the boycott have also been accurately gauged for the first time. The Arab boycott has an enormous impact on American business. The House Commerce Investigations Subcommittee reported that American businesses are complying with over 90 percent of the boycott requests as the cost of doing business with Arab States. The estimated total value of goods and services involved in all reported boycott requests in 1974 and 1975 was $4.5 billion. Available figures also indicate a sharp increase in both the number of transactions involving boycott requests and the number of companies reporting compliance.

The upward trend results from the continuing increase in the level of trade in the Middle East as these countries continue to reinvest their petro dollars in American products, technology and know-how. While this is beneficial to our overall economy, it also demonstrates that as trade grows, boycott pressures on U.S. business will likewise increase.

In addition, these figures reveal, for the first time, the number of banks, freight forwarders, insurers, carriers, and other companies receiving requests, and the number of transactions in which they comply. And they confirm the central role of these intermediaries in effectuating the Arab boycott.

Mr. President, I cite these figures to prove two points. First, the Arab boycott exists; and second, it is expanding to envelop more trade and more American individuals and firms.

Mr. President, the United States has always stood for international trade unimpeded by artificial barriers which disrupt the open market and interfer with free trade. And unconscionable religious discrimination, integral to the Arab boycott, is repugnant to our ideals as a nation. Neither our citizens nor our Government should tolerate such practices any longer.

In particular, I strongly believe that U.S. businessmen should be protected against harassment and intrusion into their business affairs, and from violation of constitutionally guaranteed freedoms, by foreign governments and members of the Arab League.

New and effective antiboycott legislation is needed to prevent foreign governments from using their economic influence to engage in and coerce others to engage in, restrictive trade practices that violate fundamental rights guaranteed by the Constitution. In addition foreign governments must not be able to interfere with the commercial freedom of U.S. businessmen to do business in any of the world's rapidly expanding and profitable foreign markets.

For too long, the U.S. position on these scores has been too weak. Recognizing this, last year I and many of my colleagues pressed for the enactment of tough antiboycott measures in a variety of areas. More detailed reporting on the boycott requests coupled with mandatory public disclosure of the reporting forms; a statutory ban on compliance with any boycott-related requests; criminal penalties for compliance with the boycott; denial of tax benefits on income derived from operations in boycotting countries; a ban on investments in the United States by foreign persons participating in boycotts—each of these was introduced and considered last session. The only bills enacted were the provisions of the Tax Reform Act and another bill which prohibits certain economic development to aid countries which object to the presence of American officials administering such aid on the basis of race, religion, national origin or sex. However, as in the case of the Tax Reform Act, we have seen the Treasury Department within the last month attempt to deliberately emasculate the new law.

Strong legislation is still needed to prevent U.S. citizens and corporations from participating in the Arab boycott of Israel. Congress would have succeeded in passing such legislation last year except for the administration's unconscionable willingness to exploit the parliamentary situation prevailing at the end of the session.

Prior to the adjournment of the 94th Congress, both the Senate and the House of Representatives had each passed by overwhelming votes—65 to 13 in the Senate; 318 to 63 in the House—legislation to extend the Export Administration Act and strengthen the antiboycott provisions of the act. However, unable to meet in formal conference, Members of the Senate, including myself, met informally with Members of the House to reconcile substantive differences. The result was a blend of the two bills, substantially in the form of the bills being introduced in both the Senate and the House of Repesentatives today.

Given the sentiment of both Houses of Congress, and the statements of the incoming President, this composite bill should be acted upon promptly and favorably.

Mr. President, I request that a brief summary of the antiboycott provisions be printed in the RECORD at this point in my remarks.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF ANTIBOYCOTT PROVISION

A. PROHIBITIONS

Subject to rules and regulations issued by the Secretary of Commerce, it would be a violation of the Export Administration Act for any U.S. person (as defined) to do or agree to do any of the following to comply with, further, or support a foreign boycott or restrictive trade practice against a country which is friendly to the United States and is not the object of any U.S. embargo:

1. Refrain from doing business with any U.S. person or person doing business in the United States.

2. Refrain from employing or otherwise discriminating against persons of a particular race, religion, nationality or national origin.
